Value Stocks beat Growth Stocks: An empirical Analysis for the German Stock Market

Based on a 'free of survivorship-bias' sample of German stocks listed at the Frankfurt stock exchange, the study investigates the ability of hedge portfolio formation structures, built of three value premium proxies (P/B, P/E, and DY), the size factor, and the technical momentum factor, to generate excess returns in the period 1992 to 2011. First, the author characterizes and defines the significant terms that are in connection with value and growth investing. He continues with the discussion of asset pricing with the CAPM, the Fama and French three-factor model, and the Carhart extension, and then describes the expected stock returns that are of capital importance. Moreover, the author deals with related studies for the German stock market. He gives a detailed description of the empirical analysis before he draws his conclusions. The author's purpose is to answer the following core questions: Is there a value premium in the German market between 1992 and 2011? Is there a reversed size premium like recent empirical findings suggest? Do high momentum stocks perform better than low momentum stocks? Is there a significant seasonal pattern in hedge portfolio returns? The combination of which factors best explains expected stock returns?

Luke Cage, Power Man Masterworks Vol. 3

The key aim of this book is to explore the global conservation and management of sharks. There has been a rapid decline in populations of many shark species, while new science has emerged of the critical role they play in marine ecosystems. However, the authors show that conservation law and policy have been slow to develop, with only a small number of iconic species being protected worldwide. The increase in fishing impact – primarily through shark finning and by-catch - has led to shark conservation receiving greater international attention in recent years. The book explores our current knowledge and status of the law and science in relation to sharks with a particular focus on improving frameworks for their conservation and management. Recent trends are analysed, including shark finning bans that have been put in place in several countries, the widening number of nations establishing shark sanctuaries and the growth of shark-based tourism. The efficacy of current listing processes for endangered species and fisheries regulations is also examined. Tourism is explored as an alternative to fishing and the risks and impacts associated with this industry are analysed. Contributors include leading authorities from universities and conservation organizations in North America, Europe and Australia. A common theme is to emphasise the importance of collaborative governance between various interest groups and the need for inter-disciplinary research and management approaches that are necessary to address the decline in sharks.

Managing Deep-sea Ecosystems at Ocean Basin Scale, Volume 1

In this major new study in the sociology of scientific knowledge, social theorist Mohammad H. Tamdgidi reports having unriddled the so-called 'quantum enigma.' This book opens the lid of the Schrödinger's Cat box of the 'quantum enigma' after decades and finds something both odd and familiar: Not only the cat is both alive and dead, it has morphed into an elephant in the room in whose interpretation Einstein, Bohr, Bohm, and others were each both right and wrong because the enigma has acquired both localized and spread-out features whose unriddling requires both physics and sociology amid both transdisciplinary and transcultural contexts. The book offers, in a transdisciplinary and transcultural sociology of self-knowledge framework, a relativistic interpretation to advance a liberating quantum sociology. Deeper methodological grounding to further advance the sociological imagination requires investigating whether and how relativistic and quantum scientific revolutions can induce a liberating reinvention of sociology in favor of creative research and a just global society. This, however, necessarily leads us to confront an elephant in the room, the 'quantum enigma.' In *Unriddling the Quantum Enigma*, the first volume of the series commonly titled *Liberating Sociology: From Newtonian toward Quantum Imaginations*, sociologist Mohammad H. Tamdgidi argues that unriddling the 'quantum enigma' depends on whether and how we succeed in dehabituating ourselves in favor of unified relativistic and quantum visions from the historically and ideologically inherited, classical Newtonian modes of imagining reality that have subconsciously persisted in the ways we have gone about posing and interpreting (or not) the enigma itself for more than a century. Once this veil is lifted and the enigma unriddled, he argues, it becomes possible to reinterpret the relativistic and quantum ways of imagining reality (including social reality) in terms of a unified, nonreductive, creative dialectic of part and whole that fosters quantum sociological imaginations, methods, theories, and practices favoring liberating and just social outcomes. The essays in this volume develop a set of relativistic interpretive solutions to the quantum enigma. Following a survey of relevant studies, and an introduction to the transdisciplinary and transcultural sociology of self-knowledge framing the study, overviews of Newtonianism, relativity and quantum scientific revolutions, the quantum enigma, and its main interpretations to date are offered. They are followed by a study of the notion of the "wave-particle duality of light" and the various experiments associated with the quantum enigma in order to arrive at a relativistic interpretation of the enigma, one that is shown to be capable of critically cohering other offered interpretations. The book concludes with a heuristic presentation of the ontology, epistemology, and methodology of what Tamdgidi calls the creative dialectics of reality. The volume essays involve critical, comparative/integrative reflections on the relevant works of founding and contemporary scientists and scholars in the field. This study is the first in the monograph series "Tayyeb Series in East-West Research and Translation" of *Human Architecture: Journal of the Sociology of Self-Knowledge* (XIII, 2020), published by OKCIR: Omar Khayyam Center for Integrative Research in Utopia, Mysticism, and Science (Utopystics). OKCIR is dedicated to exploring, in a simultaneously world-historical and self-reflective framework, the human search for a just global society. It aims to develop new conceptual (methodological, theoretical, historical), practical, pedagogical, inspirational and disseminative structures of knowledge whereby the individual can radically understand and determine how world-history and her/his selves constitute one another. Reviews "Mohammad H. Tamdgidi's *Liberating Sociology: From Newtonian Toward Quantum Imaginations*, Volume 1, *Unriddling the Quantum Enigma* hits the proverbial nail on the head of an ongoing problem not only in sociology but also much social science—namely, many practitioners' allegiance, consciously or otherwise, to persisting conceptions of 'science' that get in the way of scientific and other forms of theoretical advancement. Newtonianism has achieved the status of an idol and its methodology a fetish, the consequence of which is an ongoing failure to think through important problems of uncertainty, indeterminacy, multivariation, multidisciplinary, and false dilemmas of individual agency versus structure, among many others. Tamdgidi has done great service to social thought by bringing to the fore this problem of disciplinary decadence and offering, in effect, a call for its teleological suspension—thinking beyond disciplinarity—through drawing upon and communicating with the resources of quantum theory not as a fetish but instead as an opening for other possibilities of social, including human, understanding. The implications are far-reaching as they offer, as the main title attests, liberating sociology from persistent epistemic shackles and thus many disciplines and fields connected to things 'social.' This is exciting work. A triumph! The reader is left with enthusiasm for the second volume and theorists of many kinds with proverbial work to be done." — Professor Lewis R. Gordon, Honorary President of the Global Center for Advanced Studies and author of *Disciplinary Decadence: Living Thought in Trying Times* (Routledge/Paradigm, 2006), and *Freedom, Justice, and Decolonization* (Routledge, forthcoming 2020) "Social sciences are still using metatheoretical models of science based on 19th century newtonian concepts of "time and space". Mohammad H. Tamdgidi has produced a 'tour de force' in social theory leaving behind the old newtonian worldview that still informs the social sciences towards a 21st century non-dualistic, non-reductionist, transcultural,

transdisciplinary, post-Einsteinian quantum concept of TimeSpace. Tamdgidi goes beyond previous efforts done by titans of social theory such as Immanuel Wallerstein and Kyriakos Kontopoulos. This book is a quantum leap in the social sciences at large. Tamdgidi decolonizes the social sciences away from its Eurocentric colonial foundations bringing it closer not only to contemporary natural sciences but also to its convergence with the old Eastern philosophical and mystical worldviews. This book is a masterpiece in social theory for a 21st century decolonial social science. A must read!" — Professor Ramon Grosfoguel, University of California at Berkeley

"Tamdgidi's *Liberating Sociology* succeeds in adding physical structures to the breadth of the world-changing vision of C. Wright Mills, the man who mentored me at Columbia. Relativity theory and quantum mechanics can help us to understand the human universe no less than the physical universe. Just as my *Creating Life Before Death* challenges bureaucracy's conformist orientation, so does *Liberating Sociology* "liberate the infinite possibilities inherent in us." Given our isolation in the Coronavirus era, we have time to follow Tamdgidi in his journey into the depth of inner space, where few men have gone before. It is there that we can gain emotional strength, just as Churchill, Roosevelt and Mandela empowered themselves. That personal development was needed to address not only their own personal problems, but also the mammoth problems of their societies. We must learn to do the same." — Bernard Phillips, Emeritus Sociology Professor, Boston University

The Political Economy of Predation

Approaches to American Cultural Studies provides an accessible yet comprehensive overview of the diverse range of subjects encompassed within American Studies, familiarising students with the history and shape of American Studies as an academic subject as well as its key theories, methods, and concepts. Written and edited by an international team of authors based primarily in Europe, the book is divided into four thematically-organised sections. The first part delineates the evolution of American Studies over the course of the twentieth century, the second elaborates on how American Studies as a field is positioned within the wider humanities, and the third inspects and deconstructs popular tropes such as myths of the West, the self-made man, Manifest Destiny, and representations of the President of the United States. The fourth part introduces theories of society such as structuralism and deconstruction, queer and transgender theories, border and hemispheric studies, and critical race theory that are particularly influential within American Studies. This book is supplemented by a companion website offering further material for study (www.routledge.com/cw/dallmann). Specifically designed for use on courses across Europe, it is a clear and engaging introductory text for students of American culture.

Politics & Social Justice

Stephen Foster's "My Old Kentucky Home" has been designated as the official state song and performed at the Kentucky Derby for decades. In light of the ongoing social justice movement to end racial inequality, many have questioned whether the song should be played at public events, given its inaccurate depiction of slavery in the state. In *Slavery and Freedom in the Bluegrass State*, editor Gerald L. Smith presents a collection of powerful essays that uncover the long-forgotten stories of pain, protest, and perseverance of African Americans in Kentucky. Using the song and the museum site of My Old Kentucky Home as a central motif, the chapters move beyond historical myths to bring into sharper focus the many nuances of Black life. Chronologically arranged, they present fresh insights on topics such as the domestic slave trade, Black Shakers, rebellion and racial violence prior to the Civil War, Reconstruction, the fortitude of Black women as they pressed for political and educational equality, the intersection of race and sports, and the controversy over a historic monument. Taken as a whole, this groundbreaking collection introduces readers to the strategies African Americans cultivated to negotiate race and place within the context of a border state. Ultimately, the book gives voice to the thoughts, desires, and sacrifices of generations of African Americans whose stories have been buried in the past.

Liberating Sociology: From Newtonian Toward Quantum Imaginations: Volume 1: Unriddling the Quantum Enigma

This three-volume set is a valuable resource for researching the history of American television. An encyclopedic range of information documents how television forever changed the face of media and continues to be a powerful influence on society. What are the reasons behind enduring popularity of television genres such as police crime dramas, soap operas, sitcoms, and "reality TV"? What impact

has television had on the culture and morality of American life? Does television largely emulate and reflect real life and society, or vice versa? How does television's influence differ from that of other media such as newspapers and magazines, radio, movies, and the Internet? These are just a few of the questions explored in the three-volume encyclopedia *TV in the USA: A History of Icons, Idols, and Ideas*. This expansive set covers television from 1950 to the present day, addressing shows of all genres, well-known programs and short-lived series alike, broadcast on the traditional and cable networks. All three volumes lead off with a keynote essay regarding the technical and historical features of the decade(s) covered. Each entry on a specific show investigates the narrative, themes, and history of the program; provides comprehensive information about when the show started and ended, and why; and identifies the star players, directors, producers, and other key members of the crew of each television production. The set also features essays that explore how a particular program or type of show has influenced or reflected American society, and it includes numerous sidebars packed with interesting data, related information, and additional insights into the subject matter.

Slavery and Freedom in the Bluegrass State

This book tells the story of the Jesuit mission to Cluj, Transylvania (now Romania) from 1693, when the Jesuits were allowed to return after almost a century of restricted activity in the region, until 1773, when the order was suppressed. During these eight decades the Jesuits created a complex, multi-faceted community whose impact reached throughout Transylvania and beyond into neighbouring regions. In addition to an ongoing missionary program in this predominantly non-Catholic region, the Jesuits established a cluster of schools and a university that trained the elite, introduced Baroque architecture, music and literature, and became the masters of extensive properties. The Jesuits' schools staged dramas in several languages, their printing press produced a wide range of publications, including a Hungarian 'ABC for Girls' and a catechism in Ukrainian, and Jesuit scientists, including Miksa Hell, later Court Astronomer in Vienna, conducted experiments and observations. Among the unique features of this study are the accounts of how Jesuits sought to impose social conformity on the ethnically and religiously diverse community, the Jesuits' project to develop a 'Uniate Church' that would retain the Eastern Rite while acknowledging the authority of Rome, and the story of the long-forgotten Jesuit 'brothers', who contributed their talents as craftsmen and artists to the Jesuit enterprise. A chapter is devoted to the ill-fated 1743 mission to Moldavia, in which Transylvanian Jesuits hoped to establish a missionary and educational outpost in this Ottoman-dominated principality. Special attention is given to Jesuit interactions with the many minority groups present in Cluj: Armenians, Jews, Roma (Gypsies), and German speaking 'Saxons', as well as encounters with ethnic Romanians, who made up the majority of the population of Transylvania and among whom the Uniate Church was promoted. Cluj, a city where the cultures of Eastern and Western Europe meet, represented the furthestmost penetration into Orthodox Europe of the Baroque aesthetic and of the domination of the Habsburgs, supported and glorified by the Jesuits. The successes and failures of this religious order helped shape the history of the region for the next two centuries.

Soul Eater NOT!, Vol. 3

De tragische gebeurtenissen in Rwanda, Srebrenica en Kosovo hebben geleid tot een herbezinning over de rol en verantwoordelijkheid van de internationale gemeenschap. In het beginsel Responsibility to Protect (R2P), dat in 2005 door de wereldleiders werd omarmd, hebben individuele staten nog steeds de primaire verantwoordelijkheid voor de bescherming van hun inwoners. Maar als ze die verantwoordelijkheid niet kunnen of willen nemen, komt de verantwoordelijkheid bij de internationale gemeenschap te liggen. R2P heeft de ambitie om herhaling van Rwanda, Srebrenica en Kosovo te voorkomen, maar er bestaat nog grote onduidelijkheid over inhoud en potentieel van dit beginsel. Deze bundel verkent R2P als moreel, politiek en juridisch beginsel en onderzoekt hoe de Verenigde Naties, de Europese Unie, individuele staten en NGO's R2P kunnen gebruiken om ernstige mensenrechtenschendingen te voorkomen.
