

The Nature Nurture Debate Bridging The Gap

[#nature nurture debate](#) [#human development](#) [#genetics vs environment](#) [#psychology concepts](#) [#biological social influences](#)

Explore the enduring nature vs. nurture debate, a fundamental discussion in psychology and human development that seeks to understand the interplay between genetic predispositions and environmental factors. This piece aims to bridge the traditional divide, advocating for a holistic perspective that integrates both powerful influences on who we become.

Types of Questions

Nature is the view that behaviour is the product of innate biological or genetic factors.

Nature is the view that behaviour is the product of innate biological or genetic factors, and nurture is the view that behaviour is the product

PLAN

Research examining neural plasticity in the topic biopsychology surpests that life experiences nurture shape our biology (nature). For example, Maguire et al. (2000) investigated the hippocampi volume of London taxi drivers brains. She found that this region of the brain was larger in taxi drivers in comparison to non taxi drivers.
