details of decoration calculation of its dimensions and proportions.

Our vase-painter first produced a series of draft drawings and sketches before arriving at the final
design

At the next stage we construct the vase body.

separately the cup and the stem, which were left to dry for 2 days before joining with wet clay.

This is the most vulnerable stage of construction.

To produce the ultra-fine clay slip natural ferruginous clays from Attica are soaked in water and
processed.

Specific knowledge and experience are required both for the location of the appropriate clay deposit

The preparation process lasts up to one week

The areas that are due to become black are covered with the red clay paint

In the final stage, using an extra thin brush, the relief lines

16 hours later, the red clay paint is transformed to the black glaze

a golden metal leaf is than placed on top and fixed by bumishing.

6 people worked in total for the production of the vase and the preparation of the materials used.

The whole process lasted 7 weeks

25 hours for decoration and 60 hours for firing.

The work took place in October to November 2018
