British Summer Time Begins is about summer holidays of the mid-twentieth century and how they were spent, as recounted to Ysenda Maxtone-Graham in vividly remembered detail by people who were there. Through this prism, it paints a revealing portrait of twentieth-century Britain in summertime: how we were, how families functioned, what houses and gardens and streets were like, what journeys were like, and what people did all day in their free time. It explores their expectations, hopes, fears and habits, the rules or lack of rules under which they lived, their happiness and sadness, their sense of being treasured or neglected - all within living memory, from pre-war summers to the late 1970s. Ysenda takes us back to the long stretch of time from the last days of June till the early days of September - those months when the term-time self was cast off and you could become the person you really were, and you had (if you were lucky) enough hours in the endless succession of days to become good at the things that would later define your adulthood. The 'showpiece' part of the summer holidays was 'the summer holiday', when families took off to the seaside, or to grandparents' houses teeming with cousins, or on early package holidays to France or Spain, siblings wedged into the back of small cars, roof-racks clattering, mothers preparing picnics. British Summer Time Begins is as much about the long weeks either side of that holiday as the trip itself: the weeks when nothing much officially happened, boredom often lurked nearby, and you vanished for hours on end, nobody much knowing or even caring where you were. Could it be that those unscheduled days were actually the most important and formative of your life? From the author of the beloved Terms & Conditions, British Summer Time Begins is a delightful, nostalgic and joyous celebration of summers.

'The girls' boarding school! What a ripe theme for the most observant verbal artist in our midst today - the absurdly undersung Ysenda Maxtone Graham, who has the beadiness and nosiness of the best investigative reporter, the wit of Jane Austen and a take on life which is like no one else's. This book has been my constant companion ever since it appeared' A. N. Wilson, Evening Standard When I asked a group of girls who had been at Hatherop Castle in the 1960s whether the school had had a lab in those days they gave me a blank look. 'A laboratory?' I expanded, hoping to jog their memories. 'Oh that kind of lab!' one of them said. 'I thought you meant a Labrador.' 'The cruel teachers. The pashes on other girls. The gossip. The giggles. The awful food. The homesickness. The friendships made for life. The shivering cold. Games of lacrosse, and cricket. 'The most brilliant, hilarious book. My book of the year' India Knight 'A wonderful book' Craig Brown, Mail on Sunday

The implicit questions that inevitably underlie German bioethics are the same ones that have pervaded all of German public life for decades: How could the Holocaust have happened? And how can Germans make sure that it will never happen again? In *Reasons of Conscience*, Stefan Sperling considers the bioethical debates surrounding embryonic stem cell research in Germany at the turn of the twenty-first century, highlighting how the country's ongoing struggle to come to terms with its past informs the decisions it makes today. Sperling brings the reader unmatched access to the offices of the German parliament to convey the role that morality and ethics play in contemporary Germany. He describes the separate and interactive workings of the two bodies assigned to shape German bioethics—the parliamentary Enquiry Commission on Law and Ethics in Modern Medicine and the executive branch's National Ethics Council—tracing each institution's genesis, projected image, and operations, and revealing that the content of bioethics cannot be separated from the workings of these institutions. Sperling then focuses his discussion around three core categories—transparency, conscience, and Germany itself—arguing that without fully considering these, we fail to understand German bioethics. He concludes with an assessment of German legislators and regulators' attempts to incorporate criteria of ethical research into the German Stem Cell Law.

With a stunning new cover look, King's chilling classic of a small new England town about to be engulfed in terror. Turn off the television - in fact, why don't you turn off all the lights except for the one over your favourite chair? - and we'll talk about vampires here in the dim. I think I can make you believe in them. Stephen King, from the Introduction. 'Salem's Lot is a small New England town with the usual quota of gossips, drinkers, weirdos and respectable folk. Of course there are tales of strange happenings - but not more than in any other town its size. Ben Mears, a moderately successful writer, returns to the Lot to write a novel based on his early years, and to exorcise the terrors that have haunted him since childhood. The event he witnessed in the house now rented by a new resident. A newcomer with a strange allure. A man who causes Ben some unease as things start to happen: a child disappears, a dog

is brutally killed - nothing unusual, except the list starts to grow. Soon surprise will turn to bewilderment, bewilderment to confusion and finally to terror . . .

This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence. Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world. Epistemologies of the South outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and life triumph against the logic of market-ridden greed and individualism.
