CSCS TEST EXAM

What should you do if you need to carry a load down a steep slope?

What should you do if you discover a better way of lifting a load than the method currently in place?

... to carry a load considered as **manual handling**,?

If you need to move a load while sitting you should always remember that

Before attempting to lift a heavy load you should always try to

What should you do if you need to lift a load which blocks your front view?

What should you do if a load is too heavy for you to move on your own, there's no colleagues around to help you and the load cannot be divided into smaller parts?

What should you do if a previous back injury is affecting the job you're currently doing?

The maximum weight you can carry should be decided by

Which of these should you stop and think about before attempting to lift a load?

Which part of your body are you most like to injure if you lift heavy loads?

What should you do if you need to move items which are too heavy to carry in a single load?

What should you do if the trolley you're using gets damaged and one of its wheels fall off?

How should you position yourself if you need to lift a load from the ground?
