THE COMPLETE BABY & CHILD CARE HANDBOOK For more than four decades, parents worldwide have referred to Marina's book as their 'baby bible'. The Baby & Child Care Handbook is fully up to date, with the latest medical research. You will also have free access to Marina's website (www.baby-child-care.com) featuring over 100 video talks by world renowned paediatric experts, doctors and professors on a variety of childcare subjects. These are arranged according to the subject of each chapter in the book. 'It is my sincere conviction that parents of all shades and creeds share a common bond: that of wanting the best for their children. It is also the right of every child to be raised with enough care to nurture mind, body and soul; so that each will grow up with the good sense of self-worth and a chance to realise their full potential.' **MARINA PETROPULOS** 'Marina highlights that each child is an individual, so we as parents get to know them in order to provide their particular needs. There is no single right way and Marina is very clear that we have to trust our knowledge of our particular children in order to help them grow up to be adults who can negotiate their way in life. This is a book to have always on one's bedside table!' **Dr ALAN WOOD**, Medical Journal. 'This book is a veritable one-stop knowledge shop... Not only does it seem to cover every single, solitary, freaky, benign, apparently stupid or incredibly bright question a fuzzy-headed mother might find herself asking, but it does so in a calm, credible, non-judgemental and non-patronising tone... there are also the more tricky topics like the hopes we have for our children, and - very sensitively and sensibly dealt with - the issue of discipline... particularly useful are the handy grids to illnesses, their symptoms and when to see a doctor...' **KAREN SCHIMKE** 'This book provides an up-to-date, comprehensive and reliable, factual advice and help for parents and parents-to-be. I unreservedly recommend it.' **DR JOHN PEARNS**, Royal Children's Hospital, Australia. 'This book read beautifully - it is light, yet serious and thorough and up-to-date. A really marvellous guide and source of excellent information.' **Professor Astrid Berg**, MB ChB, FC Psych (SA), MPhil (Child & Adolescent Psychiatry). The What to Expect Babysitter and Nanny Handbook

Early childhood development (ECD)--including the sensori-motor, social /emotional and language / cognitive capacities--is indivisible from the child survival, health and education agendas and represents one of the important stages for breaking the intergenerational cycles of poverty and for promoting sustainable development. Development during the early years lays the critical foundations for health, learning and behavior across the life course. Poor development during childhood, unfortunately, is widespread. Globally over 200 million children do not reach their developmental potential in the first 5 years because they live in poverty, and have poor health services, nutrition and psycho-social care. These disadvantaged children do poorly in school and subsequently have low incomes, high fertility, high criminality, and provide poor care for their own children. As a result, their countries suffer an estimated 20 per cent loss in adult productivity. Investment in early childhood programs is essential because ECD programs and interventions can provide a "fair start" to children and help to modify distressing socio-economic and gender-related inequities. There is strong evidence regarding interventions that can address the causal factors and reduce the burden of poor child development. This package aims to help a variety of health and community workers to provide age-appropriate guidance to caregivers of young children for stimulating cognitive, language and social-emotional development through play and communication. This guidance is designed to benefit those children and families who need it most. It has been shown to be effective in improving responsive care. Implemented on a wide-scale, Care for Child Development will have significant public health and social benefits. The Care for Child Development package consists of: * Simple recommendations health workers can make to families to improve the development of children. * Training materials for health workers and community providers. * Support for families to solve common problems in providing good care for young children. * Advocacy materials. * A monitoring and evaluation framework.
