Dust and Light

It is as if being here and being human were an issue of hard ends and not pliant openings. Dust and Light is replete with questions that point with a curved or crooked finger. The poetic finger lingers past the point, and curves toward the palm. Language curves into the mystery of personhood, and the mystery of personhood wheels out into the question of cosmos.

Dust and Light

National bestselling author Carol Berg returns to the world of her award-winning *Flesh and Spirit* and *Breath and Bone* with an all-new tale of magic, mystery, and corruption.... How much must one pay for an hour of youthful folly? The Pureblood Registry accused Lucian de Remeni-Masson of "unseemly involvement with ordinaries," which meant only that he spoke with a young woman not of his own kind, allowed her to see his face unmasked, worked a bit of magic for her....After that one mistake, Lucian's grandsire excised half his magic and savage Harrowers massacred his family. Now the Registry has contracted his art to a common coroner. His extraordinary gift for portraiture is restricted to dead ordinaries—beggars or starvelings hauled from the streets. But sketching the truth of dead men's souls brings unforeseen consequences. Sensations not his own. Truths he cannot possibly know and dares not believe. The coroner calls him a cheat and says he is trying to weasel out of a humiliating contract. The Registry will call him mad—and mad sorcerers are very dangerous....

Dust and Light (Classic Reprint)

This book is a reflection on the subjects and places that made the deepest impression on the author during his years spent in Eastern Africa. His interest and skill in capturing the emotions of wild animals, their resilience and beauty make it unique. The author has sought out the most dramatic weather conditions for his photographs--morning mists, dust storms and heavy rains, or rays of light shining through the clouds--and followed the animals on endless journeys along ancient trails, across dry lakes or raging rivers, documenting their never-ending fight for survival. He had his camera with him all the time, always hoping for the perfect blend of elements to come together in one image.

The Light in the Dust

When all has been lost, we find ourselves... Out of the ashes of destruction, a new world has arisen. The plagues of the past—the worship of greed and pursuit of power—are gone. Now, the communities that remain in this post-apocalyptic world focus on creating connections, on forging futures filled with family and love. And all with the help of hard work, hope... and a little bit of magic. Artist Matthew Sugiyama knows this well. Traveling the countryside in search of the family he lost as a child, he trades his art for supplies—and uses his honed magic to re-draw the boundaries of reality, to fashion a world that is better for those he meets. Following glimpses of visions half-seen, Matthew—and the friends

he encounters along the way—will travel a path from light to darkness and back again. A road where things lost in the past can only be found in the love of the present, and the hope for the future. And he will travel this path wherever it leads. From joy to sorrow, from tears to laughter. Because Matthew is the Elemental Artist, and he knows that though dangers arise, humanity will always triumph... in a world he has painted in shades of Oil and Dust. Author Jami Farleigh invites you to meet a rich tapestry of characters, and to travel through a world that blends fantasy, laughter, coming of age, and evocative literary stylings to create a perfect escape. Fans of *The Goblin Emperor*, *The Long Way to a Small, Angry Planet*, *The Language of Flowers*, and *Quarter Share* will delight in this tale of humor, humanity, and the power of hope. Dust Light, Leaves

Someone scatters Light dust from the sky,
Like the snow that covers us
The light changes inside us
into the word
That whispers the secret
In which we can be found.
The light dust dances slowly,
The snow covers our hands,
Our sights are rainbows,
And the one who scatters the light
Remains silent.

Free From Dust, Light Is Revealed: The Path to Wisdom

WHEN LIGHT TURNS TO DUST Please note: this EPub is optimized for viewing on Thorium Reader. Thorium Reader is the free EPUB reader of choice for Windows 10 and 11, MacOS and Linux. <https://www.edrlab.org/software/thorium-reader> Artist Lloyd Godman lived in the same house at Brighton Dunedin New Zealand for nearly 30 years, but it was only during the summer of 2002-3, that he discovered a series of old photographic negatives on the ground in the cellar left by a previous owner. The silver gelatin images that might hold a reference to past lives and events had however decayed and been replaced largely by dust and dirt. At first, they appeared to have no aesthetic or cultural value. To a photographer, dust and dirt are a nuisance that degrades the image and needs to be avoided; but all that was left was dust. The silver image that had been formed by the action of light had been replaced by dust. However, as a photographer, that he discovered a series of old negatives on the ground in the dark cellar left by a previous owner seemed to hold significance. So Godman took the fragmented negatives and treated them as photographic artefacts and printed the abstract patterns formed by the dust as one would for a normal black and white photographic negative. The negatives were placed in a large format enlarger that allowed a generous black boarder to be created around the negative. The visual results are an enigmatic series of photographic prints that seem part photograph, part photogram or Clich'e verre. Rich patterns and intricate textures created by the process of decay in nature during the passing of time are given a new life and obscure meanings that only each viewer can invent are suggested in the gestalt. In placed reference appears of the frame lines. The project was symbolic of his marriage break up, move to Melbourne, where he now lives at the Bladessin Press, and his creative evolution to work with plants as an art medium where he has created xeric vertical gardens with Tillandsia plants.

The Light of Dust

Karen Grassle, the beloved actress who played Ma on *Little House on the Prairie*, grew up at the edge of the Pacific Ocean in a family where love was plentiful but alcohol wreaked havoc. In this candid memoir, Grassle reveals her journey to succeed as an actress even as she struggles to overcome depression, combat her own dependence on alcohol, and find true love. With humor and hard-won wisdom, Grassle takes readers on an inspiring journey through the political turmoil on '60s campuses, on to studies with some of the most celebrated artists at the famed London Academy of Music and Dramatic Arts, and ultimately behind the curtains of Broadway stages and storied Hollywood sets. In these pages, readers meet actors and directors who have captivated us on screen and stage as they fall in love, betray and befriend, and don costumes only to reveal themselves. We know Karen Grassle best as the proud prairie woman Caroline Ingalls, with her quiet strength and devotion to family, but this memoir introduces readers to the complex, funny, rebellious, and soulful woman who, in addition to being the force behind those many strong women she played, fought passionately—as a writer, producer, and activist—on behalf of equal rights for women. Raw, emotional, and tender, *Bright Lights* celebrates and honors womanhood, in all its complexity.

Light in the Dust

The 6th ESLAB Symposium, organised by the Space Science Department (formerly ESLAB) of the European Space Research and Technology Center, was held in Noordwijk from 26-29 September

1972. This year the theme was "Photon and Particle Interactions with Surfaces in Space". More than 60 scientists attended mainly from ESRO Member States and from America. The first part of the Symposium was devoted to introductory lectures and to papers on interactions with spacecraft. The second half dealt with the photon and particle interactions with celestial objects, and ended with a general discussion and presentations of areas where new developments are required. The purpose of this Symposium was to throw light on the importance of the problems which are evoked by E. A. Trendelenburg in his introductory remarks, and to sum up our present understanding of these phenomena. It is hoped that this book will prove useful to physicists and engineers who are actually involved in space experiments and are concerned with interactions of these types. R. J. L. GRARD
OPENING ADDRESS Gentlemen, I should like to welcome you to the 6th ESLAB Symposium. In the past we have always organised this Symposium jointly with our sister institute, ESRIN, in Frascati, but unfortunately reductions in the scientific budget have forced ESRO to terminate the activities of that laboratory. Nevertheless, we have decided to carry on the tradition, and we shall continue on our own organising this series of symposia on specialised subjects.

Scattering and Extinction of Light by Dust Particles

Walking Drawings is a series of global live art installations. EVEWRIGHT, the artist, locates and re-interprets remote 'sandscapes' around the world creating large-scale drawings of up to 400 metres in scope. The drawings are created with a combination of freehand and mechanical tools on a vast landscape. They then become pathways, and members of the public, people of different ages, genders and cultures, all dressed in black or colours, are led onto the drawings and are invited to walk the lines with him and participate in creating seductive artistic patterns and formations.

When Light Turns to Dust

Mia Lockhart has a secret. Her mother was a Keeper, as was her grandmother - the women were warriors, healers and protectors. As Mia practices her craft, and falls in love with her childhood friend, she has no idea that a man who calls himself Dragonfly is watching from the shadows.

Traps for dust and light

A history of dust, discussing dust's role as a condition of life and as a measure of the small until the beginning of the twentieth century.

Oil and Dust

Winner of the Booker Prize as best novel of the year in 1983, Heat and Dust was also made into a major motion picture starring Julie Christie, now regarded by many as a classic.

Excerpt from The Scattering of Light by Dust-Free Liquids Since this paper was sent in a photograph of the spectrum of the light scattered by chloronaphthalene has been taken and shows only the line spectrum of the glass mercury lamp used as the source of light. There is no sign of continuous spectrum. Since moreover chloronaphthalene is the liquid which one would most suspect from its formula of showing fluorescence there can be no doubt that the phenomenon observed is true scattering. Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. No matter how much you fight against it, dust pervades everything. It gathers in even layers, adapting to the contours of things and marking the passage of time. In itself, it is also a gathering place, a random community of what has been and what is yet to be, a catalog of traces and a set of promises: dead skin cells and plant pollen, hair and paper fibers, not to mention dust mites who make it their home. And so, dust blurs the boundaries between the living and the dead, plant and animal matter, the inside and the outside, you and the world ("for dust thou art, and unto dust shalt thou return"). This book treats one of the most mundane and familiar phenomena, showing how it can provide a key to thinking about existence, community, and justice today. Object Lessons is published in partnership with an essay series in The Atlantic.

When Light Turns to Dust

Excerpt from *Through Dust to Light: Poems From an Apprenticeship Perhaps*, too, it may be worth their while to some for them to notice a variation on the usual Shakespearian form of the Sonnet - where instead of tagging the couplet to the quatrains - by allowing the emotion to crystallize in its own form, I have discovered more unity and climax in letting the three quatrains, like waves, break over into the couplet. Bright Lights, Prairie Dust

Presents an account of a personal journey, and a man's dream of tasting all the honeys in the world.

Photon and Particle Interactions with Surfaces in Space

After she was buried, Jessie awoke and tore through the earth to arise, reborn, as a zombie. Jessie's gang is the Fly-by-Nights. She loves the ancient, skeletal Florian and his memories of time gone by. She's in love with Joe, a maggot-infested corpse. They fight, hunt, dance together as one-something humans can never understand. There are dark places humans have learned to avoid, lest they run into the zombie gangs. But now, Jessie and the Fly-by-Nights have seen new creatures in the woods-things not human and not zombie. A strange new illness has flamed up out of nowhere, causing the undeads to become more alive and the living to exist on the brink of death. As bits and pieces of the truth fall around Jessie, like the flesh off her bones, she'll have to choose between looking away or staring down the madness-and hanging onto everything she has come to know as life . . .

Acclaimed author Karen Hesse's Newbery Medal-winning novel-in-verse explores the life of fourteen-year-old Billie Jo growing up in the dust bowls of Oklahoma. Out of the Dust joins the Scholastic Gold line, which features award-winning and beloved novels. Includes exclusive bonus content!"Dust piles up like snow across the prairie. . . ."A terrible accident has transformed Billie Jo's life, scarring her inside and out. Her mother is gone. Her father can't talk about it. And the one thing that might make her feel better -- playing the piano -- is impossible with her wounded hands. To make matters worse, dust storms are devastating the family farm and all the farms nearby. While others flee from the dust bowl, Billie Jo is left to find peace in the bleak landscape of Oklahoma -- and in the surprising landscape of her own heart.

The Keeper

Light in the Dust is the heartwarming tale of one young woman's struggle to survive the poverty and oppression of the post-war years. Written with startling clarity and honesty, it is a book that celebrates the triumph of an irrepressible optimism in the face of the greatest of odds. This is the story of the survival of the human spirit in the face of parental oppression and social and economic deprivation. It points to a greater need for compassionate understanding in a society often deaf and blind to the mental scarring of the growing child and, by definition, of the adult.

Alone and on the run, Cipher doesn't talk about her secrets, her powers, or the people chasing her. She can't let anyone get that close. At least, she shouldn't. Knight is working undercover for the bad guys. He's done things that have marked his soul, but it'll all be worth it if he can save the girl who means everything to him—the girl who saved his life by putting herself in danger. It's been twelve years, but Knight knows she's still alive, and he's made it his mission to find her and keep her safe. When Knight finally catches up to Cipher, electricity sparks. He's crazy gorgeous, stupid brilliant, and begging to lift the burden from Cipher's shoulders. Can she really trust him with her secrets? With her life? She doesn't have long to decide, because Knight isn't the only who's been looking for her. Now Cipher can't run without leaving him behind. What good is being together if they're both dead? To save Knight, Cipher will finally stop running...one way or another. The Shadow Ravens Series: 1. Cipher by Aileen Erin, USA Today bestselling author 2. Quanta by Lola Dodge 3. I just don't know. Nobody told him that the world could be so cruel, that men could be filled with such hate and corruption. Now, Druzeel doesn't know what to think. As he struggles with these new revelations, he is not even sure what to believe. But he clings to hope, hope that not everyone is as bad as those around him, that there are others who fight for good and justice and are not just looking for ways to gain more power by any means necessary. As he fights his way through crooked guards, shadowy thieves, and dangerous orcs, he clings to his faith that his companions will hear him and turn toward the light, but it may be hard to convince them when they turn their anger and hatred on him. A man can only take so much abuse. Druzeel does not know how much restraint he has left. Can he hold his anger back and continue to believe in the power of good? Or will his traveling companions force him to do something unthinkable to defend his honor? The only thing he is sure of is not being sure of anything.

Mystic Battles - Player's Guide

An astonishing journey through the creation of the seminal role playing epic, officially available in English for the first time ever! This holy grail of Final Fantasy fandom is packed full of original concept art, process pieces, and notes from the original artists and designers chronicling the creation of these timeless games. Totalling over three-hundred pages and collected in a high-quality hard-cover binding, Final Fantasy Ultimania Archive Volume 1 remains faithful to its original Japanese source material while simultaneously offering unparalleled accessibility for Western readers. No Final Fantasy collection is complete without this beautiful tome of art, lore, and history.

Seeds of Doubt

I will destroy you. Druzeel realizes that his actions have opened another path, one of evil and deceit, but the path of righteousness still lies before him. Choosing which one to follow is the difficult part, but one thing is certain - nothing will ever be the same. A tiny seed of virtue still lies inside of him, but as he travels through a city full of sin, hatred, and evil, it gets harder to feel that goodness. He knows it will take only the slightest push to fall into a hole of darkness, so he clings tightly to that shining light. But the pull of the gloom is strong and when a new figure enters his life and offers him power, it may be impossible to resist. With power comes fear and with that fear comes respect. All he wanted was the respect of his peers and the trust of those he admired. Is this new power enough to give him both? Can it make him into the man he always wanted to be? Or will it turn him into a monster? The power is

enchanting, but it comes with a heavy price. If he chooses to ignore those consequences, then there may be no pulling him from a dark descent.

Chrétien de Troyes uses repeated references to Spain throughout his romances; despite past suggestions that they contain Mozarabic and Islamic themes and motifs, these references have never been commented upon. The book will demonstrate that these allusions to Spain occur at key moments in the romances, and are often coupled with linguistic riddles which serve as roadmaps to the manner in which the romances are to be read. These references and riddles seem to support the idea that some of their themes and motifs in Chrétien's romances are of Andalusian origin. The book also analyzes Chrétien's notion of *conjointure* and shows it to be the intentional elaboration of a sort of *Mischliteratur*, which integrates Islamic and Jewish themes and motifs, as well as mystical alchemical symbolism, into the standard religious and literary canons of his time. The contrast afforded by Chrétien's use of irony, and his subtle integration of this *matière d'Orient* into the standard canon, constitutes a carefully veiled criticism of the social and moral conduct, as well as spiritual beliefs, of twelfth-century Christian society, the crusading mentality, chivalric mores, and even the notion of courtly love. The primary interest of the book lies in the fact that it will be the first to comment upon and analyze Chrétien's references to Spain and the rich *matière d'Orient* in his romances, while suggesting channels for its transmission, through scholars, merchants, and religious houses, from northern Spain to Champagne.

Purpleminds and Blueblood

At 18 years old and straight out of high school, young and naïve Blaize Francis meets and falls in love with the neighborhood's crazy, Molly-popping, K-2 smoking, loose cannon, Dexter Simmons, who promises her a life of happiness. Now at 23, she's starting to realize she's nothing more than a human punching bag to him. Locked inside the house of hell, alone with no family or friends, physically and

emotionally battered, Blaize continues to hold on to a relationship that may eventually kill her or place the one she cherishes the most in danger. After finally escaping the torment, she runs to the only person she knows. Detective Gregory Knight is at the top of his game in his career. After losing his wife to an unexplained death, he's determined to move on with life with his 7-year-old daughter. He has been working on Blaize's domestic abuse case for the last 3 years. Knight breaks the number one rule of never mixing business with pleasure when he starts growing feelings for Blaize. With Detective Knight to the rescue, he helps her through her most difficult times and helps build her into a stronger woman. With her newfound strength and not missing the fact that Blaize is one of the most beautiful women he has ever laid eyes on, his feelings for Blaize start to grow, and his willingness to protect her may jeopardize everything he has worked hard for. Will this damsel be worth his distress?

They have been shunned and feared by society forever. Born of tainted bloodlines and raised in shameful secrecy, the tieflings of Golarion count among their ancestors some of the greatest evils of the Great Beyond. Yet not all tieflings succumb to the sinister compulsions of their evil blood -- some strive to rise above the stereotype and become heroes in their own right. This Pathfinder sourcebook explores all that it is to be a tiefling, including not only an extensive discussion of tiefling culture and society, but also presenting numerous variations on the standard tiefling character. Rules for tieflings of specific fiendish heritages, new feats and magic, variant tiefling abilities and tiefling appearances, and new options for inquisitors, summoners, sorcerers, clerics and more await discovery in this Pathfinder Player Companion.

Greenville, South Carolina. Tessa and Dexter have a peculiar game that has bound them together since adolescence, ever since he moved with his peculiar family into the house across from hers. While she develops a genuine obsession with the new neighbor, Dex views their relationship as mere amusement. Their special and eccentric friendship drives them to play with their own lives and those of others, constantly making bets and deliberately getting into trouble. A crazier wager than before forces Tess's parents to send her away forever, to Florida, to live with Aunt Teddy. Tessa begins to despise Dexter for everything he put her through, and it is only through this hatred that she manages to move on after that terrible decision. Synopsis: Daytona Beach, Florida. Eight years later. Tess can't believe her sister is about to get married, which means she has to return home for an entire weekend. Will she see him again? Will they still play together? In a weaving of present and past, their wild story speaks to us about great love and how cruel the heart can be; about friendship and the devastating pains of life, which flow inexorably and cannot hold together what is meant to be lost or change what is written to remain united.

Between Courtly Literature and Al-Andaluz

When a devil-may-care rake rescues a frosty young widow from highwaymen, their lives become deliciously entangled. Decimus Pryor is one of London's most notable rakes. He saunters through life, trysting with young widows and making people laugh. But rumors have spread that his skills in the bedroom are overrated. The young widows are laughing at him, not with him, and slamming shut the doors to their boudoirs. Eloïse Fortrose has always spurned Decimus's advances, but when he rescues her from highwaymen, she discovers that there's a lot more to this Casanova than meets the eye. What better way to heat up the chilly autumn nights than to indulge in a brief liaison? They'll frolic between the sheets, laugh a little, restore Decimus's standing as a rake, then go their separate ways. Eloïse doesn't believe in love and neither does Decimus . . . but love is coming for them both, whether they want it to or not. This Regency romance contains one dashing rake, one beautiful young widow, three hapless highwaymen, a master of disguise, and a sprinkling of magic. I fight for good. What makes a man virtuous? Is it how he was raised? The people he surrounds himself with? Or is it something that comes from his very soul? For the young Druzeel Sesstar, it is the way he has always lived his life. Regardless of the tragic death of his parents, Druzeel stills sees the world filled with honor, kindness, and integrity, beliefs encouraged by his adoptive father Graeak, a powerful wielder of magic. He is content with his studies and driven to be as great a wizard as his mentor. Because of this, Druzeel has little time for the outside world. It is this isolation that has helped paint a land full of kindness and virtue, but when a powerful artifact is stolen, Druzeel will be thrust into a world that is not what he expected. When he finds that the world is not as genuine as he was taught, will he let the hard truth affect him or will he remain true to himself? When his beliefs are challenged at every turn, the good inside him shall be tested like never before. He must hold onto his convictions or he risks losing everything, including his soul.

'A joyous and celebratory tribute to all those who battled to be heard, who fought for their achievements to be recognised and honoured, who simply kept going' Kate Mosse The tried and tested 'On This Day in History' format has elevated the stories of many people and their impact on the wider world. However, of those considered noteworthy by the Establishment, just a fraction are women. But this is not the whole story - not by half. Our past is full of influential women, many of whom have been unfairly confined to the margins of history. Politicians, troublemakers, explorers, artists, writers, scientists and even the odd murderer; these women have shaped society around the globe. From Beyoncé to Doria Shafik, Queen Elizabeth I to Lillian Bilocca, On This Day She sets out to redress this imbalance and give voice to both those already deemed female icons, alongside others whom the history books have failed to include: the good, the bad and everything in between - this is a record of human existence at its most authentic.

Lab Girl is a book about work and about love, and the mountains that can be moved when those two things come together. It is told through Jahren's remarkable stories: about the discoveries she has made in her lab, as well as her struggle to get there; about her childhood playing in her father's laboratory; about how lab work became a sanctuary for both her heart and her hands; about Bill, the brilliant, wounded man who became her loyal colleague and best friend; about their field trips - sometimes authorised, sometimes very much not - that took them from the Midwest across the USA, to Norway and to Ireland, from the pale skies of North Pole to tropical Hawaii; and about her constant striving to do

and be her best, and her unswerving dedication to her life's work. Visceral, intimate, gloriously candid and sometimes extremely funny, Jahren's descriptions of her work, her intense relationship with the plants, seeds and soil she studies, and her insights on nature enliven every page of this thrilling book. In *Lab Girl*, we see anew the complicated power of the natural world, and the power that can come from facing with bravery and conviction the challenge of discovering who you are.

Featuring a foreword by Will Self We'll all experience recovery at some point in our lives, whether from addiction, physical illness, mental health issues or loss. Many of us heal, and we may discover ways to live with our changed selves, to reclaim a life. We may find a new voice, or unearth a voice that has been submerged. Vitally, recovery can mean community. This anthology – which grew out of a small creative writing class run by Lily Dunn at Hackney Recovery Service, and was later broadened into a nationwide call for submissions by Dunn and her teaching partner, Zoe Gilbert – represents a community of writers: new, unheard voices alongside emerging and established authors. Theirs are stories from the dark back alleys, the deep crevices of the mind, and from the wild, ecstatic heights of life before, during and after recovery. These are voices that urgently need to be heard, in all their variety.

This book considers how a combination of place-based writing and location responsive technologies produce new kinds of literary experiences. Building on the work done in the Ambient Literature Project (2016–2018), this book argues that these encounters constitute new literary forms, in which the authored text lies at the heart of an embodied and mediated experience. The visual, sonic, social and historic resources of place become the elements of a live and emergent *mise-en-scène*. Specific techniques of narration, including hallucination, memory, history, place based writing, and drama, as well as reworking of traditional storytelling forms combine with the work of app and user experience design, interaction, software authoring, and GIS (geographical information systems) to produce ambient experiences where the user reads a textual and sonic literary space. These experiences are temporary, ambiguous, and unpredictable in their meaning but unlike the theatre, the gallery, or the cinema they take place in the everyday shared world. The book explores the potentiality of a new literary form produced by the exchange between location-aware cultural objects, writers and readers. This book, and the work it explores, lays the ground for a new poetics of situated writing and reading practices.

The rules are simple: each year, writers get no more than 1,000 words to create a very short story, essay, poem, or other text that resonates with Latter-day Saint audiences in some way. Judges choose finalists that showcase (and sometimes stretch) the possibilities of Mormon literature. Audiences cast votes to crown a winner. Now, for the first time, seventy-seven finalists from the contest's first five years are gathered into a single collection, brimming with angry sunbeams, android apostles, and apocalypses. At turns raw and refined, miraculous and mundane, witty and wise, these pieces are the perfect sampler plate for anyone interested in Mormon literature.

"During his many long nights in the lab, scientist Andy O'Hara has plenty of time to wonder about the mysterious and beautiful Gina, first glimpsed in a lit window across the courtyard. He does not realize she is consumed by her vaccine research, concerned about her biotech company's financial problems, and about to become the prime target of animal rights activists. She is also distracted by a charming pharmaceutical mogul who offers funding for her work and a glamorous escape from her past mistakes." "When Andy finally meets Gina, his monotonous life starts to unravel. Soon he becomes embroiled in an increasingly complex web of deception as he scrambles to discover his rival's true intentions. When Gina abruptly disappears, Andy sets off to find her. But is it too late? Is there a more sinister reason behind Gina's involvement with the company? Is Gina's vaccine all it appears to be? And is Andy ready to acknowledge that there is more to life than work?"--BOOK JACKET.

Uses literature to understand and remake our ethics regarding nonhuman animals, old human beings, disabled human beings, and cloned posthumans Literary Bioethics argues for literature as an untapped and essential site for the exploration of bioethics. Novels, Maren Tova Linett argues, present vividly imagined worlds in which certain values hold sway, casting new light onto those values; and the more plausible and well rendered readers find these imagined worlds, the more thoroughly we can evaluate the justice of those values. In an innovative set of readings, Linett thinks through the ethics of animal experimentation in H.G. Wells's *The Island of Doctor Moreau*, explores the elimination of aging in Aldous Huxley's *Brave New World*, considers the valuation of disabled lives in Flannery O'Connor's *The Violent Bear It Away*, and questions the principles of humane farming through reading Kazuo Ishiguro's *Never Let Me Go*. By analyzing novels published at widely spaced intervals over the span of a century, Linett offers snapshots of how we confront questions of value. In some cases the fictions are swayed by dominant devaluations of nonnormative or nonhuman lives, while in other cases they confirm the value of such lives by resisting instrumental views of their worth—views that influence, explicitly or implicitly, many contemporary bioethical discussions, especially about the value of disabled and nonhuman lives. Literary Bioethics grapples with the most fundamental questions of how we value different kinds of lives, and questions what those in power ought to be permitted to do with those lives as we gain unprecedented levels of technological prowess.

Lab Girl

A riveting memoir-manifesto from the first female director of the National Science Foundation about the entrenched sexism in science, the elaborate detours women have taken to bypass the problem, and how to fix the system. If you think sexism thrives only on Wall Street or in Hollywood, you haven't visited a lab, a science department, a research foundation, or a biotech firm. Rita Colwell is one of the top scientists in America: the groundbreaking microbiologist who discovered how cholera survives between epidemics and the former head of the National Science Foundation. But when she first applied for a graduate fellowship in bacteriology, she was told, "We don't waste fellowships on women." A lack of support from some male superiors would lead her to change her area of study six times before completing her PhD. *A Lab of One's Own* documents all Colwell has seen and heard over her six decades in science, from sexual harassment in the lab to obscure systems blocking women from leading professional organizations or publishing their work. Along the way, she encounters other women pushing back against the status quo, including a group at MIT who revolt when they discover their labs are a fraction of the size of their male colleagues'. Resistance gave female scientists special gifts: forced to change specialties so many times, they came to see things in a more interdisciplinary way, which turned out to be key to making new discoveries in the twentieth and twenty-first centuries. Colwell would also witness the advances that could be made when men and women worked together—often under her direction, such as when she headed a team that helped to uncover the source of the anthrax used in the 2001 letter attacks. *A Lab of One's Own* shares the sheer joy a scientist feels when moving toward a breakthrough, and the thrill of uncovering a whole new generation of female pioneers. But it

is also the science book for the #MeToo era, offering an astute diagnosis of how to fix the problem of sexism in science—and a celebration of the women pushing back.

In becoming a scientist, Claire Cyrus hopes to escape the fate of her dead father, a brilliant but critically unsuccessful poet whose poverty and bitterness derailed her own strong talent for verse. Soon after moving from England to take up her first job in a start-up biotech company in the Netherlands, she finds herself an outcast in her strange new environment, shunned by her jealous colleagues and moving only on the fringes of the expatriate community. But when she makes an accidental discovery in the lab, her life will never be the same again. *The Honest Look* is a tale of passion, betrayal and a devastating secret that threatens to bring down careers, a company and a widely accepted scientific theory. Unfolding in the modern corporate laboratory, where the idealism of advancing knowledge and the uncompromising reality of profit margins exist in uneasy truce, this is a story of how people with various stakes in a common endeavour react when its integrity is called into question, and how these reactions can be shaped--and warped--by denial, greed, hatred and love.

Working at the local processing plant, Marcos is in the business of slaughtering humans—though no one calls them that anymore. His wife has left him, his father is sinking into dementia, and Marcos tries not to think too hard about how he makes a living. After all, it happened so quickly. First, it was reported that an infectious virus has made all animal meat poisonous to humans. Then governments initiated the "Transition." Now, eating human meat—"special meat"—is legal. Marcos tries to stick to numbers, consignments, processing. Then one day he's given a gift: a live specimen of the finest quality. Though he's aware that any form of personal contact is forbidden on pain of death, little by little he starts to treat her like a human being. And soon, he becomes tortured by what has been lost—and what might still be saved.

Atlas of the European Novel

If you read (or write) popular science, you might sometimes wonder: how do the authors manage to make subjects that once put you to sleep in science class both so entertaining and approachable? The

use of language is key. Based on analyses of popular science bestsellers, this linguistic study shows how expert popularizers use the voices and narratives of scientists to engage readers, demonstrating the power of science and portraying researchers as champions of knowledge. By doing so they often blur the lines between nonfiction and fiction, inviting readers to take part in thought experiments and turn ordinary scientists into omnipotent heroes.

A Lab of One's Own

"For the past seven years, the Stanford Literary Lab, founded by Franco Moretti and Matthew Jockers, has been a leading site of literary scholarship aided by computers and algorithmic methods. This landmark volume gathers the collective research of the group and its most remarkable experiments. From seemingly ineffable matters such as the "loudness" of thousands of novels, the geographic distribution of emotions, the nature of a sentence and a paragraph, and the evolution of bureaucratic doublespeak, descriptions emerge. The Stanford Literary Lab lets the computers provide new insights for questions from the deep tradition of two centuries of literary inquiry. Rather than, like the rest of us, letting the computers lead. The results are adventurous, witty, challenging, profound. The old questions can finally get new answers--as the prelude to new big questions. Canon/Archive is the fulfillment and further development of "distant reading," adding a rare, full-length monument to the piecemeal progress of the digital humanities. No student, teacher, or inquisitive reader of literature will want to be without this book--just as no one interested in the new data-attentive methods in history, criticism, and the social sciences can afford to evade its summons"--Back cover.

Mormon Lit Blitz Anthology

'Hope Jahren asks the central question of our time: how can we learn to live on a finite planet? The Story of More is thoughtful, informative and - above all - essential' Elizabeth Kolbert, author of The Sixth Extinction Hope Jahren is an award-winning geobiologist, a brilliant writer, an inspiring teacher, and one of the seven billion people with whom we share this earth. In The Story of More, Jahren illuminates the link between human consumption habits and our imperiled planet. In short, highly readable chapters, she takes us through the science behind the key inventions - from electric power to large-scale farming and automobiles - that, even as they help us, release untenable amounts of carbon dioxide into the atmosphere. She explains the current and projected consequences of greenhouse gases - from superstorms to rising sea levels - and the actions that all of us can take to fight back. At once an explainer on the mechanisms of warming and a lively, personal narrative given to us in Jahren's inimitable voice, The Story of More is the essential pocket primer on climate change that will leave an indelible impact on everyone who reads it.

The Honest Look

"Get to know the Get Lit Players--a group of teens who use poetry to take on the world--with this common-core aligned book that sheds light on teen issues through their own poetry and slam poetry performances. The Get Lit Players include teens who are homeless, autistic, have parents in jail, battle with weight and body issues, depression, and more. But they use the power of poetry to pursue lives of promise and to reach out to friends, families, and communities ... Each chapter offers questions, writing prompts, and how-tos for readers to set their own inner poet free. Ending with a section for parents and educators featuring the curriculum that ... shows how to get teens excited about poetry and how to create poetry groups and slams in their own communities"--Provided by publisher.

'Stop what you are doing and go get Christina Lauren's My Favourite Half-Night Stand! That's Normal The perfect friends to lovers romcom from the bestselling queen of romcoms, Christina Lauren! Millie has always been one of the guys. A professor at a respected university, she's great at witty backchat but terrible at getting personal. Like her four best male friends, she's perma-single. So when a routine university function turns into a black tie gala, they all make a pact to join an online dating service and find plus-ones. There's just one hitch: after making the pact, Millie and her best friend Reid secretly spend the sexiest half-night of their lives together, before deciding the friendship is better off strictly platonic. But online dating isn't for the faint of heart. While the guys are inundated with dream dates, Millie's profile attracts nothing but creeps. So she invents an alter ego in whose make-believe shoes she can be more vulnerable than she's ever been in person. But when Reid and her alter ego hit it off, Millie finds herself struggling to resist temptation - both online and off. Soon, Millie will have to face

her worst fear - intimacy - or risk losing her best friend for ever. Find out why readers LOVE Christina Lauren: 'Pure, irresistible magic from start to finish' Emily Henry 'Witty and downright hilarious . . . perfect feel-good romantic comedy' Helen Hoang 'Pure joy' Sally Thorne 'What a joyful, warm, touching book! This is the book to read if you want to smile so hard your face hurts' Jasmine Guillory 'A sexy, hilarious rom-com . . . 'When my father died, I stayed off school to look after my mother. I was fourteen and was as incapable of looking after her as she was at looking after me. She took to wandering the roads and was soon taken into hospital. The social worker asked me if I wanted to be fostered and I said yes. Two years later, in 1975, I was admitted to a psychiatric hospital. That was the beginning of it all: medication, ECT, the locked ward. I've been sectioned five times, in and out of asylums, homeless hostels, squats and on the streets. I nearly hit the end of the road. But then, almost overnight, my life turned round. Sectioned is my story.' John O'Donoghue

This text provides a one-semester alternative to the traditional two-semester developmental algebra sequence for non-STEM (Science, Technology, Engineering, and Math) students. This new approach offers an accelerated pathway to college readiness through developmental math, preparing non-STEM students to move directly into liberal arts math or introductory statistics, while also preparing STEM students for intermediate algebra. An Accelerated Pathway through Developmental Math Math Lit, by Kathleen Almy and Heather Foes, offers an accelerated pathway through developmental math, allowing non-STEM students to move directly into liberal arts math or introductory statistics. Through its emphasis on contextual problem solving, the Almy/Foes text and its accompanying MyMathLab(R) course help students gain the mathematical maturity necessary to be successful in a college-level non-STEM math class. Students work through carefully designed explorations, activities, and instruction to garner a greater conceptual understanding of the major themes of numeracy, proportional reasoning, algebraic reasoning, and functions. Enhancements in the Second Edition have increased the versatility and ease of use for students and instructors alike. Also Available with MyMathLa (R) MyMathLab is an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Within its structured environment, students practice what they learn, test their understanding, and pursue a personalized study plan that helps them absorb course material and understand difficult concepts. Note: You are purchasing a standalone product; MyMathLab does not come packaged with this content. Simultaneously funny and frightful, Srikanth Reddy's Underworld Lit is a multiverse quest through various cultures' realms of the dead. Couched in a literature professor's daily mishaps with family life and his sudden reckoning with mortality, this adventurous serial prose poem moves from the college classroom to the oncologist's office to the mythic underworlds of Mayan civilization, the ancient Egyptian place of judgment and rebirth, the infernal court of Qing dynasty China, and beyond—testing readers along the way with diabolically demanding quizzes. It unsettles our sense of home as it ferries us back and forth across cultures, languages, epochs, and the shifting border between the living and the dead.

Art Lab for Kids

The idea that reading literature changes the reader seems as old as literature itself. Through the ages philosophers, writers, and literary scholars have suggested it affects norms, empathic ability, self-concept, beliefs, etc. This book examines what we actually know about these effects. And it finds strong evidence for the old claims. However, it remains unclear what aspects of the reading experience

are responsible for these effects. Applying methods of the social sciences to this particular problem of literary theory, this book presents a psychological explanation based upon the conception of literature as a moral laboratory. A series of experiments examines whether imagining oneself in the shoes of characters affects beliefs about what it must be like to be someone else, and whether it affects beliefs about consequences of behavior. The results have implications for the role literature could play in society, for instance, in an alternative for traditional moral education.

The Instant New York Times Bestseller and TikTok Sensation! As seen on THE VIEW! A BuzzFeed Best Summer Read of 2021 When a fake relationship between scientists meets the irresistible force of attraction, it throws one woman's carefully calculated theories on love into chaos. As a third-year Ph.D. candidate, Olive Smith doesn't believe in lasting romantic relationships--but her best friend does, and that's what got her into this situation. Convincing Anh that Olive is dating and well on her way to a happily ever after was always going to take more than hand-wavy Jedi mind tricks: Scientists require proof. So, like any self-respecting biologist, Olive panics and kisses the first man she sees. That man is none other than Adam Carlsen, a young hotshot professor--and well-known ass. Which is why Olive is positively floored when Stanford's reigning lab tyrant agrees to keep her charade a secret and be her fake boyfriend. But when a big science conference goes haywire, putting Olive's career on the Bunsen burner, Adam surprises her again with his unyielding support and even more unyielding...six-pack abs. Suddenly their little experiment feels dangerously close to combustion. And Olive discovers that the only thing more complicated than a hypothesis on love is putting her own heart under the microscope.

"Thrilling and dangerous, with an ending that will leave you gasping!" —SUZANNE YOUNG, New York Times bestselling author of the series THE PROGRAM In a world where everyone is the same, one girl is the unthinkable: unique. A high-stakes fast-paced series launch from New York Times bestselling author Rachel Vincent. Dahlia 16 sees her face in every crowd. She's nothing special—just one of five thousand girls created from a single genome to work for the greater good of the city. Meeting Trigger 17 changes everything. He thinks she's interesting. Beautiful. Unique. Which means he must be flawed. When Dahlia can't stop thinking about him she realizes she's flawed, too. But what if Trigger is right? What if Dahlia is different? But if she's flawed, then so are all her identicals. And any genome found to be flawed will be destroyed, ONE BY ONE BY ONE. . . .
