Employment Law Update, 2019 Edition analyzes recent developments in case law of interest to employment law practitioners representing plaintiffs, defendants, and labor unions and comprehensively covers recent developments in the rapidly changing employment and labor law field. Comprised of ten chapters - each written by an expert in employment law - this updated edition provides timely, incisive analysis of critical issues. Employment Law Update, 2019 Edition provides, where appropriate, checklists, forms, and guidance on strategic considerations for litigation and other forms of dispute resolution. Some of the new material discussed in this 2019 Edition includes: How the U.S. Department of Labor enforces federal whistleblower statutes Recent case law circumscribing arbitration, which can, potentially, deprive non-union workers of fundamental statutory and constitutional rights Recent German embrace of minimum wage law Efforts by legislatures, administrative agencies, courts, and public interest groups to transform the "soft law" of the U.N. Guiding Principles on Business and Human Rights into "hard law" binding multinational corporations Special problems relating to aviation personnel who blow the whistle Protection for disabled veterans under the ADA and the USERRA Evolving framework for enforcing the rights of the LGBT population Transnational labor law applicable to expatriates Application of multinational firms' codes of conduct across national borders Application of differing systems of employee rights and obligations to floating employees Previous Edition: Employment Law Update, 2018 Edition ISBN 9781454898931

The Handbooks in Finance are intended to be a definitive source for comprehensive and accessible information in the field of finance. Each individual volume in the series should present an accurate self-contained survey of a sub-field of finance, suitable for use by finance and economics professors and lecturers, professional researchers, graduate students and as a teaching supplement. The goal is to have a broad group of outstanding volumes in various areas of finance. The Handbook of Heavy Tailed Distributions in Finance is the first handbook to be published in this series. This volume presents current research focusing on heavy tailed distributions in finance. The contributions cover methodological issues, i.e., probabilistic, statistical and econometric modelling under non- Gaussian assumptions, as well as the applications of the stable and other non -Gaussian models in finance and risk management.

This volume explores how key aspects of No Child Left Behind (NCLB) have transformed the landscape of educational evaluation, and ultimately how this process is redefining what evaluation is within the educational evaluation community. In their chapters, the authors examine case studies, critical commentaries, and technical information related to the nexus between evaluation and NCLB. The volume is intended to stimulate conversation around fundamental issues in the discipline of evaluation, including blurring the lines among research, evaluation, and assessment; prioritizing summative evaluations over formative; using questions to drive research design rather than the reverse; balancing accountability requirements with other stakeholder needs; exploring the role of evaluation capacity building in an institutional setting; understanding the availability and appropriate use of assessment data; and defining learning outcomes that are based on standardized test scores alone. Evaluative activities have become integrated into the fabric of NCLB primarily through two core aspects of the legislation: responding to accountability systems and implementing scientifically based research. One plausible consequence of this close integration is that the purpose, design, and practice of evaluation may actually be transformed by this legislation. This volume describes these transformative influences and then explores the potential consequences. This is the 117th volume of the Jossey-Bass quarterly report series New Directions for Evaluation, an official publication of the American Evaluation Association.

This timely volume addresses three important recent trends in the internationalization of United States equity markets: extensive market integration through foreign investment and links among stock prices around the world; increasing securitization as countries such as Japan come to rely more than ever before on markets in equities and bonds at the expense of banks; and the opening of national financial systems of newly industrializing countries to international financial flows and institutions, as governments remove capital controls and other barriers. Eight essays examine such issues as the current extent of international market integration, gains to U.S. investors through international diversification, home-country bias in investing, the role of time and location around the world in stock trading, and the behavior of country funds. Other, long-standing questions about equity markets are also addressed, including market efficiency and the accuracy of models of expected returns, with a particular focus on variances, covariances, and the price of risk according to the Capital Asset Pricing Model.

Campbell's Physical Therapy for Children Expert Consult - E-Book

The authors have updated each of the books eight units to reflect the progress in our understanding of life at many levels, from molecules to ecosystems. The sixth edition has a new chapter that introduces students to science as a way of knowing nature. A new feature highlights examples of the process of science throughout the book, and each chapter contains a process of science question that encourages students to experience science. Media activities allow additional practice with experimentation and analysis of data, and interviews with various researchers humanize science as a social activity.
