Intro

State Symbols We use these to show the physical state of the substances in chemical equations

A base is a substance which can neutralise an acid. e.g. metal oxides, metal hydroxides.

The role of water in acidity Consider these observations

Indicators Indicators change colour, telling us if a solution is acidic or alkaline. They can't measure how acidic or alkaline the solution is

The pH scale The pH scale is a measure of the acidity or alkalinity of a solution, based on the concentration of H⁺ ions in the solution.

Making salts
