Year Book of the Michigan Conference of the United Church of Christ

"An important new interpretation of how religious change shaped American cultural identity in the early republic." —Journal of American History Northern New England, a rugged landscape dotted with transient settlements, posed challenges to the traditional town church in the wake of the American Revolution. Using the methods of spatial geography, Shelby M. Balik examines how migrants adapted their understanding of religious community and spiritual space to survive in the harsh physical surroundings of the region. The notions of boundaries, place, and identity they developed became the basis for spreading New England's deeply rooted spiritual culture, even as it opened the way to a new evangelical age. "I strongly recommend Balik's book for those studying colonial religious landscapes and heritages not only in New England, but in the nineteenth-century religious diasporas that swept the continent with varying mixes of European colonials and also African and Asian heritages." —Stanley D. Brunn, University of Kentucky "In this beautifully written and richly researched work, Shelby Balik shows how the travels of early nineteenth century Methodists, Universalists and freewill Baptist itinerant missionaries and congregations recreated the geography of New England Protestantism, setting in motion (literally) a tension between religious rootedness and religious uprootedness, center and periphery, that endures to today. Early American religious history in Balik's retelling of it is one of bodies in constant movement in and out and around the city on the hill. The delight Balik takes in maps and journeys is infectious. This is a wonderful addition to American religious historiography." —Robert Orsi, Northwestern University

“An important new interpretation of how religious change shaped American cultural identity in the early republic.” —Journal of American History Northern New England, a rugged landscape dotted with transient settlements, posed challenges to the traditional town church in the wake of the American Revolution. Using the methods of spatial geography, Shelby M. Balik examines how migrants adapted their understanding of religious community and spiritual space to survive in the harsh physical surroundings of the region. The notions of boundaries, place, and identity they developed became the basis for spreading New England's deeply rooted spiritual culture, even as it opened the way to a new evangelical age. “I strongly recommend Balik's book for those studying colonial religious landscapes and heritages not only in New England, but in the nineteenth-century religious diasporas that swept the continent with varying mixes of European colonials and also African and Asian heritages.” —Stanley D. Brunn, University of Kentucky “In this beautifully written and richly researched work, Shelby Balik shows how the travels of early nineteenth century Methodists, Universalists and freewill Baptist itinerant missionaries and congregations recreated the geography of New England Protestantism,

setting in motion (literally) a tension between religious rootedness and religious uprootedness, center and periphery, that endures to today. Early American religious history in Balik's retelling of it is one of bodies in constant movement in and out and around the city on the hill. The delight Balik takes in maps and journeys is infectious. This is a wonderful addition to American religious historiography." —Robert Orsi, Northwestern University

Harry the Plum Island Birdwatcher

This second book of the series, "Harry the Plum Island Birdwatcher" describes another of Harry's adventures in which he spends time enjoying nature's gifts of the wonderful world of birds, their habits, colors, personalities, and all that entails.

Harry the Plum Island Birdwatcher

This book was originally published in 1981 as a publication of the Cooper Ornithological Society and was based on the proceedings of a meeting of biologists and statisticians in Asilomar who gathered to examine the methods and assumptions used in estimating bird numbers. Counting birds has a long tradition. It is the currency of many ornithological studies. Bird counts have been seminal in our knowledge of bird migration, competition, ecology, population dynamics, environmental adaptation, impact of human alterations and island biogeography. Interest in estimating bird numbers remains high today but is often plagued by unasked or unanswered questions regarding sampling methods and treatment of the results. This book recorded the outcome of a meeting held to address these and other questions. It led to better understanding of what can and cannot be done with datasets. This volume remains a primary source of information on censusing of birds and other animals, and is frequently quoted in the primary literature of today. Since this volume went out of print some six years ago, demand has markedly increased for copies which are essentially unavailable, attesting to its currency today. C. John Ralph, received his Bachelors from the University of California, Berkeley and his doctorate from The Johns Hopkins University. Most of his early research was on bird migration and orientation. After a stint teaching at Dickinson College in Pennsylvania, he moved to Hawaii in 1976 where he began work on endangered forest birds for the Forest Service as a Research Ecologist. In 1981 he and his family moved to Arcata to join the Forest Service's Redwood Sciences Laboratory. One of his principal research topics there has been on an old-growth dependent bird, the Marbled Murrelet, involving extensive research from Alaska to California. His other principal work is on landbird monitoring, especially involving census and constant effort mist netting. Since 1994 he has directed research at a bird monitoring station in Costa Rica, now one of the longest running stations in Latin America. Beginning in 1980 he conducted research on an island off New Zealand involving monitoring and reintroduction of native birds. He has published more than 150 scientific articles and edited several books on bird monitoring and the Marbled Murrelet.

A great, rhapsodic, urgent book full of joy, grief, rage and love . . . A must-read' Helen Macdonald, author of *H is for Hawk* Nature has many gifts for us, but perhaps the greatest of them all is joy; the intense delight we can take in the natural world, in its beauty, in the wonder it can offer us, in the peace it can provide - feelings stemming ultimately from our own unbreakable links to nature, which mean that we cannot be fully human if we are separate from it. In *The Moth Snowstorm* Michael McCarthy, one of Britain's leading writers on the environment, proposes this joy as a defence of a natural world which is ever more threatened, and which, he argues, is inadequately served by the two defences put forward hitherto: sustainable development and the recognition of ecosystem services. Drawing on a wealth of memorable experiences from a lifetime of watching and thinking about wildlife and natural landscapes, *The Moth Snowstorm* not only presents a new way of looking at the world around us, but effortlessly

blends with it a remarkable and moving memoir of childhood trauma from which love of the natural world emerged. It is a powerful, timely, and wholly original book which comes at a time when nature has never needed it more.

A Birder's Resource Guide

"Explore[s] the role of birds in such important ecological dynamics as scavenging, nutrient cycling, food chains, and plant-animal interactions-- all seen through the lens of human well-being. ... The contributors show that quantifying avian ecosystem services is crucial when formulating contemporary conservation strategies."--Back cover.

Tourism is the world's largest industry, and ecotourism is rapidly emerging as its fastest growing segment. As interest in nature travel increases, so does concern for conservation of the environment and the well-being of local peoples and cultures. Appalachia seems an ideal destination for ecotourists, with its rugged mountains, uniquely diverse forests, wild rivers, and lively arts culture. And ecotourism promises much for the region: protecting the environment while bringing income to disadvantaged communities. But can these promises be kept? Ecotourism in Appalachia examines both the potential and the threats that tourism holds for Central Appalachia. The authors draw lessons from destinations that have suffered from the "tourist trap syndrome," including Nepal and Hawaii. They conclude that only carefully regulated and locally controlled tourism can play a positive role in Appalachia's economic development.

'A remarkable and definitive portrait' Frederick Forsyth 'Andrew Lownie's biography of Guy Burgess, Stalin's Englishman ... shrewd, thorough, revelatory.' William Boyd 'In the sad and funny Stalin's Englishman, [Lownie] manages to convey the charm as well as the turpitude.' Craig Brown Guy Burgess was the most important, complex and fascinating of 'The Cambridge Spies' - Maclean, Philby, Blunt - all brilliant young men recruited in the 1930s to betray their country to the Soviet Union. An engaging and charming companion to many, an unappealing, utterly ruthless manipulator to others, Burgess rose through academia, the BBC, the Foreign Office, MI5 and MI6, gaining access to thousands of highly sensitive secret documents which he passed to his Russian handlers. In this first full biography, Andrew Lownie shows us how even Burgess's chaotic personal life of drunken philandering did nothing to stop his penetration and betrayal of the British Intelligence Service. Even when he was under suspicion, the fabled charm which had enabled many close personal relationships with influential Establishment figures (including Winston Churchill) prevented his exposure as a spy for many years. Through interviews with more than a hundred people who knew Burgess personally, many of whom have never spoken about him before, and the discovery of hitherto secret files, Stalin's Englishman brilliantly unravels the many lives of Guy Burgess in all their intriguing, chilling, colourful, tragi-comic wonder.

Estimating Numbers of Terrestrial Birds

In 1974, the Massachusetts Audubon Society and the Massachusetts Division of Fisheries and Wildlife launched a five-year survey to map the distribution of all the birds that breed in the Commonwealth - the first such comprehensive effort in North America. Nearly 600 volunteers spent countless hours in the field collecting data. This landmark volume presents the results of their efforts. The book includes distribution maps showing possible, probable, and confirmed breeding areas for 198 Massachusetts nesting species on a grid of 989 tensquare-mile blocks. Opposite each species map is a summary account giving historical perspective, relative abundance, habitat, seasonal schedule, nest, egg, and song descriptions, clutch size, egg dates, number of broods, and other pertinent details. Each species account is illustrated with a scrupulously accurate, watercolor portrait by award-winning nature artists John Sill and Barry Van Dusen. The book also includes a set of six transparent overlay maps in an attached pocket that allow the reader to correlate key environmental factors with the distribution of nesting species. Introductory sections describe the atlas survey methodology, and two appen

A Natural History of the Mammalia: Rodentia, or gnawing animals

Meet the ladies: a flock of smart, affectionate, highly individualistic chickens who visit their favorite neighbors, devise different ways to hide from foxes, and mob the author like she's a rock star. In these pages you'll also meet Maya and Zuni, two orphaned baby hummingbirds who hatched from eggs the size of navy beans, and who are little more than air bubbles fringed with feathers. Their lives hang precariously in the balance-but with human help, they may one day conquer the sky. Snowball is a cockatoo whose dance video went viral on YouTube and who's now teaching schoolchildren how to dance. You'll meet Harris's hawks named Fire and Smoke. And you'll come to know and love a host of other avian characters who will change your mind forever about who birds really are. Each of these birds shows a different and utterly surprising aspect of what makes a bird a bird-and these are the lessons of Birdology: that birds are far stranger, more wondrous, and at the same time more like us than we might have dared to imagine. In Birdology, beloved author of *The Good Good Pig* Sy Montgomery explores the essence of the otherworldly creatures we see every day. By way of her adventures with seven birds-wild, tame, exotic, and common-she weaves new scientific insights and narrative to reveal seven kernels of bird wisdom. The first lesson of Birdology is that, no matter how common they are, Birds Are Individuals, as each of Montgomery's distinctive Ladies clearly shows. In the leech-infested rain forest of Queensland, you'll come face to face with a cassowary-a 150-pound, man-tall, flightless bird with a helmet of bone on its head and a slashing razor-like toenail with which it (occasionally) eviscerates people-proof that Birds Are Dinosaurs. You'll learn from hawks that Birds Are Fierce; from pigeons, how Birds Find Their Way Home; from parrots, what it means that Birds Can Talk; and from 50,000 crows who moved into a small city's downtown, that Birds Are Everywhere. They are the winged aliens who surround us. Birdology explains just how very "other" birds are: Their hearts look like those of crocodiles. They are covered with modified scales, which are called feathers. Their bones are hollow. Their bodies are permeated with extensive air sacs. They have no hands. They give birth to eggs. Yet despite birds' and humans' disparate evolutionary paths, we share emotional and intellectual abilities that allow us to communicate and even form deep bonds. When we begin to comprehend who birds really are, we deepen our capacity to approach, understand, and love these otherworldly creatures. And this, ultimately, is the priceless lesson of Birdology: it communicates a heartfelt fascination and awe for birds and restores our connection to these complex, mysterious fellow creatures

The Moth Snowstorm

A former intelligence agent stands accused of terrorism, held without charge in a secret overseas prison. His memoir is in the hands of a psychologist with her own agenda, and her annotations paint a much darker picture. As the story unravels, we are forced to assess the truth for ourselves, and decide not only what really happened, but who is the real terrorist. Peopled by a diverse and unforgettable cast of characters, whose reliability as narrators is always questioned, and with a multi-layered plot heaving with unexpected and often shocking developments, *Jihadi: A Love Story* is an intelligent thriller that asks big questions.

Why Birds Matter

The author of *By Book or By Crook* returns to the Outer Banks and the Lighthouse Library, where Lucy Richardson must shed light on a shocking murder... Lucy has finally found her bliss as a librarian and resident of the Bodie Island Lighthouse. She loves walking on the beach, passing her evenings with the local book club, bonding with the library cat, Charles, and enjoying the attention of not one, but TWO eligible men. But then her socialite mother, Suzanne, unexpectedly drops in, determined to move Lucy back to Boston—and reunite her with her ex-fiancé. To make matters worse, Suzanne picks a very public fight at the local hotel with her former classmate Karen Kivas. So, when Karen turns up dead outside the library the next morning, Suzanne is immediately at the top of the suspect list. Now Lucy must hunt down a dangerous killer—before the authorities throw the book at her poor mother...

With a breakdown of the Cape into regions, towns, and favorite birding areas, the guide includes a section on pelagic birding, detailed maps that indicate items of interest, birding hot spots, and even parking locations. A section on the descriptions of Cape Cod specialty species is also included as are explanations of when to bird, what to look for, and in which habitats to find birds. A useful checklist of the birds of the Cape, helpful cross references, and a complete index for quick reference round out this perfect field guide for both visitors to and residents of Cape Cod.

Stalin's Englishman: The Lives of Guy Burgess

The next shot from Cupid's bow may be fatal in USA Today bestselling, Agatha Award-winning author Ellen Byron's hearty and delightful seventh Cajun Country mystery. In Pelican, Louisiana, Valentine's Day has a way of warming the heart, despite the February chill. But the air at Crozat Plantation B&B turns decidedly frigid when celebrity chef Phillippe Chanson checks in. And when the arrogant Phillippe--in town to open his newest Cajun-themed restaurant--perishes in a fiery boat crash, Maggie Crozat's dear friend JJ lands in very cold water. Did JJ, proprietor of Junie's Oyster Bar and Dance Hall, murder Phillippe because he feared the competition? Might Maggie's mother, Ninette, have bumped off the chef for stealing one of her cherished recipes? Or was the culprit a local seafood vendor, miffed because Phillippe was somehow able to sell oysters for a remarkably reasonable price, despite an oyster shortage? Maggie had planned to devote her February to art lessons in New Orleans, a present from her sweetheart, Bo. But now she has to focus on helping her friend and her mother cross a murder charge off the menu. Meanwhile, Maggie receives a series of anonymous gifts that begin as charming but grow increasingly disturbing. Does Maggie have an admirer--or a stalker? And are these mysterious gifts somehow related to Phillippe's murder? Blood may be thicker than water, but this case is thicker than gumbo. And solving it will determine whether Maggie gets hearts and roses--or hearse and lilies--this Valentine's Day.

Massachusetts Breeding Bird Atlas

Helicopter pilot Lt. Sara Denning joins a navy battle group with little fanfare—and that's just the way she likes it. After her brother Ian's tragic death, her career path seemed obvious: step into his shoes and enter the Naval Academy, despite her fear of water. Sara's philosophy is simple—blend in, be competent, and above all, never do anything to stand out as a woman in a man's world. Somewhere along the way, Sara lost herself—her feminine, easygoing soul is now buried under so many defensive layers, she can't reach it anymore. When she meets strong, self-assured Lt. Eric Marxen, her defenses start to falter. Eric coordinates flight operations for a Navy SEAL team that requests Sara as the exclusive pilot. This blatant show of favoritism causes conflict with the other pilots; Sara's sexist boss seems intent on making her life miserable, and her roommate and best friend, the only other woman on the ship, is avoiding her. It doesn't help that her interactions with Eric leave her reeling. The endgame of the SEALs' mission is so secret, even Sara doesn't know the reason behind her mandated participation. Soon, though, the training missions become real, and Sara must overcome her fears before they plunge her into danger. When Sara's life is on the line, can she find her true self again and follow the orders of her heart before it is too late? Anne A. Wilson's *Hover* is a thrilling, emotional women's journey written by a groundbreaking former navy pilot. Birdology

A propulsive, "chilling" novel exploring the dangerous fault lines of female friendships (Lee Child), *Necessary People* deftly plumbs the limits of ambition, loyalty, and love. One of them has it all. One of them wants it all. But they can't both win. Stella and Violet are best friends, and from the moment they met in college, they knew their roles. Beautiful, privileged, and reckless Stella lives in the spotlight. Hardworking, laser-focused Violet stays behind the scenes, always ready to clean up the mess that Stella inevitably leaves in her wake. After graduation, Violet moves to New York and lands a job in cable news, where she works her way up from intern to assistant to producer, and to a life where she's finally free from Stella's shadow. In this fast-paced world, Violet thrives, and her ambitions grow -- but everything is jeopardized when Stella, envious of Violet's new life, uses her connections, beauty, and charisma to get hired at the same network. Stella soon moves in front of the camera, becoming the public face of the stories that Violet has worked tirelessly to produce -- and taking all the credit. Stella might be the one with the rich family and the right friends, but Violet isn't giving up so easily. As she and

Stella strive for success, each reveals just how far she'll go to get what she wants -- even if it means destroying the other person along the way. "I literally couldn't stop reading." -- Stephen King "I love a book that is smart as hell and impossible to put down and this is IT." -- Jessica Knoll Named one of the Best Books of May by Marie Claire, Town & Country, Refinery29, Cosmopolitan, Woman's Day, Bustle, CrimeReads, and O, the Oprah Magazine

Fielding's Birding Indonesia

Palestine, 1948. A mother clutches her six-month-old son as Israeli soldiers march through the village of Ein Hod. In a split second, her son is snatched from her arms and the fate of the Abulheja family is changed forever. Forced into a refugee camp in Jenin and exiled from the ancient village that is their lifeblood, the family struggles to rebuild their world. Their stories unfold through the eyes of the youngest sibling, Amal, the daughter born in the camp who will eventually find herself alone in the United States; the eldest son who loses everything in the struggle for freedom; the stolen son who grows up as an Israeli, becoming an enemy soldier to his own brother. Mornings in Jenin is a devastating novel of love and loss, war and oppression, and heartbreak and hope, spanning five countries and four generations of one of the most intractable conflicts of our lifetime.

Flora rustica

Each chapter focuses on a geological formation the group descends through, but plant and animal life, ecology, human impacts, and the students' experience and learning are all tightly woven into Gordon's reflections and storytelling, which create a powerful documentation and celebration of place and the evolutions that occur when human beings connect intimately to their surroundings."--BOOK JACKET.

Jihadi: A Love Story

In his best-selling 1963 book, *The Quiet Crisis*, Stewart Udall warned of the dangers of pollution and threats to America's natural resources, calling for a nationwide 'land conscience' to conserve the nation's wild places. Along with Rachel Carson's *Silent Spring* (originally published 1962; in print with Penguin Modern Classics, 2000), *The Quiet Crisis* is credited with triggering the modern environmental movement in America.

Booked for Trouble

This is the first field guide to the identification of the birds of the islands of the tropical Pacific, including the Hawaiian Islands, Fiji, Samoa, Tonga, southeastern Polynesia, and Micronesia. It is intended both as a reference for the expert and as an introduction to birding in the region for the novice. Small enough to be carried afield, it contains much previously unpublished information about behavior, vocalizations, ecology, and distribution. The forty-five color plates depict all plumages of all bird species that breed in the islands, as well as of those that regularly visit them and the surrounding oceans, and of most species believed to be extinct on the islands. Black-and-white figures show many of the rarer visitors. Introductory sections discuss the tropical Pacific as an environment for birds, problems of birding on islands, and bird conservation. Appendixes include maps of the island groups and a thorough bibliography.
