

Environment And National Security The Case Of South Asia

[#environmental security](#) [#national security South Asia](#) [#climate change impacts](#) [#geopolitical risks](#) [#resource scarcity](#)

Explore the critical interconnections between environmental degradation and national security challenges specifically within the South Asian context. This analysis delves into how factors like climate change, resource scarcity, and ecological shifts exacerbate regional instability, socio-economic pressures, and geopolitical tensions across the subcontinent, posing direct threats to the security of its nations and populations.

The collection includes scientific, economic, and social research papers.

Environmental and Animal Rights Extremism, Terrorism, and National Security

As concerns about human treatment of the environment and animals have increased over the years, so have decentralized and extremist groups related to these causes. Environmental and Animal Rights Extremism, Terrorism, and National Security analyzes the international development of radical movements relating to environmental concerns and animal rights in the context of the threats they pose to national security. In addition to tracing the factors responsible for the rapid growth of these movements over the last 25 years, this text presents countermeasures that governments can deploy to neutralize the risk posed by these threats now and in the future. Bringing to bear new developments such as cyber activity and online activism, Environmental and Animal Rights Extremism, Terrorism, and National Security offers an examination of the direct and indirect violence, lone-wolf terrorism, and leaderless resistance

that have characterized these radical wings from their inception. By not only identifying the tactics and organizational structures often employed by these groups, but also addressing future trends toward increased radicalization, Environmental and Animal Rights Extremism, Terrorism, and National Security is an important resource for identifying, anticipating, and mitigating threats posed by such movements. Describes the psychological, social, and organizational mechanisms responsible for the functioning of the extremist wings of the interconnected environmental and animal rights movements in the context of national security Identifies the main tactical and organizational ways these movements develop, moving from hierarchical organization to network structures, leaderless resistance, and lone-wolf activities Covers radical environmental and animal rights groups, including Earth First!, Animal Liberation Front, Earth Liberation Front, Animal Rights Militia, and the Sea Shepherd Conservation Society Looks to future trends in radicalization of these movements

Prevent strategy

The Prevent strategy, launched in 2007 seeks to stop people becoming terrorists or supporting terrorism both in the UK and overseas. It is the preventative strand of the government's counter-terrorism strategy, CONTEST. Over the past few years Prevent has not been fully effective and it needs to change. This review evaluates work to date and sets out how Prevent will be implemented in the future. Specifically Prevent will aim to: respond to the ideological challenge of terrorism and the threat we face from those who promote it; prevent people from being drawn into terrorism and ensure that they are given appropriate advice and support; and work with sectors and institutions where there are risks of radicalization which need to be addressed

Eco-terrorism Specifically Examining the Earth Liberation Front and the Animal Liberation Front

The Code of Federal Regulations is a codification of the general and permanent rules published in the Federal Register by the Executive departments and agencies of the United States Federal Government.

Understanding Lone Actor Terrorism

This volume examines the lone actor terrorist phenomenon, including the larger societal trends which may or may not have led to their acts of terrorism. With lone actor terrorism becoming an increasingly common threat, the contributors to this volume aim to answer the following questions: What drives the actions of individuals who become lone actor terrorists? Are ideological and cultural issues key factors, or are personal psychological motives more useful in assessing the threat? Do lone actors evolve in a broader social context or are they primarily fixated loners? What response strategies are available to security services and law enforcement? What is the future outlook for this particular terrorist threat? Although these issues are frequently discussed, few books have taken a global perspective as their primary focus. While many books focus on lone actor terrorists in relation to terrorist groups, such as Al-Qaida and the Islamic State, few, if any, cover lone actors of all ideological backgrounds, including the variants of active shooters and malicious insiders in information security, such as Edward Snowden – with both of these latter categories constituting an important variant of lone actors. Utilising the expertise of academics and practitioners, the volume offers a valuable multidisciplinary perspective. This book will be of much interest to students of terrorism and counter-terrorism, political violence, criminology, security studies and IR.

Encyclopedia of Terrorism, Third Edition

The ongoing conflicts in the Middle East and the bombings overseas have shown that—despite the "War on Terror"—terrorism is still very much a part of daily life for many individuals. Encyclopedia of Terrorism, Third Edition provides students, researchers, journalists, and policymakers with a complete survey of what seems to be an intractable problem. More than 330 entries organized in an easily accessible, A-to-Z format offer comprehensive treatments of the events, people, organizations, and places that have played a major role in international terrorism. Each entry is placed within its appropriate historical context to help readers understand the wide-ranging motivations behind terrorist actions. New and updated entries include: Islamic State mass shootings narco-terrorism Paris attacks Pulse nightclub terrorist attack right-wing terrorism San Bernardino attacks school site analysis siege of the U.S. Capitol Special Projects Team-Special Air Service (SAS) state-sponsored terrorism white supremacist groups

Emergencies and Public Health Crisis Management- Current Perspectives on Risks and Multiagency Collaboration

The successful management of emergencies and public health crises depends on adequate measures being implemented at all levels of the emergency chain of action, from policy makers to the general population. It starts with appropriate risk assessment, prevention, and mitigation and continues to prehospital and hospital care, recovery, and evaluation. All levels of action require well-thought out emergency management plans and routines based on established command and control, identified safety issues, functional communication, well-documented triage and treatment policies, and available logistics. All these characteristics are capabilities that should be developed and trained, particularly when diverse agencies are involved. In addition to institutional responses, a robust, community-based disaster response system can effectively mitigate and respond to all emergencies. A well-balanced response is largely dependent on local resources and regional responding agencies that all too often train and operate within “silos”, with an absence of interagency cooperation. The importance of this book issue is its commitment to all parts of emergency and public health crisis management from a multiagency perspective. It aims to discuss lessons learned and emerging risks, introduce new ideas about flexible surge capacity, and show the way it can practice multiagency collaboration.

The Palgrave Handbook of Left-Wing Extremism, Volume 2

This handbook provides a broad overview of left-wing extremism and its associated key issues and themes. It breaks new ground by assembling a comparative analysis of the phenomenon that is both multidimensional and multidisciplinary. Gathering a wide range of influential scholars who have worked at length in the field of extremism studies from different perspectives, backgrounds, and geographical settings, the Palgrave Handbook of Left-Wing Extremism presents an array of thought-provoking and innovative as well as informative analyses and discussions – both historical and contemporary - about the phenomenon of left-wing extremism and of how researchers conceive of and approach it in their study. The Handbook is designed to be, for the foreseeable future, the reference work for all students, researchers, and general readers interested in achieving a comprehensive understanding of left-wing extremism in all its manifestations, subtleties, and dynamics, and both its current and its potential directions.

Routledge Handbook of Non-Violent Extremism

This Handbook provides the first in-depth analysis of non-violent extremism across different ideologies and geographic centres, a topic overshadowed until now by the political and academic focus on violent and jihadi extremism in the Global North. Whilst acknowledging the potentiality of non-violent extremism as a precursor to terrorism, this Handbook argues that non-violent extremism ought to be considered a stand-alone area of study. Focusing on Islamist, Buddhist, Hindu, far-right, far-left, environmentalist and feminist manifestations, the Handbook discusses the ideological foundation of their ‘war on ideas’ against the prevailing socio-political and cultural systems in which they operate, and provides an empirical examination of their main claims and perspectives. This is supplemented by a truly global overview of non-violent extremist groups not only in Europe and the United States, but also in Africa, Asia, Oceania and the Middle East. The Handbook thus answers a call to decolonise knowledge that is especially prescient given both the complicity of non-violent extremists with authoritarian states and the dynamic of oppression towards more progressive groups in the Global South. The Handbook will appeal to those studying extremism, radicalisation and terrorism. It intersects several relevant disciplines, including social movement studies, political science, criminology, Islamic studies and anthropology.

Animal Welfare in Australia

The issue of animal welfare has attracted much attention in Australia in recent decades. Activists and welfare organisations have become increasingly vigorous in promoting a new ethical relationship between humans and animals, and in challenging practices they identify as inhumane. In 2011 this agitation culminated in the temporary suspension of cattle live exports, with significant economic and political implications for Australia. Similar campaigns have focused on domestic food production systems and the use of animals in entertainment. Yet despite this increased interest, the policy process remains poorly understood. *Animal Welfare in Australia* is the first Australian book to examine the topic in a systematic manner. Without taking a specific ethical position, Chen draws on a wide range of sources – including activists, industry representatives and policy makers – to explain how policy is made and implemented. He explores the history of animal welfare in Australia, examines public opinion and

media coverage of key issues, and comprehensively maps the policy domain. He shows how diverse social, ethical and economic interests interact to produce a complex and unpredictable climate. *Animal Welfare in Australia* will be of interest to scholars and practitioners of public policy, those interested in issues of animal welfare, and anyone wishing to understand how competing interests interact in the contemporary Australian policy landscape.

Radical Environmental Resistance

Exploring the role of direct action within times of severe social and ecological upheaval, this book evokes the rich, diverse world that radical environmental activists and indigenous environmental protectors are fighting for.

Historical Dictionary of Environmentalism

The *Historical Dictionary of Environmentalism* strategically skips across issues, concepts, time, organizations, and cultures, not with any pretense of producing a definitive dictionary but rather with the aim of producing an inclusive, wide-ranging, and global history of environmentalism. This is done through a chronology, a list of acronyms and abbreviations, an introductory essay, and over 300 cross-referenced dictionary entries.

Intervention or Protest

Within current political, social, and ethical debates – both in academia and society – activism and how individuals should approach issues facing nonhuman animals, have become increasingly important, 'hot' issues. Individuals, groups, advocacy agencies, and governments have all espoused competing ideas for how we should approach nonhuman use and exploitation. Ought we proceed through liberation? Abolition? Segregation? Integration? As nonhuman liberation, welfare, and rights' groups increasingly interconnect and identify with other 'social justice movements', resolutions to these questions have become increasingly entangled with questions of what justice and our ethical commitments demand on this issue, and the topic has become increasingly significant and divisive. The book considers how this question, and contemporary issues facing nonhumans (such as experimentation, hunting, and factory farming) should be answered by drawing on both theory and practice in order to provide grounded, yet actionable, ways forward. Indicatively, the book covers topics such as: • The intersection between nonhuman ethics and the ethics of war and self-defence • Nonhuman animals as political subjects and acting agents • Whether we should intervene for nonhuman animals in cases of natural disaster • Various explorations of why the nonhuman movement may not be succeeding as well as it could be • Comparisons between the nonhuman movement and other social movement • Arguments for and against intervening to help or save nonhumans, and how far we may go • What intervention could ultimately mean for nonhumans The book is therefore intended not only to provide new and interesting insight into the area and important contemporary discussions, but also to constructively aid the nonhuman movement and unite theory and practice on the crucial issues. With the nonhuman movement and its past approaches currently being questioned as a success, more nonhumans than ever being harmed and exploited, and a growing gulf between activists and scholars, this book will not only be a timely addition to the literature, but an attempt to bridge these gaps and move both theory and practice – and thus the movement and field – forward.

Armed groups: Studies in National Security, Counterterrorism, and Counterinsurgency

Product Description: Discussion of armed groups which are considered to include classic insurgents, terrorists, guerrillas, militias, police agencies, criminal organizations, war-lords, privatized military organizations, mercenaries, pirates, drug cartels, apocalyptic religious extremists, orchestrated rioters and mobs, and tribal factions. To study armed groups use of history, political science, anthropology, sociology, theology, and economics are traditional areas of research. The book also delves into matters of ethics, technology, intelligence, education, the law, diplomacy, military science, and even mythology. The book is divided into five sections: History and armed groups, Present context and environment, Religion and inspiration, thinking differently about armed groups, the shape of things to come.

Global Environmental Politics

Global Environmental Politics provides a fully up to date and comprehensive introduction to the most important issues dominating this fast moving field. Going beyond the issue of climate change, the

textbook also introduces students to the pressing issues of desertification, trade in hazardous waste, biodiversity protection, whaling, acid rain, ozone-depletion, water consumption, and over-fishing. . Importantly, the authors pay particular attention to the interactions between environmental politics and other governance issues, such as gender, trade, development, health, agriculture, and security.

Green Is the New Red

An insider tells how environmentalists and animal rights activists have become "the number one domestic terrorism threat."

Homegrown Hate

"A history and guide to countering domestic terrorism in the United States. Who are the American citizens--White nationalists and militant Islamists--perpetrating acts of terrorism against their own country? What are their grievances and why do they hate? How can this transnational peril be effectively addressed? Homegrown Hate ... directly compares White nationalists and militant Islamists in the United States. In this timely book, scholar and holistic justice activist Sara Kamali examines these Americans' self-described beliefs, grievances, and rationales for violence, and details their organizational structures within a transnational context. She presents compelling insight into the most pressing threat to homeland security not only in the United States, but in nations across the globe: citizens who are targeting their homeland according to their respective narratives of victimhood. She also explains the hate behind the headlines and provides the tools to counter this hate from within, cogently offering hope in uncertain and divisive times." -- \$c From dust jacket.

Counterterrorism and Investigative Detention

Counterterrorism and Investigative Detention explores the practice of investigative detention of terrorist suspects in the legal systems of the United States, the United Kingdom, and France. In addition to illuminating the characteristics, capabilities, and limitations of various investigative detention regimes, this book examines ways in which international law and national security imperatives have served as vectors for change and convergence in these otherwise divergent legal systems.

Sonic Wilderness: Wild Vinyl Records

Sonic Wilderness accesses the critical value of unusual vinyl records that concern our relationship with nature. These wild records reveal unconventional perspectives on the entanglements of human life with animals, gardens and plants. They form a lyrical unconscious exposing the conventions and ideologies of popular music, their warped perspectives and acoustic radioactivity comprising a resistance to enduring social, psychological and political conditions.

Psychology of Terrorism

In compiling this annotated bibliography on the psychology of terrorism, the author has defined terrorism as "acts of violence intentionally perpetrated on civilian noncombatants with the goal of furthering some ideological, religious or political objective." The principal focus is on nonstate actors. The task was to identify and analyze the scientific and professional social science literature pertaining to the psychological and/or behavioral dimensions of terrorist behavior (not on victimization or effects). The objectives were to explore what questions pertaining to terrorist groups and behavior had been asked by social science researchers; to identify the main findings from that research; and attempt to distill and summarize them within a framework of operationally relevant questions. To identify the relevant social science literature, the author began by searching a series of major academic databases using a systematic, iterative keyword strategy, mapping, where possible, onto existing subject headings. The focus was on locating professional social science literature published in major books or in peer-reviewed journals. Searches were conducted of the following databases October 2003: Sociofile/Sociological Abstracts, Criminal Justice Abstracts (CJ Abstracts), Criminal Justice Periodical Index (CJPI), National Criminal Justice Reference Service Abstracts (NCJRS), PsycInfo, Medline, and Public Affairs Information Service (PAIS). Three types of annotations were provided for works in this bibliography: Author's Abstract -- this is the abstract of the work as provided (and often published) by the author; Editor's Annotation -- this is an annotation written by the editor of this bibliography; and Key Quote Summary -- this is an annotation composed of "key quotes" from the original work, edited to provide a cogent overview of its main points.

Current and Projected National Security Threats to the United States

In 2006 the Animal Enterprise Terrorism Act (AETA) was passed with the intention to equip law enforcement agencies with the tools to apprehend, prosecute, and convict individuals who commit "animal enterprise terror." But, as many have come to realize, this act does not concretely define what is meant by that phrase, leading to the interpretation that anyone interfering with a company's ability to make a profit from the exploitation of animals can be considered a terrorist. In this unprecedented and timely collection, some of the most influential voices in the world of law and animal rights examine the legalities of the AETA, highlight its repressive nature and the collusion between private interests and political legislation, and provide theoretical frameworks for understanding a variety of related issues. In a series of interviews, the book also gives animal advocates who have been convicted or directly affected by the AETA, including members of the AETA 4 and SHAC 7, an opportunity to speak for themselves. Ultimately, these writers show that the AETA is less about fighting terrorism and more about safeguarding corporate profit, and that it should be analyzed and resisted by everyone who believes in a better world. Featuring: Piers Beirne, Sarahjane Blum, Heidi Boghosian, Walter Bond, Joseph Buddenberg, Sarat Colling, Kimberly E. McCoy, Jason Del Gandio, Scott DeMuth, Carol L. Glasser, Jennifer D. Grubbs, Josh Harper, Stephanie Jenkins, Jay Johnson, Eric Jonas, Michael Loadenthal, Dara Lovitz, Lillian M. McCartin, Anthony J. Nocella II, David Naguib Pellow, Will Potter, Dylan Powell, Ryan Shapiro, Wesley Shirley, John Sorenson, Vasile Stanescu, Brad J. Thomson, and Aaron Zellhoefer

Protecting National Security and Civil Liberties

To all of these animals we owe respect for their basic inviolable rights.

Building Resilience Against Terrorism

"The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

The Terrorization of Dissent

This is a print on demand edition of a hard to find publication. Examines terrorists' involvement in a variety of crimes ranging from motor vehicle violations, immigration fraud, and mfg. illegal firearms to counterfeiting, armed bank robbery, and smuggling weapons of mass destruction. There are 3 parts: (1) Compares the criminality of internat. jihad groups with domestic right-wing groups. (2) Six case studies of crimes includes trial transcripts, official reports, previous scholarship, and interviews with law enforce. officials and former terrorists are used to explore skills that made crimes possible; or events and lack of skill that the prevented crimes. Includes brief bio. of the terrorists along with descriptions of their org., strategies, and plots. (3) Analysis of the themes in closing arguments of the transcripts in Part 2. Illus.

Compilation of Hearings on Islamist Radicalization

Rethinking Society in the 21st Century is a critical collection of readings that provides students with a foundational knowledge base in sociology. The fourth edition has been thoroughly updated to include significant Canadian content, with a greater focus on indigeneity, gender, and sexuality and a new section dedicated to social movements, social change, and emerging fields. This anthology introduces students to the fundamental elements of sociology with a balance of classical theory—Marx, Weber, Durkheim, Mills—and more contemporary approaches found in the works of Michel Foucault and Dorothy Smith. Building on this theoretical grounding, the text outlines core concepts in sociology as well as major social institutions such as families, the economy and labour, education, health care, and media. Covering a wide breadth of topics, including chapters on animals, the environment,

crime, trans issues, class, ethnicity, and race, this new edition explores critical debates in Canadian society with an emphasis on intersectional approaches to social inequalities. This volume is rich with pedagogical features that promote critical understanding, including detailed introductions that speak to the contextual history of the source material and discussion questions for each section. Uniquely designed for introductory courses, *Rethinking Society in the 21st Century* is the ideal reader for Canadian students of sociology.

Zoopolis

This compendium of information on terrorist groups, violent international criminal gangs, and other extremist groups that have been or are currently operating is intended for use as a reference guide and research tool for academics, students, government officials, security personnel, military personnel, law enforcement personnel, and the public. The publication also lists and describes political organizations and religious or ethnic factions that espouse violence or display the threat of violence in their philosophical or operational standards. The information was collected from a broad range of sources, including interviews with, law enforcement and military practitioners, researchers and academics, and government officials. The organizations are listed geographically by continent and country. The listing for each organization covers its stated aims, ideology, or policy; areas of operation, numbers of active members, numbers of supporters, structure, headquarters, leaders' names, funding sources, types of activities, publications, network contacts, significant actions and activities, and trends.

Global Trends 2040

The emphasis of counterterrorism policy in the United States since Al Qaeda's attacks of September 11, 2001 (9/11) has been on jihadist terrorism. However, in the last decade, domestic terrorists—people who commit crimes within the homeland and draw inspiration from U.S.-based extremist ideologies and movements—have killed American citizens and damaged property across the country. Not all of these criminals have been prosecuted under terrorism statutes. This latter point is not meant to imply that domestic terrorists should be taken any less seriously than other terrorists.

Eco-terrorism Specifically Examining Stop Huntingdon Animal Cruelty (SHAC)

"Is terrorism crime or war? Can there be a 'war against terrorism'? In this fully updated edition, Charles Townshend unravels the questions at the heart of the problem of terrorism - its causes, methods, effects, and limitations - suggesting that it must be understood as a political strategy whose threat can be rationally grasped and answered"--Publisher's description.

Crimes Committed by Terrorist Groups

The great struggles of the twentieth century between liberty and totalitarianism ended with a decisive victory for the forces of freedom and a single sustainable model for national success: freedom, democracy, and free enterprise. In the twenty-first century, only nations that share a commitment to protecting basic human rights and guaranteeing political and economic freedom will be able to unleash the potential of their people and assure their future prosperity. People everywhere want to be able to speak freely; choose who will govern them; worship as they please; educate their children male and female; own property; and enjoy the benefits of their labor. These values of freedom are right and true for every person, in every society and the duty of protecting these values against their enemies is the common calling of freedom-loving people across the globe and across the ages. Today, the United States enjoys a position of unparalleled military strength and great economic and political influence. In keeping with our heritage and principles, we do not use our strength to press for unilateral advantage. We seek instead to create a balance of power that favors human freedom: conditions in which all nations and all societies can choose for themselves the rewards and challenges of political and economic liberty. In a world that is safe, people will be able to make their own lives better. We will defend the peace by fighting terrorists and tyrants. We will preserve the peace by building good relations among the great powers. We will extend the peace by encouraging free and open societies on every continent. Defending our Nation against its enemies is the first and fundamental commitment of the Federal Government. Today, that task has changed dramatically. Enemies in the past needed great armies and great industrial capabilities to endanger America.

A Ticking Time Bomb

Rethinking Society in the 21st Century, Fourth Edition

Terrorism and Homeland Security: An Introduction with Applications provides a comprehensive introduction to the problem of terrorism and to its solution, Homeland Security. In addition to its extensive treatment of terrorism, the book describes public and private sector counterterrorism as well as all hazards emergency management. It presents national, state, and local perspectives and up-to-date information, including the reorganization of the Department of Homeland Security, the renewed Patriot Act, and intelligence reform. This book covers a wide range of issues, including such topics as the effectiveness of terrorism; weapons of mass destruction; privatization of counterterrorism; and wars of globalization. Learning objectives and key terms outline chapter content and highlight important topics. Scenarios are placed at the beginning of each chapter to explain concepts and relate theory to practice. The book includes Reality Check sections and critical thinking boxes to help the reader to formulate alternative perspectives on issues and events in order to seek creative and improved solutions to problems. At the end of each chapter are discussion questions that reinforce content and provide an opportunity for the reader to review, synthesize, and debate the key issues; applications that use assessment center and red team techniques to help the student develop analytical and decision-making skills in the context of understanding the mindset and planning processes of terrorist; and web links that provide direction for additional resources, information, and research. This book's primary market are students attending community college homeland security programs, as well as state, federal, and private security training programs. Its secondary market are professionals of the Department of Homeland Security and security professionals belonging to ASIS. Learning objectives and key terms outline chapter content and highlight important topics. Scenarios are placed at the beginning of each chapter to explain concepts and relate theory to practice. "Reality Check" sections and critical thinking boxes help the reader to formulate alternative perspectives on issues and events in order to seek creative and improved solutions to problems. Discussion questions at the end of each chapter reinforce content and provide an opportunity for the reader to review, synthesize, and debate the key issues. Web links at the end of each chapter provide direction for additional resources, information, and research.

Extremist Groups

A serious look at the enemies we face in the twenty-first...

The Domestic Terrorist Threat

This book is the complete guide to understanding the structure of homeland security – its underlying law and policy. Created from a broad and in depth, yet edited collection of statutes, policy papers, presidential directives, and other documents, it cultivates a detailed understanding of the foundations of homeland security. It is arranged in a topic-by-topic format structured to include only the documents and statutes that affect a particular subject, making for much easier understanding. Thus, the chapter on FEMA contains only the portions of the statutes and other documents that relate to FEMA. There are twenty-five topic areas. It contains hundreds of end notes, references, and suggestions for further study. This book offers important legal guidance that students, law enforcement officers, lawyers, and other homeland security professionals need to accurately interpret, understand, and apply homeland security policy. The Introduction provides an in-depth overview of the subject of homeland security and includes a discussion of what is homeland security, definitions of homeland security and terrorism, what is homeland security law, its development, and what is a homeland security curriculum. There are contributing chapters about homeland security in Europe, and homeland security in China and Japan.

Terrorism

Foundations of Homeland Security and Emergency Management Complete guide to understanding homeland security law The newly revised and updated Third Edition of Foundations of Homeland Security and Emergency Management enables readers to develop a conceptual understanding of the legal foundations of homeland security and emergency management (HSEM) by presenting the primary source law and policy documents we have established to address "all hazards," both terrorism and natural disasters. The book demonstrates that HSEM involves many specialties and that it must be viewed expansively and in the long-term. The Third Edition has more sources than previous editions and is streamlined with fewer long quotations. It highlights only those portions of the various documents and statutes necessary to provide the reader an understanding of what the law is designed to accomplish.

Foundations of Homeland Security and Emergency Management includes information on: WMD, now expanded to include Pandemic Laws Political extremism, domestic threats, Posse Comitatus Act, and Insurrection Act Space Law, comparative Drone Law with Japan, HSEM in Puerto Rico Homeland Security Legal Architecture before 9/11 Ethical, Legal, and Social Issues in Homeland Security Critical Infrastructure Protection, Resiliency, and Culture of Preparedness With its accessible format, plethora of primary source documentation, and comprehensive coverage of the subject, this book is an essential resource for professionals and advanced students in law enforcement, national and homeland security, emergency management, intelligence, and critical infrastructure protection.

The National Security Strategy of the United States of America

Countering violent extremism consists of various prevention and intervention approaches to increase the resilience of communities and individuals to radicalization toward violent extremism, to provide nonviolent avenues for expressing grievances, and to educate communities about the threat of recruitment and radicalization to violence. To explore the application of health approaches in community-level strategies to countering violent extremism and radicalization, the National Academies of Sciences, Engineering, and Medicine held a public workshop in September 2016. Participants explored the evolving threat of violent extremism and radicalization within communities across America, traditional versus health-centered approaches to countering violent extremism and radicalization, and opportunities for cross-sector and interdisciplinary collaboration and learning among domestic and international stakeholders and organizations. This publication summarizes the presentations and discussions from the workshop.

National Security Law, Seventh Edition, and Counterterrorism Law, Fourth Edition, 2023-2024 Supplement

Terrorism and Homeland Security
