Nasser

Gamal Abdel Nasser, architect of Egypt's 1952 Revolution, president of the country from 1956 to 1970, hero to millions across the Arab world since the Suez Crisis, was also a family man, a devoted husband and father who kept his private life largely private. In 1973, three years after his early passing at the age of 52, his wife Tahia wrote a memoir of her beloved husband for her family. The family then waited almost forty years, through the presidencies of Anwar Sadat and Hosni Mubarak, both unsympathetic to the memory of Nasser, before publishing Tahia's book in Arabic for the first time in 2011. Now this unique insight into the life of one of the giants of the twentieth century is finally available in English. Accompanied by more than eighty photographs from the family archive, many never before published, this historic book tells the story of Gamal and Tahia's life together from their marriage in 1944, through the Revolution and Gamal's career on the world stage, revealing an unknown and intimate picture of the man behind the president. "At 6:30am on the morning of July 23, 1952 there was a knock on the door. Tharwat Okasha shook my hand and congratulated me: 'The military coup has succeeded.' I asked him about Gamal. 'He is close by, not more than five minutes away at the General Command.' At 9:30am an officer called: he had come from the General Command at Kubri al-Qubba, sent by Colonel Gamal Abdel Nasser to tell me that he was fine and would not be home for lunch."

War Journal

This wry take on Kafka's novel *The Trial* revolves around its narrator's attempts to petition successfully the elusive ruling body of his country, known simply as "the Committee." Consequences for his actions range from the absurd to the hideous. Ibrahim offers an unbroken first-person narrative rendered in brief, crisp prose framed by a conspicuous absence of vivid imagery. Furthermore, the petitioner is a man without identity. The ideal antihero, he remains, as does his country, unnamed throughout the intricate plot with a locale suggestive of 1970s Cairo. The Committee pierces the inflammatory terrain between ordinary men, unbridled displays of power, and other broader concerns of the author's native Egypt. The novel's corrosive, shocking conclusion catapults satiric surrealism into a new realm.

Foreign Policy as Nation Making

In July 1956 Egyptian President Gamal Nasser nationalized the Suez Canal, causing immediate concern to Britain and France. They already opposed Nasser and were worried at the threat to maritime traffic in the Canal. This book traces the course of subsequent events. Together with Israel, Britain and France hatched a plot to occupy the Canal Zone and overthrow Nasser. Israel attacked Sinai, and Britain and France launched offensives throughout Egypt, but strategic failures overshadowed tactical success. Finally, Britain, France and Israel bowed to international pressure and withdrew, leaving the Suez Canal, and Egypt, firmly in the hands of President Nasser.

The Suez Crisis 1956

From his 1956 Suez triumph to the 1967 defeat, President Nasser of Egypt dominated the Arab revolution. Drawing on new Arabic material, this history casts a fresh light on Nasser's era and legacy of conflict and provides an essential background to developments in the contemporary Arab world.

Nasser at War

This book is at once the history of a remarkable and fascinating phenomenon--a British-style public school rooted in Egyptian soil boasting such alumni as King Hussein of Jordan, Omar Sharif, and Edward Said--and a reflection of the spirit of Alexandria during the first half of the twentieth century. Its publication in October 2002 is timed to coincide with the school's centenary. Victoria College, Alexandria, founded in October 1902, was named after the British queen Victoria, who had died the year before. It was the brainchild of a group of British businessmen who formed the nucleus of Alexandria's small British community. Deliberately fashioned as an independent, secular school, open to anyone who could afford its fees, it attracted the children both of the elite--royalty, diplomats, magnates, politicians, landowners--and of very ordinary people. Its pupils came not only from all over Egypt, but from the entire Middle East and beyond. This immensely readable history is, in the first place, a book about and for the Old Victorians. In a series of colorful sketches, backed by plentiful quotation from documents in the school archives, a series of engaging and distinguished characters come to life, not least Victoria's first two headmasters, C.R. Lias and his successor R.W.G. Reed--the two men whose enlightened vision and skillful leadership made the school what it was. Yet at the same time, this is a book whose appeal extends far beyond its immediate subject matter. In the process of putting together the story of a school, the authors have uncovered a wealth of material that will interest Middle East and postcolonial scholars as well as educationists, social historians, and students of human nature.

"Post is a pioneer in the field of political-personality profiling. He may be the only psychiatrist who has specialized in the self-esteem problems of both Osama bin Laden and Saddam Hussein."--The New Yorker "Policy specialists and academic scholars have long agreed that for U.S. leaders to deal effectively with other actors in the international arena, they need images of their adversaries. Leaders must try to see events, and, indeed, their own behavior, from the perspective of opponents.... Faulty images are a source of misperceptions and miscalculations that have often led to major errors in policy, avoidable catastrophes, and missed opportunities. History supplies all too many examples."--from the Foreword What impels leaders to lead and followers to follow? How did Osama bin Laden, the son of a multibillionaire construction magnate in Saudi Arabia, become the world's number-one terrorist? What are the psychological foundations of man's inhumanity to man, ethnic cleansing, and genocide? Jerrold M. Post contends that such questions can be answered only through an understanding of the psychological foundations of leader personality and political behavior. Post was founding director of the Center for the Analysis of Personality and Political Behavior for the CIA. He developed the political personality profiles of Menachem Begin and Anwar Sadat for President Jimmy Carter's use at the Camp David talks and initiated the U.S. government's research program on the psychology of political terrorism. He was awarded the Intelligence Medal of Merit in 1979 for his leadership of the center. In this book, he draws on psychological and personality theories, as well as interviews with individual terrorists and those who have interacted with particular leaders, to discuss a range of issues: the effects of illness and age on a leader's political behavior; narcissism and the relationship between followers and a charismatic leader; the impact of crisis-induced stress on policymakers; the mind of the terrorist, with a consideration of "killing in the name of God"; and the need for enemies and the rise of ethnic conflict and terrorism in the post-Cold War environment. The leaders he discusses include Fidel Castro, Osama bin Laden, Saddam Hussein, Kim Jong Il, and Slobodan Milosevic.

Social Studies Success Class 5

Over sixteen extraordinary days in October and November 1956, the twin crises of Suez and Hungary pushed the world to the brink of a nuclear conflict and what many at the time were calling World War III. *Blood and Sand* is a revelatory new history of these dramatic events, for the first time setting both crises in the context of the Arab-Israeli conflict, and the treacherous power politics of imperialism and oil. *Blood and Sand* tells this story hour by hour, with a fascinating cast of characters including Gamal Abdel Nasser, Anthony Eden, Dwight D. Eisenhower, Nikita Khrushchev, Christian Pineau, Imre Nagy and David Ben-Gurion. It is a tale of conspiracy and revolutions, spies and terrorists, kidnappings and assassination plots, the fall of the British Empire and the rise of American hegemony. *Blood and Sand* is essential to our understanding of the modern Middle East and resonates powerfully with the problems of oil control, religious fundamentalism and international unity that face the world today.

Hearings, Reports and Prints of the Senate Committee on the Judiciary

This is a fact based captivating narrative about the life of a Mossad operative whose destiny has been decided for him through extraordinary circumstances. His world of subterfuge and deceit kept him from

experiencing love, and his motive for living was revenge. David Parker searched for adventure in life, but instead he discovered that profound hatred ruled, and it became a threat to his very existence. As a young Christian from Seattle, he knew nothing about the Jews and Israel's fight for survival, but after he converted to Judaism he found himself battling an evil entity so malevolent and dedicated to the destruction of the young Jewish state, that he threw himself into his work in an endeavor to annihilate the enemy first. His mission as an assassin for the illustrious Mossad became his obsession and in the end he became a shell of his former self. A global consensus was that Radical Islam and their methods of terror had to be defeated for a free world to exist. This young man's dedication to that precise cause destroyed whatever sense of decency he had, and what could have been a promising life became a life of torment and regret.

DIV Born in 1883, King Faisal I of Iraq was a seminal figure not only in the founding of the state of Iraq but also in the making of the modern Middle East. In all the tumult leading to the dissolution of the Ottoman Empire and the establishment of new Arab states, Faisal was a central player. His life traversed each of the important political, military, and intellectual developments of his times./div This comprehensive biography is the first to provide a fully rounded picture of Faisal the man and Faisal the monarch. Ali A. Allawi recounts the dramatic events of his subject's life and provides a reassessment of his crucial role in developments in the pre- and post-World War I Middle East and of his lasting but underappreciated influence in the region even 80 years after his death. A battle-hardened military leader who, with the help of Lawrence of Arabia, organized the Arab Revolt against the Ottoman Empire; a leading representative of the Arab cause, alongside Gertrude Bell, at the Paris Peace Conference of 1919; a founding father and king of the first independent state of Syria; the first king of Iraq—in his many roles Faisal overcame innumerable crises and opposing currents while striving to build the structures of a modern state. This book is the first to afford his contributions to Middle East history the attention they deserve.

The Poetics of Military Occupation

Egypt came to govern Gaza as a result of a war, a failed effort to maintain Arab Palestine. Throughout the twenty years of its administration (1948–1967), Egyptian policing of Gaza concerned itself not only with crime and politics, but also with control of social and moral order. Through surveillance, interrogation, and a network of local informants, the police extended their reach across the public domain and into private life, seeing Palestinians as both security threats and vulnerable subjects who needed protection. Security practices produced suspicion and safety simultaneously. *Police Encounters* explores the paradox of Egyptian rule. Drawing on a rich and detailed archive of daily police records, the book describes an extensive security apparatus guided by intersecting concerns about national interest, social propriety, and everyday illegality. In pursuit of security, Egyptian policing established a relatively safe society, but also one that blocked independent political activity. The repressive aspects of the security society that developed in Gaza under Egyptian rule are beyond dispute. But repression does not tell the entire story about its impact on Gaza. Policing also provided opportunities for people to make claims of government, influence their neighbors, and protect their families.

Redemption Denied

No leader of modern times was more unique and more uniquely national than Charles de Gaulle. As founder and first President of the Fifth Republic, General de Gaulle saw himself 'carrying France on my shoulders'. When he first emerged on to the world stage in 1940, his insistence that he spoke for his nation might well have appeared impossibly arrogant for a recently promoted junior general

who had never been elected to anything. But he personified many of the traits of his country which fascinate the rest of the world - its pride in itself, its intransigence, its historical and cultural heritage and its quasi-religious belief in the state. Le Général, as he became known from 1940 on, appeared as if carved from a single monumental block, but was, in fact, extremely complex, a man with deep personal feelings and recurrent mood swings, devoted to his family and often seeking reassurance from those around him. Though insisting on discipline and loyalty from others, he was a great rebel. A grand visionary with a vast geo-political grasp and elephantine memory, he was also a supreme tactician with a taste for secrecy and the ability to out-flank opponents. This is a magisterial, sweeping biography of one of the great leaders of the twentieth century and of the country with which he so identified himself. Written with terrific verve and narrative skill, and yet rigorous and detailed, it brings alive as never before the private man as well as the public leader through exhaustive research and astute analysis.

Faisal I of Iraq

For more than 60 years, hundreds of thousands of Palestinians have lived as Israeli citizens within the borders of the nation formed at the end of the 1948 conflict. Occupying a precarious middle ground between the Jewish citizens of Israel and the dispossessed Palestinians of the West Bank and the Gaza Strip, the Israeli Palestinians have developed an exceedingly complex relationship with the land they call home; however, in the innumerable discussions of the Israel-Palestine problem, their experiences are often overlooked and forgotten. In this book, historian Ilan Pappé examines how Israeli Palestinians have fared under Jewish rule and what their lives tell us about both Israel's attitude toward minorities and Palestinians' attitudes toward the Jewish state. Drawing upon significant archival and interview material, Pappé analyzes the Israeli state's policy towards its Palestinian citizens, finding discrimination in matters of housing, education, and civil rights. Rigorously researched yet highly readable, *The Forgotten Palestinians* brings a new and much-needed perspective to the Israel-Palestine debate.

Bilharzia

The great medieval necropolis of Cairo, comprising two main areas that together stretch twelve kilometers from north to south, constitutes a major feature of the city's urban landscape. With monumental and smaller-scale mausolea dating from all eras since early medieval times, and boasting some of the finest examples of Mamluk architecture not just in the city but in the region, the necropolis is an unparalleled--and until now largely undocumented--architectural treasure trove. In *Architecture for the Dead*, architect Galila El Kadi and photographer Alain Bonnamy have produced a comprehensive and visually stunning survey of all areas of the necropolis. Through detailed and painstaking research and remarkable photography, in text, maps, plans, and pictures, they describe and illustrate the astonishing variety of architectural styles in the necropolis: from Mamluk to neo-Mamluk via baroque and neo-pharaonic, from the grandest stone buildings with their decorative domes and minarets to the humblest--but elaborately decorated--wooden structures. The book also documents the modern settlement of the necropolis by families creating a space for the living in and among the tombs and architecture for the dead.

Apartment Called Freedom

For too long Egypt's system of government was beholden to the interests of the elite in power, aided by the massive apparatus of the security state. Breaking point came on 25 January 2011. But several years after popular revolt enthralled a global audience, the struggle for democracy and basic freedoms are far from being won. *Media, Revolution, and Politics in Egypt: The Story of an Uprising* examines the political and media dynamic in pre-and post-revolution Egypt and what it could mean for the country's democratic transition. We follow events through the period leading up to the 2011 revolution, eighteen days of uprising, military rule, an elected president's year in office, and his ouster by the military. Activism has expanded freedoms of expression only to see those spaces contract with the resurrection of the police state. And with sharpening political divisions, the facts have become amorphous as ideological trends cling to their own narratives of truth.
