The Conception of God in the Later Royce

Dr. Jarvis kindly invited me to undertake this Foreword. According to his suggestion, I here intend to complement his work by creating a context for it. To do so, prior notice of a common misrepresentation of Royce and of his contemporary relevance seems needed, before briefly sketching his biography and interest in religion. Finally, to orient the reader to the present study, I will point out Royce's main works and the spirit of the man. In the year 2150 A. D. , what will people be saying about Harvard? If the reported prediction of a self-effacing William James comes true, the common answer will be, "Harvard? Oh, that's the place where Royce taught. " And yet, now that almost a century has passed since Royce began teaching at Harvard, most Americans do not recognize the name "Josiah Royce. " Of those who do, few know him as a significant American philosopher of community. And of these few, far fewer recall either that religious problems first drove Royce to philosophy or that he said such problems "of all human interests, deserve our best efforts and our utmost loyalty. " 1 Little wonder, then, that when Americans survey our "classic" philosophers-Peirce, James, Royce, Santayana, Dewey, Whitehead-few of them respond to Royce as the most explicitly and persistently religious philosopher of them all. Fortunately, however, popularity contests do not accurately weigh the merit of a philosopher.

THE CONCEPTION OF GOD IN THE LATER ROYCE.

This book contends that Josiah Royce bequeathed to philosophy a novel idealism based on an ethico-religious insight. This insight became the basis for an idealistic personalism, wherein the Real is the personal and a metaphysics of community is the most appropriate approach to metaphysics for personal beings, especially in an often impersonal and technological intellectual climate. The first part of the book traces how Royce constructed his idealistic personalism in response to criticisms made by George Holmes Howison. That personalism is interpreted as an ethical and panentheistic one, somewhat akin to Charles Hartshorne's process philosophy. The second part investigates Royce's idealistic metaphysics in general and his ethico-religious insight in particular. In the course of these investigations, the author examines how Royce's ethico-religious insight could be strengthened by incorporating the philosophical theology of Dr. Reverend Martin Luther King, Jr., and Emmanuel Levinas's ethical metaphysics. The author concludes by briefly exploring the possibility that Royce's

progressive racial anti-essentialism is, in fact, a form of cultural, antiblack racism and asks whether his cultural, antiblack racism taints his ethico-religious insight.

The Dictionary of Modern American Philosophers includes both academic and non-academic philosophers, and a large number of female and minority thinkers whose work has been neglected. It includes those intellectuals involved in the development of psychology, pedagogy, sociology, anthropology, education, theology, political science, and several other fields, before these disciplines came to be considered distinct from philosophy in the late nineteenth century. Each entry contains a short biography of the writer, an exposition and analysis of his or her doctrines and ideas, a bibliography of writings, and suggestions for further reading. While all the major post-Civil War philosophers are present, the most valuable feature of this dictionary is its coverage of a huge range of less well-known writers, including hundreds of presently obscure thinkers. In many cases, the Dictionary of Modern American Philosophers offers the first scholarly treatment of the life and work of certain writers. This book will be an indispensable reference work for scholars working on almost any aspect of modern American thought.

The Conception of God

This study traces the critique of Enlightenment modernism that began with Ralph Waldo Emerson and culminated in the thought of Charles Sanders Peirce and the mature Josiah Royce. Varieties of Transcendental Experience argues that these thinkers provide a constructive alternative to deconstructionist postmodernism that is compatible with the Christian faith.

Dictionary of Modern American Philosophers

Hegel's philosophy of religion is a philosophical theology in which God is conceived as a movement of inclusive divine subjectivity - ultimately God inclusive of the world. For Hegel, this inclusive divine subjectivity took the form of a movement of conceptual thought. In an effort to work with Hegel while going beyond him, *Experience and Spirit* presents God as a movement of inclusive divine subjectivity; however, that movement is understood to be not one of thought but of enriching experience and, thus, of spirit. This argument in favor of a renewed understanding of Hegel's true infinite proceeds in three major steps: first, a consideration of Hegel's own problematic proposal; second, the elaboration of a fuller and more contemporary notion of experience; and, third, three constructive phenomenological and philosophical reflections on basic questions in philosophical theology, namely, the experience of God, speaking about God, and the notions of evil, freedom, and mystery. In the end, *Experience and Spirit* proposes a philosophy of generosity, both human and divine.

The Conception of God

Josiah Royce and William James lived in Cambridge, Massachusetts, on Irving Street, just two doors apart, and Charles Peirce grew up only blocks away. John Dewey was born and educated in nearby Vermont. These four great thinkers shared more than geographic space; they engaged in a series of formative philosophical discussions. By tracing the interactions of Royce (1855–1916) with James, Peirce, and Dewey, Oppenheim "re-imagines pragmatism" in a way that highlights the late Royce's role as mediator and favors the "seed-plant" image of O. W. Holmes, Jr., over the corridor image of Papini. Josiah Royce emphasized that communities of all sizes—ranging from families to towns—needed "reverence for the relations of life" not only to thrive but to survive. This theme permeates the dialectic of Royce's interactions with Peirce, James, and Dewey. Oppenheim analyzes the agreement and disagreement of these thinkers on the method and content of philosophy, skepticism and intelligibility, and nominalism and intentionality, as he uncovers their varied stances toward transcendent Reality. Oppenheim repudiates Ralph Barton Perry's tactic of using Royce as a foil to display James positively, by offering a richer portrait of Royce. Oppenheim calls attention to Royce's "doctrine of two levels" and its effects on the distinction of human and super-human, by showing the contrast of Royce's "third attitude of will" against two primarily self-centered attitudes of will, and by examining the roles of Spirit, Community, and semiotic process in Royce's late thought.

CONCEPTION OF GOD

This Dictionary provides detailed accounts of the lives, works, influences and receptions of the most important philosophers of the twentieth century. Over 1000 entries give both biographical and bibliographical information.

The Conception of God

One Hundred Twentieth-Century Philosophers offers biographical information and critical analysis of the life, work and impact of some of the most significant figures in philosophy this century. Taken from the acclaimed Biographical Dictionary of Twentieth-Century Philosophers, the 100 entries are alphabetically organised, from Adorno to Zhang Binglin, and cover individuals from both continental and analytic philosophy. The entries have an identical four-part structure making it easy to compare and contrast information, comprising: * biographical details * a bibliography of major works * a listing of relevant secondary and critical literature * an appraisal of the philosopher's thoughts and achievements. A separate glossary provides an introduction to the origins, development and main features of major philosophical schools and movements and offers select bibliographies to guide the reader to further research.

Royce's Metaphysics

"This Handbook provides a structured overview of William James's intellectual work. James was a pioneer of the "new" physiological psychology of the late nineteenth century. He was also a founder of the pragmatist movement in philosophy and made influential contributions to metaphysics and to the study of religion as well. This Handbook's chapters are organized either around major themes in James's writing or around his conversations with interlocutors"--

Biographical Dictionary of Twentieth-century Philosophers

Prize-winning biographer Richardson has written the definitive work on the fascinating William James, whose life and writing put an indelible stamp on psychology, philosophy, teaching, and religion--and on modernism itself.

One Hundred Twentieth-Century Philosophers

W.J. Mander examines the nature of idealist ethics: the form and content of ethical belief most typically adopted by philosophical idealists. He identifies a tradition of idealist ethics, before going on to argue that such an approach offers an attractive way of looking at moral questions and has much to contribute to contemporary discussion.

The Conception Of God

A mere two hundred years old, Mormonism is still in its infancy compared to other theological disciplines (Judaism, Catholicism, Buddhism, etc.). This volume will introduce its reader to the rich blend of theological viewpoints that exist within Mormonism. The essays break new ground in Mormon studies by exploring the vast expanse of philosophical territory left largely untouched by traditional approaches to Mormon theology. It presents philosophical and theological essays by many of the finest minds associated with Mormonism in an organized and easy-to-understand manner and provides the reader with a window into the fascinating diversity amongst Mormon philosophers. Open-minded students of pure religion will appreciate this volume's thoughtful inquiries. These essays were delivered at the first conference of the Society for Mormon Philosophy and Theology. Episode 1.3: Deductive and Inductive Arguments - Episode 1.3: Deductive and Inductive Arguments by Center for Innovation in Legal Education 539,290 views 10 years ago 12 minutes - This episode covers two major types of arguments: deductive and inductive. Script by David Plumlee and Jessica Taverna.

Deductive and Inductive Arguments

Example 1: Where to go for dinner?

Red Iguana open until 10pm; Cafe Trang until 9pm.

Example 2: How many classes to take?

Facts and opinions have different relationships with the conclusions drawn.

If acceptance of the conclusion depends on the strength of the premises...

When dealing with deductive arguments, do not start with the conclusion

When making a deductive argument avoid picking out your conclusion ahead of time.

Are the premises true?

The evaluation process is different than deductive arguments

Is the premise sufficient to justify the conclusion?

Inductive arguments take on many forms.

Generalizations: where arguments involve making a general claim based on limited or specific evidence.

Analogies: drawing conclusions about one situation based on what you know about another

General Principles: opposite of generalizations. Involve applying general principles to a specific case
