Ever Considered Making a Switch To a Different Business? What If You Could Work From The Comfort of Your Own Home, What if You Had The Chance of Being Your Own Boss? People often confuse MLM with pyramid marketing; however there is very clear distinction between the two approaches: pyramid marketing is about getting your money and then using you to recruit other distributors; MLM, on the other hand, is about moving the product through a larger network of distributors so that the business can increase sales volume. Another difference between MLM and pyramid marketing is that Pyramid marketing requires each level to DOUBLE before a new level is created so it isn't fair to people lower down in the levels and also unethical. MLM, however, awards a commission based upon the volume of product sold through own sales efforts as well as that of the down line organization. Since MLM faces the risks of initiating a business that has not been tested by the customers is not recognized, people prefer to wait a couple of years before joining. Hence, they also witness the company's track-record and reliability. "They" say that very few people achieve a high level of success in network marketing; they are right. What they don't tell you is that very few people achieve a high level of success in all other businesses as well. Success has always been, and will always be, a factor of mastering and applying certain laws that the masses remain ignorant of. Having 20 years experience in traditional business and 10 years experience in network marketing, I began to discover that success as a network marketing entrepreneur has got very little to do with the products, the companies, the locations of business, the compensation plan, the ground floor opportunity or many of the other external reasons people site as the cause of success or failure. What I discovered is not sexy, not spoken off strongly enough and not celebrated. What is it you discovered Pedro? I am glad you asked! Success in network marketing and ANY other business is almost 95% dependent on inner factors that the entrepreneur has control of, neglect of which results in absolute failure. In this book, I walk you through the secrets of true success, secrets that are used by ALL network marketing legends and successful business persons. Without the knowledge of these laws, you will NEVER achieve a high level of success in network marketing or any other business, period! Here are the 7 laws of success you must master and apply in your network marketing business if you aspire to achieve a high level of success; they are all covered in depth in this book: The Law of Vision The Law of Self Confidence The Law of Personal Growth The Law of Network The Law of Massive Action The Law of Leadership The Law of Influence Master these laws, apply them in your business and watch yourself climb the ladder of unparalleled success, contribution and influence.

Secrets of Building a Million Dollars

This is a business book about networking that draws upon an age-old fairy tale for inspiration -- kissing frogs to find a prince. The book lays out the steps and secrets to build and maintain powerful, positive social networks. The steps are explained using an easy to remember acronym, N.E.T.W.O.R.K, with a chapter devoted to each letter. The secrets, revealed throughout the book, are the underlying philosophy and reflect the attitude of positive networkers. This book also marries the exciting new science of the "small-world" phenomenon (the importance of weak links and random connections) with

the art of networking. And, though it is a business book, the lessons learned apply to one's personal life, as well. Readers learn how to build powerful, positive social networks -- for both business and life. The book contains numerous networking stories based on the authors' personal experiences, techniques used by the great networkers, nuggets of practical networking information, end of chapter summaries for quick reference, and short, amusing frog fables to illustrate the points of each chapter. It is the practical field-guide to the art and science of networking.

The Frog and Prince

A woman's – or man's – total package isn't only about what you look like. Keli Len želd learned this lesson firsthand when her Paris modelling agent placed her on an unhealthy diet of orange juice and water. Since then, she has fought to make "diet" a naughty word in her vocabulary and yours. "For whatever reason, we all have something about ourselves we don't like. I figure this is one of the cons of being part of the human race," she writes in her first book, *Everyone Is A Supermodel: Secrets For Any Career Based On My Modelling Experiences*. "How we were born gets painted, prodded, wax, buffed and injected to either look like someone else or believe we will be happier when we look in the mirror." But there is more to making it in life than a body confidence pep talk. You need to impress a potential boss, prepare a positive social media image, craft an impeccable resume and nail a job interview. Invited to an impromptu event where you'll network further? You need to be ready for that too. Readers can count on additional advice from successful industry professionals, such as Marie Claire Australia's national advertising manager Anne-Marie Clarke, popular turntable goddess DJ Dakota and London-based PR executive Nicole Crowley.

Join up your 'real life' and online networking Measure your networking success Follow up with new contacts successfully "This is a cornerstone book for anyone involved in running a smaller business and wishing to deploy networking as an enquiry source. It is clear, concise and provides a complete education for succeeding in, what is for some, a difficult environment." Ben Kench, Leading UK sales trainer and business growth specialist "I've read this entire book from start to finish and so should you because, when you know what you're doing, business networking does work, and by following the blueprint that Stef has set down for you: first you'll learn, then you'll earn." Brad Burton, Managing Director, 4Networking Ltd.

Secrets of Building a Million-Dollar Network Marketing Organization

Do you know enough people who could refer work to you? Are you great at following up contacts from events you attend? Do you know the secrets of making a real impact on those you meet? Effective networking is vital to the success of organisations - and the individuals who work in them. Most people are poor networkers, but it's easy to improve your skills. By following John Timperley's simple networking strategies, and the techniques of the world's top connectors, you will quickly learn how to build your own network of useful contacts. Discover how to polish your communication skills, create a lasting impression, quickly build your network, use your contacts database effectively, enjoy your new friends and contacts - and maximise your chances of success.

Everyone Is A Supermodel: Secrets For Any Career Based On My Modelling Experiences

After realizing the massive importance of building a strong professional network, I began scouring the web, Amazon, and bookstores for resources. I found there were resources on related topics, such as interpersonal communication, but not many great resources on business networking specifically. I began asking everyone I know who has had a successful career, built a successful business, or simply knows a lot of people for their advice on how to build a professional network. After compiling the best advice I received, studying every relevant book and resource I could find, experimenting, and practicing, I learned a lot about how to effectively make new contacts and build relationships. I'm extremely excited to be sharing everything I've learned along the way in this book! For better or for worse, what you know, what you can do, or even your credentials, are often not as important as who you know. Your relationships can often be even more important than your qualifications! People prefer to do business with people they like and trust. Your relationships and professional network are extremely valuable in growing your business or developing your career. Whether it's forming partnerships for your company, finding a new job, acquiring clients, fundraising, seeking mentors, or recruiting talent for your company, your relationships can have an extreme positive or negative impact on your success. Your professional network can also be an amazing source for knowledge, information, expertise, and advice. For people who hate networking, it can seem like a chore. I hated networking too when I first started. After realizing how important it was, meeting some amazing people, and benefiting tremendously from it, I began to truly enjoy it. Networking doesn't have to be a dry exercise the way you may picture it if you don't make it so. I've compiled all of my lessons learned over years of practice study in to this book! I've written it to be completely thorough, yet to-the-point enough as to not waste your time. It's a combination of core philosophies as well as actionable tips and techniques. The philosophies and tactics I describe in this book have benefited my career tremendously.
