boil it for a couple of hours

add your yeast of your preference

strip all the alcohol

divert the tails to a separate holding tank

pull out more of the sweet wood notes

dump barrels into a holding tank

Make Bourbon Whiskey at Home Part I - Make Bourbon Whiskey at Home Part I by Mark Tompkins 190,248 views 3 years ago 48 minutes - No nonsense **step**, by **step instructions**, for **making Bourbon**, at home, grain to glass. Part I - sourcing grain to Stripping run.

use seven and a half liters of grain

grind the rye grain up

bring the temperature down from 190 degrees fahrenheit

use a paint stirrer and a cordless drill

added a leader or so cold water to mash

use just straight malted barley

let that sit for three hours

suspend this over top of the primary fermenter

rinse all the sugar out of the grain

poured the last of my 12 liters of boiling hot water

adding boiling water

drain now for about 3-4 hours

check the temperatures right around 80 degrees fahrenheit

get rid of the table salt

check the specific gravity

check the potential for alcohol

put enough time wash into the sample tube

wait for 72 hours

taking a specific gravity

to check the specific gravity of my wash

create my cooling water for the condenser

run it right after about 95 degrees

measures the actual alcohol by volume in a liquid

test some of the distillate

How whiskey is made? Production process in factories step by step I Tennessee whiskey I Single Malt - How whiskey is made?
