Maternal Child Nursing Care - E-Book

Maternal Child Nursing Care - E-Book

Maternal Child Nursing Care

Written by the foremost experts in maternity and pediatric nursing, Maternal Child Nursing Care, 5th Edition offers the accurate, practical information you need to succeed in the classroom, the clinical setting, and on the NCLEX® examination. This new edition offers numerous content updates throughout the text to keep you up-to-date on the latest topics and best practices. Plus hundreds of illustrations, alert boxes, and tables clarify key content and help you quickly find essential information. Atraumatic Care boxes in the pediatric unit teach you how to provide competent and effective care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, supply resources and guidance, and illustrate nursing care in a variety of settings. Critical thinking case studies offer opportunities to test and develop your analytical skills and apply knowledge in various settings. Emergency boxes in the maternity unit guide you through step-by-step emergency procedures. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Family-Centered Care boxes highlight the needs or concerns of families that you should consider to provide family-centered care. NEW! Content updates throughout the text give you the latest information on topics such as the late preterm infant, fetal heart rate pattern identification, obesity in the pregnant woman, shaken baby syndrome/traumatic brain injury, Healthy People 2020, car restraints, immunizations, and childhood obesity. NEW! Updated Evidence-Based Practice boxes including QSEN KSAs (knowledge, skills, attitudes) provide the most current practice guidelines to promote quality care. NEW! Medication Alerts stress medication safety concerns for better therapeutic management. NEW! Safety Alerts highlighted and integrated within the content draw attention to developing competencies related to safe nursing practice.

Maternal-infant Nursing Care

This market-leading textbook provides just the "right amount" of maternity and pediatric content in an easy-to-understand manner. Divided into two sections, the first part of the book includes 28 chapters on maternity nursing and the second part contains 27 chapters covering pediatric nursing. Numerous illustrations, photos, boxes, and tables clarify key content and help you quickly find essential information. And because it's written by market-leading experts in maternity and pediatric nursing, you can be sure you're getting the accurate, practical information you need to succeed in the classroom, the clinical setting, and on the NCLEX(R) examination. UNIQUE! Nursing Alerts point out critical information to consider when caring for patients. UNIQUE! Guidelines boxes outline instructions for skills or procedures in an easy-to-follow, step-by-step format. UNIQUE! Emergency boxes offer quick reference to emergency procedures for critical maternity and pediatric emergencies. UNIQUE! Home Care boxes offer helpful guidelines for delivering effective care in the home environment. UNIQUE! Atraumatic Care boxes in the pediatric section illustrate how to provide competent nursing care without creating undue physical or psychological stress for pediatric patients, families, and nurses. UNIQUE! Community Focus boxes examine community issues and provide resources and guidance on caring for families outside the clinical setting. UNIQUE! Cultural Awareness boxes address culturally competent care for patients with a variety of customs and beliefs. UNIQUE! Family-Centered Care boxes discuss the family's role and needs in caring for the patient. UNIQUE! Nursing Process boxes offer quick access to nursing process information for major diseases and conditions. Critical Thinking Exercises provide case scenarios to promote sound clinical decision making. Nursing Care Plans include rationales for interventions and provide specific guidelines for delivering effective nursing care. Patient Teaching boxes highlight important information for communicating continuing care instructions to patients and families. New and consolidated content on pain assessment and management focuses on this key aspect of pediatric nursing. Updated content on evidence-based practice illustrates how current research can be used to improve patient outcomes. The latest information in the field is included throughout, including expanded coverage of the late preterm infant and fetal heart rate pattern identification.

Maternal Child Nursing Care

Growing research shows that many children from immigrant and refugee families are not doing well in school, due in part to linguistic and cultural disadvantages. Teaching dual-language learners requires cultural sensitivity, an understanding of language acquisition, and intentional teaching strategies. Combining research and techniques, this resource helps early childhood educators support dual-language learners as they develop the skills necessary for school readiness and success.

Maternal & Child Health Nursing

For all courses in maternal and child nursing care in any nursing program. This dynamic, up-to-date text offers an integrated framework and philosophy for teaching the nursing of childbearing families and nursing of children together. Accurate, readable, and concise, Maternal & Child Nursing Care supports faster and more efficient learning in briefer, more compressed courses; while helping students develop essential skills for fast-changing healthcare environments. Core themes in this edition include family-centered and community-based care; health promotion (including Healthy People 2020); patient and family education; clinical reasoning; evidence-based practice, and developing cultural competence. This edition adds new Safety Alerts; more coverage of pain as the fifth vital sign; greater focus on care of families where a child is dying; and updated content on assessment, nutrition, communication, and many other key topics. Multiple pedagogical tools help students focus both learning and review, including intuitive Pathophysiology Illustrated visuals; Family Quotes presenting the family's perspective; Learning Outcomes and Critical Concept Review Features; Key Terms, and an online audio glossary.

Maternal Child Nursing Care

MATERNAL-CHILD NURSING CARE, 2ND EDITION covers the essential content for the maternity and pediatric nursing courses combined in one affordable text. The inclusion of expert authors, contributors, and reviewers ensures delivery of accurate and up-to-date content in both maternity and pediatric areas. The authors are also noted for their clear writing style that makes content easy to read and understand. The following are the key features retained for the second edition: Nursing Care Plans, Nurse Alerts, Guidelines, Emergency Treatment, Home Care, Cultural Awareness, Family Focus, Patient Teaching and Critical Thinking Exercises. The second edition will also include a new

full-color design, greater emphasis on community care and research throughout. - Expert authors ensure delivery of accurate and up-to-date maternity and pediatric content - Authors' clear writing style makes content easy to read and understand - Focus on the family throughout emphasizes the influence of family in health and illness - Nursing Care Plans, including rationales for interventions, provide students with an overview and specific guidelines for delivering effective nursing care - Nurse Alerts point out critical information that students should not overlook when treating patients - Guidelines boxes outline nursing procedures in an easy-to-follow fashion - Emergency boxes highlight emergency procedures in a step-by-step format to help students understand how to perform them - Home Care boxes detail important information to help prepare students to deliver care to patients and families in the home setting - Atraumatic Care boxes (in the pediatric section) teach students to provide competent care without creating undue physical or psychological stress to the patient - Critical Thinking boxes provide students with case scenarios that depict real life situations to help them choose the best intervention and make good clinical judgements - Patient Teaching boxes (in the maternity section) highlight content students can share with patients and families to help them meet or exceed expected outcomes - Cultural Considerations boxes provide students with information to help them deliver culturally competent care - Family Focus boxes highlight the needs or concerns of families that students should consider when family-centered care is provided - NEW Chapter 3, Community and Home Care, provides a basis for understanding community aspects of maternity care - Unit 2, Reproductive Years, provides students with a thorough understanding of health promotion and prevention, common health concerns, contraception, infertility, and abortion related to the care of women throughout the childbearing years - Two NEW chapters, Pre-Existing Conditions (13) and Gestational Conditions (14) focus on the care and treatment of pregnant women with conditions she had prior to becoming pregnant and those she acquired during pregnancy - NEW Chapter 21, Assessment and Care During the Fourth Trimester focuses on nursing care management of the physical and psychosocial needs of the mother and on discharge teaching during the fourth trimester (postpartum) - NEW Chapter 22, Transition to Parenthood, focuses on assisting parents in adapting to parenthood, and includes practical suggestions for the first weeks at home after the birth - NEW Chapter 29, Community-Based Care of the Child and Family, provides students with an understanding of how to provide care for patients outside of the acute care setting - An inviting full-color design with over 1,000 colorful photographs and line drawings has been added to enhance the overall visual appeal of the text - Community Focus boxes have been added throughout to highlight information on how to provide care in community settings (Includes a FREE MERLIN website at: www.harcourthealth.com/MERLIN/Wong/maternal/)

Maternal & Child Nursing Care PDF ebook, Global Edition

The themes that shape this book - nursing care in the community, client education, critical thinking, & evidence-based practice in nursing - will prepare students for the responsibility of managing care for families with diverse healthcare needs, & to work collaboratively with families & other health professionals to enhance care. For courses in maternal and child nursing care in any nursing program Help students think like nurses with maternal-newborn and pediatric clients As nursing courses are shortened and clinical experiences become more limited, time is increasingly precious to both students and faculty. Designed to support faster, more efficient learning in condensed courses, Maternal & Child Nursing Care presents key content about maternal-newborn nursing, women's health, and pediatric nursing topics in an accurate, readable way. Throughout this family-focused text, special attention is paid to health promotion, home/community care, patient and family education, clinical reasoning, evidence-based practice, and cultural competence. Engaging features help readers learn and retain essential concepts in a short period of time. The straightforward approach allows students to focus on what is most important-developing the essential skills and abilities to practice nursing in fast-changing healthcare environments. Also available with MyNursingLab(MyNursingLab is an online homework, tutorial, and assessment program designed to engage students in the Maternal/Newborn Nursing course and improve results. Its guided learning path is proven to help students think like a nurse as they move beyond memorization to true understanding through application. NOTE: You are purchasing a standalone product; MyNursingLab does not come packaged with the content.

Maternal and Infant Nursing Care

CLINICAL COMPANION FOR MATERNAL-INFANT NURSING CARE is a valuable, pocket-size clinical reference on the most essential content for normal and high-risk maternal-infant nursing care. The first six chapters are dedicated to providing appropriate information on the normal processes during each stage of the childbearing experience. These include a chapter on fetal assessment and a chapter on key drugs used during pregnancy and lactation. The remaining three chapters highlight important considerations related to high-risk pregnancy, medical problems, and the newborn at risk. An important theme in this text focuses on maternal, fetal, and infant assessment. TOC: * Pocket-size reference detailing the most essential content necessary for the clinical setting, including antepartal assessment, pregnancy, fetal assessment, labor, birth, recovery, neonatal assessment and care. * Teaching Plans for Home Care highlight the importance of understanding the role of home care in the overall nursing care. * Care Paths and Decision Trees serve as examples of clinical, collaborative tools to introduce students to care implementation in the clinical environment. * Warning Signs boxes alert students to potential problems. * Procedure boxes provide step-by-step information on specific procedures. * Drug Profiles are included in an appendix to provide students with accessible, essential information about the most common medications and their effects on the woman and the newborn.

Maternal Child Nursing Care

Explains how to assess, plan, provide, and evaluate care for pregnancy, delivery, recovery, abnormal conditions, and newborn care. Features more than 65 of the most common and high-risk care plans for nursing care using the nursing process approach, this text includes NIC interventions, discussions on collaborative problems, key nursing activities, signs and symptoms, and diagnostic studies. --From publisher description.

Maternal & Child Nursing Care

This is an easy-to-use reference with nursing care plans for healthy clients during pregnancy, labor and delivery, postpartum, and the newborn periods. Additional diagnoses and plans are included for common perinatal and neonatal complications. The user can easily design a client-specific plan of care with interventions that are based on the latest research and current practice.

Maternal-Child Nursing Care

This reference is a compilation of care plans for the most commonly encountered clinical problems a nurse is likely to encounter. Written by practicing nurses for students and practitioners, this book serves as both a valuable reference and learning resource.

Maternal Child Nursing Care in Canada - E-Book

A respected authority updated for today's changing healthcare environment, Maternal & Child Health Nursing, 9th Edition, equips students for success by presenting maternal-newborn and child healthcare not as two separate disciplines, but as a continuum of knowledge. This extensively revised 9th Edition integrates a nursing process framework, an approachable organization, the latest evidence-based research, and engaging learning aids to ensure a mastery of essential concepts and cultivate the skills for successful nursing practice.

Clinical Companion to Accompany Maternal-Infant Nursing Care

It offers the perfect balance of maternal and child nursing care with the right depth and breadth of coverage for students in today's maternity/pediatric courses. A unique emphasis on optimizing outcomes, evidence-based practice, and research supports the goal of caring for women, families and children, not only in traditional hospital settings, but also wherever they live, work, study, or play. Clear,

concise, and easy to follow, the content is organized around four major themes, holistic care, critical thinking, validating practice, and tools for care that help students to learn and apply the material.

Maternal and Child Nursing Care

Learn to apply the knowledge you gain from Maternal-Child Nursing, 5th Edition to real-world scenarios with this user-friendly study guide. Specifically designed to parallel the material in the McKinney text, it's full of hands-on learning exercises, practical activities, and valuable review of essential concepts and skills to help cement your understanding of maternity and pediatric nursing care and apply that knowledge to the clinical world. Revised review questions reflect the study guide's updated content and allow you to quickly check your understanding of text material. Learning exercises include matching, short answer, fill-in-the-blank, and true/false questions to test your knowledge of the important material from each chapter. Expanded critical thinking exercises further test your critical thinking and decision making skills. Case studies and critical thinking exercises help you apply theoretical knowledge to real-life situations. Suggested learning activities for community and clinical settings enhance your understanding of the content. NEW! Completely updated content matches the textbook and provides a comprehensive review of essential maternal-child concepts and skills.

Maternal Newborn Nursing Care Plans

Here's the clinical information you need at your fingertips to provide safe, effective, and compassionate care in maternity and pediatric clinical settings. Full-color images of nursing skills and procedures as well as tools and charts make bedside reference easy.

Maternal-infant Nursing Care Plans

Maternal Newborn Nursing Care Plans provides students with a necessary care plan reference that includes a strong nursing process approach and comprehensive coverage of maternity nursing content. The goal of the book is to provide interventions for both collaborative problems and nursing diagnoses. It emphasizes the use of standardized nursing languages, including NANDA diagnoses, NIC interventions, and NOC outcomes in each care plan. Includes over 65 of the most common normal and high risk care plans associated with maternal newborn nursing care. UNIQUE! Lists the collaborative problems or potential complications for every condition covered. Incorporates a consistent format presentation for each content area that includes: 1) Focus on Collaborative Practice - definition, etiology, physical findings, diagnostic studies; 2) Collaborative Problems - list of collaborative problems and focus assessments; 3) Nursing Diagnosis Care Plans - list of each diagnosis, care plan for each nursing diagnosis that links NANDA, NIC, and NOC; and 4) Teaching/Collaborative Activities. Emphasizes collaboration throughout to show students how to use standardized approaches such as Critical Paths and individualized approaches (Nursing Care Plans) focusing on individualized care much the same as nurses do in practice. UNIQUE! Includes Care Plans from a wellness perspective to provide a greater emphasis on health promotion and prevention and to provide students with the necessary tools for care for areas other than just the problem. Integrates Home Care for certain interventions to stress the importance of follow-up care. Integrates Patient Teaching Interventions for certain diagnoses to help students understand the importance of teaching the patient self-care. . Evidence-Based Neonatal Nursing Practice chapter focuses on the importance of incorporating research into practice and on how to utilize available database resources for systematic research reviews. . Competency Based Neonatal Nursing Education chapter. . Hospice and Palliative Care chapter focuses on special treatment modalities for the neonate with cancer. . Management of NICU Environment chapter provides key information on how the NICU environment will support the premature infant's adaptability to extrauterine life. . Care of the Extremely Low Birth Weight Infant chapter provides a quick overview of the risk factors, typical problems, long-term outcomes and potential complications. . Complementary Therapies chapter provides discussions of various therapies as complements to traditions, allopathic techniques. . FREE CD-ROM included with the text. Includes: . Case studies and exam questions to help nurses prepare for neonatal intensive care or neonatal nurse practitioner certification or as a study aid to test their content knowledge. . Supplemental information on neonatal nursing standards (from NANN) and competency-based education, . EVOLVE website dedicated to providing the most current links to topics in neonatal nursing at <http://evolve.elsevier.com/Kenner/comprehensiv>

Delmar's Maternal-Infant Nursing Care Plans (Book Only)

The new Study Guide for Perry's Maternal Child Nursing Care in Canada is designed to help you review and master content from the core text and learn how to think critically in applying your knowledge. Chapters parallel those in the text and provide review, critical thinking applications, engaging activities, and more, with an answer key at the back of the book. This comprehensive study guide also contains case studies to help you integrate information and develop the critical thinking, clinical reasoning, and clinical judgement skills required to pass your licensure examination and excel in clinical practice. Thinking Critically case-based activities require students to apply the concepts found in the chapters to solve problems, make clinical judgement decisions concerning care management, and provide responses to patient questions and concerns. Reviewing Key Concepts questions in various formats give students ample opportunities to assess their knowledge and comprehension of information covered in the text. Matching, fill-in-the-blank, true/false, short-answer, and multiple-choice activities help students identify the core content of each chapter and test their understanding. Learning Key Terms matching and fill-in-the-blank questions let students test their ability to define all key terms highlighted in the corresponding textbook chapter. Perforated pages allow you to use activities for graded assignments. Answer key at the end of the book includes answers to all questions.

Study Guide for Maternal-Child Nursing

Comprehensive: An overview of each disease condition with assessment, diagnostic tests, nursing care plan and discharge/follow-up plan presented in brief, which would enable the learner to study this book with great interest. **Simple and Clear:** Simplified nursing care plans would enable the students or nurses to comprehend the content in an easy manner. This main feature of this book is that nursing care plans are based on the steps of nursing process and SOAPIE FORMAT and includes common

conditions of maternal , neonatal and few Gynaecological conditions of the women and neonate based on the revised undergraduate and postgraduate nursing syllabus of INDIAN NURSING COUNCIL. This book has been scientifically designed and meticulously written, keeping in view the recent and updated advancements in the care of women and neonate with maternal and neonatal conditions.

Maternal-Infant Nursing Care

For more than three decades, nursing students have relied on MATERNAL AND CHILD HEALTH NURSING for maternity and pediatric nursing education. The new ninth edition responds to changes in practice, with an increased focus on the nursing process, health promotion, family-centered care, cultural diversity and care in the home and community settings. Illustrations or photos on nearly every other page simplify learning. Students will rely on this book long after leaving the classroom. * Comprehensive coverage of basic maternity and pediatric nursing prepares students for today's practice. * Strong emphasis on family found within the narrative is essential in planning and implementing care. * Health promotion focus stresses teaching, screening and assessment to maintain optimal health. * Expanded coverage of cultural considerations develops awareness of diversity and provides strategies for meeting client needs. * Procedures are boxed for easy retrieval of step-by-step instructions. * Boxed Nurse Alerts offer helpful, practical tips for students new to the clinical setting. * Care plans include rationales for steps to help students understand why nursing actions are performed. * Each chapter includes Critical Thought Questions with answers in the Instructor's Resource Manual to help students learn to apply knowledge to practice.
