International Behavioural and Social Sciences

This collection reprints a selection of classic works from the Tavistock Press social and behavioral sciences series. Many of these works have gone out of print or are difficult to locate, making this set an invaluable resource for academic libraries engaged in collection-building or in search of sturdy, library-bound replacement volumes that will stand up to repeated use. The Tavistock Institute holds a unique place in the development of the social and behavioral sciences. Established in 1947, it has long been a pioneering force in the study of human relations in the context of the family, the work group, and the larger organization, and is famous for seminal work in such key methodologies as group dynamics, action research, and organizational development. Tavistock Press--established in the 1950s as a co-operative venture between the Institute and Routledge & Kegan Paul--produced a series of major contributions across the social sciences. Continuing late into the 1980s, the activities of the Press mirrored those of the Institute. Tavistock Press published numerous groundbreaking works by some of the world's most eminent scholars, including titles by Melanie Klein, Wilfred Bion, D. A. Winnicott, Elliot Jaques, and others. The volumes in this special collection are selected from those areas Tavistock helped to create, as well as the more established fields to which it made significant contributions. Volumes are available individually or as an economically priced set. For volume prices, look up individual titles or ISBNs on the Routledge website, or contact our Library Marketing department at: reference@routledge-ny.com.

Scientific Discovery in the Social Sciences

This volume offers selected papers exploring issues arising from scientific discovery in the social sciences. It features a range of disciplines including behavioural sciences, computer science, finance, and statistics with an emphasis on philosophy. The first of the three parts examines methods of social scientific discovery. Chapters investigate the nature of causal analysis, philosophical issues around scale development in behavioural science research, imagination in social scientific practice, and relationships between paradigms of inquiry and scientific fraud. The next part considers the practice of social science discovery. Chapters discuss the lack of genuine scientific discovery in finance where hypotheses concern the cheapness of securities, the logic of scientific discovery in macroeconomics, and the nature of that what discovery with the Solidarity movement as a case study. The final part covers formalising theories in social science. Chapters analyse the abstract model theory of institutions as a way of representing the structure of scientific theories, the semi-automatic generation of cognitive science theories, and computational process models in the social sciences. The volume offers a unique perspective on scientific discovery in the social sciences. It will engage scholars and students with a multidisciplinary interest in the philosophy of science and social science.

The Tavistock Institute holds a unique place in the development of the social and behavioural sciences. Established in 1947 the focus of the organization has always been on the study of human relations in the context of the family, the work group and the larger organization. Constantly innovative, the Institute has been a pioneer of such key methodologies as group dynamics, action-research and organizational development. Tavistock Press was established as a co-operative venture between the Institute and Routledge & Kegan Paul (RKP) in the 1950's and produced a series of major contributions across the social sciences. Continuing late into the 1980's the activities of the Press mirrored those of the Institute and published ground breaking works by a number of eminent academics including Melanie Klein, Wilfred Bion, DA Winnicott and Elliot Jaques. This collection makes available, in facsimile, a selection of those important works which have since gone out of print, or are difficult to locate. The volumes are available individually and as minisets, structured around those areas Tavistock helped to create, as well as the more established fields to which it made significant contributions.

Fundamentals of Social Sciences and Library Consortia

The present book entitled, "Fundamentals of Social Sciences and Library" is an attempt to bring to gather the fundamental concept of the umbrella term 'Social Science' which normally consist of four basic disciplines namely Political Science, Economics, Sociology and History though at a later stage the multidisciplinary approaches have widened the scope of social science thereby resulted into the inclusion of several disciplines which in one context or the other are directly related to the study of human beings. The present effort intends to study the most significant and important area of study in respect of a social institution known as 'The Library'. Thus, the present work involves selected senior library professionals who not only have adequate background and knowledge of social science disciplines along with sound knowledge of the organization and management of the library. The book is divided into six chapters namely (i) Social Science: An Overview (ii) Political Science (iii) Economics (iv) Sociology (v) History (vi) Consortia and Social Sciences. The book will be useful to the students pursuing the studies in the field of library and information science, teachers involved in teaching the course which involves the teaching of multidisciplinary content especially the social science vis-à-vis libraries as well as by all those who wants to study and do research the role of libraries and their contribution in the growth and development of social science disciplines.

Readings in Social Evolution and Development

Readings in Social Evolution and Development presents a collection of articles on a specialized aspect of sociology, or social psychology. The book starts by describing social change and development and the role of institutionalization, individual behavior, and role performance on such change and development. The text also discusses the basic problems of evolutionary perspective in sociology and studies of development and modernization. The theories of social change, the problem of evolution, and the major trends of change in the contemporary setting, such as changes in the industrial societies and alternative courses of political development in the new states are also encompassed. Sociologists and social psychologists and students taking sociology courses will find the book useful.

Readings in Child Socialization

Readings in Child Socialization is a collection of papers that covers concerns in sociological science, particularly those that involve children. The book presents 14 materials that tackle issues in human society. The text first details the concept of society and socialization, and then proceeds to presenting sociological studies, such as a developmental study of the effects of sex of the dominant parent on sex role preference, identification, and imitation in children; social origins and consequences of elaborated and restricted codes; and sex, age, and state as determinants of mother-infant interaction. The book will be of great interest to researchers and practitioners of sociology and other related disciplines, such as social psychology.

The Social Analysis of Class Structure

This book constitutes the outcome of an international conference held at the Otto-Mobes-Volkswirtschaftsschule, Graz-Stifting(Austria), from June 16 to 22, 1974. The conference was initiated by a project group working on determinants and controls of social science development at the Institute for Advanced Studies and Scientific Research in Vienna and organized by the editors of this volume. It was held under the auspices of the Austrian Ministry of Science and Research. The main topics of the conference were those at the forefront of the 'state of argumentation' (to borrow from one of our contributors) in philosophy and sociology of science ever since the controversy between Thomas S. Kuhn and Sir Karl R. Popper has sharpened our awareness for the methodological and substantial presuppositions involved with questions of growth and development in science. Let us give two examples of those topics. The borderline between sociology of science and philosophy of science has become more and more unclear; while the work of at least some philosophers of science comes to have an empirical flavour, sociologists of science are increasingly apt to include logical and methodological components of the research process as their objects of examination. Papers included in this volume testify to both tendencies.

Social Theory and Economic Change

Focusing on the relationship between culture and human development, this timely book offers an interdisciplinary exploration of key developmental processes. It combines psychological and sociological approaches with cross-cultural research to examine phenomena such as the transfer of culture between generations and the universality of attachment theory. This book will be essential reading for anyone studying or researching in cultural psychology, cross-cultural psychology, acculturation or behavioral development. It will also prove an invaluable source of information for anyone interested in sociology and the social sciences in general.

Value Systems and Social Process

First published in 1952, the International Bibliography of the Social Sciences (anthropology, economics, political science, and sociology) is well established as a major bibliographic reference for students, researchers and librarians in the social sciences worldwide. Key features * Authority: Rigorous standards are applied to make the IBSS the most authoritative selective bibliography ever produced. Articles and books are selected on merit by some of the world's most expert librarians and academics. *Breadth: today the IBSS covers over 2000 journals - more than any other comparable resource. The latest monograph publications are also included. *International Coverage: the IBSS reviews scholarship published in over 30 languages, including publications from Eastern Europe and the developing world. *User friendly organization: all non-English titles are word sections. Extensive author, subject and place name indexes are provided in both English and French. Renowned for its international coverage and rigorous selection procedures, this series provides the most comprehensive and scholarly bibliographic service available in the social sciences. Arranged by topic and indexed by author, subject and place-name, each bibliography lists and annotates the most important works published in its field during the year of 1997, including hard-to-locate journal articles. Each volume also includes a complete list of the periodicals consulted.

Ibss: Sociology: 1998

Readings in the Sociology of Religion is a collection of articles that examines the sociological aspects of religion. The title discusses the contemporary theories, concept, and studies about the sociology of religion. The text first details the concept of sociology of religion, along with the relationship between religion and sociological theory. Next, the selection covers the theoretical development of the sociology of religion and Weber's sociological theory, as well as the modern dilemma of value and belief in the social sciences. The last part tackles the types of research in sociology of religion. The book will be of great interest to sociologists and behavioral scientists. Individuals who have a keen interest in the interaction between religion and society will also benefit from the text.

Readings in the Sociology of Religion

Published in 1998, Sentiments and Activities is a valuable contribution to the field of Sociology and Social Policy.

Sentiments and Activities

A major new online reference work, *Emerging Trends in the Social and Behavioral Sciences: Interdisciplinary Perspectives* contains individual essays from both established scholars and rising stars. Links in each entry direct users to other relevant entries, often in other disciplines and specialties, thereby creating an intelligent multidimensional system of cross-referencing. Thoughtfully constructed with a multidimensional system of cross-referencing, this innovative reference work allows users to consider emerging trends in the social and behavioral sciences from multiple levels of analysis and from different disciplinary perspectives. Focuses on five core social and behavioral science disciplines: anthropology, economics, political science, psychology and sociology - with additional entries in related fields such as education and communications studies. Reviews and summarizes the current state of knowledge on each key topic in the social and behavioral sciences, maps emerging trends, and identifies new, promising lines of research. Editorial Board members and contributors such as Jacquie Eccles, University of Michigan (Psychology); Marlis Buchman, University of Zurich (Sociology); and David Laibson, Harvard (Economics) are recognized globally as experts in their fields. www.wileyonlinelibrary.com/ref/emergingtrends Following initial publication, essays will be updated periodically to reflect new developments and new essays will be added.

Emerging Trends in the Social and Behavioral Sciences

The *Social Sciences Empowered* contains papers presented at the 7th International Congress on Interdisciplinary Behavior and Social Science 2018 (ICIBSoS 2018), held 21-22 July 2018, Bangkok, Thailand, 22-23 September 2018, Bali, Indonesia, 6-7 October 2018, Kuta, Bali, Indonesia, and 24-25 November 2018, Yogyakarta, Indonesia. ICIBSoS 2018 provided the economic and social analysis necessary for addressing issues in Humanities disciplines such as Education, Sociology, Anthropology, Politics, History, Philosophy, Psychology as well as food security. Contributions to these proceedings give necessary insight into the cultural and human dimension of such diverse research areas as transport, climate change, energy and agriculture. ICIBSoS 2018 also analyses the cultural, behavioural, psychological, social and institutional drivers that transform people's behaviour and the global environment. ICIBSoS 2018 proposes new ideas, strategies and governance structures for overcoming the crisis from a global perspective, innovating the public sector and business models, promoting social innovation and fostering creativity in the development of services and product design.

The Social Sciences Empowered

We are living in a digital era in which most of our daily activities take place online. This has created a big data phenomenon that has been subject to scientific research with increasingly available tools and processing power. As a result, a growing number of social science scholars are using computational methods for analyzing social behavior. To further the area, these evolving methods must be made known to sociological research scholars. *Opportunities and Challenges for Computational Social Science Methods* focuses on the implementation of social science methods and the opportunities and challenges of these methods. This book sheds light on the infrastructure that should be built to gain required skillsets, the tools used in computational social sciences, and the methods developed and applied into computational social sciences. Covering topics like computational communication, ecological cognition, and natural language processing, this book is an essential resource for researchers, data scientists, scholars, students, professors, sociologists, and academicians.

Opportunities and Challenges for Computational Social Science Methods

Our lives as human beings are characterized by production and use of social resources, material (e.g., money and physical possessions) as well as immaterial (such as love, knowledge, and power). Distribution and exchange of these resources are central to individuals' physical and mental health and quality of life. Over the past four decades, Social Resource Theory (SRT) has evolved to build vital links between social psychology and public policy, providing a valuable lens for understanding and addressing social class, inequality, and injustice. The recent conceptual and theoretical developments and future prospects of this robust field are on full display in this *Handbook of Social Resource Theory*. An international, interdisciplinary panel of experts expands on the pioneering work of the late Dr. Uriel Foä and his wife Edna Foä, starting with the basic structure of SRT. The Handbook includes integrations of SRT with other social scientific frameworks, analyses of organizational and cultural issues, reports of empirical research using various methods, as well as applications to different areas including: Social justice Quality of life Interpersonal relationships Social dilemmas Stress management

Work satisfaction Cognitive development Consumer behavior Cross-cultural behavior Covering human social transactions from the interpersonal to the intercultural levels, the Handbook of Social Resource Theory extends this relevant line of study to enhance the work of social psychologists, sociologists, anthropologists, political scientists, and public policy makers. "The Handbook presents the basic tenets of the social resource theory originated from the late Uriel Foa and provides an authoritative agenda for the future developments of this theory. Kjell Törnblom and Ali Kazemi have made an excellent job in gathering a global group of contributing scholars representing an outstanding mix of respected and long-standing researchers in social psychology, sociology, psychology, management, economics and marketing, political science, history, and applied ethics/philosophy. This Handbook is an ideal resource for researchers, instructors, and graduate students in all these fields with an interest in social resource theory." Edna B. Foa Professor of Clinical Psychology, University of Pennsylvania "Uriel Foa (1916-1990) developed social resource theory in the 1960s. In the next half century this theory has generated an enormous amount of new data and theory in social, cross-cultural, and educational psychology, as well as in related disciplines. It has inspired work on interpersonal relationships, attributions, the understanding of status, morality, distributive justice, procedural justice, social dilemmas, interpersonal evaluation, biosocial theory, and action construal. Applications in both organizational and educational settings and in marketing studies indicate the theory's relevance for the "real world." This volume edited by Kjell Törnblom and Ali Kazemi is the wonderful Festschrift that Foa did not have, because he died when he was too young by contemporary life expectancy standards. It includes chapters by many of the stars of the fields that social resource theory has influenced." Harry C. Triandis Professor Emeritus, University of Illinois "Forty years ago Edna and Uriel Foa began to spell out the unwritten social rules by which we trade – on a daily basis – friendship, information, respect, gifts, favors and other rewards and punishments. Sociologists, psychologists, economists, and others owe the editors a tremendous debt of gratitude for reminding us of the eloquence and indispensability of the original work on social resource theory and for bringing together a distinguished roster of scholars and scientists to reflect on the theory and to exercise it in the service of addressing an astonishing number and variety of important social and organizational problems." John T. Jost Professor of Psychology and Politics, New York University "What material and symbolic goods count as resources? How do resources relate to power? How can the exchange and distribution of resources be understood in both interpersonal and societal terms? In this outstanding volume, Törnblom and Kazemi bring together a constellation of experts from a variety of disciplines to address questions such as these. Taking as their basis the classic statement by Uriel and Edna Foa of the resource theory of social exchange, the Handbook moves through theoretical to practical analyses and presents both laboratory and field research conducted in a number of different countries. The book makes an excellent contribution to our understanding of social exchange theory in particular and of social relationships in general. The collection is both impressive and important." Faye J Crosby Professor of Psychology, University of California Santa Cruz "A tour de force, this comprehensive volume presents cutting edge insights inspired by Foa and Foa's social resource theory. Törnblom and Kazemi have brought together a stellar cast to address ageless questions about the cornerstones of social life and provide generative roadmaps for future theorizing and research. This volume is a rich resource for scholars as well as students and educated readers who want to know more about the complexities of social life." Linda J. Skitka Professor of Psychology, University of Illinois at Chicago

Today's world is characterized by a set of overarching trends that often come under the rubric of social change. In this innovative volume, Rainer K. Silbereisen and Xinyin Chen bring together, for the first time, international experts in the field to examine how changes in our social world impact on our individual development. Divided into four parts, the book explores the major socio-political and technological changes that have taken place around the world - from post- from the rapid upheavals in 1990s Europe to the gradual changes in parts of East Asia - and explains how these developments interplay with human development across the lifespan. Human Development and Social Change is a useful resource for students and researchers involved in all areas of human development, including developmental psychology, sociology and education.

Social Change and Human Development

The second edition of this guide to basic reference sources in the social sciences contains nearly three times as many entries, - 2,200 - as the earlier edition and also includes several other notable enhancements. In addition to revising and substantially enlarging the chapters on reference sources, Li has further increased the usefulness of this reference volume by adding a chapter on geography and one on business that is distinct from economies. Since the publication of the first edition, there have been two obvious developments in information storage and retrieval: the rapid development of online databases and the development of CD-ROM. Instead of devoting a separate chapter to these developments, the book incorporates online databases, CD-ROM and other forms of data sources into the text. In addition, there is a brief introduction to these developments. Although the general deadline for inclusion in the volume was December 1988, quite a few titles published in 1989 are included.

Structure and Subject Interaction

The established reference work Guide to Reprints has been radically reworked for this edition. Bibliographical data was substantially increased where information was obtainable. In addition, the user-friendliness of Guide to Reprints was raised to the high level of other K.G. Saur directories through author-title cross-references, a subject volume, a person index and a publisher index. In this edition, the directory lists more than 60,000 titles from more than 350 publishers.

Research that has been presented primarily by quantitative research can benefit from the voice of the participants and the added value of the different perspective that qualitative research can provide. The purpose of mixed methods research is to draw from the positive aspects of both research paradigms to better answer the research question. This type of research is often used in schools, businesses, and non-profit organizations as they strive to address and resolve questions that will impact their organizations. Applied Social Science Approaches to Mixed Methods Research is an academic research publication that examines more traditional and common research methods and how they can be complimented through qualitative counterparts. The content within this publication covers an array of topics such as entrepreneurship, social media, and marginalization. It is essential for researchers, academicians, non-profit professionals, business professionals, and higher education faculty, and specifically targets master or doctoral students committed to writing their theses, dissertations, or scholarly articles, who may not have had the benefit of working on a traditional research team.

Guide to Reprints

The most important works published in 1997 in the social science field are listed and compiled in this reference work. Included are foreign titles and periodicals and the compilation also takes in the former London Bibliography of the Social Sciences.
