

Agricultural Trade Usda Is Monitoring Market Development Programs As Required But Could Improve Analysis Of Impact

[#agricultural trade USDA #market development programs #USDA program monitoring #impact analysis improvement #trade policy effectiveness](#)

The USDA actively monitors agricultural trade and its market development programs as required, yet there is a clear opportunity to enhance the analysis of their overall impact. Improving this analytical process will provide deeper insights into program effectiveness and ensure better accountability for trade initiatives.

Course materials cover topics from beginner to advanced levels.

Food Trade, Food Security and the SDGs: UNRISD Seminar - Food Trade, Food Security and the SDGs: UNRISD Seminar by UNRISD 4,831 views 7 years ago 41 minutes - In addition to SDG2, which aims to end hunger, food security and food **trade**, have implications for other goals related to energy, ...

In this UNRISD Seminar, Sophia Murphy discusses (1) whether countries can create and enforce trade rules that respect other global commitments to sustainable and inclusive human well-being, (2) how the international community can rebuild confidence in international food markets and the rules that govern them, and (3) how governments should reform multilateral trade rules to limit future risks to food security while ensuring everybody's food needs are met in a sustainable way.

Susan Mathews (Office of the High Commissioner for Human Rights—OHCHR) brings another perspective to the discussion of trade from a social development and human rights angle. She explains why and how OHCHR is engaging on trade as a human rights issue, highlights lessons learned from past experiences with human rights impact assessments of trade agreements, and describes current efforts to initiate a human rights impact assessment of the Continental Free Trade area agreement in Africa, focusing on agriculture, including food security and livelihoods, as well as employment.
