The Marriage Book

In America, the average amount of money, time, and energy spent on a wedding are astronomical. While thousands of dollars are spent for the wedding day, little if any money, time, and energy are spent in preparation for the marriage itself. To Have & To Hold: Preparing for a Godly Marriage offers a different approach from "pre-marital counseling." It is more of a marriage education helping and equipping couples to build smart marriages and healthy families. The days prior to a wedding can be busy and hectic. This Bible study book format maximizes the time couples have by focusing on important information in a simplified and condensed version. One of the biggest mistakes couples make is collecting great resources and then becoming overwhelmed by the amount of information gathered with little time to complete the reading. Oftentimes, those resources are put on the shelf for later, only to be pulled down when a crisis hits ... often too little, too late. This study may be used in a variety of ways including: For couples to do on their own as a pre-marriage study. For pastors or others to use in pre-marriage counseling with couples. For small groups where a leader has a group of young couples preparing to wed. For couples or small groups in the early years of marriage who did not receive pre-marriage preparation and counseling. Some of the weekly preparation is fun, creative, and light. It is a good escape from the wedding plans for a while helping couples find a balanced approach will help them gain insight during the fast-paced days. These weekly interactive prep activities will be focused on the specific topic for the week. They will encourage couples to look at scripture passages, do biblical words studies, listen to podcasts, go to a romantic place, or do some other activity to creatively challenge their thinking. These assignments are not a major time commitment, but they are vital as a couple works through issues. God's purposes for marriage are much higher and greater than our own. In Genesis 2:18, God said, "It is not good for man to be alone," He created Eve as an answer to that aloneness. Even though Adam had a perfect relationship with God, a perfect environment, and had all the possessions he wanted, there was still a void of intimacy. Blending two individuals into oneness was the Divine goal. They were made to become suitable helpers, counterparts who could balance and back one another in every way. God ordained marriage to be an earthly picture of the relationship between Christ and the Church. Jesus Christ's love for the Church, according to Ephesians 5, is sacrificial and unconditional. He laid down His life to present the church, His bride, whole, and complete. Likewise, when a husband and wife love each other as they do their own bodies, nurturing and caring for each other, they live out the beautiful picture of Christ's oneness with the Church. Features: Interactive questions and tools to guide discussion and make the study personal for couples Practical and simple to equip couples for marriage not only the wedding Tools and suggestions for pre-marital education and counsel Bible study book for couples (sold separately) is included in the Leader Guide for Pastors, church staff, small group leaders, or facilitators Benefits: Understand God's Biblical foundation and purpose for marriage in order to establish a foundation that provides stability and oneness in the marital relationship. Following God's principles leads to oneness and freedom in the roles and responsibilities

of the husband and wife. Help couples understand and follow God's stewardship principles as they work to experience financial freedom. Challenge the thinking of couples regarding needs, intimacy, and oneness in marriage. Encourage and challenge each partner to individually keep Christ as the first priority as well as to grow together in spiritual oneness as a couple. Equip couples with tools to learn the necessary skills to effectively communicate through expressing oneself, listening, and managing conflict. Create healthy expectations for marriage and set a course of action for the future. Join Byron and Carla Weathersbee in this eight-session study *To Have & To Hold: Preparing for a Godly Marriage* as they explore and focus on the keys to a healthy marriage.

As teachers we often tend to expect other countries to teach chemistry in much the same way as we do, but educational systems differ widely. At Bielefeld University we started a project to analyse the approach to chemical education in different countries from all over the world: Teaching Chemistry around the World. 25 countries have participated in the project. The resulting country studies are presented in this book. This book may be seen as a contribution to make the structure of chemistry teaching in numerous countries more transparent and to facilitate communication between these countries. Especially in the case of the school subject chemistry, which is very unpopular on the one hand and occupies an exceptional position on the other hand – due to its relevance to jobs and everyday life and most notably due to its importance for innovation capacity and problem solving – we have to learn from each others' educational systems.

The main problems that prevent fast and high-quality document processing in electronic document management systems are insufficient and unstructured information, information redundancy, and the presence of large amounts of undesirable user information. The human factor has a significant impact on the efficiency of document search. An average user is not aware of the advanced option of a query language and uses typical queries. Development of a specialized software toolkit intended for information systems and electronic document management systems can be an effective solution of the tasks listed above. Such toolkits should be based on the means and methods of automatic keyword extraction and text classification. The categorization (or classification) of texts into predefined categories has witnessed a booming interest in the last 10 years due to the increased availability of documents in digital form and the ensuing need to organize them. Thus, research on keyword extraction, advancements in the field, and possible future solutions is of great importance in current times. Developing a Keyword Extractor and Document Classifier: Emerging Research and Opportunities presents an information extraction mechanism that can process many kinds of inputs, realize the type of text, and understand the percentage of the keywords that has to be stored. This mechanism then supports information extraction and information categorization mechanisms. This module is used to support a text summarization mechanism, which leads—with the help of the keyword extraction module—to text categorization. It employs lexical and information retrieval techniques to extract phrases from the document text that are likely to characterize it and determines the category of the retrieved text to present a summary to the users. This book is ideal for practitioners, stakeholders, researchers, academicians, and students who are interested in the development of a new keyword extractor and document classifier method.
