Network Maintenance and Troubleshooting Guide

Today's rapidly changing technology offers increasingly complex challenges to the network administrator, MIS director and others who are responsible for the overall health of the network. This Network Maintenance and Troubleshooting Guide picks up where other network manuals and texts leave off. It addresses the areas of how to anticipate and prevent problems, how to solve problems, how to operate a healthy network and how to troubleshoot. Network Maintenance and Troubleshooting Guide also provides basic technical and troubleshooting information about cable testing, Ethernet and Token Ring networks and additional information about Novell's IPX(R) protocol and TCP/IP. Examples are shown as either diagrams and tables, or screen captures from Fluke instruments. Network professionals will appreciate the guide's "real world" orientation toward solving network crises quickly, by guiding readers to solutions for restoration of end to end data delivery as quickly as possible. The network novice will learn from the simplified descriptions about networking technology in the Appendices.

ATI TEAS 6 Subject Test Mathematics: Student Practice Workbook + Two Realistic ATI TEAS Math Tests Paperback

During the tail end of the Vietnam War, the US Army Europe, faced with a large drug problem among soldiers stationed in Germany, opens the Freedom House, a drug and alcohol rehabilitation center. A group of unforgettable characters are chosen to administer an unorthodox program laced with Zen Buddhism, Taoism and an enigmatic teacher, Duane Baldini, an ex-Marine. Duane brings Christopher Bold on board, a confused college graduate who is trying to find his own way against the legacy and the background of the turbulent and revolutionary period of the late sixties. Christopher is confronted by the universal struggle with dualities--the mind vs. the body, the head vs. the heart, "them" vs. "us" in his attempt to find the road to himself. He also is confronted by First Sgt. Ron Slade, a career Army man, whose "real" world experience clashes with the "new age" teaching and antics of both Duane and Christopher. The result is a story that is funny, poignant, and fascinating in its portrayal of a young man on a journey to find himself against the tragedy of war, strife, a torn nation and the comedy of a M.A.S.H.-like military environment.

"This Guide presents comprehensive, step-by-step guidance on assessing hazardous materials emergency response needs at state, regional, and local levels; matching state, regional, and local capabilities with potential emergencies involving different types of hazardous materials; and assessing how quickly resources can be brought to bear in an emergency. The methodology described in the Guide is designed to be scalable, allowing the implementation results to be aggregated at the local level up through regional, state, and national levels. Also, the Guide is designed to connect as many components as possible to already-established standards, guidelines, regulations, and laws, so that the Guide will remain current as these underlying components are updated. In addition, the Guide discusses appropriate means for maintaining currency of the information over time. The Guide and accompanying spreadsheet tool (on the attached CD-ROM), which leads planners through the assessment process, will be most useful for local jurisdictions that have limited resources and expertise in hazardous materials emergency response planning."--Publisher's description.

Although Lawrence Kohlberg provided major ideas for psychological research in morality for decades, today some critics regard his work as outmoded, beyond repair, and too faulty for anybody to take seriously. These critics suggest that research would advance more profitably by taking a different approach. Postconventional Moral Thinking acknowledges particular philosophical and psychological problems with Kohlberg's theory and methodology, and proposes a reformulation called "Neo-Kohlbergian." Hundreds of researchers have reported a large body of findings after having employed Kohlberg's theory and methods to the Defining Issues Test (DIT), therefore attesting to the relevance of his ideas. This book provides a coherent theoretical overview for hundreds of studies that have used the DIT. The authors propose reformulations in the underlying psychological and philosophical theories. This book pulls together the analysis of criticisms of a Kohlbergian approach, a rationale for DIT research, and new theoretical ideas and new research.

Bilingualism Through Schooling is a comprehensive survey of bilingual education. It shows how bilingual schooling can have a double impact by providing students with functional second-language competence, and also contributing to their deeper understanding of culture and history. Concerned with both ethnolinguistic minority children and majority, English-speaking pupils, the book approaches bilingualism from a variety of perspectives--linguistic, psychological, and socio-cultural. Among the many topics discussed are: goals and consequences of bilingualism, sociolinguistic contexts, language attitudes, and proficiency assessment. Ramirez explores the various types of programs and techniques used to facilitate second-language acquisition and also provides guidelines for the preparation and certification of bilingual instructors. Bibliographies are included.

Mrs. Louise Mallard, afflicted with a heart condition, reflects on the death of her husband from the safety of her locked room. Originally published in Vogue magazine, "The Story of an Hour" was retitled as "The Dream of an Hour," when it was published amid much controversy under its new title a year later in St. Louis Life. "The Story of an Hour" was adapted to film in The Joy That Kills by director Tina Rathbone, which was part of a PBS anthology called American Playhouse. Time to Talk provides a powerful and accessible resource for practitioners to help develop their own skills, as well as supporting a whole-school or setting approach to speaking and listening. Written by the government's former Communication Champion for children, it showcases and celebrates effective approaches in schools and settings across the country. Jean Gross helpfully summarises research on what helps children and young people develop good language and communication skills, and highlights the importance of key factors: a place to talk, a reason to talk and support for talk. This practical and engaging book also provides: whole-class approaches to developing all children and young people's speaking and listening skills; 'catch-up' strategies for those with limited language ways in which settings and schools can develop an effective partnership with specialists, such as speech and language therapists, to help children with more severe needs; examples of good practice in supporting parents/carers to develop their children's language skills; answers to practitioners' most frequently asked questions about speech and language. This book is for all school leaders, teachers and Early Years practitioners concerned about the growing number of children and young people with limited language and communication skills.
