From Sand Hill to pine. A tourist from Injianny

Book Excerpt: ... Oddly enough, no one, except the lady, really cared to go, and two--the expressman and journalist--would have preferred to remain on the coach. But the national instinct of questioning any purely arbitrary authority probably was a sufficient impulse. As they neared the opened door of what appeared to be a four-roomed, unpainted, redwood boarded cabin, the passenger who had occupied the seat near the window said, --"I'll go first and sample the shanty." He was not, however, so far in advance of them but that the others could hear quite distinctly his offhand introduction of their party on the threshold, and the somewhat lukewarm response of the inmates. "We thought we'd just drop in and be sociable until the coach was ready to start again," he continued, as the other passengers entered. "This yer gentleman is Ned Brice, Adams & Co.'s expressman; this yer is Frank Frenshaw, editor of the 'Mountain Banner...

From Sand Hill to Pine - Primary Source Edition

This Is A New Release Of The Original 1899 Edition.

From sand hill to pine

This second edition provides extensively expanded coverage of North American vegetation from arctic tundra to tropical forests.

From Sand Hill to Pine

Charles Barron McIntosh has devoted a lifetime of scholarship to the history of human activity on Nebraska's Sand Hills, the spare, beautiful land that occupies much of western Nebraska. From carefully deciphering Native American occupancy through rigorous analysis of thousands of arrowheads, to patiently combing through decades of courthouse land title transaction records, McIntosh has mastered the sweep of centuries of human interaction with the land. We learn how the land shapes humankind, far more than pride would have us believe, and we see that perhaps our real success lies in learning how to live with the land, rather than attempting to master it. The Nebraska Sand Hills reflects McIntosh's lifetime of learning, reading, questioning, analyzing—in short, everything it means to be a scholar; seldom are these efforts so well demonstrated. His affection for this unique landscape is present on every page.

Stories in Light and Shadow

Cultural landscapes are a product of the interactions between humans and natural settings. They are landscapes and seascapes that are shaped by human history and land use. Socioeconomic processes especially, but also environmental changes and natural disturbances, are some of the forces that make up landscape dynamics. To understand and manage such complex landscapes, interdisciplinary and transdisciplinary approaches are necessary, emphasizing the integration of natural and social sciences and considering multiple landscape functions. The spatial patterns of Asian landscapes are strongly related to human activities and their impacts. Anthropogenic patterns and processes have created numerous traditional cultural landscapes throughout the region, and understanding them requires indigenous knowledge. Cultural landscape ecology from a uniquely Asian perspective is explored in this book, as are the management of landscapes and land-use policies. Human-dominated landscapes with long traditions, such as those described herein, provide useful information for all ecologists, not only in Asia, to better understand the human–environmental relationship and landscape sustainability.

It's a Lot Simpler Than You Think by Harvard Business Review 881,652 views 2 years ago 9 minutes, 32 seconds - To many people, **strategy**, is a total mystery. But it's really not complicated, says Harvard **Business**, School's Felix Oberholzer-Gee, ...

To many people, strategy is a mystery.

Strategy does not start with a focus on profit.

It's about creating value.

There's a simple tool to help visualize the value you create: the value stick.

What is willingness-to-pay?

What is willingness-to-sell?

Remind me: Where does profit come in again?

How do I raise willingness-to-pay?

And how do I lower willingness-to-sell?

El Monstruo

John Ross has been living in the old colonial quarter of Mexico City for the last three decades, a rebel journalist covering Mexico and the region from the bottom up. He is filled with a gnawing sense that his beloved Mexico City's days as the most gargantuan, chaotic, crime-ridden, toxically contaminated urban stain in the western world are doomed, and the monster he has grown to know and love through a quarter century of reporting on its foibles and tragedies and blight will be globalized into one more McCity. *El Monstruo* is a defense of place and the history of that place. No one has told the gritty, vibrant histories of this city of 23 million faceless souls from the ground up, listened to the stories of those who have not been crushed, deconstructed the Monstruo's very monstrousness, and lived to tell its secrets. In *El Monstruo*, Ross now does.

Colores de la Vida

"Each page captures a sense of wonder, of the vibrancy of color, the imagination of the artist, the name of the hue. Colors take life in this small picture book, perfect for small hands, in an astonishing pairing of visual intimacy and artistic joy that make this one of the most distinctive recent books on color—in English or otherwise." —Papertigers.org This book truly did take a village of artists, scattered all around mountain villages in the beautiful state of Oaxaca. Fifteen in fact! Go to our website to see who carved what lovely animal. And, please, imagine the adventurous Cindy Weill traipsing from village to village in search of these wonderful artisans. Este libro tomó el trabajo de toda una comunidad de artistas, esparcidos por los pueblos de las montañas del hermoso estado de Oaxaca. Tomó quince artistas, de hecho! Ve a nuestro sitio para ver quien esculpió cada bonito animal. Y, por favor, imagina a la intrépida Cindy Weill paseando de pueblo a pueblo en búsqueda de estos maravillosos artesanos y artesanas.

Disney & His Worlds

This work provides an overview of the Disney organization, in particular the theme parks and their significance for contemporary culture. The author examines topics such as Walt Disney's life and how his biography has been constructed, the Disney Company in the years after his death and various writings about the Disney theme parks. He raises important issues about the parks such as: whether they are harbringers of postmodernism; the significance of consumption at the parks; and the representation of past and future. The discussion of theme parks links with the presentation of Disney's biography and his organization by showing how central economic and business considerations have been in their development and how the significance of these considerations is typically marginalized in order to place an emphasis on fantasy and magic.

Age of discrepancies

"The first exhibition to offer a critical assessment of the artistic experimentation that took place in Mexico during the last three decades of the twentieth century. The exhibition carefully analyzes the origins and emergence of techniques, strategies, and modes of operation at a particularly significant moment of Mexican history, beginning with the 1968 Student Movement, until the Zapatista uprising in the State of Chiapas. The show includes work by a wide range of artists, including Francis Alys, Vicente Rojo, Jimmie Durham, Helen Escobedo, Julio Galán, Felipe Ehrenberg, José Bedia, Guillermo Gómez-Peña, Francisco Toledo, Carlos Amorales, Melanie Smith, and Alejandro Jodorowsky, among many others. The edition is illustrated with 612 full-color plates of the art produced during these last three decades of the twentieth century reflect the social, political and technical developments in Mexico and ranged from painting and photography to poster design, installation, performance, experimental theatre, super-8 cinema, video, music, poetry and popular culture like the films and ephemeral actions of 'Panic' by Alejandro Jodorowsky, Pedro Friedeberg's pop art, the conceptual art, infrarealists and urban independent photography, artists books, the development of contemporary political photography, the participation of Mexican artists in Fluxus in the seventies and the contribution of Ulises Carrión to the international artist book movement and popular rock music, the pictorial battles of the eighties and the emergence of a variant of neo-conceptual art in 1990. The exhibition is curated by Olivier Debrouse, Pilar García de Garmen, Cuauhtémoc Medina, Álvaro Vázquez Mantecón"--Provided by vendor.

Understanding Leisure

First published in 1989. Understanding Leisure is a readable introductory analysis of the key elements in the study of leisure. This includes leisure concepts and dimensions of leisure, its activity forms, participants, provision, and leisure futures, leisure and social theory. A collaborative work of six authors, Understanding Leisure is a textbook which introduces the reader to the interrelated dimensions of leisure in contemporary society and aims to provide them with guidelines for further study. Exercises and discussion topics are included at the end of each chapter to enable the reader to apply general theory to particular examples. The text contains seven chapters covering all aspects of the study of leisure. Starting with a critical evaluation of different concepts of leisure it progresses through

an analysis of the relationship between leisure both to play and work and the diverse forms of leisure such as recreation, hobbies, crafts and education. There then follows a perspective on leisure participation, an analysis of the spatial dimensions of leisure and how relative land values can affect access to leisure. The historical context of leisure provision and the changing relationship between public and private sector is then examined which provides insights into the future of leisure, based on forecasts and theories of social change. The book ends with a discussion of how contemporary social theory contributes to an understanding of leisure. Understanding Leisure will be valuable reading for undergraduate degree courses in Leisure Studies. It will also be useful background reading for post graduate study in Leisure and Recreational Management and Tourism as well as for leisure professionals in both the commercial and public sectors.

The Challenge of Tourism Carrying Capacity Assessment

Planning and management for tourism growth is becoming essential in the context of sustainable development. Particularly so since many tourist destinations are facing severe pressures from tourist flows and activities. Such pressures are evidenced in terms of dysfunctions (congestion, environmental degradation, etc) which ultimately affect the attraction and competitiveness of tourism destinations. The development of tourism should be considered in accordance with sustainability principles. In this context respecting the capacity of the local system to sustain growth becomes a key challenge. This book examines the use of various tools to define, measure and evaluate tourism carrying capacity (TCC) - a tool aiming to impose limits for entering certain tourist destinations or using certain activities. Drawing on case studies from France, Spain, Italy, Greece, the UK, the Netherlands, Ireland, Belgium, Austria, Germany and Finland, it presents practical experiences of implementing TCC in various tourist destinations (i.e. historic towns, coastal zones, islands, etc). It draws conclusions regarding the measurement and implementation of TCC assessment and provides further guidelines towards a comprehensive methodological framework for assessing tourism sustainability in the future.

Plazas

PLAZAS: LUGAR DE ENCUENTROS, 5th Edition, is a two- or three-semester introductory Spanish program designed to support and enhance your students' language learning experience. PLAZAS transports your students to a Spanish-speaking country or region for an authentic and personalized cultural language-learning experience. Culture is embedded into every page of PLAZAS, giving your students an appreciation of different cultural practices and perspectives. Thanks to an exclusive partnership with the National Geographic Society, the fifth edition facilitates multi-modal interactions with cultural information in new and revised sections. The program's pedagogy continues to be firmly rooted in the research of the National Standards for Foreign Language Learning, or the Five Cs--Communication, Cultures, Connections, Comparisons, and Communities. The new A explorar! section draws upon all five standards in an engaging manner while previewing the content of the lesson. Letters to Sartre

Simone de Beauvoir and Jean-Paul Sartre formed one of the most famous literary couples of the twentieth century. Their relationship took on the quality of legend and served as a model of openness and honesty for countless men and women. Sartre was revered during his lifetime as a paradigm of the modern philosophe and intellectual, but since de Beauvoir's death in 1986, her literary reputation has threatened to eclipse Sartre's. Her work *The Second Sex* is, by any standard, one of the most important and influential books of the twentieth century. When these private and revealing letters were published in France in 1990, they caused a storm of controversy. Here de Beauvoir tells Sartre everything, tracing the extraordinary complications of their triangular love life. These letters reveal de Beauvoir not only as manipulative and dependent, but also as vulnerable, passionate, jealous, and committed. This reissue of a New York Times Notable Book will inspire philosophers, writers, and lovers of literature for decades to come.

In the Maw of the Earth Monster

As portals to the supernatural realm that creates and animates the universe, caves have always been held sacred by the peoples of Mesoamerica. From ancient times to the present, Mesoamericans have made pilgrimages to caves for ceremonies ranging from rituals of passage to petitions for rain and a plentiful harvest. So important were caves to the pre-Hispanic peoples that they are mentioned in Maya hieroglyphic writing and portrayed in the Central Mexican and Oaxacan pictorial codices. Many ancient settlements were located in proximity to caves. This volume gathers papers from twenty prominent Mesoamerican archaeologists, linguists, and ethnographers to present a state-of-the-art survey of ritual cave use in Mesoamerica from Pre-Columbian times to the present. Organized geographically, the book examines cave use in Central Mexico, Oaxaca, and the Maya region. Some reports present detailed site studies, while others offer new theoretical understandings of cave rituals. As a whole, the collection validates cave study as the cutting edge of scientific investigation of indigenous ritual and belief. It confirms that the indigenous religious system of Mesoamerica was and still is much more terrestrially focused than has been generally appreciated.

Resisting McDonaldization

George Ritzer's McDonaldization thesis argued that contemporary life is succumbing to the standardization, flexibility and practicability of fast-food service. This book brings together specially commissioned papers by leading social and cultural analysts to engage in a critical appraisal of the thesis. The contributors discuss the roots of the thesis, the rationalization of late modern life, the effects of increasing cultural commodification, the continuing prominence of American cultural and economic imperialism and the impact of globalization on social and cultural life. The strengths and weaknesses of the McDonaldization thesis are clearly evaluated and the irrational consequences of rationalization are pinpointed and critically

Electron Microscopy and Analysis 2001

Electron microscopy is now a mainstay characterization tool for solid state physicists and chemists as well as materials scientists. Electron Microscopy and Analysis 2001 presents a useful snapshot of the latest developments in instrumentation, analysis techniques, and applications of electron and scanning probe microscopies. The book is ideal for materials scientists, solid state physicists and chemists, and researchers in these areas who want to keep abreast of the state of the art in the field.

Cárdenas Compromised is a political and institutional history of Mexico's urban and rural labor in the Yucatán region during the regime of Lázaro Cárdenas from 1934 to 1940. Drawing on archival materials, both official and popular, Fallaw combines narrative, individual case studies, and focused political analysis to reexamine and dispel long-cherished beliefs about the Cardenista era. For historical, geographical, and ethnic reasons, Yucatán was the center of large-scale land reform after the Mexican Revolution. A long-standing revolutionary tradition, combined with a harsh division between a powerful white minority and a poor, Maya-speaking majority, made the region the perfect site for Cárdenas to experiment by launching an ambitious top-down project to mobilize the rural poor along ethnic and class lines. The regime encouraged rural peasants to form collectives, hacienda workers to unionize, and urban laborers to strike. It also attempted to mobilize young people and women, to challenge Yucatán's traditional, patriarchal social structure, to reach out to Mayan communities, and to democratize the political process. Although the project ultimately failed, political dialogue over Cárdenas's efforts continues. Rejecting both revisionist (anti-Cárdenas) and neopopulist (pro-Cárdenas) interpretations,

Fallaw overturns the notion that the state allowed no room for the agency of local actors. By focusing on historical connections across class, political, and regional lines, Fallaw transforms ideas on Cardenismo that have long been accepted not only in Yucatán but throughout Mexico. This book will appeal to scholars of Mexican history and of Latin American state formation, as well as to sociologists and political scientists interested in modern Mexico.

Cárdenas Compromised

First published in 1968, Carlos Fuentes's controversial novel *A Change of Skin* tells the story of four persons who drive from Mexico City to Veracruz one Palm Sunday. The Driver of the car is Franz, an ex-Nazi, and with him is his young Mexican lover Isabel, the talented but failed poet Javier, and his embittered wife, Elizabeth. There is a fifth person as well--the Narrator. Through him we discover that all the characters are searching for some real value in their lives: love for Elizabeth, creating in the case of Javier, experience for Isabel, and redemption for Franz.

A Change of Skin

A novel about love's labors lost at once hilarious and heartrending, "*Loving Pedro Infante*" unravels the fictions people weave to justify loving the wrong mate, and confirms Denise Chavez's reputation as one of the most vibrant Chicana storytellers.

Loving Pedro Infante

How can we help poor people earn more from their knowledge rather than from their sweat and muscle alone? This book is about increasing the earnings of poor people in poor countries from their innovation, knowledge, and creative skills. Case studies look at the African music industry; traditional crafts and ways to prevent counterfeit crafts designs; the activities of fair trade organizations; biopiracy and the commercialization of ethnobotanical knowledge; the use of intellectual property laws and other tools to protect traditional knowledge. The contributors' motivation is sometimes to maintain the art and culture of poor people, but they recognize that except in a museum setting, no traditional skill can live on unless it has a viable market. Culture and commerce more often complement than conflict in the cases reviewed here. The book calls attention to the unwritten half of the World Trade Organization's Agreement on the Trade Related Aspects of Intellectual Property (TRIPS). TRIPS is about knowledge that industrial countries own, and which poor people buy. This book is about knowledge that poor people in poor countries generate and have to sell. It will be of interest to students and scholars of international trade and law, and to anyone with an interest in ways developing countries can find markets for cultural, intellectual, and traditional knowledge.

What follows is a new edition of the second in a series of three books providing an account of the mathematical development of demography. The first, *Introduction to the Mathematics of Population* (Addison-Wesley, 1968), gave the mathematical background. The second, the original of the present volume, was concerned with demography itself. The third in the sequence, *Mathematics Through Problems* (with John Beekman; Springer Verlag, 1982), supplemented the first two with an ordered sequence of problems and answers. Readers interested in the mathematics may consult the earlier book, republished with revisions by Addison-Wesley in 1977 and still in print. There is no overlap in subject matter between *Applied Mathematical Demography* and the *Introduction to the Mathematics of Population*. Three new chapters have been added, dealing with matters that have come recently into the demographic limelight: multi-state calculations, family demography, and heterogeneity. vii PREFACE This book is concerned with commonsense questions about, for instance, the effect of a lowered death rate on the proportion of old people or the effect of abortions on the birth rate. The answers that it reaches are not always commonsense, and we will meet instances in which intuition has to be adjusted to accord with what the mathematics shows to be the case.

Dos mundos, a best-selling program for Introductory Spanish known for its exceptional progressive activities, made its name as an innovative pioneer in Beginning Spanish. Today, it has maintained the spirit of innovation through many successful editions and continues to be implemented in numerous beginning Spanish language classes across the nation with outstanding results. Based on the communicative approach, Dos mundos stresses the use of engaging activities in a natural and spontaneous classroom atmosphere. The Actividades de comunicacion play a primary role in Dos mundos, since the core of the program is communication. These activities include fresh, practical ideas from the field of second-language teaching. In this research-based approach to learning language, the development of communicative language skills is the central goal, with formal grammar presentation and practice at the service of communication. To this end, the grammar explanations and exercises on the blue pages at the end of each chapter are designed for quick reference and ease of study. Additionally, cultural content is integrated throughout each chapter. The new Conozca section on each chapter opener gives an introduction of the country or region of focus, including information about holidays, foods, famous people, and important cities. Ventanas culturales readings focus on community, customs, and daily life while Ventanas al pasado readings focus on aspects of the social, cultural, or political history of the Spanish-speaking world. The Enlace readings explore literature, music, and cinema, and the Lecturas present topics such as sports and leisure activities.

From Contention to Democracy addresses a crucial aspect of contemporary societies: the role of social movements for political and social change. The volume gathers together essays written by prominent social theorists who have been asked to reflect on the relationship between movements and processes of social, political and cultural change. Three broad types of movement-change nexus are distinguished and discussed: incorporation, transformation, and democratization. The chapters in this book all point to the place of social movements in relation to these three processes of change, while discussing the history and well-known events of social movements. Individual occurrences such as the protest of French students in 1968 or Chilean shantytown dwellers are examined. The final essay looks ahead, wondering: what is the future of social movements?

The 2020 edition of The State of World Fisheries and Aquaculture has a particular focus on sustainability. This reflects a number of specific considerations. First, 2020 marks the twenty-fifth anniversary of the Code of Conduct for Responsible Fisheries (the Code). Second, several Sustainable Development Goal indicators mature in 2020. Third, FAO hosted the International Symposium on Fisheries Sustainability in late 2019, and fourth, 2020 sees the finalization of specific FAO guidelines on sustainable aquaculture growth, and on social sustainability along value chains. While Part 1 retains the format of previous editions, the structure of the rest of the publication has been revised. Part 2 opens with a special section marking the twenty fifth anniversary of the Code. It also focuses on issues coming to the fore, in particular, those related to Sustainable Development Goal 14 and its indicators for which FAO is the “custodian” agency. In addition, Part 2 covers various aspects of fisheries and aquaculture sustainability. The topics discussed range widely, from data and information systems to ocean pollution, product legality, user rights and climate change adaptation. Part 3 now forms the final part of the publication, covering projections and emerging issues such as new technologies and aquaculture biosecurity. It concludes by outlining steps towards a new vision for capture fisheries. The State of World Fisheries and Aquaculture aims to provide objective, reliable and up-to-date information to a wide audience – policymakers, managers, scientists, stakeholders and indeed everyone interested in the fisheries and aquaculture sector.

A leading figure in cultural studies worldwide, Néstor García Canclini is a Latin American thinker who has consistently sought to understand the impact of globalization on the relations between Latin America, Europe, and the United States, and among Latin American countries. In this book, newly available in English, he considers how globalization is imagined by artists, academics, migrants, and entrepreneurs, all of whom traverse boundaries and, at times, engage in conflicted or negotiated multicultural interactions. García Canclini contrasts the imaginaries of previous migrants to the Americas with those who live in transnational circuits today. He integrates metaphor and narrative, working through philosophical, anthropological, and socioeconomically grounded interpretations of art, literature, crafts, media, and other forms of expression toward his conclusion that globalization is, in important ways, a collection of heterogeneous narratives. García Canclini advocates global imaginaries that generate new strategies for dealing with contingency and produce new forms of citizenship oriented toward multiple social configurations rather than homogenization. This edition of *Imagined Globalization* includes a significant new introduction by George Yúdice and an interview in which the cultural theorist Toby Miller and García Canclini touch on events including the Arab Spring and Occupy Wall Street.

This new work surveys how rapid changes taking place at the start of the twenty-first century in social, cultural, political and economic domains impact on sexuality, health and human rights. The relationships between men, women and children are changing quickly, as are traditional family structures and gender norms. What were once viewed as private matters have become public, and an array of new social movements – transgender, intersex, sex worker, people living with HIV – have come into the open. The book is split into three sections: *Global 'Sex' Wars* – discusses the notion of sexualities, its political landscapes internationally, and the return of religious fervour and extremism *Epistemological Challenges and Research Agendas* – examines modern 'scientific' understandings of sexuality, its history and the way in which AIDS has drawn attention to sexuality *The Promises and Limits of Sexual Rights* – discusses human rights approaches to sexuality, their strengths and limitations and new ways of imagining erotic justice Offering a unique framework for understanding this new world, set in the context of the major theoretical debates of recent decades, this book will be of interest to professionals, advocates and policy researchers and is suitable for a wide range of courses covering areas such as gender studies, human sexuality, public health and social policy.
