On October 14-19, 1990, the 6th International Conference on the Conservation of Earthen Architecture was held in Las Cruces, New Mexico. Sponsored by the GCI, the Museum of New Mexico State Monuments, ICCROM, CRATerre-EAG, and the National Park Service, under the aegis of US/ICOMOS, the event was organized to promote the exchange of ideas, techniques, and research findings on the conservation of earthen architecture. Presentations at the conference covered a diversity of subjects, including the historic traditions of earthen architecture, conservation and restoration, site preservation, studies in consolidation and seismic mitigation, and examinations of moisture problems, clay chemistry, and microstructures. In discussions that focused on the future, the application of modern technologies and materials to site conservation was urged, as was using scientific knowledge of existing structures in the creation of new, low-cost, earthen architecture housing.

Nowadays thousands of grammar books, textbooks, outlines, references and language guides of Spanish, Portuguese, Italian and French are published year by year. However, all of them teach these languages separately. Here you will find a comparative grammar of the four major Romance languages together based on their grammatical and lexical similarities for you, lovers of foreign languages, to learn and compare Spanish, Portuguese, Italian and French simultaneously. It is an audacious endeavor to find or create a novel way of learning to speak several languages and becoming a multilingual person. It took me over 3 years to finish the book. It consists of over 800 pages, 10 chapters covering all the grammatical aspects of these 4 languages. It includes over 1000 examples, 500 easy-to-follow charts and tables. It contains 138 geographical, historical and cultural facts about Spanish, Portuguese, Italian and French countries. Below I will discuss several reasons why I decided to write this book and why you need it. 1) First of all, this book is written for readers like you who are fond of or would like to learn Spanish, Portuguese, Italian and French simultaneously or just to get an all-round knowledge of all these four Romance languages. It is designed not only for beginners who do not have an extensive knowledge of grammar, yet need a guide through the grammatical concepts of all mentioned above languages, but also intermediate and advanced students who would like to have a reference book

of several Romance languages at once.2) Second of all I spent many years learning these languages separately, which was a complete waste of time before I realized it. This book will hopefully save you a great deal of time and allow you to study and compare at a glance the four main Neo-Latin languages.3) Knowledge of foreign languages is fast becoming a necessary requirement for those who are involved in international business, tourism, culture and education. This book offers you four languages to learn, which will make you feel at home wherever you go, whether as a tourist or businessman.4) Learning several languages simultaneously or one by one will train and strengthen your memory and can help stave off such terrible diseases as Alzheimer's.5) If you have never studied several languages at once before and you like challenges, then you should definitely try it. Because it is a really entertaining and challenging task to do. In conclusion, I would like to sincerely thank you for preordering the book and your interest in it. I hope it will help you improve your languages and become multilingual.

Because they list all the public holidays and pagan festivals of the age, calendars provide unique insights into the culture and everyday life of ancient Rome. The Codex-Calendar of 354 miraculously survived the Fall of Rome. Although it was subsequently lost, the copies made in the Renaissance remain invaluable documents of Roman society and religion in the years between Constantine's conversion and the fall of the Western Empire. In this richly illustrated book, Michele Renee Salzman establishes that the traditions of Roman art and literature were still very much alive in the mid-fourth century. Going beyond this analysis of precedents and genre, Salzman also studies the Calendar of 354 as a reflection of the world that produced and used it. Her work reveals the continuing importance of pagan festivals and cults in the Christian era and highlights the rise of a respectable aristocratic Christianity that combined pagan and Christian practices. Salzman stresses the key role of the Christian emperors and imperial institutions in supporting pagan rituals. Such policies of accommodation and assimilation resulted in a gradual and relatively peaceful transformation of Rome from a pagan to a Christian capital.

The Art of French Cookery

- The essential guide to this underrated but increasingly popular fortified wine - Perfect for every serious wine drinker but also the armchair traveler and those who want to understand how sherries are made - Written by one of the most well-regarded wine writers on the subject - Beautifully designed and highly illustrated to tell the story of the wines, the makers and the region Made in a unique way, matured in cellars dating back to the age of the Conquistadores, and bursting with a panoply of sun-drenched flavors, Sherry has - due to a succession of scandals and bad luck in the 1970s - been maligned and misunderstood. But the Sherry scene is set for seismic change. With a series of new styles, new vineyards and a dynamic new crop of cellar masters, this wine is creating a revolution in the world's restaurants that can't be ignored. Ben Howkins, in colorful words and equally evocative pictures, delves deep into sherry's fascinating story and reveals why it is set to come back into our lives with a magnificent flourish! "With over 3,000 years of history behind it, the future of Sherry lies in its past. Sommeliers admire it for its many varieties and Ben Howkins' book will tell you why." - Steven Spurrier

The American Plant Migration ...

A throwaway comment about a universally hated judge, "Where is Lee Harvey Oswald, when we need him," lands attorney Dennis McCauley in deep trouble when his alcohol-fueled statement comes hours before the judge is gunned down. The evidence of his guilt is overwhelming. Powerful forces in politically conservative Orange County are mobilized against McCauley, a maverick with a well-documented history of taking action into his own hands. A scandal-plagued sheriff, a career-driven district attorney, and a corrupt cop conspire to bring McCauley down. McCauley's life becomes a nightmare as he seeks to prove his innocence and save his life and his law practice. He enlists the aid of a savvy former cop and a beautiful, former prosecutor. The defense team must unravel a mosaic of corrupt judges, crooked politicians, and the power brokers who control them to prevent McCauley from facing the death penalty. They have a few hopes to solve the case, but no guarantees. As McCauley's defense team maneuvers to protect him and his reputation, a not-guilty verdict is not enough. They intend to uncover the plot and prosecute the real culprit. But the killer has struck before, and there's nothing to stop him now.

Compassionate conservatism is a new political force in the land, sweeping the grassroots of people of all faiths, races, and ethnicities. In its parts it offers solutions to many of our most intractable problems; in its whole it is nothing less than an innovative philosophy of government. No author is more qualified to explain its power and promise than Marvin Olasky, described by The New York Times as "the godfather of compassionate conservatism." Compassionate conservatism offers a new paradigm for how the government can and should intervene in the economy. It begins with a long-lost premise about human behavior: economics, by itself, is not what changes lives. Only faith, and deeply held beliefs, can do that. For decades government has focused only on material well-being, ignoring the passions and convictions that make life worth living. What is conservative about the new movement is that its leaders also know that government cannot instill these beliefs. What it can do is help them flourish. It can give aid, inspiration, and direction to America's natural "armies of compassion" that have been a hallmark of our history since the founding. Compassionate conservatism offers a way to transcend the root problems that currently oppress too many deserving Americans. It offers a unique vision of the triangular relationship between the state, our many churches, and our tens of thousands of charities. It is a true reinvention of welfare, a wholesale revolution in the welfare state, and a redefinition of the social safety net. In *Compassionate Conservatism* Marvin Olasky takes us on a road trip with his son, Daniel, across the country, showing exactly how the new movement is unfolding. Along the way, he offers a set of principles, and a brief tour through history to show that these are not so much radically new ideas as rediscoveries of long-lost wisdom. Read this book for a blueprint of the future of politics and welfare in America.

This unique volume provides new perspectives on assessing the performance of nonprofit organizations whilst meeting the information needs of decision-makers, both internal (such as resource-providers, regulators and clients), and external (including boards, managers, staff and volunteers). Whilst most discussions of accountability focus exclusively on financial accountability, this title offers a significant contribution to a relatively untouched area by combining the treatment of both evaluation and accountability from a managerial perspective. With increased interest in the concept that nonprofit organizations must be accountable, this topical volume fills a gap in the literature that postgraduates and scholars of business studies and management will find invaluable.

Cognitive Linguistics, the branch of linguistics that tries to "make one's account of human language accord with what is generally known about the mind and the brain," has become one of the most flourishing fields of contemporary linguistics. The chapters address many classic topics of Cognitive Linguistics. These topics include studies on the semantics of specific words (including polysemy and synonymy) as well as semantic characteristics of particular syntactic patterns / constructions (including

constructional synonymy and the schematicity of constructions), the analysis of causatives, transitivity, and image-schematic aspects of posture verbs. The key characteristic of this volume is that all papers adopt the methodological perspective of Corpus Linguistics, the rapidly evolving branch of linguistics based on the computerized analysis of language used in authentic settings. Thus, the contributions do not only all provide various new insights in their respective fields, they also introduce new data as well as new corpus-based and quantitative methods of analysis. On the basis of their findings, the authors discuss both theoretical implications going well beyond the singular topics of the studies and show how the discipline of Cognitive Linguistics can benefit from the rigorous analysis of naturally-occurring language. The languages which are investigated are English, German, Dutch, and Russian, and the data come from a variety of different corpora. As such, the present volume will be of interest to a wide range of scholars with many different foci and interests and should pave the way for further integration of usage-based techniques of analysis within this exciting paradigm.

Fulk's Comparative Grammar offers an overview of and bibliographical guide to the study of the phonology and the inflectional morphology of the earliest Germanic languages, with particular attention to Gothic, Old Norse / Icelandic, Old English, Old Frisian, Old Saxon, and Old High German, along with some attention to the more sparsely attested languages. The sounds and inflections of the oldest Germanic languages are compared, with a view to reconstructing the forms they took in Proto-Germanic and comparing those reconstructed forms with what is known of the Indo-European protolanguage. Students will find the book an informative introduction and a bibliographically instructive point of departure for intensive research in the numerous issues that remain profoundly contested in early Germanic language history.

Is it possible to advance democracy by empowering ordinary citizens to make key decisions about the design of political institutions and policies? In 2004, the government of British Columbia embarked on a bold democratic experiment: it created an assembly of 160 near-randomly selected citizens to assess and redesign the province's electoral system. The British Columbia Citizens' Assembly represents the first time a citizen body has had the power to reform fundamental political institutions. It was an innovative gamble that has been replicated elsewhere in Canada and in the Netherlands, and is gaining increasing attention in Europe as a democratic alternative for constitution-making and constitutional reform. In the USA, advocates view citizens' assemblies as a means for reforming referendum processes. This book investigates the citizens' assembly in British Columbia to test and refine key propositions of democratic theory and practice.

In 2002, a neo-fascist party nearly seized control of the French government in an electoral shocker. The Mistral was conceived to expose the roots of that movement, which still exists today. Noel Marquis, a beautiful young woman, is aided by Jean Francois, a former boyfriend; Father Routhier, a Catholic priest in the historic tradition of Cardinal Richelieu; and Lieutenant Flanagan, a retired detective in tracing her father's mysterious life through three decades and across two continents. But Noel becomes the target of a fascist killer when she unearths the conspiracy to murder her uncle and the attempted assassination of her father, Marius Marquis. With Noel's support, Marius can finally understand a thirty-year-old plot—the by-product of a political malignancy that caused his wife's death—and start on a journey that will transform his life. From Algeria, the south of France, the United States, and Canada, The Mistral is a thrilling story of mystery, love, and international political conspiracy on both sides of the Atlantic.

Designing Deliberative Democracy

Comparative Grammar of Italian and French

A growing part of the public is concerned about cities being designed and governed in a responsible way. In the contemporary information society, however, the democratic obligation of the citizens to inform themselves thoroughly, so that they can participate in public affairs has become impossible to fulfill. Rather than submitting to the opinions of self-proclaimed experts, citizens need new ways to make sense of what is going on around them. Accountability technologies stand for new innovative approaches to bottom-up governance: technologies to monitor those in power and hold them accountable for their actions. Accountability technologies are designed to coordinate citizen-led data collection, visualization and analysis in order to achieve social change. This book takes a close look at initiatives that have succeeded in making an impact on the reality of the city, as well as the motivations, strategies and tactics of the people who create and use these technologies. How can data generated by citizens be put into action?
