Donor

The first Dr Stephen Dunbar thriller. When seven-year-old Amanda Chapman is admitted to hospital with acute renal failure, her parents are in despair. Their hope is renewed when Amanda is accepted for treatment in a pioneering, state-of-the-art dialysis unit in an exclusive private hospital in Glasgow, but behind the lavish hospital corridors, private rooms and friendly staff lies something much more sinister. Dr Dunbar goes undercover to find out in the first of Ken McClure's gripping thrillers featuring the ex-Special Forces medic.

The Secret

Steven Dunbar gets the news that an old friend, Dr Simone Ricard of Mediciens Sans Frontieres, has died in an accident while attending a scientific meeting in Prague. She and her team have been working to eradicate polio in the border region between Pakistan and Afghanistan and have discovered a possible reason for their failure to do so - fake teams put in by the CIA. She has gone to Prague to publicise this but the meeting organisers won't let her speak - they already know the reason and have accepted the CIA apology. They think it will only make matters worse if wider publicity is sought.

Lost Causes

Ex-Special Forces medic Dr Steven Dunbar has left his job with the Sci-Med Inspectorate and now works for a pharmaceutical company. Against his will, he is persuaded to return to Sci-Med when a number of people die in suspicious circumstances, including a former health minister. And then the UK comes under bio-terrorist attack. A disease not seen in the country for a hundred years is let loose on major cities and a group of young Islamic fundamentalists are arrested. But something is not quite right. Steven begins to suspect that there is a dark and ruthless conspiracy at the heart of the outbreak that is much closer to home.

White Death

This is the seventh Dr Steven Dunbar thriller. The governments of the world know a terrorist biological attack will happen sooner rather than later. Vaccination is the only solution, but designing and producing vaccines has never been harder due to stringent trials, rules and regulations and huge settlements in an increasingly litigious society. There is no such thing as a 'completely safe vaccine' but necessity soon begins to outweigh caution and corners are cut, blind eyes turned and scientists given free rein with the new science of molecular biology. The only outcome can be disaster.

The Secret

The 10th Dr Steven Dunbar thriller. Ex-Special Forces medic Dr Steven Dunbar is distraught when he hears of the death of his old friend, Dr Simone Ricard of Mýdicins sans Frontiýres at a scientific meeting in Prague. When he learns that Simone had gone there to publicise the CIA's use of fake vaccination teams in the Pakistan/Afghanistan border region to gather intelligence - an area where she and her team had been working with the World Health Organisation to eradicate polio - he begins to doubt the reported accidental cause of her death. Was the hunt for Bin Laden all that was going on in that region or could there be something even more sinister? KEN McCCLURE is an award-winning medical scientist as well as a global selling author. He was born and brought up in Edinburgh, Scotland, where he studied medical sciences and cultivated a career that has seen him become a prize-winning researcher in his field. Using this strong background to base his thrillers in the world of science and medicine, he is currently the author of twenty-four novels and his work is available across the globe in over twenty languages. He has visited and stayed in many countries in the course of his research but now lives in the county of East Lothian, just outside Edinburgh.

Deception

In a village outside Edinburgh, a young boy is the victim of a shocking ordeal while playing by the canal. . . he is attacked by a rat. The village itself is currently in turmoil over a genetically modified crop growing in a nearby field and sinister doubts are being expressed over its supposed government licence. The Sci-Med Inspectorate send Steven Dunbar to investigate. His search for the truth soon gives rise to the horrific suspicion that the rat incident - one of several in the area - might be connected to the GM crop.

Is there something in these crops that is somehow affecting the behaviour of the rats? But Steven's questions are beginning to upset some powerful operators: people who are prepared to kill to stop him . . . This book was first published by Simon & Schuster Ltd. (UK) in 2001. It was the second Steven Dunbar adventure to be published in a series that currently extends to ten.. Steven is not only a qualified doctor but also an ex-Special Forces soldier who now works for the Sci-Med Inspectorate, a small unit attached to the Home Office of the UK government. It is their job to investigate possible wrong-doing in the Hi-Tech world of science and medicine. Ken McClure is the internationally bestselling author of over twenty medical thrillers such as *The Lazarus Strain*, *The Gulf Conspiracy*, *White Death* and *Dust to Dust*. His books have been translated into twenty-three languages and he has earned a reputation for the accuracy of his predictions. McClure's work is informed by his background as an award-winning research scientist with the UK's Medical Research Council.

The Devil's Landscape

Dr Steven Dunbar, ex Special Forces medic and chief investigator with the Sci-Med Inspectorate, comes across apparent interference with front-line medical research in the UK. Funding for Professor Dorothy Lindstrom, a leading neuroscientist who has recently returned home to the UK after a tragic fire took the lives of two of her young colleagues at Yale University, has been completely blocked. Professor Lindstrom, a feisty character who has made more than a few enemies over the years, and her research group, who have been making dramatic progress in the new field of epigenetics which deals with genetic influences on human behaviour are upset and angry but feel helpless. One of the group, Dr Owen Barrowman who has been looking for genetic and biochemical differences in convicted psychopathic killers held in secure establishments across the UK is particularly upset as he believes he is on the brink of a major discovery. He is determined to complete his research before the money runs out despite Steven's warning about the dangers of being continually exposed to evil. His warnings go unheeded with tragic consequences.

Deception

THE RATS RAISED THE ALARM... In a village outside Edinburgh, a young boy is the victim of a shocking ordeal while playing with his friends by the canal ... he is attacked by a rat. The village itself is currently in turmoil over a genetically modified crop growing in a nearby field and sinister doubts are being expressed over its supposed government license. The Sci-Med Inspectorate send Steven Dunbar to investigate. His search for the truth soon gives rise to the horrific suspicion that the rat incident - one of several in the area - might not be unconnected to the GM crop. Is there something in these crops that is somehow affecting the behaviour of the rats? But Steve's questions are beginning to upset some powerful operators: people who are prepared to kill to stop him...

Dust to Dust

The eighth Dr Stephen Dunbar thriller. John Motram, a cell biologist at Newcastle University, firmly believes that Black Death was not caused by bubonic plague but by an unknown virus. He is excited when Oxford University informs him that there might be preserved bodies of Black Death victims hidden under Dryburgh Abbey. Motram launches an excavation but it comes to a disastrous end when he apparently loses his mind after entering the secret tomb. Dr Steven Dunbar is sent to investigate - fearing that a new killer virus has been let loose.

The Lazarus Strain

Steven was aware that his breathing had become rapid and shallow and that cold sweat was forming on his brow. Not for the first time in his life real fear was coming to call and this time there could be only one outcome; he was going to die a painful death.

Deception

It is England, 2002, and Persian Gulf War veterans are getting sick and dying from a mysterious ailment. Steven Dunbar, a medical investigator, uncovers a conspiracy and threat that will kill more people.

The Gulf Conspiracy

The ultimate book on the worldwide movement of hackers, pranksters, and activists collectively known as Anonymous—by the writer the Huffington Post says “knows all of Anonymous’ deepest, darkest

secrets” “A work of anthropology that sometimes echoes a John le Carré novel.” —Wired Half a dozen years ago, anthropologist Gabriella Coleman set out to study the rise of this global phenomenon just as some of its members were turning to political protest and dangerous disruption (before Anonymous shot to fame as a key player in the battles over WikiLeaks, the Arab Spring, and Occupy Wall Street). She ended up becoming so closely connected to Anonymous that the tricky story of her inside–outside status as Anon confidante, interpreter, and erstwhile mouthpiece forms one of the themes of this witty and entirely engrossing book. The narrative brims with details unearthed from within a notoriously mysterious subculture, whose semi-legendary tricksters—such as Topiary, tflow, Anachaos, and Sabu—emerge as complex, diverse, politically and culturally sophisticated people. Propelled by years of chats and encounters with a multitude of hackers, including imprisoned activist Jeremy Hammond and the double agent who helped put him away, Hector Monsegur, Hacker, Hoaxer, Whistleblower, Spy is filled with insights into the meaning of digital activism and little understood facets of culture in the Internet age, including the history of “trolling,” the ethics and metaphysics of hacking, and the origins and manifold meanings of “the lulz.”

Contemporary Authors

This is the third Dr Steven Dunbar thriller. When a traveller dies on a flight back to London from Africa, Ebola virus seems to be the reason. However, other victims in the UK are dying of the same illness and there seems to be no link. As politicians equivocate and scientists attempt to find a cause, Dr Steven Dunbar begins to question his own belief in medicine.

Hacker, Hoaxer, Whistleblower, Spy

Everyone in Green Valley, Tennessee knows that the six bearded Winston brothers have been imbued with an unfair share of charm and charisma... and are prone to mischief. Dr. Strange Beard, the fifth book in the Winston Brothers series, from USA TODAY bestselling author Penny Reid publishes in July 2018!

Wildcard

What if you discovered that you come from an ancient family of Shadow Chasers, with a duty to protect others from an evil Army of Shadows. Nom is an outsider at school. When she and Zithembe become friends, life still seems - well - a little ordinary. But when an army of monsters threatens their world, it's all up to the two of them and the start of a journey into the dreamworld on a quest that will change their lives. Powers of the Knife is the first book in the Shadow Chasers trilogy. It's an African fantasy adventure, one part family saga, one part hero's quest.

Dr. Strange Beard

The Book of Buried Treasure is a historical account of pirates and piracy, containing true stories of some of the most notorious buccaneers, their heists and robberies and the pirate gold that is lost forever. The book is written by American journalist and adventurer Ralph D. Paine who was indicted for piracy with a capital crime, after sailing on a boat that was smuggling munitions. _x000D_ Table of Contents: _x000D_ The World-Wide Hunt for Vanished Riches _x000D_ Captain Kidd in Fact and Fiction _x000D_ Captain Kidd, His Treasure _x000D_ Captain Kidd, His Trial, and Death _x000D_ The Wondrous Fortune of William Phips _x000D_ The Bold Sea Rogue, John Quelch _x000D_ The Armada Galleon of Tobermory Bay _x000D_ The Lost Plate Fleet of Vigo _x000D_ The Pirates' Hoard of Trinidad _x000D_ The Lure of Cocos Island _x000D_ The Mystery of the Lutine Frigate _x000D_ The Toilers of the Thetis _x000D_ The Quest of El Dorado _x000D_ The Wizardry of the Divining Rod _x000D_ Sundry Pirates and Their Booty _x000D_ Practical Hints for Treasure Seekers

The Powers of the Knife

A lively and personal book that returns the city to political thought Cities shape the lives and outlooks of billions of people, yet they have been overshadowed in contemporary political thought by nation-states, identity groups, and concepts like justice and freedom. The Spirit of Cities revives the classical idea that a city expresses its own distinctive ethos or values. In the ancient world, Athens was synonymous with democracy and Sparta represented military discipline. In this original and engaging book, Daniel Bell and Avner de-Shalit explore how this classical idea can be applied to today's cities, and they explain why philosophy and the social sciences need to rediscover the spirit of cities. Bell and de-Shalit look at nine

modern cities and the prevailing ethos that distinguishes each one. The cities are Jerusalem (religion), Montreal (language), Singapore (nation building), Hong Kong (materialism), Beijing (political power), Oxford (learning), Berlin (tolerance and intolerance), Paris (romance), and New York (ambition). Bell and de-Shalit draw upon the richly varied histories of each city, as well as novels, poems, biographies, tourist guides, architectural landmarks, and the authors' own personal reflections and insights. They show how the ethos of each city is expressed in political, cultural, and economic life, and also how pride in a city's ethos can oppose the homogenizing tendencies of globalization and curb the excesses of nationalism. The Spirit of Cities is unreservedly impressionistic. Combining strolling and storytelling with cutting-edge theory, the book encourages debate and opens up new avenues of inquiry in philosophy and the social sciences. It is a must-read for lovers of cities everywhere. In a new preface, Bell and de-Shalit further develop their idea of "civicism," the pride city dwellers feel for their city and its ethos over that of others.

The Book of Buried Treasure

A'Beckett and Leech were original contributors to "Punch, or the London Charivari" magazine, established 1841. It became the famous "Punch" magazine and remained in publication to 2002. A'Beckett also wrote editorials for a similar concept magazine, "Figaro in London" that ceased publication in 1839. "In commencing this work, the object of the Author was, as he stated in the Prospectus, to blend amusement with instruction, by serving up, in as palatable a shape as he could, the facts of English History. He pledged himself not to sacrifice the substance to the seasoning; and though he has certainly been a little free in the use of his sauce, he hopes that he has not produced a mere hash on the present occasion. His object has been to furnish something which may be allowed to take its place as a standing at the library table, and which, though light, may not be found devoid of nutriment."--Preface.

The Spirit of Cities

In this fresh and often playful interdisciplinary study, Lisa Zunshine presents a fluid discussion of how key concepts from cognitive science complicate our cultural interpretations of "strange" literary phenomena. From Short Circuit to I, Robot, from The Parent Trap to Big Business, fantastic tales of rebellious robots, animated artifacts, and twins mistaken for each other are a permanent fixture in popular culture and have been since antiquity. Why do these strange concepts captivate the human imagination so thoroughly? Zunshine explores how cognitive science, specifically its ideas of essentialism and functionalism, combined with historical and cultural analysis, can help us understand why we find such literary phenomena so fascinating. Drawing from research by such cognitive evolutionary anthropologists and psychologists as Scott Atran, Paul Bloom, Pascal Boyer, and Susan A. Gelman, Zunshine examines the cognitive origins of the distinction between essence and function and how unexpected tensions between these two concepts are brought into play in fictional narratives. Discussing motifs of confused identity and of twins in drama, science fiction's use of robots, cyborgs, and androids, and nonsense poetry and surrealist art, she reveals the range and power of key concepts from science in literary interpretation and provides insight into how cognitive-evolutionary research on essentialism can be used to study fiction as well as everyday strange concepts.

The Comic History of England

When Steven Dunbar is called upon to investigate the bizarre murders of two UK medical scientists at the top of their fields, he finds it difficult to see anything they had in common. On paper, they had never even met. When a French banker in Paris, a Swiss World Health Organisation strategist in Geneva and an Israeli microbiologist in Beer Sheva meet a similar fate, the only link Steven can see is money. At some point in the recent past, all of them have become suddenly and secretly rich and Russian oligarchs - expats living in London - have something to do with that. As Steven's investigation expands on a global scale, the intelligence services of several countries become involved, fearing some world-wide conspiracy. Steven's peace of mind is further challenged when his partner, Tally, a doctor at a London children's hospital, decides to join the fight against the killer Ebola virus in the Democratic Republic of Congo where yet another epidemic of the disease has broken out. She feels that not enough is being done by Western governments to prevent the situation worsening to become an international pandemic. She is to discover that Steven is not the only one coming up against a conspiracy, one that is to put both their lives in danger and threatens to unleash undreamt-of horror on the world.

Strange Concepts and the Stories They Make Possible

A revealing examination of the often misunderstood history of contemporary financial markets.

Miasma

This biography examines the long life of the traveller and author Stephen Graham. Graham walked across large parts of the Tsarist Empire in the years before 1917, describing his adventures in a series of books and articles that helped to shape attitudes towards Russia in Britain and the United States. In later years he travelled widely across Europe and North America, meeting some of the best known writers of the twentieth century, including H.G. Wells and Ernest Hemingway. Graham also wrote numerous novels and biographies that won him a wide readership on both sides of the Atlantic. This book traces Graham's career as a world traveller, and provides a rich portrait of English, Russian and American literary life in the first half of the twentieth century. It also examines how many aspects of his life and writing coincide with contemporary concerns, including the development of New Age spirituality and the rise of environmental awareness. *Beyond Holy Russia* is based on extensive research in archives of private papers in Britain and the USA and on the many works of Graham himself. The author describes with admirable tact and clarity Graham's heterodox and convoluted spiritual quest. The result is a fascinating portrait of a man who was for many years a significant literary figure on both sides of the Atlantic.

Virtue, Fortune, and Faith

Noted pastor J. D. Greear addresses the important but rarely explored topic of Christians who doubt their salvation or have an unclear notion of what "asking Jesus into your heart" really means.

Beyond Holy Russia

This work tells the stories of women rulers who shaped the destiny of many countries. It includes sixteen biographies of women who had beauty, intellect, and ambition gaining massive fame on the pages of history. Moreover, the reader will learn much about the history and culture of the various lands that these leaders ruled. Contents include: Semiramis, Queen of Assyria Dido, Queen of Carthage Cleopatra, Queen of Egypt Zenobia, Queen of Palmyra Matilda of Flanders Margaret of Anjou Catharine of Aragon Queen Elizabeth, and Mary, Queen of Scots Queen Catherine De' Medici Queen Anne Maria Theresa, Empress of Austria Catherine II., Empress of Russia Queen Marie Antoinette The Empress Josephine The Empress Eugénie Queen Victoria

Stop Asking Jesus Into Your Heart

The Civil War, the Restoration, and the Glorious Revolution in England laid the institutional and intellectual foundations of the modern understanding of liberty, of which we are heirs and beneficiaries. The Crisis of the Seventeenth Century uncovers new pathways to understanding this seminal time. Neither Catholic nor Protestant emerges unscathed from the examination to which Trevor-Roper subjects the era in which, from political and religious causes, the identification and extirpation of witches was a central event. Trevor-Roper points out that "In England the most active phase of witch-hunting coincided with times of Puritan pressure -- the reign of Queen Elizabeth and the period of the civil wars -- and some very fanciful theories have been built on this coincidence. But... the persecution of witches in England was trivial compared with the experience of the Continent and of Scotland. Therefore... [one must examine] the craze as a whole, throughout Europe, and [seek] to relate its rise, frequency, and decline to the general intellectual and social movements of the time..."

The Girls' Book of Famous Queens

In a stunning work of insight and hope, New York Times bestselling author Wally Lamb once again reveals his unmatched talent for finding humanity in the lost and lonely and celebrates the transforming power of the written word. For several years, Lamb has taught writing to a group of women prisoners at York Correctional Institution in Connecticut. In this unforgettable collection, the women of York describe in their own words how they were imprisoned by abuse, rejection, and their own self-destructive impulses long before they entered the criminal justice system. Yet these are powerful stories of hope and healing, told by writers who have left victimhood behind. In his moving introduction, Lamb describes the incredible journey of expression and self-awareness the women took through their writing and shares how they challenged him as a teacher and as a fellow author. *Couldn't Keep It to Myself* is a true testament to the process of finding oneself and working toward a better day.

The Crisis of the Seventeenth Century

As an American author who chose to live in Europe, Henry James frequently wrote about cultural differences between the Old and New World. The plight of bewildered Americans adrift on a sea of European sophistication became a regular theme in his fiction. This collection of twenty-four papers from some of the world's leading James scholars offers a comprehensive picture of the author's cross-cultural aesthetics. It provides detailed analyses of James's perception of Europe - of its people and places, its history and culture, its artists and thinkers, its aesthetics and its ethics - which ultimately lead to a profound reevaluation of his writing. With in-depth analysis of his works of fiction, his autobiographical and personal writings, and his critical works, the collection is a major contribution to current thinking about James, transtextuality and cultural appropriation.

Couldn't Keep It to Myself

DigiCat Publishing presents to you this special edition of "The Works of the Rev. Hugh Binning" by Hugh Binning. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

Henry James's Europe

PAST LIVES is a medical thriller which explores the nightmare of multiple personality disorder uncovered by American neurosurgeon John Macandrew in one of his patients after brain surgery. His patient's agony and the dreadful revenge taken by her husband, who wrongly blames Macandrew for his wife's condition, brings him across the Atlantic in search of answers. His quest takes him from the windswept ramparts of Culzean Castle in Scotland to a research laboratory at Edinburgh University and from there to a remote Benedictine monastery; from Notre Dame Cathedral in Paris to Marseilles and across the Mediterranean to Corsica and Malta. Someone knows the secret of multiple personality disorder and they'd like it to stay that way. But the sinister biblical scholar, Dom Ignatius has already found it out and plans to use the knowledge for his own selfish ends - the uncovering of an eye witness to the events of two thousand years ago. PAST LIVES was first published in the UK by Allison & Busby Ltd. in 2006. Ken McClure is the internationally bestselling author of over twenty medical thrillers such as The Lazarus Strain, The Gulf Conspiracy, White Death and Dust to Dust. His books have been translated into twenty-five languages and he has earned a reputation for the accuracy of his predictions. McClure's work is informed by his background as an award-winning research scientist with the UK's Medical Research Council.

The Works of the Rev. Hugh Binning

"MISHA I can't help but smile at the lyrics in her letter. She misses me. In fifth grade, my teacher set us up with pen pals from a different school. Thinking I was a girl, with a name like Misha, the other teacher paired me up with her student, Ryen. My teacher, believing Ryen was a boy like me, agreed. It didn't take long for us to figure out the mistake. And in no time at all, we were arguing about everything. The best take-out pizza. Android vs. iPhone. Whether or not Eminem is the greatest rapper ever... And that was the start. For the next seven years, it was us. Her letters are always on black paper with silver writing. Sometimes there's one a week or three in a day, but I need them. She's the only one who keeps me on track, talks me down, and accepts everything I am. We only had three rules. No social media, no phone numbers, no pictures. We had a good thing going. Why ruin it? Until I run across a photo of a girl online. Name's Ryen, loves Gallo's pizza, and worships her iPhone. What are the chances? F*ck it. I need to meet her. I just don't expect to hate what I find. RYEN He hasn't written in three months. Something's wrong. Did he die? Get arrested? Knowing Misha, neither would be a stretch. Without him around, I'm going crazy. I need to know someone is listening. It's my own fault. I should've gotten his phone number or picture or something. He could be gone forever. Or right under my nose, and I wouldn't even know it. *Punk 57 is a stand alone New Adult romance. It is suitable for ages 18+."--Amazon.com

Past Lives

History comes alive in this incredible children's illustrated book about castles. Slicing through different areas of a medieval fortress, extraordinary views reveal the people busy inside, preparing for battle as an enemy army approaches. Packed with facts, you'll find out what it takes to build a massive 14th-century castle, dress a knight in armor, or prepare a feast fit for a king or queen. From the drawbridge to the dungeon, Cross-Sections Castle swarms with the people who keep the castle

going--the workers, craftsmen, and servants. And, as you pore over every page, look out for the villainous spy. Is he in the well... the keep... the moat? No? Keep looking, he's there somewhere! Back in print after 20 years, you can now cheer on jousters, be entertained by a troubadour, and witness the gory details of a traitor's demise. This unique illustrated book for kids is not just the story of a castle; it brings medieval history to life.

Punk 57

Dr Michael Neef, consultant in paediatric oncology at a large city hospital, is cautiously optimistic when he is given the go-ahead to carry out gene therapy trials on some of his terminally ill patients. The biotechnology company involved believes that it has come up with a treatment for malignant tumours, and the hospital administrators, reeling after a recent bout of bad publicity, see this as an opportunity to get some good press coverage for a change. But as the trials progress, the press - largely in the form of journalist, Eve Sayers - becomes more interested in the deaths of two young girls. Originally thought to have died from viral pneumonia, post-mortem examinations reveal the presence of an underlying cancer, so severe that only recent exposure to a powerful carcinogen can account for it. As more deaths follow and the city's Public Health Department fails to trace the source of the carcinogen, all the signs point towards a horrifying scenario, though the powers-that-be refuse to take any of the evidence seriously. Alarm bells ringing, it is up to Neef, with the aid of Eve, to set about trying to find the cause of this deadly - and seemingly infectious - disease before any more fall victim to it. And it would appear that someone is determined he won't live to find out . . . Ken McClure is the internationally bestselling author of over twenty medical thrillers such as *The Lazarus Strain*, *The Gulf Conspiracy*, *White Death* and *Dust to Dust*. His books have been translated into twenty-three languages and he has earned a reputation for the accuracy of his predictions. McClure's work is informed by his background as an award-winning research scientist with the UK's Medical Research Council. This book was first published by Simon & Schuster Ltd. (UK) in 1996.

Stephen Biesty's Cross-Sections Castle

"From the University of Florida College of Fine Arts, Charlie Mitchell and distinguished colleagues from across America present an introductory text for theatre and theoretical production. This book seeks to give insight into the people and processes that create theater. It does not strip away the feeling of magic but to add wonder for the artistry that make a production work well." -- Open Textbook Library.

Pandora's Helix

A book that actually takes you inside - and around - the human body to see how it works, with the help of some truly unique illustrations and some very small people! Explore your brain, your bones, and everything in between in incredible cross-section drawings of all the body systems. Inside each one are teams of tiny characters busy at work, and explaining what's going on. Every page includes jaw-dropping facts. Did you know that the skin is your largest organ - in an adult it's 2 sq m (22 sq ft). Have you ever thought about how heavy the brain is? Well, it's about 1.4 kg (3 lb) and is crammed with 100 billion nerve cells that help you think and move. And by the time you turn 75, your heart will have pumped blood around your body 4,000 million times! With the challenge of finding two tiny explorers making their way through the body, learning about anatomy has never been so much fun!

Theatrical Worlds (Beta Version)

In the age of Buzzfeeds, hashtags, and Tweets, students are increasingly favoring conversational writing and regarding academic writing as less pertinent in their personal lives, education, and future careers. *Writing and Literature: Composition as Inquiry, Learning, Thinking and Communication* connects students with works and exercises and promotes student learning that is kairotic and constructive. Dr. Tanya Long Bennett, professor of English at the University of North Georgia, poses questions that encourage active rather than passive learning. Furthering ideas presented in *Contribute a Verse: A Guide to First-Year Composition* as a complimentary companion, *Writing and Literature* builds a new conversation covering various genres of literature and writing. Students learn the various writing styles appropriate for analyzing, addressing, and critiquing these genres including poetry, novels, dramas, and research writing. The text and its pairing of helpful visual aids throughout emphasizes the importance of critical reading and analysis in producing a successful composition. *Writing and Literature* is a refreshing textbook that links learning, literature, and life.

The Supernatural in Modern English Fiction

The papers collected in this volume study the function and meaning of various kinds of narrative texts from the perspective of New Philology, Linguistics, Iconography and Reception studies. Their purpose is to understand the workings of narrative texts.

Stephen Biesty's Incredible Body Cross-Sections

A new interdisciplinary interest has risen to study interconnections between oral tradition and book culture. In addition to the use and dissemination of printed books, newspapers etc., book culture denotes manuscript media and the circulation of written documents of oral tradition in and through the archive, into published collections. Book culture also intertwines the process of framing and defining oral genres with literary interests and ideologies. The present volume is highly relevant to anyone interested in oral cultures and their relationship to the culture of writing and publishing. The questions discussed include the following: How have printing and book publishing set terms for oral tradition scholarship? How have the practices of reading affected the circulation of oral traditions? Which books and publishing projects have played a key role in this and how? How have the written representations of oral traditions, as well as the roles of editors and publishers, introduced authorship to materials customarily regarded as anonymous and collective?
