The Medicine Path

The Medicine Path invites us to reconsider the old ways-the ways of our indigenous ancestors. The original peoples of our planet understood both the beauty and necessity of knowing Mother Earth as they knew themselves. As a result of this deep relationship with the land, the medicines of the natural

world became known. This book tells the story of how one woman returned to those healing ways, re-kindled a connection to the earth, and now shares the resulting healing gifts with her community.

The Healing Arts

Medicine and astronomy are the oldest of all the sciences. They appear at first glance to be the original "odd couple." Their union gave birth to a progeny that populated the Western world for more than two millennia. From an historical perspective, their marriage and mutual influence is undeniable. Cosmology and cosmogony, as natural philosophical aspects of astronomy, have gone hand in hand with the science of medicine from time immemorial. Indeed, medicine and the pseudoscience of astrology were for centuries inseparable. The ancients began the embryonic search for answers to questions that had puzzled humans for eons. No systematic approach to the nature of the universe was undertaken until the Sumerians, the Babylonians, and the Greeks began the quest for wisdom. The Greeks, beginning with Thales in the 6th century B.C.E., sought a unifying principle to explain the world as a whole. Because cosmology and medicine were among the few known sciences in ancient times, it was natural that these two apparently disparate disciplines should be combined to provide the theoretical basis of medicine--foundations that were to survive for nearly 2,400 years. This scientific structure rested firmly on the ancient principles of cosmology, astronomy, and the concept of universal harmony. This book tells the tale of these theoretical underpinnings and how they influenced humankind's efforts to maintain health and fight disease. Ultimately, the system was fundamentally flawed. Nonetheless, it lingered on for centuries beyond what common sense tells us it should have. Few comprehensive analyses of the relationship between cosmology and medicine have been undertaken in the astronomical or medical literature. For better or for worse, cosmological principles have had profound effects on the theory and practice of medicine over the centuries. It is time for historians, astronomers, physicians, and philosophers to acquaint themselves with the impact early cosmology has had on medicine. Awareness of this linkage can help us better understand not only past but present-day medicine. This book is a fascinating review of the historical roots of the medical tradition.

Harmony in Healing

There are few disciplines as exciting and forward-looking as medicine. Unfortunately, however, many modern practitioners have rather lost sight of the origins of their discipline. 'A Cabinet of Ancient Medical Curiosities' aspires to make good this lapse by taking readers back to the early days of Western medicine in ancient Greece and Rome. Quoting the actual words of ancient authors, often from texts which have never been translated into English, it gives a glimpse into the beginnings of such fields as surgery, gynecology, pediatrics, preventive medicine, and pharmacology, as well as highlighting ancient views on such familiar topics as medical ethics and the role of the doctor in society.

With the exception of die-hard aficionados of European or Italian horror cinema, most people may not have heard of giallo cinema or have seen many films in this subgenre of horror. Most academic film studies tend to ignore horror cinema in general and the giallo specifically. Critics often deride these films, which reveal more about the reviewers' own prejudices than any problem with the works themselves. As a counter to such biases, Mikel J. Koven argues for an alternative approach to studying these films, by approaching them as vernacular cinema—distinct from "popular cinema." According to Koven, to look at a film from a vernacular perspective removes the assumptions about what constitutes a "good" film and how a particular film is in some way "artistic." In *La Dolce Morte: Vernacular Cinema and the Italian Giallo Film*, Koven explores the history and evolution of this aspect of cinema, and places these

films within the context of Italian popular filmmaking. He addresses various themes, motifs, and tropes in these films: their use of space, the murders, the role of the detective, the identity of the killer, issues of belief, excess, and the set-piece.

Messages from Spirit

Traditional Anishinaabe (Ojibwe or Chippewa) knowledge, like the knowledge systems of indigenous peoples around the world, has long been collected and presented by researchers who were not a part of the culture they observed. The result is a colonized version of the knowledge, one that is distorted and trivialized by an ill-suited Eurocentric paradigm of scientific investigation and classification. In *Our Knowledge Is Not Primitive*, Wendy Makoons Geniusz contrasts the way in which Anishinaabe botanical knowledge is presented in the academic record with how it is preserved in Anishinaabe culture. In doing so she seeks to open a dialogue between the two communities to discuss methods for decolonizing existing texts and to develop innovative approaches for conducting more culturally meaningful research in the future. As an Anishinaabe who grew up in a household practicing traditional medicine and who went on to become a scholar of American Indian studies and the Ojibwe language, Geniusz possesses the authority of someone with a foot firmly planted in each world. Her unique ability to navigate both indigenous and scientific perspectives makes this book an invaluable contribution to the field of Native American studies and enriches our understanding of the Anishinaabe and other native communities.

La Dolce Morte

Today's moviegoers and critics generally consider some Hollywood products--even some blockbusters--to be legitimate works of art. But during the first half century of motion pictures very few Americans would have thought to call an American movie "art." Up through the 1950s, American movies were regarded as a form of popular, even lower-class, entertainment. By the 1960s and 1970s, however, viewers were regularly judging Hollywood films by artistic criteria previously applied only to high art forms. In *Hollywood Highbrow*, Shyon Baumann for the first time tells how social and cultural forces radically changed the public's perceptions of American movies just as those forces were radically changing the movies themselves. The development in the United States of an appreciation of film as an art was, Baumann shows, the product of large changes in Hollywood and American society as a whole. With the postwar rise of television, American movie audiences shrank dramatically and Hollywood responded by appealing to richer and more educated viewers. Around the same time, European ideas about the director as artist, an easing of censorship, and the development of art-house cinemas, film festivals, and the academic field of film studies encouraged the idea that some American movies--and not just European ones--deserved to be considered art.

Our Knowledge Is Not Primitive

'Moral character, so to say, constitutes the most effective means of proof.' In ancient Greece, rhetoric was at the centre of public life. Many writers attempted to provide manuals to help improve debating skills, but it was not until Aristotle produced *The Art of Rhetoric* in the 4th century bc that the subject had a true masterpiece. As he considered the role of emotion, reason, and morality in speech, Aristotle created essential guidelines for argument and prose style that would influence writers for more than two millennia. Brilliantly explained and carefully reasoned, *The Art of Rhetoric* remains as relevant today as it was in the assemblies of ancient Athens.

The Road that Led to Somewhere

The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, *Yvain*, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. *Yvain* is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

I Will Survive is the story of Gloria Gaynor, America's "Queen of Disco." It is the story of riches and fame, despair, and finally salvation. Her meteoric rise to stardom in the mid-1970s was nothing short of phenomenal, and hits poured forth that pushed her to the top of the charts, including "Honey Bee," "I Got You Under My Skin," "Never Can Say Goodbye," and the song that has immortalized her, "I Will Survive," which became a #1 international gold seller. With that song, Gloria heralded the international rise of disco that became synonymous with a way of life in the fast lane - the sweaty bodies at Studio 54, the lines of cocaine, the indescribable feeling that you could always be at the top of your game and never come down. But down she came after her early stardom, and problems followed in the wake, including the death of her mother, whose love had anchored the young singer, as well as constant battles with weight, drugs, and alcohol. While her fans always imagined her to be rich, her personal finances collapsed due to poor management; and while many envied her, she felt completely empty inside. In the early 1980s, sustained by her marriage to music publisher Linwood Simon, Gloria took three years off and reflected upon her life. She visited churches and revisited her mother's old Bible. Discovering the world of gospel, she made a commitment to Christ that sustains her to this day.

I took a three-year break from work to explore the topic of peace, love, and success. I spent the time analyzing my thoughts and the effects my thoughts had on my emotional state of mind. The things I found out were quite intriguing. I came to the realization that many of us are not living to our full potential. We live with a measured joy. We keep our happiness in check. Our smiles are met with a restriction from our breath, which makes it short-lived. We seldom breathe fully because our breath is interrupted by the depth of our thoughts. We never really let go fully. We are bound by layers of chains that have entangled our thinking chains from an uncertain future, chains of work, chains of relationships, chains of our finances, too many chains to mention. My time away from work gave me the opportunity to explore how to break the chains. I admit that even a broken chain is not permanently broken but can be easily reunited if old habits are not changed. My book focuses on the actions we can take to break chains and keep them broken. My book explores how our thoughts control our destiny. It teaches thought control and the importance of silence. It teaches how to overcome fear, anger, negative thoughts, stress, and hatred. You will learn how to nurture your emotions, embrace moments, and the importance of spiritual peace. I will teach you how to live in thankfulness, with compassion, while activating love.

Between 1867 and 2000, the Canadian government sent over 150,000 Aboriginal children to residential schools across the country. Government officials and missionaries agreed that in order to "civilize and Christianize" Aboriginal children, it was necessary to separate them from their parents and their home communities. For children, life in these schools was lonely and alien. Discipline was harsh, and daily life was highly regimented. Aboriginal languages and cultures were denigrated and suppressed. Education and technical training too often gave way to the drudgery of doing the chores necessary to make the schools self-sustaining. Child neglect was institutionalized, and the lack of supervision created situations where students were prey to sexual and physical abusers. Legal action by the schools' former students led to the creation of the Truth and Reconciliation Commission of Canada in 2008. The product of over six years of research, the Commission's final report outlines the history and legacy of the schools, and charts a pathway towards reconciliation. *Canada's Residential Schools: Reconciliation* documents the complexities, challenges, and possibilities of reconciliation by presenting the findings of public testimonies from residential school Survivors and others who participated in the TRC's national events and community hearings. For many Aboriginal people, reconciliation is foremost about healing families and communities, and revitalizing Indigenous cultures, languages, spirituality, laws, and gover-

nance systems. For governments, building a respectful relationship involves dismantling a centuries-old political and bureaucratic culture in which, all too often, policies and programs are still based on failed notions of assimilation. For churches, demonstrating long-term commitment to reconciliation requires atoning for harmful actions in the residential schools, respecting Indigenous spirituality, and supporting Indigenous peoples' struggles for justice and equity. Schools must teach Canadian history in ways that foster mutual respect, empathy, and engagement. All Canadian children and youth deserve to know what happened in the residential schools and to appreciate the rich history and collective knowledge of Indigenous peoples. This volume also emphasizes the important role of public memory in the reconciliation process, as well as the role of Canadian society, including the corporate and non-profit sectors, the media, and the sports community in reconciliation. The Commission urges Canada to adopt the United Nations Declaration on the Rights of Indigenous Peoples as a framework for reconciliation. While Aboriginal peoples are victims of violence and discrimination, they are also holders of Treaty, Aboriginal, and human rights and have a critical role to play in reconciliation. All Canadians must understand how traditional First Nations, Inuit, and Métis approaches to resolving conflict, repairing harm, and restoring relationships can inform the reconciliation process. The TRC's calls to action identify the concrete steps that must be taken to ensure that our children and grandchildren can live together in dignity, peace, and prosperity on these lands we now share. De Inventione

An ancient prophecy written over 3000 years ago reveals that the Arab states and terrorist populations, which are identified on the front cover of this book, will soon confederate in order to wipe Israel off of the map. Their mandate is clear: They have said, "Come, and let us cut them off from being a nation, That the name of Israel may be remembered no more." (Psalm 83:4). Psalm 83 predicts a climactic, concluding Arab-Israeli war that has eluded the discernment of today's top Bible scholars, and yet, the Middle East stage appears to be set for the fulfillment of this prophecy. While many of today's top Bible experts are predicting that Russia, Iran, Turkey, Libya, and several other countries are going to invade Israel according a prophecy in Ezekiel 38, this timely book explains how Psalm 83 occurs prior. Discover how Israel defeats their ancient Arab enemies, and why Americans need to stand beside Israel in this coming war!

Only Lukas Hawthorne could simultaneously break my spirit, crush my dreams...and make me dripping wet. He's a legend on campus-a star athlete with records that'll never be broken. I always see him on campus walking around with some new hot piece of ass, and I dream about what it would be like to be the one on his arm...It's totally unfair to have such an effortlessly handsome grad student as my TA. Who knew economic theory could be so sexy? Problem is, I've been so distracted by him all semester that now I'm failing his course, and I need pass if I hope to graduate on time. He wants to meet with me after class, to discuss how I can make up my grade this summer...extra assignments, private lessons...whatever it takes. But when a disgusting realization is made-our student-teacher sex sessions are permanently interrupted. Our parents are engaged. They're madly in love and can't wait to make me, Lukas, and all of our siblings one big happy family. To make matters worse, we have to endure a family vacation at his father's lake house. Together. A million miles away from everything. Thing is, the more inappropriate my desire is for him, the more intensely it burns...and he isn't shy about meeting me halfway. According to him, we're going to defile every room and every surface of his father's house before we go back to school. Challenge accepted.

Dr. Blair's Lectures on Rhetoric

Some evangelical churches appear to be uninterested in their historical roots, and so can be liturgically and doctrinally unstable. Perceiving this disconnection between their Protestant faith and ancient Christianity, a number of evangelicals have abandoned Protestantism for traditions that seem to be clearly rooted in the early church. Ken Stewart argues that the evangelical tradition's track record of interaction with Christian antiquity is far healthier than is often assumed. He surveys five centuries of Protestant engagement with the ancient church, showing that Christians belonging to the evangelical churches of the Reformation consistently see their faith as connected to early Christianity. Stewart explores areas of positive engagement, including the Lord's Supper and biblical interpretation, as well as areas that raise concerns, such as monasticism. *In Search of Ancient Roots* shows that Christian antiquity is the heritage of all orthodox Christians, and that evangelicals have the resources in their history to claim their place at the ecumenical table. 'A must-read for every person struggling with the question, "What does evangelicalism have to do with history?"' Leonardo De Chirico, Director of Reformanda Initiative
