Child of the Shadows

Henryk Grynberg published *Child of the Shadows* in 1965 in Poland under the title *Zydowska wojna* ("The Jewish War") corresponding to the work by Joseph Flavius from the first century. That original title is important because the author intended to argue with a certain anti-Semitic stereotype emphasizing the passive attitude of the Jews in the face of the Holocaust. The English title links Grynberg's book too obviously to the literature concerned with the experiences of the children of the Holocaust, and thus it veils its thematic richness. The writer points out that the heroic, though passive, struggle for each hour and day of life was for the Jews the only possible form of fighting. *Child of the Shadows*, published in English translation in 1969, is divided into two parts. The first describes the situation of the author's family in the first months of the German occupation of Poland, beginning with the eviction and ending with the escape on the night preceding the deportation of the Jewish community to Treblinka and with the protagonist's separation from his father, who bought Aryan documents for his wife and son and then, because of his Semitic features, hid in forests but did not survive the war. The second part deals with the "Aryan papers," first in Warsaw and later in the country. The novel concludes with the coming of the Red Army in the summer of 1944.

Children of the Shadows

In the UK the number of people who came from a minority ethnic group grew by 53 per cent between 1991 and 2001, from 3.0 million in 1991 to 4.6 million in 2001. Whilst much has been written about the impact of these demographic changes in relation to policy issues, black and minority women and children remain under-researched. Recent publications have tended to focus on South Asian women, forced marriage and 'honour' related violence. *Moving in the Shadows* brings together for the first time in a single volume, an examination of violence against women and children within the diverse communities of the UK. Its strength lies in its gendered focus as well as its understanding of the need for an integrated approach to all forms of violence against women, whilst foregrounding the experiences of minority women, the communities they are part of, and the organizations which have advocated for their rights and given them voice. The chapters contained within this volume explore a set of core themes: the forms and contexts of violence minority women experience; the continuum of violence; the role of culture and faith in the control of women and girls; the types of intervention within multi-cultural and social cohesion policies; the impacts of violence on British-born and migrant women and girls; and the intersection of race, class, gender and sexuality highlighting issues of similarity and difference. Taken together, they provide a valuable resource for scholars, students, activists, social workers and policy-makers working in the field.

The Book of Shadows

This is an adventure novel that revolves around Eric Venable. Excerpt: Were this to be the tale, simply, of how Eric Venable fell and rose again from the depths, much might be said of his voyage to Tientsin River. It would bear much dwelling upon; it would in itself make, from the Horatio-Algerian viewpoint, an excellent moral tale. But it would delete all about Shinski and Marie, and the Shirvan diamond, and the burlap, -wrapped parcel; it would have to touch upon, Mrs. Ivanoff's pistol with discretion; and of course, it could say little about the poet Gerin's company of sh, shadows, or the devil Boris Kryalpin, or the ending of the Kum Chao.
