End of the Line

"Veteran telcom journalist Leslie Cauley pursued the story for over a decade and witnessed the entire debacle. Cauley gained access to current and former AT & T executives, boardmembers, and other insiders. Filled with new and controversial material and peopled by a cast of characters worthy of a Shakespearean drama, this is the first book to chronicle this tale." "Up through the late 1990s, AT & T

- tough, innovative, resourceful - seemed infallible. For industry insiders and for the general public, it loomed as an emblem of American business prowess and, even more, the American Dream fulfilled. End of the Line is an unprecedented account of the ruin of an icon and one of the shattering corporate events of our time."--Jacket.

The Telephone

Alexander Graham Bell's request for his assistant to "come here" revolutionized the way America's citizens communicated with one another. Bell's seemingly humble but transformative invention, the telephone, remains a crucial part of daily life and is used by billions of people worldwide every day. With the far-reaching network it spawned, it drew out its most isolated citizens and gathered the populace into a simultaneously intimate and national conversation. A nation of remote farmhouses, suburban families, and city dwellers could now be connected to each other over great distances. The telephone's integration into society now makes it impossible to imagine the technological and social achievements of the 20th century without it.

Political Groups, Parties, and Organizations That Shaped America [3 volumes]

This three-volume set explores the multiple roles that parties and interest groups have played in American politics from the nation's beginnings to the present. This set serves as an essential resource for analyzing the emergence and impact of parties and interest groups in the American political system and for understanding the systematic and structural bases for interest group and party behavior. Volume One opens with an introduction by the editors that provides a general overview of the eras and identifies important themes and events, laying a foundation on which the subsequent essays and primary documents for each interest group or political party builds. Narrative essays focus on how specific parties or interest groups have shaped or reflect a particular set of events or general themes in each of the eras in American political history. Topical entries reflect key themes developed throughout the volumes. Entries range from important founding groups and parties to contemporary political action committees and policy advocacy groups. The set also includes primary source documents (e.g., letters, platform documents, court decisions, flyers, etc.) that reveal important dimensions of the corresponding group's political influence.

Exploding the Phone

"A rollicking history of the telephone system and the hackers who exploited its flaws." —Kirkus Reviews, starred review Before smartphones, back even before the Internet and personal computers, a misfit group of technophiles, blind teenagers, hippies, and outlaws figured out how to hack the world's largest machine: the telephone system. Starting with Alexander Graham Bell's revolutionary "harmonic telegraph," by the middle of the twentieth century the phone system had grown into something extraordinary, a web of cutting-edge switching machines and human operators that linked together millions of people like never before. But the network had a billion-dollar flaw, and once people discovered it, things would never be the same. Exploding the Phone tells this story in full for the first time. It traces the birth of long-distance communication and the telephone, the rise of AT&T's monopoly, the creation of the sophisticated machines that made it all work, and the discovery of Ma Bell's Achilles' heel. Phil Lapsley expertly weaves together the clandestine underground of "phone phreaks" who turned the network into their electronic playground, the mobsters who exploited its flaws to avoid the feds, the explosion of telephone hacking in the counterculture, and the war between the phreaks, the phone company, and the FBI. The product of extensive original research, Exploding the Phone is a groundbreaking, captivating book that "does for the phone phreaks what Steven Levy's Hackers did for computer pioneers" (Boing Boing). "An authoritative, jaunty and enjoyable account of their sometimes comical, sometimes impressive and sometimes disquieting misdeeds." —The Wall Street Journal "Brilliantly researched." —The Atlantic "A fantastically fun romp through the world of early phone hackers, who sought free long distance, and in the end helped launch the computer era." —The Seattle Times

The Master Switch

Winner of the 2011 Business Book of the Year Award The Internet Age: on the face of it, an era of unprecedented freedom in both communication and culture. Yet in the past, each major new medium, from telephone to satellite television, has crested on a wave of similar idealistic optimism, before succumbing to the inevitable undertow of industrial consolidation. Every once free and open technology has, in time, become centralized and closed; as corporate power has taken control of the 'master switch.' Today a similar struggle looms over the Internet, and as it increasingly supersedes all other media the stakes have never been higher. Part industrial exposé, part examination of freedom of expression, The Master Switch reveals a crucial drama - full of indelible characters - as it has played out over decades in the shadows of global communication.

One of the few monitoring global trends related to information and communication technologies (ICTs) from a development perspective, this publication is a valuable reference for policymakers in developing countries. Special attention is given to ICTs in accelerating private sector development (PSD) in developing countries. Many national and donor strategies related to PSD fail to take adequate account of the ICT potential, which has greatly expanded thanks to changes in the global ICT landscape. Different facets of the ICT-PSD interface are explored, including: ICT infrastructure as a factor in the investment climate; ICT use by the private sector; the ICT sector as a part of the private sector, and finally, ICT use in interventions aimed at facilitating PSD.

Do you make deals? Do you want to learn how the best dealmakers in the world do it? Everyone -- and certainly every business -- makes deals. Whether you are an automobile dealer negotiating to buy another, or Exxon merging with Mobil in a \$76 billion transaction, the craft of dealmaking is everywhere. And like any craft, dealmaking has its apprentices, its journeymen...and its masters. Leo Hindery, Jr., is one of those masters of the negotiating table -- a man who has steered home more than 240 business deals over the last twenty-five years, deals worth well in excess of \$150 billion. In *The Biggest Game of All*, he brings readers inside the rooms where he has worked his wizardry, sometimes in partnership with, and sometimes against, the best dealmaking businessmen of our time, including General Electric's Jack Welch, Jerry Levin of AOL Time Warner, TCI's John Malone, George Steinbrenner, Barry Diller, and Rupert Murdoch. Through detailed narratives of the key moments in some of the biggest deals of our time -- including AT&T's \$60 billion purchase of the cable giant MediaOne, the \$54 billion sale of TeleCommunications, Inc. (a deal done in only twelve days), and the USA Networks/Seagram swap -- *The Biggest Game of All* is a true master class in dealmaking, showing all the inside strategies, tactics, and temperaments that make great dealmakers great. And at the center of the master class are Leo Hindery's ten commandments of dealmaking: #1. Do more homework than the other guy. #2. Look before you leap to the altar. You may love him, but you can't change him. #3. Deals should be done as fast as possible...but no faster. #4. Remember that you are only as good as the women and men around you. (And so is the other guy.) #5. Learn how to walk away. #6. Have adversaries, if need be. But don't have enemies. #7. Read the fine print. #8. Don't keep score on things that don't matter. #9. Hang in there. #10. Learn to keep your mouth shut. Leo Hindery's vantage point from the very peak of the dealmaking pyramid is the ideal place to observe, and therefore to understand, what separates good deals -- those intended to improve a company's strategic prospects -- from bad. At a time when the costs of business decisions made out of fear, confusion, and greed have never been higher or more newsworthy, knowing good from bad might be the most important dealmaking skill of all. No one who reads this insider's look at the incredible speed with which these human calculators make billion-dollar decisions, and at their fundamental, almost intuitive understanding of their own and other enterprises, will look at American business the same way again. *The Biggest Game of All* is that rarest of business books, instructive, enlightening, and just plain fun...a ringside seat at the real World Series of Poker, where the chips are worth a billion dollars each.

The Tempest

Whether one agrees with him or not, there is no avoiding the challenge of Hume for contemporary philosophy of religion. The symposia in this stimulating collection reveal why, whether the discussions concern Hume on metaphysics and religion, 'true religion', religion and ethics, religion and superstition, or miracles. For some, Hume's criticisms of religion are so devastating that religion cannot withstand them. Others disagree, and claim that Hume can be answered on his own terms. For others, while Hume shows us paths we should not take, these open up the way for a consideration of religious possibilities he never considered. These are not peripheral matters. The responses to them determine the style and spirit in which one pursues philosophy of religion today.

The Comprehensive Commentary on the Holy Bible: Acts-Revelation

Using New Testament "gematria, " symbolic number values encoded in the Greek phrases, the author reveals that the sacred couple was one of the essential pillars of early Christian teachings, before being denied by the architects of institutional Christianity and obscured by later Church doctrine.

The Acts, the Epistles and the Revelation

Frustrated with an increasingly polarized social landscape, award-winning photographer John Noltner set out on a 40,000-mile road trip across the United States to rediscover the common humanity that connects us. He did so by asking people one simple question: "What does peace mean to you?" Through difficult conversations, gentle humor, and a keen eye for beauty, Noltner's Portraits of Peace captures a rich collage of who we are as a nation. Beautiful storytelling and captivating photography converge to offer a uniquely human and accessible examination of the social issues that most challenge us today, such as racial equality, immigration reform, LGBTQ+ rights, women's rights, freedom of religion, and tolerance. Through the real-world stories of ordinary citizens who choose, in the midst of difficult circumstances, to pursue healing, reconciliation, and community building, we discover a glimmer of hope that something better is possible. Portraits of Peace offers a promising road map to a peaceful future as a pluralistic society.

Roman Catholicism, Old and New

In *The Theology of the First Christians*, Walter Schmithals offers a comprehensive history of the development of religious thought from the preaching of Jesus to the formation of the New Testament canon. This well-researched volume will be of great interest to New Testament scholars and students.

CSPR;Religion and Hume's Legacy

John Calvin's sermons on Ezekiel, held between 1552 and 1554 in the church 'la Madeleine' in Geneva and now studied for the first time, offer intriguing material on his exposition of prophetic visions. The manuscripts disclose the reformer's preaching on the book as a whole, including the visions on the restoration of Israel, Gog and Magog, and the great temple vision. The first part of this study focuses on the history of patristic, medieval and 16th century exegesis of Ezekiel. The second part is a systematic theological analysis of the hermeneutical principles of Calvin's exposition of visionary revelation. Finally, the sermons on the visions of Ezek. 36-48, a unique specimen of literal historical exegesis with a christological perspective, are analysed.

The Publishers' Circular and Booksellers' Record

The authority of the Bible is one of the defining features of Christianity. However, the origins of the Biblical canon, both as an idea and as a composition still pose many unresolved questions and the nature of the bible's authority, including the many ways in which that authority has been tapped throughout history, are important and vast areas of investigation. The essays in this book discuss such crucial issues as the history of the formation of the biblical canon, examples of the canonisation of books in Antiquity outside Christianity, and the nature and function of canonical texts in general. Several essays, furthermore, deal with the numerous ways in which biblical canonicity has been construed and utilised in more recent European history. The essays, written by specialists in religious studies, ancient history, classical philology, church history and literary theory, should be of great interest to students, scholars and general readers concerned with scriptural and literary canon formation.

Study aids include review questions after each section and activities in the margins of the text to personalize the material.

Portraits of Peace

This volume brings together the religious and philosophical writings of the founders of Russian religious philosophy, Aleksei Khomiakov and Ivan Kireevsky. Both began their intellectual careers in the literary world of the 1820s. The texts collected here make the philosophical concepts of Sobornost (community, universality, wholeness, ecumenicity) and integral knowledge, available to western readers. Based on the primacy of the heart, the spiritual wholeness of the human being and the cognitive will, integral knowing moves beyond rationality to union with the object of knowledge in knowing. This book provides an introduction to Russian religious philosophy, and a profound, meditative text for anyone concerned with human and spiritual unity. Also included are two responses to Slavophile ideas by the prominent Russian philosophers Pavel Florensky and Nikolai Berdiaev.

The Christian Church During the First Three Centuries

The hereditary office of Presiding Patriarch of the Church of Jesus Christ of Latter-day Saints, first occupied by the father of the Mormon prophet, Joseph Smith, had long seemed the focal point of a struggle for authority between those appointed and those born to leadership positions. Irene Bates and E. Gary Smith, who conclude that the office's demise in 1979 was inevitable, chronicle its history and find it to be a classic example of Max Weber's theory of the "routinization of charisma". From the creation of the patriarchal office in 1833 to its demise, the authors illuminate the tensions between the leadership circle of the Council of Twelve, headed by Brigham Young, and the potential rival power center of the Patriarch. This struggle is related, in turn, to the one between the Smith family and the rest of the Mormon leadership. Also illuminated are recurrent struggles between the president and the Twelve over the patriarchal issue. Bates and Smith argue that the real source of dissonance between the patriarchs and other church leaders was the impossibility of melding familial authority (the Patriarch) with official authority (the structured leadership of the growing church).

The Christian Union

This collection of essays reflects the two poles of interest on which Francois Bovon has concentrated during the last years: the New Testament (especially the Gospel of Luke and the Book of Acts) as well as the ancient church and the Christian Apocrypha. Eight articles in this volume deal with Luke and Acts, and their coverage of this subject ranges from a research report to detailed studies such as an analysis of Luke's practice of quotation. Nine of the essays focus on early Christian Apocrypha and the ancient church; five essays deal with theological topics at the crossroads between the New Testament and the Apocrypha. The essays are written in German and English or have been translated from French into English for this collection.

Outlook

Except for Christ himself, no figure has been more influential in the history of Christianity than the apostle Paul. And yet his remarkable life remains shrouded in mystery. In this probing new book, John B. Polhill scrapes away the myths about this great man and uncovers the truth of his life and thought. Using Acts, the Pauline epistles, and reliable traditions from non-canonical sources, Polhill weaves together the remarkable story of Paul's transformation from persecutor to persecuted, producing a dynamic account of his entire ministry. By placing each of Paul's letters in its proper historical context, Polhill brings new light to these foundation stones of the Christian faith. He follows Paul from his early years in Tarsus and Jerusalem to his imprisonment and eventual martyrdom, painting a detailed, comprehensive portrait of Paul that will serve as an indispensable resource for students, teachers, and pastors alike.

Speaking of Jesus

Uniquely authoritative and wide-ranging in its scope, The Oxford Dictionary of the Christian Church is the indispensable one-volume reference work on all aspects of the Christian Church. It contains over 6,000 cross-referenced A-Z entries, and offers unrivalled coverage of all aspects of this vast and often complex subject, including theology, churches and denominations, patristic scholarship, the bible, the church calendar and its organization, popes, archbishops, saints, and mystics. In this revision, innumerable small changes have been made to take into account shifts in scholarly opinion, recent developments, such as the Church of England's new prayer book (Common Worship), RC canonizations,

ecumenical advances and mergers, and, where possible, statistics. A number of existing articles have been rewritten to reflect new evidence or understanding, for example the Holy Sepulchre entry, and there are a few new articles. Perhaps most significantly, a great number of the bibliographies have been updated. Established since its first appearance in 1957 as an essential resource for ordinands, clergy, and members of religious orders, ODCC is an invaluable tool for academics, teachers, and students of church history and theology, as well as for the general reader.

John Calvin on the Visions of Ezekiel

A Legacy of Preaching, Volume One--Apostles to the Revivalists explores the history and development of preaching through a biographical and theological examination of its most important preachers. Instead of teaching the history of preaching from the perspective of movements and eras, each contributor tells the story of a particular preacher in history, allowing the preachers from the past to come alive and instruct us through their lives, theologies, and methods of preaching. Each chapter introduces readers to a key figure in the history of preaching, followed by an analysis of the theological views that shaped their preaching, their methodology of sermon preparation and delivery, and an appraisal of the significant contributions they have made to the history of preaching. This diverse collection of familiar and lesser-known individuals provides a detailed and fascinating look at what it has meant to communicate the gospel over the past two thousand years. By looking at how the gospel has been communicated over time and across different cultures, pastors, scholars, and homiletics students can enrich their own understanding and practice of preaching for application today. Volume One covers the period from the apostles to the revivalists and profiles thirty preachers including: Paul by Eric Rowe Peter by David R. Beck Melito of Sardis by Paul A. Hartog Origen of Alexandria by Stephen O. Presley Ephrem the Syrian by Jonathan J. Armstrong Basil of Caesarea by Jonathan Morgan John Chrysostom by Paul A. Hartog Augustine of Hippo by Edward L. Canon and Canonicity

In a world that often asks us to consider the things that can separate us...whether that is race, politics or ethnicity...A Peace of My Mind explores the common humanity that unites us. "A Peace of My Mind" is a 120-page book that features the b&w portraits and personal stories of 55 individuals who answer the simple question, "What does peace mean to you?" Since 2009, Noltner has photographed and interviewed Holocaust survivors, refugees, political leaders, artists, homeless individuals, and others, asking them to reveal what peace means to them, how they work towards it in their lives and what obstacles they encounter along the way. The result is a stunning and heart-felt collection that acknowledges the challenges we face as a society, yet builds hope through the inspiring stories of people committed to peaceful tomorrows.
