The Joy of Small Things

'This book is a not-so-small joy in itself.' NIGELLA LAWSON 'Parkinson has the gift of making you look with new eyes at everyday things. The perfect daily diversion.' JOJO MOYES 'Always funny and frank and full of insight, I absolutely love Parkinson's writing.' DAVID NICHOLLS 'I loved this book . . . Parkinson's writing transports you to unexpected places of joy and comfort . . . these pages contain happiness.' MARINA HYDE 'The twenty-first century feels a lot more bearable in Parkinson's company.' CHARLOTTE MENDELSON Drawn from the successful Guardian column, these everyday exultations and inspirations will get you through dismal days. Hannah Jane Parkinson is a specialist in savouring the small pleasures of life. She revels in her fluffy dressing gown ('like bathing in marshmallow'), finds calm in solo cinema trips, is charmed by the personalities of fonts ('you'll never see Comic Sans on a funeral notice'), celebrates pockets and gleefully abandons a book she isn't enjoying. Parkinson's everyday exultations - selected from her immensely successful Guardian column - will utterly delight. FEATURES BRAND NEW MATERIAL 'A compendium of delights.' OBSERVER 'Delightful . . . a love letter to those little moments of bliss that get us through the daily grind.' RED

Secondhand Chic

Fun, funky, and fabulous, this book offers a personal buying guide for anyone who wants to look like a million for a fraction of the cost.

Atlas of Imagined Places

WINNER, Edward Stanford Travel Writing Awards 2022: Illustrated Travel Book of the Year. HIGHLY COMMENDED, British Cartographic Society Awards 2022. From Stephen King's Salem's Lot to the superhero land of Wakanda, from Lilliput of Gulliver's Travels to Springfield in The Simpsons, this is a wondrous atlas of imagined places around the world. Locations from film, tv, literature, myths, comics and video games are plotted in a series of beautiful vintage-looking maps. The maps feature fictional buildings, towns, cities and countries plus mountains and rivers, oceans and seas. Ever wondered

where the Bates Motel was based? Or Bedford Falls in *It's a Wonderful Life*? The authors have taken years to research the likely geography of thousands of popular culture locations that have become almost real to us. Sometimes these are easy to work out, but other times a bit of detective work is needed and the authors have been those detectives. By looking at the maps, you'll find that the revolution at Animal Farm happened next to Winnie the Pooh's home. Each location has an extended index entry plus coordinates so you can find it on the maps. Illuminating essays accompanying the maps give a great insight into the stories behind the imaginary places, from Harry Potter's wizardry to Stone Age Bedrock in the Flintstones. A stunning map collection of invented geography and topography drawn from the world's imagination. Fascinating and beautiful, this is an essential book for any popular culture fan and map enthusiast.

Give Me Liberty

In *Give Me Liberty: A Handbook for American Revolutionaries*, bestselling author Naomi Wolf illustrates the changes that can take place when ordinary citizens engage in the democratic system the way the founders intended and tells how to use that system, right now, to change your life, your community, and ultimately, the nation. As the practice of democracy becomes a lost art, Americans are increasingly desperate for a restored nation. Many have a general sense that the "system" is in disorder—if not on the road to functional collapse. But though it is easy to identify our political problems, the solutions are not always as clear. In *Give Me Liberty: A Handbook for American Revolutionaries*, bestselling author Naomi Wolf illustrates the breathtaking changes that can take place when ordinary citizens engage in the democratic system the way the founders intended and tells how to use that system, right now, to change your life, your community, and ultimately, the nation.

THIS GUY'S ON HIS OWN TRIP

The fear of the unknown bothers most of us, even if it comes at the cost of chasing our dreams. How many of us want to drop everything that we are doing and travel the world? How many of us do? Neeraj Narayanan just did that, quitting his job one day and flying to Barcelona. Join him on his journey as he takes you rollicking across some countries in Europe and South East Asia, motoring up high mountain passes, hiding in jungles and being part of crazy festivals, hoping to find pretty girls in pursuit but only ending up with furious bulls, bears, and gypsies on his tail. At some point, he has almost no money left but his resolve to build a life out of travel doesn't ebb. This is a witty yet heart-warming tale of one man's solo journey for a year. While he goes to find beautiful places, he ends up finding trust, compassion, and a universe conspiring to make all his dreams come true. This guy's really on his own trip and promises to take you on one too!

Second-hand Time

Nobel Prize winner Svetlana Alexievich invents a new genre of narrative non-fiction as she writes the life stories of housewives, artists, party workers, students, soldiers, traders, living through a time of political upheaval -- the fall of the Soviet Union and the two decades that followed it.

The Rust Programming Language (Covers Rust 2018)

The official book on the Rust programming language, written by the Rust development team at the Mozilla Foundation, fully updated for Rust 2018. The Rust Programming Language is the official book on Rust: an open source systems programming language that helps you write faster, more reliable software. Rust offers control over low-level details (such as memory usage) in combination with high-level ergonomics, eliminating the hassle traditionally associated with low-level languages. The authors of *The Rust Programming Language*, members of the Rust Core Team, share their knowledge and experience to show you how to take full advantage of Rust's features--from installation to creating robust and scalable programs. You'll begin with basics like creating functions, choosing data types, and binding variables and then move on to more advanced concepts, such as: Ownership and borrowing, lifetimes, and traits Using Rust's memory safety guarantees to build fast, safe programs Testing, error handling, and effective refactoring Generics, smart pointers, multithreading, trait objects, and advanced pattern matching Using Cargo, Rust's built-in package manager, to build, test, and document your code and manage dependencies How best to use Rust's advanced compiler with compiler-led programming techniques You'll find plenty of code examples throughout the book, as well as three chapters dedicated to building complete projects to test your learning: a number guessing game, a Rust implementation

of a command line tool, and a multithreaded server. New to this edition: An extended section on Rust macros, an expanded chapter on modules, and appendixes on Rust development tools and editions.

Journey into the world of book collecting with the Goldstones-rediscover the joy of reading, laugh, and fall in love with books all over again. The idea that books had stories associated with them that had nothing to do with the stories inside them was new to us. We had always valued the history, the world of ideas contained between the covers of a book or, as in the case of *The Night Visitor*, some special personal significance. Now, for the first time, we began to appreciate that there was a history and a world of ideas embodied by the books themselves. Part travel story, part love story, and part memoir, Lawrence and Nancy Goldstone's *Used and Rare* provides a delightful love letter to book lovers everywhere.

Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the role of systematic reviews, critically appraise published reviews or perform reviews themselves.

Austin is one of those people who needs to survive through the destruction of others. The others, in Austin's case, include his successful elder brothers, Matthew, and the women who, one after the other, are so touchingly convinced that they can 'save' him. This is the story of the relentless struggle for survival of Austin, the accidental man.

An Accidental Man

'Here we drink three cups of tea to do business; the first you are a stranger, the second you become a friend, and the third, you join our family, and for our family we are prepared to do anything – even die.' Haji Ali, Korphe Village Chief, Karakoram mountains, Pakistan In 1993, after a terrifying and disastrous attempt to climb K2, a mountaineer called Greg Mortenson drifted, cold and dehydrated, into an impoverished Pakistan village in the Karakoram Mountains. Moved by the inhabitants' kindness, he promised to return and build a school. *Three Cups of Tea* is the story of that promise and its extraordinary outcome. Over the next decade Mortenson built not just one but fifty-five schools – especially for girls – in remote villages across the forbidding and breathtaking landscape of Pakistan and Afghanistan, just as the Taliban rose to power. His story is at once a riveting adventure and a testament to the power of the humanitarian spirit.

THE FANTASY BOOKTOK SENSATION! For fans of *Uprooted* and *For the Wolf* comes a dark, lushly gothic fantasy about a maiden who must unleash the monster within to save her kingdom—but the monster in her head isn't the only threat lurking. Elspeth needs a monster. The monster might be her. Elspeth Spindle needs more than luck to stay safe in the eerie, mist-locked kingdom she calls home—she needs a monster. She calls him the Nightmare, an ancient, mercurial spirit trapped in her head. He protects her. He keeps her secrets. But nothing comes for free, especially magic. When Elspeth meets a mysterious highwayman on the forest road, her life takes a drastic turn. Thrust into a world of shadow and deception, she joins a dangerous quest to cure the kingdom of the dark magic infecting it. Except the highwayman just so happens to be the King's own nephew, Captain of the Destriers...and guilty of high treason. He and Elspeth have until Solstice to gather twelve Providence Cards—the keys to the cure. But as the stakes heighten and their undeniable attraction intensifies, Elspeth is forced to face her darkest secret yet: the Nightmare is slowly, darkly, taking over her mind. And she might not be able to stop him.

Chained to the hold of a slave ship bound for the Caribbean, a terrified young girl's only comfort is the voice of a woman she can't see. She is told 'Anansi stories', tales of the crafty spider whose cunning and humorous tricks give the girl the resilience and wit she needs to survive. Moving and funny at the same time, Anansi carefully juxtaposes the savagery of the slave trade with the exuberance of traditional story telling. SuperScripts are tried and tested plays that will appeal to 11 - 16 year olds. Mostly written by professional playwrights and performed in public to popular acclaim, these plays are ideal for the English classroom and drama studio and are accompanied by an extensive range of original activities.

In 1920, Nora Waln arrived in China and was welcomed into the innermost daily life of the Lin family as a daughter in affection. Now in its second edition, the *MHRA Style Guide* is an indispensable tool for authors and editors of scholarly books, contributors to academic publications, and students preparing theses. The *Style Guide* succeeds the best-selling *MHRA Style Book*, five editions of which were published from 1971 to 1996. Though originally designed for use in connection with the publications of the Modern Humanities Research Association, the *Style Book* became a standard book of reference, particularly in the humanities, and has been adopted by many other authors, editors, and publishers. This new edition of the *Style Guide* has been revised and updated by a subcommittee of the MHRA. It provides comprehensive guidance on the preparation of copy for publication and gives clear and concise advice on such matters as spelling (including the spelling of proper names and the transliteration of Slavonic names), abbreviations, punctuation, the use of capitals and italics, dates and numbers, quotations, notes, and references. Chapters on indexing, the preparation of theses and dissertations, and proof correcting are also included.
