BETTER EYESIGHT

Ancient authors debated proper verbal and non-verbal signs as representations of divinity. These understanding of signs were based on ideas drawn from language and thus limited due to a their partial understanding of the multi-functionality of signs. Charles S. Peirce's semiotics, as adapted by anthropological linguists including Michael Silverstein, better explains the contextual linkages ("performativity") of ancient religious signs such as divine names. Sign meaning is always dependent on processes of interpretation and is always open to reinterpretation. Focusing on these processes permits a more detailed analysis of the ancient evidence. Examples are drawn from ancient Israelite verbal and non-verbal divine representation, the apostle Paul's linguistic letter/spirit model, Christian debates about the limits of language to best represent the deity, Josephus' aniconic advertisement of Jewish rites, the multi-layered divine representations in the Dura-Europos synagogue, the diverse "performativity" of Jewish ascent liturgies, and—the single modern example—the role of art at Burning Man. Divine representation is the basis for ritual efficacy even as sign meaning is a constant source of contention.

A village story for village maidens. Susan, Esther, and Dorothy; or, The three starts in life

Esther is the most visual book of the Hebrew Bible and largely crafted in the Fourth Century BCE by an author who was clearly au fait with the rarefied world of the Achaemenid court. It therefore provides an unusual melange of information which can enlighten scholars of Ancient Iranian Studies whilst offering Biblical scholars access into the Persian world from which the text emerged. In this book, Lloyd Llewellyn-Jones unlocks the text of Esther by reading it against the rich iconographic world of ancient Persia and of the Near East. Ancient Persia and the Book of Esther is a cultural and iconographic exploration of an important, but often undervalued, biblical book, and Llewellyn-Jones presents the book of Esther as a rich source for the study of life and thought in the Persian Empire. The author reveals answers to important questions, such as the role of the King's courtiers in influencing policy, the way concubines at court were recruited, the structure of the harem in shifting the power of royal women, the function of feasting and drinking in the articulation of courtly power, and the meaning of gift-giving and patronage at the Achaemenid court.

Acts of Interpretation

The series Studies and Texts in Scepticism contains monographs, translations, and collected essays exploring scepticism in its dual manifestation as a purely philosophical tradition and as a set of sceptical strategies, concepts, and attitudes in the cultural field - especially in religions, perhaps most notably in Judaism. In such cultural contexts scepticism manifests as a critical attitude towards different dimensions and systems of secular or revealed knowledge and towards religious and political authorities. It is not merely an intellectual or theoretical worldview, but a critical form of life that expresses itself in such diverse phenomena as religion, literature, and society. Further book series of the Maimonides Centre for Advanced Studies are Jewish Thought, Philosophy, and Religion and the Yearbook of the Maimonides Centre for Advances Studies.

Dans Esther Tellermann: Énigme, prière, identité, première monographie consacrée à l'œuvre de l'écrivain, Aaron Prevots met en lumière un regard poétique novateur sur des réalités tant intérieures qu'extérieures. Il montre comment Tellermann (1947-) explore l'intime du monde, ses textures et ses contours, ses terres insituables semblant s'entrecroiser, et le rêve et le mythe faits tremplin pour une traversée renouvelée de l'Histoire et du deuil. Il appréhende le caractère énigmatique de longues suites de chants dont la forme peut s'apparenter à celle de la prière, ainsi que les enjeux identitaires d'un dire singulièrement ouvert à l'Autre. En examinant des textes de 1999-2019, Aaron Prevots souligne le lyrisme décentré d'un poète majeur et la présence de ses pairs comme interlocuteurs. In Esther Tellermann: Enigma, Prayer, Identity, the first book-length study of the writer's œuvre, Aaron Prevots highlights her innovative poetic approach to inner and outer realities. He shows how Tellermann (1947-) explores the world's innermost structures, its textures and contours, its indeterminate places that seemingly intersect, and dreams and myth as springboards for experiencing anew historical turning points and timeless rites of mourning. He considers the enigmatic quality of long suites of poetic song whose form can resemble that of prayer, as well as the stakes regarding identity when poetic expression foregrounds openness to the Other. In examining texts from 1999-2019, Aaron Prevots emphasizes this major poet's decentered lyricism and the presence of fellow writers as interlocutors.

This volume sets out to re-examine what ancient people - primarily those in ancient Greek and Roman communities, but also Mesopotamian and Chinese cultures - thought they were doing through divination, and what this can tell us about the religions and cultures in which divination was practised. The chapters, authored by a range of established experts and upcoming early-career scholars, engage with four shared questions: What kinds of gods do ancient forms of divination presuppose? What beliefs, anxieties, and hopes did divination seek to address? What were the limits of human 'control' of divination? What kinds of human-divine relationships did divination create/sustain? The volume as a whole seeks to move beyond functionalist approaches to divination in order to identify and elucidate previously understudied aspects of ancient divinatory experience and practice. Special attention is paid to the experiences of non-elites, the perception of divine presence, the ways in which divinatory techniques could surprise their users by yielding unexpected or unwanted results, the difficulties of interpretation with which divinatory experts were thought to contend, and the possibility that divination could not just ease, but also exacerbate, anxiety in practitioners and consultants.
