Sinfullicious

Jessica isn't half as innocent as she looks. She's a college student in a relationship with not one, but two handsome jocks who have extraordinarily little self-control. They want her all the time and aren't afraid to make their intentions known and she hasn't learned how to say no to either of them yet. This puts her in many, many compromising situations with both of them at the same time in many public places. It all started when she's dared to run through the hallways of her dorm wearing nothing, and then it just spirals to surrendering her first time in the library while someone watches, humiliating adventures in a moving car, and being touched on a hiking path. ~~~~~ PG Excerpt ~~~~~ Jessica can pinpoint the exact moment her exhibitionist kink started. In fact, she even remembers who started it. His name is John and he's just a guy in her school. She never really gets to know him beyond that point, but she remembers he was the one who jump started her kinks. The spinning bottle between them comes to a stop with the mouth pointed directly at her and John says, "I dare you to run across the hall naked." All nine pairs of eyes are on her suddenly. Her mouth opens and closes a few times. "I didn't say whether I wanted to do truth or dare," she argues. Her pulse races. "So you're going to chicken out?" one of the others teases. The other girls before her have been much braver, taking on their dares without batting an eye. Kendra's panties are still in front of her and Lawrence isn't wearing anything at all. It's only understandable that he has his hands folded in front of him, hiding his junk from view. Natalie still hasn't put her shirt back on from her challenge earlier. She's wearing her lace bra that is a size or two too small and Jessica thinks it's not really the guy's fault that their eyes keep drifting towards her. She's finding it hard not to look at her too. Her breasts are spilling out from the bra, pink nipple peeking from the edge. Nobody's looking at her now. They're all looking at Jessica.

Berserker

Long ago, in a distant part of the galaxy, two alien races met—and fought a war of mutual extinction. The sole legacy of that war was the weapon that ended it: the death machines, the BERSERKERS. Guided by self-aware computers more intelligent than any human, these world-sized battle craft carved a swath of death through the galaxy—until they arrived at the outskirts of the fledgling Empire of Man. These are the stories of the frail creatures who must meet this monstrous and implacable enemy—and who, by fighting it to a standstill, become the saviors of all living things. This is Saberhagen's classic book length collection of the first eleven Berserker stories. Meet Berserker hunter extraordinaire Johann Karlsen, his evil brother Felipe Nogara, The Third Historian of the Carmpan Race, gallant fighters of the killer machines and the deranged killer machine, Mr. Jester.

The Possession

WINNER OF THE 2022 NOBEL PRIZE IN LITERATURE Self-regard, in the works of Annie Ernaux, is always an excruciatingly painful and exact process. Here, she revisits the peculiar kind of self-fulfillment possible when we examine ourselves in the aftermath of a love affair, and sometimes, even, through the eyes of the lost beloved.

Consciousness And The Novel

Human consciousness, long the province of literature, has lately come in for a remapping - even rediscovery - by the natural sciences, driven by developments in Artificial Intelligence, neuroscience, and evolutionary biology. But as the richest record we have of human consciousness, literature, David Lodge suggests, may offer a kind of knowledge about this phenomenon that is complementary, not opposed, to scientific knowledge. Writing with characteristic wit and brio, and employing the insight and acumen of a skilled novelist and critic, Lodge here explores the representation of human consciousness in fiction (mainly English and American) in the light of recent investigations in cognitive science, neuroscience, and related disciplines. How, Lodge asks, does the novel represent consciousness? And how has this changed over time? In a series of interconnected essays, he pursues this question down various paths: how does the novel's method compare with that of other creative media such as film? How does the consciousness (and unconscious) of the creative writer do its work? And how can criticism infer the nature of this process through formal analysis? In essays on Charles Dickens, E.M. Forster, Evelyn Waugh, Kingsley and Martin Amis, Henry James, John Updike and Philip Roth, and in reflections on his own practice as a novelist, Lodge brings to light - and to engaging life

The Forge Of God

On July 26, Arthur Gordon learns that Europa, the sixth moon of Jupiter, has disappeared. Not hiding, not turned black, but gone. On September 28th, Edward Shaw finds an error in the geological records of Death Valley. A cinder cone was left off the map. Could it be new? Or, stranger yet, could it be artificial? The answer may be lying beside it-a dying Guest who brings devastating news for Edward and for Planet Earth. As more unexplained phenomena spring up around the globe-a granite mountain appearing in Australia, sounds emanating from the earth's core, flashes of light among the asteroids-it becomes clear to some that the end is approaching, and there is nothing we can do. Facing the destruction of all they know, some people turn to God, others to their families, and a few turn to saviors promising escape from a planet being torn apart. Will they make it in time? And who gets left behind to experience the last moments of beauty and chaos on earth?

Brother Assassin

DigiCat Publishing presents to you this special edition of "The Cords of Vanity" (A Comedy of Shirking) by James Branch Cabell. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

The Cords of Vanity

Mark and Ben travel deep into the Blue Temple's hidden horde in an attempt to recover whatever gold and Swords they can for the forces of Sir Andrew. Gods, demons and human traitors have other plans for the Swords and for the adventurers. In the game of the gods, no one's survival is secure, even a god's.

The Second Book of Swords

Figures of Earth is the second installment in James Branch Cabell's Biography of the Life of Manuel, set in the imaginary province of Poictesme. Young Manuel is a simple, well-liked swineherd who is often seen continually reshaping a small figure he made from the marsh clay from the pool of Haranton. One day, a stranger appears and tells Manuel of an adventure to save the Count of Arnaye's daughter from a wizard who carried her off to the gray mountain called Vraidex. Manuel accepts this adventure (and many more that follow)—and his life will never be the same. The book was originally published in 1921 and was dedicated to "six most gallant champions," each of whom were real persons who came to Cabell's defense during the legal battle over alleged obscenity in his previous novel, Jurgin. This book is part of the Standard Ebooks project, which produces free public domain ebooks.

Jurgin: A Comedy of Justice

With contributions from Aristotle to Lakoff and Johnson, and incorporating the work of philosophers, linguists, literary theorists, and cognitive psychologists, this wide-ranging and multidisciplinary six-volume collection on metaphor and figurative language is a new title from Routledge's Critical Concepts in Linguistics series. Metaphor and Figurative Language is fully indexed and has a comprehensive introduction, newly written by the editors, which places the collected material in its historical and intellectual context ...

Figures of Earth

In 'The Line of Love; Dizain des Mariages,' James Branch Cabell offers readers a rich tapestry of chivalric romance and sardonic wit, woven together in an exploration of love across different ages. Cabell's literary style is marked by an elegant, archaic prose that underpins the ironic commentary on the romantic ideals and societal mores of bygone eras. This work, structured as a sequence of interrelated stories, not only reflects the author's clear fascination with the Medieval period but also situates itself within the early 20th-century's revival of interest in chivalric tales, thus providing a complex interplay between past and present literary traditions. James Branch Cabell, an important figure in American literature, was known for his unique blend of fantasy and realism, his eloquent storytelling, and his finely-crafted satirical narratives. Cabell's passion for history, mythology, and his own Virginian heritage often inspired his works. In 'The Line of Love,' his background and interests manifest in his use of historical settings and the deconstruction of romantic myths, culminating in a book that both celebrates and questions the very nature of love and marriage. 'The Line of Love; Dizain des Mariages' is recommended for those who delight in literary craftsmanship that transcends time. Cabell's adept storytelling and intricate characterizations make this book an appealing read for lovers of classic literature. The novel's subtle irony and reflection on eternal themes of love and matrimony will resonate with modern readers, offering a nuanced perspective that challenges as much as it charms. It is a significant work that continues to merit scholarly attention and appreciation among connoisseurs of literary art.

Metaphor and Figurative Language

James Branch Cabell (1879-1958) wrote many of the Twentieth Century's finest fantasies, including the controversial "Jurgin," which was famously banned by the New York Society for the Suppression of Vice. It was only after the furor died down that readers and critics were fully able to appreciate that the author was no mere sensationalist, but a literary artist of very high calibre. Cabell was above all

else, an elegant stylist, whose gently caustic, beautifully fantastic comedies struck a chord in the Jazz Age and still resonate today. He was an important influence on subsequent writers as diverse as Fritz Leiber and Neil Gaiman. "[He] is a delightful author . . . I like the sheer audacity and the scope [of his work]." -- Neil Gaiman "One of the all-time greats of fantasy, whose cynical yet romantic view of the human comedy is simultaneously hilarious, beautiful, and melancholy. A writer you must read." -- Darrell Schweitzer "From the Hidden Way" collects Cabell's poetry, which illustrates a mastery of a wide range of styles and forms, and is filled with sly allusions to Cabell's other books. It was included in the famous Storisende Edition of the collected "Biography of Manuel," which Cabell considered to be the centerpiece of his art.

The Music from Behind the Moon

"The Devil's Own Dear Son" is Cabell's final philosophical comedy, about a man who discovers that his father was a demon and goes to Hell for a disquieting family reunion. James Branch Cabell (1879-1958) wrote many of the Twentieth Century's finest fantasies, including the controversial *Jurgen*, which was famously banned by the New York Society for the Suppression of Vice. James Branch Cabell (1879-1958) wrote many of the Twentieth Century's finest fantasies, including the controversial *Jurgen*, which was famously banned by the New York Society for the Suppression of Vice. It was only after the furor died down that readers and critics were fully able to appreciate this was no mere sensationalist, but a literary artist of very high caliber. Cabell was above all else, an elegant stylist, whose gently caustic, beautifully fantastic comedies struck a chord in the Jazz Age and still resonate today. He was an important influence on subsequent writers as diverse as Fritz Leiber and Neil Gaiman.

Coils

In Synners, the line between technology and humanity is hopelessly slim. To be a Synner is to join the online hardcore, an outlaw band of hackers, simulation pirates, and reality synthesizers hooked on artificial reality and virtual space. Now you can change yourself to suit the machines - all it costs you is your freedom, and your humanity. Synners shows us a world perilously close to our own. A constant

stream of new technology spawns new crime before it hits the streets, and the human mind and the external landscape have fused to the point where any encounter with "reality" is incidental. Equal parts thrill-ride and cautionary tale, this classic novel by the Queen of Cyberpunk offers us a terrifying glimpse into the future of our race. Winner of the Arthur C. Clarke Award for best novel, 1992
