Parikh's Textbook of Medical Jurisprudence, Forensic Medicine & Toxicology, 6e (HB)

A Textbook of Medical Jurisprudence and Toxicology, Sixth Edition discusses medico-legal points concerning the different causes of death, examination of evidence, and crimes that merit medical attention and advice. The author reviews the legal procedures in criminal courts of medical jurisprudence, including the inquest procedures, the difficulties encountered in detecting crime, medical evidence, rules for presenting evidence, and the powers of criminal courts. The post-mortem examination concerns the external and internal examination of the deceased to establish identity (if unknown), to determine time and cause of death. Under the written orders of the court, an exhumation can take place when suspicions of foul play arises after death. The author discusses death in terms of somatic (physical) or molecular (tissues and cells dying individually after vital organs have stopped functioning). The book also describes in detail the primary modes of dying, namely, syncope, asphyxia, and coma. The book explains the medico-legal aspects of injuries, pregnancy, legitimacy, rape, miscarriage, infanticide, and insanity. This book is intended for medical students, but can also benefit students in law courses, and practitioners of legal jurisprudence and of the medical sciences.

Medical Jurisprudence, Forensic Medicine and Toxicology

Excerpt from Medical Jurisprudence, Forensic Medicine and Toxicology, Vol. 2 A medical Opinion or certificate may be required as to the danger of a given wound, and on this opinion may depend the question of bail for the prisoner. By the danger of a wound in such a case is usually meant imminent danger, as any wound may be remotely dangerous to life. Slight wounds, as already stated, may result fatally under certain conditions. Under the French practice a slight wound is one which does not incapacitate one from work for more than twenty days. Looked at in another way, slight or severe wounds may be classified according as they are completely curable, leaving no infirmity or disturbance Of function, or not completely curable. The latter are such as are necessarily followed by permanent or temporary infirmity. The question as to the severity of any given wound may sometimes be left to the jury to decide from the description of the wound, or a medical opinion may be required. Although the intent of the assailant is Often of equal or greater importance than the severity or kind of wound, yet this can only

occasionally be inferred from the surgical aspects of the wound. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
