**** A New York Times Bestseller ** NAMED ONE OF THE BEST BOOKS OF THE YEAR BY:** Time • The New Yorker • NPR • GQ • Elle • Vulture • Fortune • Boing Boing • The Irish Times • The New York Public Library • The Brooklyn Public Library "A complex, smart and ambitious book that at first reads like a self-help manual, then blossoms into a wide-ranging political manifesto."—Jonah Engel Bromwich, The New York Times Book Review One of President Barack Obama's "Favorite Books of 2019" Porchlight's Personal Development & Human Behavior Book of the Year In a world where addictive technology is designed to buy and sell our attention, and our value is determined by our 24/7 data productivity, it can seem impossible to escape. But in this inspiring field guide to dropping out of the attention economy, artist and critic Jenny Odell shows us how we can still win back our lives. Odell sees our attention as the most precious—and overdrawn—resource we have. And we must actively and continuously choose how we use it. We might not spend it on things that capitalism has deemed important ... but once we can start paying a new kind of attention, she writes, we can undertake bolder forms of political action, reimagine humankind's role in the environment, and arrive at more meaningful understandings of happiness and progress. Far from the simple anti-technology screed, or the back-to-nature meditation we read so often, *How to do Nothing* is an action plan for thinking outside of capitalist narratives of efficiency and techno-determinism. Provocative, timely, and utterly persuasive, this book will change how you see your place in our world.

Encyclopaedic Dictionary Of Botany

Excerpt from Paxton's Botanical Dictionary: Comprising the Names, History, and Culture of All Plants Known in Britain; With a Full Explanation of Technical Terms Respecting the number of scientific terms herein explained, we may be allowed to say that no other popular glossary contains such a copious collection. Their explication is in exact accordance with the views of the most learned botanists, merely being reduced to dimensions which best comport with simplicity and conciseness. Considering the immense field which this volume occupies, the accentuation of generic, specific, and all purely botanical names that are not Anglicised, must be regarded as a highly valuable characteristic. By the extreme perspicuity of the marks employed, their full and universal adaptation, and the fact that they were all supplied by the first botanist in England, (dr. Lindley,) the botanic student or other assiduous examiner will here meet with a fund of accurate instruction in this particular, to which only the most laboured and extremely expensive publication can at all pretend. It might be assumed that the signs used are sufficiently common to require no comment but, for the benefit of the less informed, we shall just show the manner in which they apply. In the first place, the vowel in each word over which the primary accent occurs, sustains all the emphasis of the syllabic pronunciation, independently of the real nature of the sign. Further, the employment of the long quantity or the short quantity simply denotes that the vowel above which they are placed is to be sounded long and broadly, or short and abruptly. To vary our expression, the short vowel is perpetually pronounced in conjunction with the next consonant, and the long one has its own distinct and final sound, as if the letter were doubled, but the voice rested on each. In all cases when the last syllable but one is marked long the accent falls on that syllable; and when the last syllable but one is marked short the accent falls on the last syllable but two. Thus Romani'i's would be accented Romanus, and tricolor would be accented tricolor, although the i on which the accent is placed is short. It is extremely important to bear this in mind. Adventuring in Dictionaries: New Studies in the History of Lexicography brings together seventeen papers on the making of dictionaries from the sixteenth century to the present day. The first five treat English and French lexicography in the sixteenth and seventeenth centuries. Heberto Fernandez and Monique Cormier discuss the outside matter of French–English bilingual dictionaries; Kusujiro Miyoshi re-assesses the influence of Robert Cawdrey; John Considine uncovers the biography of Henry Cockeram; Antonella Amatuzzi discusses Pierre Borel's use of his predecessors; and Fredric Dolezal investigates multi-word units in the dictionary of John Wilkins and William Lloyd. Linda Mitchell's account of dictionaries as behaviour guides in the seventeenth and eighteenth centuries leads on to Giovanni Iamartino's presentation of words associated with women in the dictionary of Samuel Johnson, and Thora Van Male's of the ornaments in the *Encyclopédie*. Nineteenth-century and subsequent topics are treated by Anatoly Liberman on the growth of the English etymological dictionary; Julie Coleman on dictionaries of rhyming slang; Laura Pinnavaia on Richardson's *New Dictionary* and the changing vocabulary of English; Peter Gilliver on early editorial decisions and reconsiderations in the making of the *Oxford English Dictionary*; Anne Dykstra on the use of Latin as the metalanguage in Joost Halbertsma's *Lexicon Frisicum*; Laura Santone on the "Dictionnaire critique" serialized in Georges Bataille's Surrealist review *Documents*; Sylvia Brown on the stories of missionary lexicography behind the *Eskimo–English Dictionary* of 1925; and Michael Adams on the legacies of the Early Modern English Dictionary project. The diverse critical perspectives of the leading lexicographers and historians of lexicography who contribute to this volume are united by a shared interest in the close reading of dictionaries, and a shared concern with the making and reading of dictionaries as human activities, which cannot be understood without attention to the lives of the people who undertook them.
