

Gcse Biology Papers Test Edexcel

[#GCSE Biology past papers Edexcel](#) [#Edexcel GCSE Biology revision notes](#) [#GCSE Biology exam practice questions](#) [#Biology GCSE study materials Edexcel](#) [#Edexcel GCSE Biology mock exams](#)

Prepare thoroughly for your GCSE Biology exams with our comprehensive collection of Edexcel past papers and practice tests. These resources are designed to help you understand the exam format, identify key topics, and improve your grades, making your Edexcel GCSE Biology revision highly effective.

Our academic journal archive includes publications from various disciplines and research fields.

Welcome, and thank you for your visit.

We provide the document Edexcel Gcse Biology Past Papers you have been searching for.

It is available to download easily and free of charge.

Across countless online repositories, this document is in high demand.

You are fortunate to find it with us today.

We offer the entire version Edexcel Gcse Biology Past Papers at no cost.

Gcse Biology Papers Test Edexcel

Intro

The spread of particles from an area of high concentration to an area of low concentration is called...

Which of the following is not found in a bacterial cell?

Which of these features make the alveoli efficient at gas exchange?

Before mitosis what happens inside the cell?

What is a cell called when it has differentiated?

A sperm cell and muscle cell do a lot of movement. Which substructures would these types of cell contain many of?

To calculate magnification, which of the following equations would you use?

Active transport is when a cell absorbs minerals against the concentration gradient. True or false?

Which of these specialised cells is hollow, forms tubes and is involved in the transport of water?

The movement of water molecules across a partially permeable membrane from a region of high water concentration to a region of lower water concentration is known as...

Which of these is not an adaptation of exchange surfaces that increase the efficiency of diffusion?

Sperm cells contain an acrosome in the tip of its head. This helps the sperm to penetrate the egg. What does the acrosome contain?

What colour does iodine solution change to in the presence of starch?

What is the name of the cells that are responsible for controlling the opening and closing of stomata?

Which of the following is responsible for emulsifying fats and neutralising stomach acid?

Which of these blood vessels has valves to prevent the backflow of blood?

Which substance is broken down by amylase?

Which of the following chemicals would you use to test for the presence of protein?

This organ is where digested food is absorbed into the blood..

Amino acids are formed from the digestion of which food group? a Protein

The name of the drug used to reduce the amount of bad LDL cholesterol in the blood is...

The movement of dissolved food molecules through the phloem tissue is...

Palisade cells are found in the leaf. Which of these characteristics help them to carry out photosynthesis?

What device can be fitted in a narrowed artery to allow blood to flow more freely?

A microorganism that causes disease is known as...

Painkillers are used to kill pathogens. True or false?

Which of these diseases is not spread by sexual contact?

Malaria is caused by a protist. The protist gets carried by mosquitoes when they feed on an infected animal. What term best describes the mosquito?

Which of the following is not a method that white blood cells use to defend against pathogens?

Which drug is used to treat an irregular heartbeat?

Clinical testing involves a blind and double blind trials. Which of the following best describes a double blind trial?

Rose black spot causes purple or black spots to develop on leaves. This usually makes the leaves turn yellow and drop early. What type of pathogen causes rose black spot?

Which drug originates from willow bark and leaves?

How does the stomach help defend against pathogens?

Which of the following would be a treatment for gonorrhoea?

A drug's effectiveness at treating an illness is known as its...

Which of the following is not a limiting factor of photosynthesis?

Pondweed is useful for providing an easy way to determine how different factors affect the rate of photosynthesis. How would you use pondweed to measure the rate of photosynthesis?

Other than carbon dioxide what other product is produced during fermentation in yeast?

During anaerobic respiration lactic acid can build up in the muscles. What is needed to react with the lactic acid to remove it from the cells?

A product of photosynthesis is glucose. Which of the following is not a use of glucose in plants?

What type of molecule is formed from combining glucose molecules with nitrate ions?

When there are high levels of lactic acid which organ converts lactic acid back into glucose?

The sum of all the reactions that happen in a cell or body is known as...

Which type of respiration transfers the most energy?
