It concludes that a number of issues would need to be addressed, owing to Islamic banks' unique governance structures and balance sheets. Resolution Frameworks for Islamic Banks

Every year, we all try to commit to a New Year's resolution, but after a couple of weeks, we tend to fall off the wagon. Committing your resolution in writing is one way to stick with it. "The New Year's Resolution Journal" is the perfect product to help people stick with their resolutions. The first page lets you write down your specific resolution for the year. Each page after that starts with the day at the top starting with Day 1 and ending with Day 365. Then there is a line for the date followed by several lines where you can right the details of completing your resolution for that day. Finally, each page concludes with a spot to write yourself an inspirational saying. Committing everything to writing, especially daily, is a great way to keep on your resolution. Then at the end of the year, you can see how you did. Stick with your New Year's resolution this year with the help of "The New Year's Resolution Journal!"

Developing Power

Political boundaries are often porous to finance, financial intermediation, and financial distress. Yet they are highly impervious to financial regulation. When inhabitants of a country suffering a deficit of purchasing power are able to access and deploy funds flowing in from a country with a surfeit of such power, the inhabitants of both countries may benefit. They may also benefit when institutions undertaking such cross-border financial intermediation experience economies of scale and are able to innovate and to offer funds and services at lower costs. Inevitably, however, at least some such institutions will sometimes act imprudently, some of the projects in which such funds are deployed may be unwise, and other such projects can suffer from unforeseen circumstances. As a result of such factors, a financial institution may suffer distress in one country, and may then transmit such distress to other countries in which it operates. The efficacy of any response to such cross-border transmission of distress may turn on the response being given due effect in both (or all) the territories in which the distressed financial institution operates. This situation creates a conundrum for policymakers, legislators, and regulators who wish to enable those subject to their jurisdiction to access the benefits of cross-border financial intermediation, yet cannot make rules and regulations that would have effect outside that jurisdiction. This book explores this conundrum and offers a response. It does so by drawing on and adding to the literatures on financial intermediation, regulation, and distress, and on existing hard and soft laws and regulations. The book advocates for the creation of a model law that would address the full range of financial institutions, including insurance companies, and that would enable relevant authorities to cooperate with counterparts in advance of the onset of distress and to give appropriate effect in their jurisdiction to measures taken by counterpart authorities in other jurisdictions in which the distressed institution also operates.

Issues in Social Psychology and Conflict Resolution: 2011 Edition

This paper provides a detailed assessment of key attributes of effective resolution regimes for financial institutions in Columbia. The authorities of Columbia have strong powers to manage weak and failing financial institutions and a track record of using them. Colombia's resolution regime, however, has shortcomings with respect to standards set in the key attributes. Important resolution powers are not available to the authorities, the regime does not emphasize minimizing the exposure of taxpayers to loss, and taking resolution actions does not hinge on an assessment of non-viability. However, Columbia has a large and diversified financial system compared with peer countries, with significant cross-border institutions and large mixed function conglomerates.

If you want something you never had, You must be willing to do Something you've never done.

Behind every successful man there's a lot of unsuccessful years.

Try not to become a man of succes, but rather try to become a man of value.

The only place where success comes before work is in the dictionary.

SUCCESS is on the same road as FAILURE. Success is just a little further down the road.

If you don't build your dream someone will hire you to help build theirs.
