A public relations expert shares inspirational stories and smart strategies for successful business communication and crisis management. Business leaders spend up to 90 percent of each day communicating with colleagues, customers, shareowners, creditors, regulators, advocates, and competitors. The style and success of those communications has a vital influence on their organization's culture, opportunity, and reputation. In this age of heightened transparency, no leader can afford to under-value to importance of communication—especially during a crisis. With more than three decades of experience working with many Fortune 500 companies, communications consultant Jack Modzelewski teaches leaders to see themselves as chief credibility officers. In Talk Is Chief, he provides sound advice and concrete examples of effective communication. He also shares the “10 Commandments of Crisis Management”—essential communication tools for avoiding crises or averting worst-case scenarios when confronted with an existential threat.

This book describes the most complex machine ever sent to another planet: Curiosity. It is a one-ton robot with two brains, seventeen cameras, six wheels, nuclear power, and a laser beam on its head. No one human understands how all of its systems and instruments work. This essential reference to the Curiosity mission explains the engineering behind every system on the rover, from its rocket-powered jetpack to its radioisotope thermoelectric generator to its fiendishly complex sample handling system. Its lavishly illustrated text explains how all the instruments work -- its cameras, spectrometers, sample-cooking oven, and weather station -- and describes the instruments' abilities and limitations. It tells you how the systems have functioned on Mars, and how scientists and engineers have worked around problems developed on a faraway planet: holey wheels and broken focus lasers. And it explains the grueling mission operations schedule that keeps the rover working day in and day out.

Der Autor untersucht das Kräftefeld, das Selbstverständnis und die Handlungspraxis von Agenturen, Beratungsunternehmen, Einzelberatern, Rechtsanwaltskanzleien und „anderen Dienstleistern“, die in der „Berliner Republik“ Lobbying und Public Affairs-Management als käufliche Services anbieten. Dabei werden 45 Untersuchungskategorien quantitativ und qualitativ ausgewertet, um die Unterschiede und Gemeinsamkeiten innerhalb der boomenden Dienstleisterbranche zu analysieren. Es wird ersichtlich, welche Entwicklungen mit dem Strukturwandel in der Interessenvertretung verbunden sind und welche Rolle kommerziell ausgerichtete externe Kontrakt-Dienstleister dabei spielen.

Nature-based solutions (NbS) are solutions inspired or supported by nature. They include ecosystem conservation and restoration measures, as well as the creation or enhancement of natural processes in man-made ecosystems, such as cities. Recent interest in NbS has emphasized their importance for urban water management and cities across the world have begun to experiment with them. Experiences from different contexts, however, are not adequately captured and understood. This book aims to address this gap by compiling case studies and reviews that explore NbS for urban water management from different regions and perspectives and highlight emerging challenges and opportunities for harnessing their potential.
