The Stress Rescue offers practical techniques and strategies to effectively manage and alleviate stress. Learn how to identify your stress triggers, implement relaxation exercises, and develop coping mechanisms to improve your overall well-being and achieve a greater sense of calm amidst life's challenges.

Cognitive Grief Therapy

Knowledge, skills, and intervention strategies for the treatment of individuals, couples, and families who have experienced a loss through death of their loved one.

Cognitive Grief Therapy

In successful grief therapy, a healthy psyche copes with the stress of loss by maintaining high functioning in day-to-day life while constructing a positive inner relationship with the deceased. Ruth Malkinson shows professionals how to achieve these aims in the context of brief cognitive therapy with individuals, couples, and families.

Third-Wave Cognitive Therapy for the Treatment of Loss and Grief

This book proposes and explores a novel conceptualisation of the grieving process grounded in evolutionary psychology that integrates cognitive behavioural approaches such as compassion focused therapy, metacognitive awareness, and acceptance and commitment therapy. Starting with an intro-

duction of the historical and theoretical basis for the Principles of Loss model, the book then outlines methods of assessment and describes the processes of formulation and case conceptualisation, with specific guidance on how to navigate these in the context of loss. The book provides an in-depth exploration of the Five-Phase Principles for the Treatment of Loss and Grief (intervention), as well as guidance on the supervision of loss. The chapters, accompanied by case studies, provide an overview of the novel model, followed by specific and tailor-made guidance on assessment (including a novel self-report measure), formulation, treatment, and supervision. This guide is intended for clinicians familiar with or interested in the theory and practice of third-wave cognitive behavioural therapies.

Cognitive Behavior Therapy in Clinical Social Work Practice

Edited by a leading social work authority and a master CBT clinician, this first-of-its-kind handbook provides the foundations and training that social workers need to master cognitive behavior therapy. From traditional techniques to new techniques such as mindfulness meditation and the use of DBT, the contributors ensure a thorough and up-to-date presentation of CBT. Covered are the most common disorders encountered when working with adults, children, families, and couples including: Anxiety disorders Depression Personality disorder Sexual and physical abuse Substance misuse Grief and bereavement Eating disorders Written by social workers for social workers, this new focus on the foundations and applications of cognitive behavior therapy will help individuals, families, and groups lead happier, fulfilled, and more productive lives.

REBT with Diverse Client Problems and Populations

This practice-focused resource demonstrates effective uses of Rational Emotive Behavior Therapy methods and techniques in treating clients across various conditions, settings, and subgroups. Client problems featured include both those often associated with REBT (e.g., anxiety, depression, anger) and others noted for complex presentations, difficulties with engagement, and impasses (e.g., addictions, suicidality, psychosis). Challenging treatment populations are covered as well, including women, couples, families, elder and pediatric clients, clients with disabilities, and sexual minorities. These stimulating cases show how well the diversity of clients and their concerns is matched by the flexibility of techniques and applications within REBT. In each chapter, expert therapists:

- Identify concepts in REBT especially suited to approaching the problem or population.
- Outline best REBT practices in assessment and treatment of the client(s).
- Survey evidence-based non-REBT approaches most useful in complementing REBT.
- Provide a brief case example representing appropriate REBT in action.
- Assess their use of REBT in treating the problem or members of the population.

A bedrock text for REBT scholar-practitioners, REBT with Diverse Populations and Problems is a testimony to the continuing usefulness of the therapy and its adaptability as client populations emerge and as the contexts of client problems evolve in response to a demanding world.

Grief and Bereavement in Contemporary Society

Grief and Bereavement in Contemporary Society is the authoritative guide to the study of and work with major themes in bereavement. The classic edition includes a new preface from the lead editors discussing advances in the field since the book's initial publication. The book's chapters synthesize the best of research-based conceptualization and clinical wisdom across 30 of the most important topics in the field. The volume's contributors come from around the world, and their work reflects a level of cultural awareness of the diversity and universality of bereavement and its challenges that has rarely been approximated by other volumes. This is a readable, engaging, and comprehensive book that shares the most important scientific and applied work on the contemporary scene with a broad international audience. It's an essential addition to anyone with a serious interest in death, dying, and bereavement.

Working With the Bereaved

Working With the Bereaved summarizes the major themes in bereavement research and clinical work and uses the authors' own cutting-edge research to show mental-health practitioners how to integrate these themes into their practice. It provides clinicians with a framework for exploring their own emotional and intellectual assumptions about loss and bereavement, and it goes on to summarize state-of-the-art thinking in the field. The heart of the book focuses on the theoretical and clinical implications of the empirically validated Two-Track Model of Bereavement, as well as a variety of therapeutic techniques designed to help the bereaved both reapproach life and manage their continuing bonds with the

deceased. The later chapters examine methods for integrating systems and family perspectives in therapy, for attending to the implications of culture and religion, and for meeting crises and emergencies in bereavement care. The concluding chapter addresses self-care, well-being, and resilience, offering practical guidelines for both the bereaved and those who treat them.

Life After Loss

The process of grief does not change a person as much as it reveals another part of the self. *Life After Loss: Contemporary Grief Counseling and Therapy* is a reader friendly book with tools, techniques, and compass points to help others with the experience of grief. Going beyond the well-known but outmoded stage theories of grief, this book explores and illustrates new models of treatment, applying them to the lived experience of bereaved clients. Best applied practices are examined, and the book quickly becomes a 'go-to' resource for typical and complicated facilitation of grief. Topics include: Clinical practices for natural and complicated grief processes What went wrong with Kubler-Ross' stage theory of grief The functions of emotions in grief The impact of death on the family Death, grief, and spirituality Loneliness and isolation The social and cultural ceremonies of death Meaning making and growth following loss

Grief Disorders: Clinical, Cultural, and Epidemiological Aspects

The death of a child has a tremendous and overwhelming impact on parents and siblings, completely altering the psychological landscape of the family. In the aftermath of such a tragedy, parents face the challenge of not only dealing with their own grief, but also that of their surviving children. How can someone attempt to cease parenting a deceased child while maintaining this role with his/her other children? Is it possible for a mother or father to effectively deal with feelings of grief and loss while simultaneously helping their surviving children? *Parenting After the Death of a Child: A Practitioner's Guide* addresses this complex and daunting dilemma. Following on the heels of a qualitative research study that involved interviewing bereaved parents, both fathers and mothers, Buckle and Fleming have put together several different stories of loss and recovery to create an invaluable resource for clinicians, students, and grieving parents. The authors present the experience of losing a child and its subsequent impact on a family in a novel and effective way, demonstrating the strength and importance of their book for the counseling field.

Parenting After the Death of a Child

The purpose of this book is to provide vital information regarding loss and trauma to practicing counselors and therapists. Trauma and loss are pervasive presenting problems, many counselors and therapists possess scant understanding of trauma and loss, and little, if any, attention is paid to trauma or to loss in the graduate training of clinical psychology and counseling psychology students. The book is organized into four sections which cover: an overview of loss and trauma, key conceptual frameworks for understanding loss and trauma, review of several types of events producing trauma and loss, and interventions addressing loss and trauma. A key contribution of the book is the focus on losses caused by death and losses due to other reasons. The contributions to practice include the overview of what is known about trauma and about loss; examination of several frameworks for organizing both understanding of and working with traumatized and bereaved clients; rich descriptive cases of individuals coping with various traumatic events and the losses embedded in the trauma; and presentation of various interventions, including changes that can be made in the graduate education of practitioners.

A Professional's Guide to Understanding Trauma and Loss

Named a 2013 Doody's Core Title! "In the fields of death education, research and counseling/psychology, surely Bill Worden is a giant....ALL of us, personally and professionally, are indebted to J. William Worden. From his work we may be just a bit wiser, a bit healthier, a bit more competent, and a lot more in touch with meaning (our own and those of others) for the sake of all who mourn." --*Illness, Crisis, & Loss* "Every helping professional will profit from Worden's treatment of uncomplicated and complicated mourning. Especially hopefully is his material on the many types of loss...I highly recommend Worden's book." --Ministry Recipient of The International Work Group on Death, Dying and Bereavement Herman Feifel Award. Dr. Worden presents the highly anticipated fourth edition to *Grief Counseling and Grief Therapy*, the gold standard of grief therapy handbooks. The previous editions, translated into 12 languages, received worldwide acclaim for their sensitive, insightful, and practical approach to grief counseling. In this updated and revised fourth edition, Dr. Worden presents his most

recent thinking on bereavement drawn from extensive research, clinical work, and the best of the new literature. Key Features: The task model has been modified to account for new thinking and research findings in the field, including meaning making, resilience, and continuing bonds A new chapter on the Mediators of Mourning helps clinicians to understand what accounts for individual differences in adapting to the death of a loved one Looks at recent controversies in the field including the best way to understand complicated bereavement and the efficacy of grief counseling and therapy Presents the vital distinction between grief and trauma, and highlights different intervention approaches for each Comprehensive and highly organized, this text is useful to therapists just beginning to work in the field as well as seasoned practitioners.

Grief Counseling and Grief Therapy, Fourth Edition

If ever there was an area requiring that the research-practice gap be bridged, surely it occurs where thanatologists engage with people dealing with human mortality and loss. The field of thanatology—the study of death and dying—is a complex, multidisciplinary area that encompasses the range of human experiences, emotions, expectations, and realities. The Handbook of Thanatology is the most authoritative volume in the field, providing a single source of up-to-date scholarship, research, and practice implications. The handbook is the recommended resource for preparation for the prestigious certificate in thanatology (CT) and fellow in thanatology (FT) credentials, which are administered and granted by ADEC.

Handbook of Thanatology

"The Oxford Handbook of Geropsychology provides students and experienced clinicians and clinical researchers alike with a comprehensive and contemporary overview of developments in the field of geropsychology. Informed by an international perspective, the introductory section covers demographics, meta-analyses in geropsychology, social capital and gender, cognitive development, and ageing. Sections on assessment and formulation include chapters on interviewing older people, psychological assessment strategies, capacity and suicidal ideation, and understanding long term care environments. Psychological distress and their causes are reviewed with chapters focusing upon late-life depression and anxiety, psychosis, and personality disorders. In this section, neuropsychiatric approaches to working with older people and risk factors relating to cognitive health are reviewed. Intervention strategies covered include cognitive-behavioural therapy (CBT), interpersonal psychotherapy (IPT), acceptance and commitment therapy (ACT), and family therapy. Interprofessional teamwork and aspects of work with persons with dementia (PwD), caregivers, and care staff, are also covered. Chapters on interventions address specific populations such as lesbian, gay, bisexual and transgender older persons, people with physical and psychological comorbidities, and those experiencing grief and bereavement. Finally, this Handbook explores new horizons, including positive ageing, exercise and health promotion, and the use of new media such as online and virtual reality interactive technologies in clinical research and practice with older adults." -- From the Amazon

The Oxford Handbook of Clinical Geropsychology

Pregnancy loss can be devastating, regardless of whether it is early or late in pregnancy or in the short period after a baby is born. In many instances, similar emotions are experienced when a couple learns that their fertility treatments were unsuccessful. Here the well-known psychologist Amy Wenzel applies the principles of cognitive behavioral therapy—a thoroughly-researched approach for treating mood disorders, anxiety disorders, and stress-related disorders—to the experience of reproductive loss. She offers strategies for coping with loss and provides a step-by-step guide to reengaging in life. With warmth and compassion, she helps readers journey toward healing.

Coping With Infertility, Miscarriage, and Neonatal Loss

This book presents a new approach to understanding the history and practice of cognitive-behavior therapy by presenting country profiles in 38 countries located around the world. The objectives of this edited volume are to provide a broad understanding of the practice of CBT internationally as well as country specific practices that will provide researchers and practitioners with important information for consideration in the application of CBT. The book begins with an introductory chapter by the editors that discusses the history of CBT and the efforts to globalize and disseminate the science and practice of CBT as well as the unique cultural and international variables. The subsequent chapters offer detailed country profiles of the history and practice of CBT from around the globe. More specifically, chapters

will provide an overview of the country, a history of psychotherapy in the country, current regulations regarding psychotherapy provision, professional and cognitive behavior therapy organizations, training opportunities/programs in CBT, populations most frequently worked with using CBT in the country, the use and adaptation of CBT, the research on CBT in the country, and CBT with special populations (children, immigrants, HIV+, etc). Many of the nations represented are the most populous and influential ones in their respective regions where CBT has been incorporated into psychotherapy training and practice. Taken as a whole, the countries are quite diverse in terms of sociocultural, economic, and political conditions and the impact of these variables on the practice of CBT in the country will be discussed. The final chapter of the volume offers a summary of the patterns of practice, integrating the main findings and challenges and discussing them within a global context. A discussion of the vision for next steps in the globalization of CBT concludes the book.

Cognitive Behavioral Therapy in a Global Context

This book pulls together a definitive collection of work on the theory and practice of clinical, spiritual, and emotional support after the experience of violent death - counseling beyond the crisis. Over the past decade, there have been countless publications devoted to crisis response, crisis intervention and counseling, disaster mental health services, and support for victims of traumatic events, but almost none devoted to the response planning and community care for those individuals who continue to struggle with trauma and grief issues for more than a few months after a violent death. The chapters in this volume, written by national and international experts in the field, provide the reader with the theoretical and clinical bases necessary for planning and implementing clinical and spiritual services to meet the needs of survivors, witnesses, family and community members of violent death.

Violent Death

Working With the Bereaved summarizes the major themes in bereavement research and clinical work and uses the authors's own cutting-edge research to show mental-health practitioners how to integrate these themes into their practice. It provides clinicians with a framework for exploring their own emotional and intellectual assumptions about loss and bereavement, and it goes on to summarize state-of-the-art thinking in the field. The heart of the book focuses on the theoretical and clinical implications of the empirically validated Two-Track Model of Bereavement, as well as a variety of therapeutic techniques designed to help the bereaved both reapproach life and manage their continuing bonds with the deceased. The later chapters examine methods for integrating systems and family perspectives in therapy, for attending to the implications of culture and religion, and for meeting crises and emergencies in bereavement care. The concluding chapter addresses self-care, well-being, and resilience, offering practical guidelines for both the bereaved and those who treat them.

Working with the Bereaved

Sibling Loss Across the Lifespan brings together researchers, clinicians, and bereaved siblings to explore sibling loss. Unique in both form and content, the book focuses on loss within five key age ranges—childhood, adolescence, emerging adulthood, adulthood, and late adulthood—and losses within a special topics section that addresses areas of interest across multiple age groups. In addition to chapters from researchers and clinicians, the book includes personal stories from bereaved siblings who describe the lived experience of this loss.

Sibling Loss Across the Lifespan

Highly practical and student centered, Applied Helping Skills: Transforming Lives, is an experiential text focusing on basic skills and core interventions. Although it has a consistent a big-picture perspective, this book emphasizes the role of counselors to make contact with their individual clients, to help them feel understood, and to clarify the major issues that trouble them.

Applied Helping Skills

Systemic Interventions for Collective and National Trauma explains the theoretical basis for understanding collective and national trauma through the concept of systems theory, and gives ways of implementing systems theory in interventions at the micro, mezzo, and macro levels. Particular attention is given to the use of socio-political and cultural aspects of interventions with victims, as well as to the ethical codes that social workers and other mental health professionals need to integrate in their work

with collective/national trauma. Separated into two distinct parts on theory and practice, this volume is appropriate for practitioners as well as students in advanced courses.

Systemic Interventions for Collective and National Trauma

Many factors in the world today, such as globalization and a rise in immigration, are increasing the need for mental health practitioners to acquire the ability to interact effectively with people of different cultures. This text will be the most comprehensive volume to address this need to date, exploring the history, philosophy, processes, and trends in counseling and psychotherapy in countries from all regions of the globe. Organized by continent and country, each chapter is written by esteemed scholars drawing on intimate knowledge of their homelands. They explore such topics as their countries' demographics, counselor education programs, current counseling theories and trends, and significant traditional and indigenous treatment and healing methods. This consistent structure facilitates quick and easy comparisons and contrasts across cultures, offering an enhanced understanding of diversity and multicultural competencies. Overall, this text is an invaluable resource for practitioners, researchers, students, and faculty, showing them how to look beyond their own borders and cultures to enhance their counseling practices.

Handbook of Counseling and Psychotherapy in an International Context

The Encyclopedia of Psychological Trauma is the only authoritative reference on the scientific evidence, clinical practice guidelines, and social issues addressed within the field of trauma and posttraumatic stress disorder. Edited by the leading experts in the field, you will turn to this definitive reference work again and again for complete coverage of psychological trauma, PTSD, evidence-based and standard treatments, as well as controversial topics including EMDR, virtual reality therapy, and much more.

The Encyclopedia of Psychological Trauma

"In this state-of-the-art volume, leading international scholars and clinicians provide a comprehensive and cross-disciplinary overview of how rigorous research on bereavement translates into practice. They identify new developments and controversies in the field, relating new theories to concepts from attachment theory and emotion theory. The effects of societal change and of national and international events on personal and public mourning are examined along with other areas of interest to practitioners, such as grief and disaster, posttraumatic growth, and cultural competence in helping diverse clients cope with grief and bereavement. New analyses use longitudinal data sets to trace patterns of adjustment, trajectories of grieving over time, and the use of coping resources. The contributors also explore emerging research on the consequences of losing a loved one, "disenfranchised" grieving, continuing bonds, and other critical areas. Researchers and practitioners will find much to enrich and deepen their work in this thought-provoking volume"--Cover. (PsycINFO Database Record (c) 2012 APA, all rights reserved).

Handbook of Bereavement Research and Practice

The loss of a loved one is one of the most painful experiences that most of us will ever have to face in our lives. This book recognises that there is no single solution to the problems of bereavement but that an understanding of grief can help the bereaved to realise that they are not alone in their experience. Long recognised as the most authoritative work of its kind, this new edition has been revised and extended to take into account recent research findings on both sides of the Atlantic. Parkes and Prigerson include additional information about the different circumstances of bereavement including traumatic losses, disasters, and complicated grief, as well as providing details on how social, religious, and cultural influences determine how we grieve. Bereavement provides guidance on preparing for the loss of a loved one, and coping after they have gone. It also discusses how to identify the minority in whom bereavement may lead to impairment of physical and/or mental health and how to ensure they get the help they need. This classic text will continue to be of value to the bereaved themselves, as well as the professionals and friends who seek to help and understand them.

Bereavement

Techniques of Grief Therapy is an indispensable guidebook to the most inventive and inspirational interventions in grief and bereavement counseling and therapy. Individually, each technique emphasizes creativity and practicality. As a whole, they capture the richness of practices in the field and

the innovative approaches that clinicians in diverse settings have developed, in some cases over decades, to effectively address the needs of the bereaved. New professionals and seasoned clinicians will find dozens of ideas that are ready to implement and are packed with useful features, including: Careful discussion of the therapeutic relationship that provides a "container" for specific procedures An intuitive, thematic organization that makes it easy to find the right technique for a particular situation Detailed explanations of when to use (and when not to use) particular techniques Expert guidance on implementing each technique and tips on avoiding common pitfalls Sample worksheets and activities for use in session and as homework assignments Illustrative case studies and transcripts Recommended readings to learn more about theory, research and practice associated with each technique

Techniques of Grief Therapy

Fourth Edition Named a 2013 Doody's Core Title! Praise for the Fourth Edition: "In the fields of death education, research and counseling/psychology, surely Bill Worden is a giant...ALL of us, personally and professionally, are indebted to [him]. From his work we may be just a bit wiser, a bit healthier, a bit more competent, and a lot more in touch with meaning for the sake of all who mourn." --Illness, Crisis, & Loss "[If] you knew Worden's work and his writings previously, you'll find an enhanced book with a much broader and challenging perspective than his previous editions. If you are not familiar with Bill Worden, then it is time to begin." --Ben Wolfe, MEd, LICSW, Fellow in Thanatology, Program Manager/Grief Counselor, St. Mary's Medical Center's Grief Support Center Duluth, MN Encompassing new content on the treatment of grief, loss, and bereavement, the updated and revised fifth edition of this gold-standard text continues to deliver the most up-to-date research and practical information for upper-level students and practitioners alike. The fifth edition includes updates to the author's Tasks and Mediators of Mourning, new case studies, and valuable Instructor Resources. The text highlights recent initiatives to extend care to the bereaved and fosters the knowledge and skills required for effective intervention and even preventative treatment. Also addressed is the impact of social media and online resources for "cyber mourning," changes in the DSM-5 as they influence bereavement work, alternate models of mourning, and new findings on the varied qualities of grief. The fifth edition continues to present a well-organized, concise format that is easy to read and provides critical information for master's level health courses in grief counseling and grief therapy as well as for new and seasoned practitioners alike. New to the Fifth Edition: Refinements to the author's TASKS of Mourning New considerations regarding Mediators of Mourning on social variables The impact of social media and online resources on "cyber mourning" Complicated spiritual grief after mass shootings and other catastrophes Changes in the DSM-5 as they influence bereavement work Cross-cultural and multifaceted counseling for specialized grief, including grandparent's grief, prolonged grief disorder, and HIV-AIDS-related bereavement Updated information on grief and depression New case studies and updated references Includes reflection and discussion questions in each chapter Updated and revised information on grief counseling training Accompanying instructor packet with Manual, PowerPoint slides, and Test Bank

Death and Mourning Processes in the Times of the Coronavirus Pandemic (COVID-19)

Grief and Bereavement in Contemporary Society is an authoritative guide to the study of and work with major themes in bereavement. Its chapters synthesize the best of research-based conceptualization and clinical wisdom across 30 of the most important topics in the field. The volume's contributors come from around the world, and their work reflects a level of cultural awareness of the diversity and universality of bereavement and its challenges that has rarely been approximated by other volumes. This is a readable, engaging, and comprehensive book that will share the most important scientific and applied work on the contemporary scene with a broad international audience, and as such, it will be an essential addition to anyone with a serious interest in death, dying, and bereavement.

Grief Counseling and Grief Therapy, Fifth Edition

Thoroughly updated to reflect the latest trends in theory and practice, this this substantially revised and extended edition is the most in-depth and wide-ranging textbook available on person-centred psychotherapy and counselling. Divided into four parts, it examines the theoretical, philosophical and historical foundations of the person-centred approach; the fundamental principles of person-centred practice and applications of person-centred practice; how person-centred conceptualisations and practices can be applied to groups of clients who bring particular issues to therapy; and, finally, professional issues for person-centred therapists, such as ethics, supervision and training. Written by a diverse

range of expert contributors, unified by a more relational, ethics-based reading of person-centred theory and practice, this is a comprehensive, cutting-edge resource for students on all advanced level person-centred courses, as well as for a wide range of professional practitioners in the field. New to this Edition: - A new, introductory chapter looking at contemporary challenges and opportunities for growth for the person-centred world - Nine further new chapters, including work with children and young people, older clients, arts-based therapies, addiction and bereavement, spiritual dimensions, contact and perception, working integratively, global and political implications - Increased use of text learning features to make the chapters more accessible and engaging - A greater focus on actual practice, with more case studies and examples of therapist–client dialogues Increased reference to research - A general updating of all chapters to include all relevant references

Omega

Attachment-Informed Grief Therapy bridges the fields of attachment studies and thanatology, uniting theory, research, and practice to enrich our understanding of how and why people grieve and how we can help the bereaved. In its pages, clinicians and students will gain a new understanding of the etiology of complicated grief and its treatment and will become better equipped to formulate accurate and specific case conceptualization and treatment plans. The authors also illustrate the ways in which the therapeutic relationship is a crucially important—though largely unrecognized—element in grief therapy, and offer guidelines for an attachment informed view of the therapeutic relationship that can serve as the foundation of all grief therapy.

Grief and Bereavement in Contemporary Society

Working with widowers can be one of the most challenging parts of a therapist's career. Despite the need for better research and professional guidance, therapists have often been left alone to confront a group struggling with high rates of suicide, mortality, physical health problems, and depression. *Counseling Widowers* builds from the latest developments in grief research and men's studies to bridge the gap between counseling practice and the needs of bereaved men. In these pages, therapists will find tools for adjusting their clinical strategies to work more effectively with these men. Through a more empathic understanding of widowers, therapists can help them build from their strengths as they face the loss of their partner.

The Handbook of Person-Centred Psychotherapy and Counselling

How we cope with grief and come to terms with the death of a loved one shapes our world. In this comprehensive guide to the mourning process, Dr Volkan, a world-recognised authority on grief, shows how each mourning is as individualised as our fingerprints, encoded with our past history of losses. Anecdotal and compassionate, this is a profoundly moving and informative study of how grief and loss shape all our lives.

Attachment-Informed Grief Therapy

A comprehensive and up-to-date handbook that surveys the field of grief therapy, providing readers with the latest theoretical approaches and practice guidance.

Counseling Widowers

This updated second edition of *Working with Loss and Grief* provides a model for practitioners working with those who are grieving a significant life loss. Making clear connections between theory and practice, the 'Range of Response to Loss' model provides a theoretical 'compass' for recognising the wide variability in reaction to loss and the 'Adult Attitude to Grief' scale is a tool for 'mapping' individual grief and its change over time, providing an individual grief profile. Together these offer a framework for practitioners to: -listen to stories of grief told by clients -identify common patterns in grief -recognize individual difference in grief response -make assessments -prompt therapeutic dialogue -guide therapeutic focus and -evaluate outcomes. This edition includes: a new chapter on 'The RRL Model and a Pluralistic Approach to Counselling' ; two new case studies; additional content on vulnerability; new grief assessment tools and systems, and the latest research. Dr Linda Machin is Honorary Research Fellow at Keele University, having been a Lecturer in Social Work and Counselling at Keele. She established a counselling service for the bereaved in North Staffordshire and continues to work as a researcher and freelance trainer.

Life After Loss

After a significant loss, grief is normal and necessary. But sometimes a mourner's grief becomes naturally heightened, stuck, or made more complex by especially difficult circumstances, such as suicide, homicide, or multiple losses within a short time period. This is called "complicated grief." In this primer by one of the world's most respected grief educators, Dr. Wolfelt helps caregivers understand the various factors that often contribute to complicated grief. He presents a model for identifying complicated grief symptoms and, through real-life examples, offers guidance for companioning mourners through their challenging grief journeys. This book rounds out Dr. Wolfelt's resources on the companioning philosophy of grief care, making it an essential addition to your professional library.

The Handbook of Grief Therapies

A LIVING LOSS: Surviving Separation From a Loved One focuses on living loss when a person becomes estranged from a loved one who still lives - a friend, a partner or a family member. This book focuses on a forced estrangement, wherein one family member (the enforcer) refuses to see another family member (the enforced). There is not necessarily any explanation, which can lead to grief, depression, and eventual decline in health. When a family member is lost to death, the grieving process is shattering. Lives are changed; hearts are broken. Yet, even in the depths of despair, there is hope. There is help, too, therapists, support groups, and other family members. A living loss is soul wounding. Support is often not available for those experiencing this loss. They grieve alone. Resolution is extremely difficult. Even in estrangement, there is hope. Author Barbara Rombough is ready to help you heal. She uses cognitive therapy strategies, relaxation techniques, and so much more to help mend the brokenhearted. It is possible to emerge a different person, renewed with strength, inner peace, and acceptance, whether or not the broken family bonds are ever healed.

Working with Loss and Grief

Presents approximately eighty activities for counseling children and adolescents, which address such issues as anxiety, depression, stress, grief, low frustration tolerance, anger, bullying, and acting out.

When Grief Is Complicated

Grief is a natural reaction to loss but in some cases it can be devastating, preventing you from moving on in your life and affecting your relationships and work. This fully updated self-help guide offers an examination and explanation of the grieving process and outlines clinically-proven strategies, based on cognitive behavioural therapy (CBT), to help you adjust to life without a loved one:

- Knowing what to expect when you are grieving
- Understanding the physical and psychological reactions to grief
- Practical coping strategies to help you deal with your loss

Passage to Manhood

Passage to Manhood is a groundbreaking and beautifully written ethnography that addresses the intersection of modernity, heroin use, and AIDS as they intersect in a new "rite-of-passage" among young ethnic-minority males in contemporary China.

The Disempowered Development of Tibet in China

This book explores the synergy between development and conflict in the Tibetan areas of Western China from the mid-1990s onward, when rapid economic growth occurred alongside a particularly assimilationist policy approach. Based on accessible economic analysis and extensive interdisciplinary fieldwork, it represents one of the only macro-level and systemic analyses of its kind in the scholarship on Tibet, and also holds much interest for those interested in China and in development and conflict more generally.

Redacted

"Redacted is a major work of original scholarship and a signal critical accomplishment. With impressive daring and persistence, Jonathan Abel has investigated rarely used archives to open a body of materials virtually unknown to English-language readers. This is a stunning achievement, and it is sure to change the landscape of Japanese literary studies." - Marilyn Ivy, author of *Discourses of the Vanishing: Modernity, Phantasm, Japan* "A masterful blending of incisive, close textual analysis, subtle situating of literary texts in their historical moments, attention to the very materiality of book culture, Redacted is a truly original thinking about how literature is formed and malformed, written, received, and read, under the pressure of censorship. It does nothing less than reveal a complex but hidden history of modern Japanese literature. A thrilling example of literary historical scholarship that combines the palpable excitement of archival work and the elucidating intensity of close reading." - Alan Tansman, author of *The Aesthetics of Japanese Fascism*

Lin Shu, Inc.

How could a writer who knew no foreign languages call himself a translator? How, too, did he become a major commercial success, churning out nearly two hundred translations over twenty years? Lin Shu, Inc. crosses the fields of literary studies, intellectual history, and print culture, offering new ways to understand the stakes of translation in China and beyond. With rich detail and lively prose, Michael Gibbs Hill shows how Lin Shu (1852-1924) rose from obscurity to become China's leading translator of Western fiction at the beginning of the twentieth century. Well before Ezra Pound's and Bertolt Brecht's

"inventions" of China revolutionized poetry and theater, Lin Shu and his assistants--who did, in fact, know languages like English and French--had already given many Chinese readers their first taste of fiction from the United States, France, and England. After passing through Lin Shu's "factory of writing," classic novels like *Uncle Tom's Cabin* and *Oliver Twist* spoke with new meaning for audiences concerned with the tumultuous social and political change facing China. Leveraging his success as a translator of foreign books, Lin Shu quickly became an authority on traditional Chinese culture who upheld the classical language as a cornerstone of Chinese national identity. Eventually, younger intellectuals--who had grown up reading his translations--turned on Lin Shu and tarred him as a symbol of backward conservatism. Ultimately, Lin's defeat and downfall became just as significant as his rise to fame in defining the work of the intellectual in modern China.

Imperial Eclipse

The "Pacific War" narrative of Japan's defeat that was established after 1945 started with the attack on Pearl Harbor, detailed the U.S. island-hopping campaigns across the Western Pacific, and culminated in the atomic bombings of Hiroshima and Nagasaki, Japan's capitulation, and its recasting as the western shore of an American ocean. But in the decades leading up to World War II and over the course of the conflict, Japan's leaders and citizens were as deeply concerned about continental Asia--and the Soviet Union, in particular--as they were about the Pacific theater and the United States. In *Imperial Eclipse*, Yukiko Koshiro reassesses the role that Eurasia played in Japan's diplomatic and military thinking from the turn of the twentieth century to the end of the war. Through unprecedented archival research, Koshiro has located documents and reports expunged from the files of the Japanese Cabinet, ministries of Foreign Affairs and War, and Imperial Headquarters, allowing her to reconstruct Japan's official thinking about its plans for continental Asia. She brings to light new information on the assumptions and resulting plans that Japan's leaders made as military defeat became increasingly certain and the Soviet Union slowly moved to declare war on Japan (which it finally did on August 8, two days after Hiroshima). She also describes Japanese attitudes toward Russia in the prewar years, highlighting the attractions of communism and the treatment of Russians in the Japanese empire; and she traces imperial attitudes toward Korea and China throughout this period. Koshiro's book offers a balanced and comprehensive account of imperial Japan's global ambitions.

The Nature of the Beasts

It is widely known that such Western institutions as the museum, the university, and the penitentiary shaped Japan's emergence as a modern nation-state. Less commonly recognized is the role played by the distinctly hybrid institution—at once museum, laboratory, and prison—of the zoological garden. In this eye-opening study of Japan's first modern zoo, Tokyo's Ueno Imperial Zoological Gardens, opened in 1882, Ian Jared Miller offers a refreshingly unconventional narrative of Japan's rapid modernization and changing relationship with the natural world. As the first zoological garden in the world not built under the sway of a Western imperial regime, the Ueno Zoo served not only as a staple attraction in the nation's capital—an institutional marker of national accomplishment—but also as a site for the propagation of a new "natural" order that was scientifically verifiable and evolutionarily foreordained. As the Japanese empire grew, Ueno became one of the primary sites of imperialist spectacle, a microcosm of the empire that could be traveled in the course of a single day. The meaning of the zoo would change over the course of Imperial Japan's unraveling and subsequent Allied occupation. Today it remains one of Japan's most frequently visited places. But instead of empire in its classic political sense, it now bespeaks the ambivalent dominion of the human species over the natural environment, harkening back to its imperial roots even as it asks us to question our exploitation of the planet's resources.

Taming Tibet

The violent protests in Lhasa in 2008 against Chinese rule were met by disbelief and anger on the part of Chinese citizens and state authorities, perplexed by Tibetans' apparent ingratitude for the generous provision of development. In *Taming Tibet*, Emily T. Yeh examines how Chinese development projects in Tibet served to consolidate state space and power. Drawing on sixteen months of ethnographic fieldwork between 2000 and 2009, Yeh traces how the transformation of the material landscape of Tibet between the 1950s and the first decade of the twenty-first century has often been enacted through the labor of Tibetans themselves. Focusing on Lhasa, Yeh shows how attempts to foster and improve Tibetan livelihoods through the expansion of markets and the subsidized building of new houses, the control over movement and space, and the education of Tibetan desires for development have worked

together at different times and how they are experienced in everyday life. The master narrative of the PRC stresses generosity: the state and Han migrants selflessly provide development to the supposedly backward Tibetans, raising the living standards of the Han's "little brothers." Arguing that development is in this context a form of "indebtedness engineering," Yeh depicts development as a hegemonic project that simultaneously recruits Tibetans to participate in their own marginalization while entrapping them in gratitude to the Chinese state. The resulting transformations of the material landscape advance the project of state territorialization. Exploring the complexity of the Tibetan response to—and negotiations with—development, *Taming Tibet* focuses on three key aspects of China's modernization: agrarian change, Chinese migration, and urbanization. Yeh presents a wealth of ethnographic data and suggests fresh approaches that illuminate the Tibet Question.

The Art of Censorship in Postwar Japan

This book explores the practice of censorship in modern Japan, focusing on the most celebrated censorship trials of literature, film, and manga in the post WW II period.

The Menace of the Market

As China moves from a society controlling all aspects of life, including population movement, to something nearer a market economy, migration has become a live issue. Tens of millions of rural migrants have entered China's cities, meeting discrimination similar to that experienced by economic migrants in the West. This book looks to the reasons why people leave certain areas, the lives of migrants and government policy towards them. It distinguishes different types of migration and looks particularly at marriage migration and the effects of migration on the lives of women.

Internal Migration in Contemporary China

Heroin first reached Gejiu, a Chinese city in southern Yunnan known as Tin Capital, in the 1980s. Widespread use of the drug, which for a short period became "easier to buy than vegetables," coincided with radical changes in the local economy caused by the marketization of the mining industry. More than two decades later, both the heroin epidemic and the mining boom are often discussed as recent history. Middle-aged long-term heroin users, however, complain that they feel stuck in an earlier moment of the country's rapid reforms, navigating a world that no longer resembles either the tightly knit Maoist work units of their childhood or the disorienting but opportunity-filled chaos of their early careers. Overcoming addiction in Gejiu has become inseparable from broader attempts to reimagine laboring lives in a rapidly shifting social world. Drawing on more than eighteen months of fieldwork, Nicholas Bartlett explores how individuals' varying experiences of recovery highlight shared challenges of inhabiting China's contested present.

Recovering Histories

Non-governmental organizations have increased dramatically in China since the 1970s, despite operating in a restrictive authoritarian environment. With labour migrants moving to the cities en masse in search of higher wages and better standards of living, the central and local states now permit migrant NGOs to deliver community services to workers in cities such as Beijing and Shanghai. Engaging a new conceptual framework, Jennifer Hsu reveals how NGOs are interacting with the layers and spaces of the state and navigating a complex web of government bodies, lending stability to, and forming mutually beneficial relationships with, the state.

State of Exchange

This work investigates inequality and social exclusion in contemporary Chinese society, specifically in the context of urbanization, migration and crime. Economic reforms started in the late 1970s (post-Mao) fuelled a trend of urbanization and mass migration within China, largely from rural areas to more economically developed urban regions. With this migration, came new challenges in a rapidly changing society. Researchers have extensively studied the rural-to-urban human movement, social changes, inequality and its impact on individuals and society as a whole. This volume provides a new perspective on this issue. It forges a link between internal migration, inequality, social exclusion and crime in the context of China, through qualitative research into the impact of this phenomenon on individuals' lives. Using a series of case studies drawn from interviews with inmates – men and women – in a large Chinese prison, it focuses on migrant offenders' subjective experiences, and analyses issues

from the rarely-heard perspectives of migrant lawbreakers themselves. The research demonstrates how factors – including: the hukou system, rural-urban, class and gender inequalities, prejudices against rural migrants, and other structural problems – often lead to migrant offending. The author argues that to mitigate the effects of criminalisation, the root causes of these problems should be examined, emphasizing radical reforms to the hukou policy, cultural change in urban society to welcome newcomers, positive programs to integrate migrant workers into urban societies and improve their opportunities, rather than inflicting harsher penalties or reducing migration. While the research is based in China, it has clear implications for other regions of the world, which are experiencing similar tensions related to national and international migration. This work will be of interest to researchers in criminology and criminal justice, particularly with an interest in Asia, as well as those in related fields such as sociology, law and social justice.

Internal Migration, Crime, and Punishment in Contemporary China

As China moves from a society controlling all aspects of life, including population movement, to something nearer a market economy, migration has become a live issue. Tens of millions of rural migrants have entered China's cities, meeting discrimination similar to that experienced by economic migrants in the West. This book looks to the reasons why people leave certain areas, the lives of migrants and government policy towards them. It distinguishes different types of migration and looks particularly at marriage migration and the effects of migration on the lives of women.

Internal Migration in Contemporary China

This title provides a much needed theoretical account of socio-cultural and identity issues surrounding middle-class Chinese migration in the changing context of migration policies and issues in Australia and other places. It also offers insights to students studying the current changing face of Chinese migration and provides relevant data to policy-makers, managers and practitioners in the field of immigration and multicultural affairs. This is a cutting edge volume that advances theories, methodologies and policy issues relating to contemporary middle-class Chinese migrants. It reports and discusses multidisciplinary research undertaken in Australia, Canada and New Zealand. The book will not only serve as an introductory textbook for students of migration studies, social sciences and China studies, but also as a reference source for those who are interested in learning about recent Chinese migration in Asia and the Pacific.

Experiences of Transnational Chinese Migrants in the Asia-Pacific

Drawing on ten years of ethnographic data collected from multi-sited field research, Ling's book traces the journeys of dozens of second-generation migrants from middle school to the labor market in Shanghai and reveals the ongoing process of inclusion and exclusion that shapes the politics of citizenship in urban China.

The Inconvenient Generation

The Chinese overseas comprise the 25 million or more who left China to settle abroad, and their families and descendents. The essays in this book draw mainly from Southeast Asia, but also with those Chinese who settled in North America, Australasia and other parts of Asia.

Don't Leave Home

This book provides a fresh perspective on the understanding of transnational families by examining the one-child generation of Chinese migrants who came to the UK to study, and their parents, who remain in China.

Education, Migration and Family Relations Between China and the UK

The Routledge Handbook of Smuggling offers a comprehensive survey of interdisciplinary research related to smuggling, reflecting on key themes, and charting current and future trends. Divided into six parts and spanning over 30 chapters, the volume covers themes such as mobility, borders, violent conflict, and state politics, as well as looks at the smuggling of specific goods – from rice and gasoline to wildlife, weapons, and cocaine. Chapters engage with some of the most contentious academic and policy debates of the twenty-first century, including the historical creation of borders, re-bordering, the criminalisation of migration, and the politics of selective toleration of smuggling. As it maps a field that

contains unique methodological, ethical, and risk-related challenges, the book takes stock not only of the state of our shared knowledge, but also reflects on how this has been produced, pointing to blind spots and providing an informed vision of the future of the field. Bringing together established and emerging scholars from around the world, *The Routledge Handbook of Smuggling* is an indispensable resource for students and researchers of conflict studies, borderland studies, criminology, political science, global development, anthropology, sociology, and geography.

The Routledge Handbook of Smuggling

This expansive collection of A-Z entries offers a compelling look into hate groups in America. Focusing on organizations in operation today, this resource book for student and general audiences covers numerous hot-button issues in politics and culture. The Southern Poverty Law Center lists nearly 900 hate groups active in the United States today. Some of these, such as the KKK, have deep roots in American history. Others are newer, formed in response to policies and shifts in our cultural landscape. Often these organizations imply defense of America and political ideals in their names, such as "Council of Conservative Citizens" and "American Family Association." Some, such as "White Aryan Resistance" and "Supreme White Alliance," are more direct in their associations. Nearly all posit an erosion of rights and values; a way of life that is becoming lost to immigrants; a diffusion or integration of population; and government overstep. Many of these groups preach a necessity for violence, through either outright or thinly veiled language. Membership in these organizations poses another topic for investigation, as their ranks are not just anti-government or pro-gun rights types who seek to defend the Constitution. Many are simply citizens who see their ideal for America as under threat by various groups—whether ethnic, racial, or religious. This unique reference will allow readers to explore the underlying issues central to understanding them. How do these hate groups get started, and why do people join?

Hate Groups and Extremist Organizations in America

A twenty-first century version of Roger Fowler's 1973 *Dictionary of Modern Critical Terms*, this latest edition of *The Routledge Dictionary of Literary Terms* is the most up-to-date guide to critical and theoretical concepts available to students of literature at all levels. With over forty newly commissioned entries, this essential reference book includes: an exhaustive range of entries, covering such topics as genre, form, cultural theory and literary technique new definitions of contemporary critical issues such as Cybercriticism and Globalization complete coverage of traditional and radical approaches to the study and production of literature thorough accounts of critical terminology and analyses of key academic debates full cross-referencing throughout and suggestions for further reading. Covering both long-established terminology as well as the specialist vocabulary of modern theoretical schools, *The Routledge Dictionary of Literary Terms* is an indispensable guide to the principal terms and concepts encountered in debates over literary studies in the twenty-first century.

The Routledge Dictionary of Literary Terms

Architecture as Experience investigates the perception and appropriation of places across intervals of time and culture. The particular concern of the volume is to bring together fresh empirical research and animate it through contact with theoretical sophistication, without overwhelming the material. The chapters establish the continuity of a particular physical object and show it in at least two alternative historical perspectives, in which recognisable features are shown in different lights. The results are often surprising, inverting the common idea of a historic place as having an enduring meaning. This book shows the insight that can be gained from learning about earlier constructions of meaning which have been derived from the same buildings that stand before us today.

Architecture as Experience

The Second Edition of Ken Guest's *Cultural Anthropology: A Toolkit for a Global Age* covers the concepts that drive cultural anthropology by showing that now, more than ever, global forces affect local culture and the tools of cultural anthropology are relevant to living in a globalizing world.

Cultural Anthropology A Toolkit for a Global Age

The 21st century has seen growing numbers of seniors turning to migration in response to newfound challenges to traditional forms of retirement and old-age support, such as increased longevity, demographically aging populations, and global neoliberal trends reducing state welfare. Chinese-born

migrants to the U.S. serve as an exemplary case of this trend, with 30 percent of all migrants since 1990 being at least 60 years old. This book tells their story, arguing that they demonstrate the significance of age as a mediating factor that is fundamentally important for considering how migration is experienced. The subjects of this study are situated at the crossroads of Chinese immigrant and Chinese-American experiences, embodying many of the ambiguities and paradoxes that complicate common understandings of each group. These are older individuals who have waited their whole lives to migrate to the U.S. to rejoin family but often experience unanticipated family conflict when they arrive. They are retirees living at the social and economic margins of American society who nonetheless find significant opportunities to achieve meaningful retired lifestyles. They are members of a diaspora spanning vast regional and ideological differences, yet their wellbeing hinges on everyday interactions with others in this diverse community. Their stories highlight the many possibilities for mutual engagement that connect Chinese and American ways of being and belonging in the world.

Chinese Senior Migrants and the Globalization of Retirement

Receiving a text from Sasha, my girlfriend, at work was always risky. Especially when she wanted to know if her girlfriend was horny. A short and sweet (and filthy) story.

Sissy Dreams: From Boyfriend to Girlfriend

Eloquently interweaving ethnography and memoir, award-winning anthropologist Ruth Behar offers a new theory and practice for humanistic anthropology. She proposes an anthropology that is lived and written in a personal voice. She does so in the hope that it will lead us toward greater depth of understanding and feeling, not only in contemporary anthropology, but in all acts of witnessing.

The Vulnerable Observer

Today's moviegoers and critics generally consider some Hollywood products--even some blockbusters--to be legitimate works of art. But during the first half century of motion pictures very few Americans would have thought to call an American movie "art." Up through the 1950s, American movies were regarded as a form of popular, even lower-class, entertainment. By the 1960s and 1970s, however, viewers were regularly judging Hollywood films by artistic criteria previously applied only to high art forms. In *Hollywood Highbrow*, Shyon Baumann for the first time tells how social and cultural forces radically changed the public's perceptions of American movies just as those forces were radically changing the movies themselves. The development in the United States of an appreciation of film as an art was, Baumann shows, the product of large changes in Hollywood and American society as a whole. With the postwar rise of television, American movie audiences shrank dramatically and Hollywood responded by appealing to richer and more educated viewers. Around the same time, European ideas about the director as artist, an easing of censorship, and the development of art-house cinemas, film festivals, and the academic field of film studies encouraged the idea that some American movies--and not just European ones--deserved to be considered art.

Hollywood Highbrow

Jordan-Young has written a stunning book that demolishes most of the science associated with the dominant paradigm of the development of sex and gender identity, behavior, and orientation. The current paradigm, brain organization theory, proposes: "Because of early exposure to different sex hormones, males and females have different brains"; and these hormones also create "gay" and "straight" brains. Jordan-Young interviewed virtually every major researcher in the field and reviewed hundreds of published scientific papers. Her conclusion: "Brain organization theory is little more than an elaboration of longstanding folk tales about antagonistic male and female essences and how they connect to antagonistic male and female natures." She explains, in exquisite detail, the flaws in the underlying science, from experimental designs that make no statistical sense to "conceptually sloppy" definitions of male and female sexuality, contradictory results, and the social construction of normality. Her conclusion that the patterns we see are far more complicated than previously believed and due to a wider range of variables will shake up the research community and alter public perception.

Brain Storm

Signed into law in 2000, the Trafficking Victims Protection Act (TVPA) defined the crime of human trafficking and brought attention to an issue previously unknown to most Americans. But while human

trafficking is widely considered a serious and despicable crime, there has been far less consensus as to how to approach the problem—owing in part to a pervasive emphasis on forced prostitution that overshadows repugnant practices in other labor sectors affecting vulnerable populations. *Responding to Human Trafficking* examines the ways in which cultural perceptions of sexual exploitation and victimhood inform the drafting, interpretation, and implementation of U.S. antitrafficking law, as well as the law's effects on trafficking victims. Drawing from interviews with social workers and case managers, attorneys, investigators, and government administrators as well as trafficked persons, Alicia W. Peters explores how cultural and symbolic frameworks regarding sex, gender, and victimization were incorporated into the drafting of the TVPA and have been replicated through the interpretation and implementation of the law. Tracing the path of the TVPA over the course of nearly a decade, *Responding to Human Trafficking* reveals the profound gaps in understanding that pervade implementation as service providers and criminal justice authorities strive to collaborate and perform their duties. Ultimately, this sensitive ethnography sheds light on the complex and wide-ranging effects of the TVPA on the victims it was designed to protect.

Responding to Human Trafficking

The Arizona State University Art Museum is renowned for its extensive and notable craft collection and features international acquisitions in wood, ceramic, and fiber. This book, edited by the museum's curators, uses the ASU collection to explore the idea of craft within a critical context, as both idea and action. *Crafting a Continuum* begins with the genesis of the craft collection and relates it to the historical development of craft in the United States and abroad, exploring both anthropological and cultural concepts of the field. Peter Held and Heather Sealy Lineberry present photographs of the museum's objects alongside essays by distinguished scholars to illuminate historical and contemporary trends. Sidebars and essays by writers in the craft field offer a broad overview of the future of contemporary craft.

Crafting a Continuum

The assertion that even institutions often viewed as abhorrent should be dispassionately understood motivates Arkotong Longkumer's pathbreaking ethnography of the Sangh Parivar, a family of organizations comprising the Hindu right. The Greater India Experiment counters the urge to explain away their ideas and actions as inconsequential by demonstrating their efforts to influence local politics and culture in Northeast India. Longkumer constructs a comprehensive understanding of Hindutva, an idea central to the establishment of a Hindu nation-state, by focusing on the Sangh Parivar's engagement with indigenous peoples in a region that has long resisted the "idea of India." Contextualizing their activities as a Hindutva "experiment" within the broader Indian political and cultural landscape, he ultimately paints a unique picture of the country today.

The Greater India Experiment

"An intelligent and insightful study" of the cultural and economic factors surrounding female sex workers in Japan (Nicole Constable, author of *Maid to Order in Hong Kong: Stories of Migrant Workers*). Contemporary Japan is home to one of the world's largest and most diversified markets for sex. Widely understood to be socially necessary, the sex industry operates and recruits openly, staffed by a diverse group of women who are attracted by its high pay and the promise of autonomy—but whose work remains stigmatized and unmentionable. Based on fieldwork with adult Japanese women in Tokyo's sex industry, *Healing Labor* explores the relationship between how sex workers think about what sex is and what it does and the political-economic roles and possibilities that they imagine for themselves. Gabriele Koch reveals how Japanese sex workers regard sex as a deeply feminized care—a healing labor—that is both necessary and significant for the well-being and productivity of men. In this nuanced ethnography that approaches sex as a social practice with political and economic effects, Koch compellingly illustrates the linkages between women's work, sex, and the gendered economy. "Will not only enlighten anthropologists with an interest in gender issues, the sex industry, labor relations, and women's rights, but will also provide valuable insights for anyone interested in the Japanese economic system and workplace." —*The Journal of Japanese Studies*

Healing Labor

Bring the spark back into your bedroom and your marriage with gutsy and effective advice from bestselling author Michele Weiner-Davis. It is estimated that one of every three married couples

struggles with problems associated with mismatched sexual desire. Do you? If you want to stop fighting about sex and revitalize your intimate connection with your spouse, then you need this book. In *The Sex-Starved Marriage*, bestselling author Michele Weiner Davis will help you understand why being complacent or bitter about ho-hum sex might cost you your relationship. Full of moving firsthand accounts from couples who have struggled with the erosion of sexual desire and rebuilt their passionate connection, *The Sex-Starved Marriage* addresses every aspect of the sexual libido problem: If you're the more highly sexed partner, you'll breathe a sigh of relief. At last someone understands your feelings about the void in your marriage. Discover why your pleas for touch have fallen upon deaf ears and why your approach to the lull in your sexual relationship could be a sexual turnoff. Most important, learn new ways to motivate your spouse to take your needs for more physical closeness to heart. If you're the spouse with a lagging libido, you're far from alone. You'll learn about the physiological and psychological factors, including unresolved relationship issues, that may contribute to the chill in your bedroom and what you can do to melt the ice. And if you're a man, you'll be surprised to learn that staggering numbers of men, even men whose sexual machinery works just fine, "get headaches" too! *The Sex-Starved Marriage* will give you and your spouse the inspiration, encouragement, and answers you need.

The Sex-Starved Marriage

The iconic relief organization's activities over a half century of history, through wars, epidemics, and other disasters: "Well-researched . . . fascinating." —Julia F. Irwin, *Bulletin of the History of Medicine* In dark skirts and bloodied boots, Clara Barton fearlessly ventured onto Civil War battlefields to tend to wounded soldiers. She later worked with civilians in Europe during the Franco-Prussian War, lobbied legislators to ratify the Geneva conventions, and founded and ran the American Red Cross. The American Red Cross from Clara Barton to the New Deal tells the story of the charitable organization from its start in 1881, through its humanitarian aid during wars, natural disasters, and the Depression, to its relief efforts of the 1930s. Marian Moser Jones illustrates the tension between the organization's founding principles of humanity and neutrality and the political, economic, and moral pressures that sometimes caused it to favor one group at the expense of another. This book tells the stories of: • U.S. natural disasters such as the Jacksonville yellow fever epidemic of 1888, the Sea Islands hurricane of 1893, and the 1906 San Francisco earthquake • crises abroad, including the 1892 Russian famine and the Armenian massacres of 1895–96 • efforts to help civilians affected by the civil war in Cuba • power struggles within the American Red Cross leadership and subsequent alliances with the American government • the organization's expansion during World War I • race riots and massacres in East St. Louis, Chicago, and Tulsa between 1917 and 1921 • help for African American and white Southerners after the Mississippi flood of 1927 • relief projects during the Dust Bowl and after the New Deal An epilogue relates the history of the American Red Cross since the beginning of World War II and illuminates the organization's current practices and international reputation.

The American Red Cross

Hair in Toxicology: An Important Biomonitor is the first book of its kind devoted exclusively to in-depth analysis of the hair shaft as an important tool for a diverse range of scientific investigations. This authoritative book combines contributions from experts in academic, governmental and industrial environments, to provide a unique, comprehensive look at: - Why hair can serve as an invaluable bio-resource in toxicology, with up-to-date reviews on hair growth, hair fibre formation and hair pigmentation - Information (including regulatory details) on the exposure of hair (and by extension the body) to drug and non-drug chemicals and pollutants - Toxicological issues relevant to the use of hair products (including colourants, shampoos and depilatories) - The ability of hair to capture information on personal identity, chemical exposure, and environmental interactions - How hair can provide an understanding of human life from archaeological and historical perspectives - Future direction in the use of hair in toxicology *Hair in Toxicology: An Important Biomonitor* is ideal as a reference and guide to investigations in the biomedical, biochemical and pharmaceutical sciences at the graduate and post graduate level.

Hair in Toxicology

If there is a reunion in your future, whether as the organizer or a helping hand, *Reunion Planner* is one book you won't want to be without. *Reunion Planner* leaves nothing to chance. The contents include sections on the following: choosing the proper kind of reunion, recruiting volunteers, selecting the time

and place, creating the program, guest speakers, budgeting, notifying the participants and promoting the event, planning meals and decorations, accommodations and transportation, souvenirs and fund raisers, photographers and videographers, building a genealogy, and finishing touches from road signs to thank-you notes and more.

Reunion Planner

Focusing on three entertainers who have become national icons Martin Stokes offers a portrait of Turkish identity that is very different from the official version of anthems and flags. In particular, he discusses how a Turkish concept of love has been developed through the work of the singers and the public reaction to them.

The Republic of Love

The twelfth-century French poet Chrétien de Troyes is a major figure in European literature. His courtly romances fathered the Arthurian tradition and influenced countless other poets in England as well as on the continent. Yet because of the difficulty of capturing his swift-moving style in translation, English-speaking audiences are largely unfamiliar with the pleasures of reading his poems. Now, for the first time, an experienced translator of medieval verse who is himself a poet provides a translation of Chrétien's major poem, Yvain, in verse that fully and satisfyingly captures the movement, the sense, and the spirit of the Old French original. Yvain is a courtly romance with a moral tenor; it is ironic and sometimes bawdy; the poetry is crisp and vivid. In addition, the psychological and the socio-historical perceptions of the poem are of profound literary and historical importance, for it evokes the emotions and the values of a flourishing, vibrant medieval past.

Yvain

Stephanie Tripp, Guest Editor for the spring 2013 edition "Tracing /New / Media / Feminisms" maps out the topic by way of twelve international contributors, including: Faith Wilding; Morehshin Allahyari and Jennifer Way; Annina Rüst; Kim Sawchuk (Studio XX) and Stéphanie Lagueux (Matricules) in conversation with Media-N; Meighan Ellis; Colleen Keough; Eleanor Dare; and Laura Gemini and Federica Timeto in conversation with Lynn Hershman Leeson. These creative practitioners undertake their various approaches to feminism(s) from multiple theoretical positions as well as physical sites. The journal's REVIEWS/REPORTS and PAPAERS section showcases a review on Joan Truckenbrod's book. An interview with Jon Satrom about GLI.TC/H. An interview with Alvaro Pastor on "La Casa IDA." A discussion on Augmented Reality. An essay about: Channel TWo (CH2.) And an essay on new work in software studies. Pat Badani Editor-in-Chief
