The Handbook of Asian Intelligence Cultures

The Handbook of Asian Intelligence Cultures explores the historical and contemporary influences that have shaped Asian intelligence cultures as well as the impact intelligence service have had on domestic and foreign affairs.

The Determinants of Leadership

This book investigates the determinants of leadership in East Asia, emphasizing the significance of followership in the success and failure of leadership projects proposed by China, Japan, and the United States. While doing so, it answers a central question in the field of international relations: Why do potential leader countries succeed in obtaining potential followers in some instances, but fail to do so in other instances? Employing an inclusive leadership and societal approach, the book investigates how the leading countries motivate followership in East Asian economic and security dynamics. It analyzes how Chinese, Japanese and American leadership obtained acceptance from potential followers, focusing on the significance of domestic politics of potential follower countries in shaping their governmental preferences and generating followership. The book features empirical evidence in six case studies, covering topics such as the successful Chinese endeavor of South Korea joining the Chinese initiative for the Asian Infrastructure and Investment Bank (AIIB), the failed US attempt to prevent South Korea from doing so, the US's success to convince Japan to join the Trans-Pacific Partnership (TPP), the failed Japanese strive for winning South Korea's support for Japan's bid for a permanent seat at the UN Security Council (UNSC), the Chinese failure at obtaining the Philippines' backing of the Chinese aspirations in the South China Sea (SCS) during the Aquino Presidency, and, finally, the Chinese success on the same effort during the Duterte presidency. The book will appeal to students, scholars, and researchers of international relations interested in a better understanding of leadership determinants in East Asia, Global Power Shift, foreign policy, as well as East Asian economic and security dynamics.

Southeast Asian Affairs 2008

Since its inception in 1974, Southeast Asian Affairs (SEAA) has been an indispensable annual reference for generations of policy-makers, scholars, analysts, journalists, and others. Succinctly written by regional and international experts, SEAA illuminates significant issues and events of the previous year in each of the Southeast Asian nations and the region as a whole. Southeast Asian Affairs 2008 provides an informed and readable analysis of the events and developments in the region in 2007. In the regional section, the first two articles provide the political and economic overview of Southeast Asia. They are followed by an article on India's geopolitics and Southeast Asia, and two articles on ASEAN. Eleven country reviews as well as four country-specific thematic chapters follow, delving into domestic political, economic, security, and social developments during 2007 and their implications for countries in the region and beyond.

From Aquino II to Duterte (2010–2018)

The Duterte administration is often considered a rupture in Philippines' politics. Yet, how different is Duterte's programme of change from the past governments, particularly from its predecessor, the Aquino II administration? Is there a shift in regime orientation and policy preferences from Aquino II to Duterte? What will this mean to the future direction of Philippine democracy, its economic development, peace and security, and relations with other countries? This volume focuses on four critical areas—politics and governance; economic governance; Mindanao peace process; and international relations—to illustrate continuities or discontinuities in policies and governance of institutions to explain the dynamics of change in the Philippines. It pays particular attention to the crucial period between Aquino II and the early years of Duterte. The reason is that Aquino II represents an important period for rebuilding and consolidating institutions of governance and accountability after two previous tumultuous administrations. Yet Aquino II also demonstrates the inherent flaws of Philippine democracy and unravels the contradictory forces vying for state power that sets the scene for Duterte's rise. Reflecting on the crucial transition period between the two presidencies, while also providing a much-needed update on the most noteworthy policy changes since Duterte's inauguration, the book fills an important scholarly gap in understanding Asia's oldest and most puzzling democracy.

The Philippine Government

This book aims to examine the multiple effects of the COVID-19 pandemic on China-Southeast Asia relations from both Chinese and Southeast Asian perspectives. It invites many officials and scholars from the leading think-tanks and famous universities in China and Southeast Asian states to contribute and tries to reveal how has China-Southeast Asia relations been reshaping during/after the COVID-19 pandemic and discuss what kind of measures could be taken to push forward China-Southeast Asia relations and thus ensuring the peace and prosperity in the region. The main content of this book is divided into 10 parts, in which the first chapter briefly introduces the COVID-19 situation in China and Southeast Asia, China's anti-COVID efforts, and the impacts of the COVID-19 on China-Southeast Asia relations from Chinese and Southeast Asian perspectives. Chapter 2 examines the dual influence of the pandemic on the construction of China-ASEAN community of a shared future and gave some useful policy recommendations on improving China-Southeast Asia relations. The following 8 chapters go deep into the Southeast Asian states' response to COVID-19 and the economic, political and social effects of the COVID-19 on Southeast Asia–China relations, and look forward the future development of such relations. In addition, it also analyzes Southeast states' reactions to the intense Sino-US power rivalry during/after the COVID-19 pandemic. This book is probably the first comprehensive study that investigates the impacts of the COVID-19 pandemic on China–Southeast Asia relations from both Chinese and Southeast Asian perspectives. It would not only open up a new area of study on China and Southeast Asia relations, but provide insightful observations and useful information for governments, companies and social organizations to facilitate cooperation in trade and investment, public health, and people-to-people exchanges. Therefore, the intended readership not only includes the academics but also officials, businessmen, journalists and social activists. The most important feature of this book is that it points out China–Southeast Asia relations would be reshaped by COVID-19 in the long run and analyzes how it would be reshaped. It also shows a well-balanced view on the COVID-19 and China–Southeast Asia relations as both university scholars, think-tank experts and government officials are involved in this book.

The Reshaping of China-Southeast Asia Relations in Light of the COVID-19 Pandemic

Across more than four decades, the conflict between the national government and Muslim liberation forces in the southern Philippines has killed tens of thousands and displaced millions. Two landmark agreements under the presidency of Benigno S Aquino III — the first in 2012 and the second in 2014 — raised high hopes that peace might finally be on the way. But the peace process stalled, and has yet to regain momentum, after a botched counterterrorism operation in early 2015. This volume provides both in-depth examination of the latest stage of a still-ongoing peace process as well as richly textured analysis of the historical, political, and economic context underlying one of the most enduring conflicts in the world. It is thus an extremely important foundational resource in the continuing quest for peace and prosperity in Mindanao. Contents: Introduction: The Travails of Promoting Peace and Prosperity in Mindanao (Paul D Hutchcroft) National Political Update: Can the Gains Be Sustained? Assessing the First Five Years of the Aquino Administration (Ronald D Holmes) Historical Foundations: War and Peace in Muslim Mindanao: Critiquing the Orthodoxy (Patricio N Abinales) The Role of International Actors in the Search for Peace in Mindanao (Steven Rood) Peace Prospects: Forging a Peace Settlement for the Bangsamoro: Compromises and Challenges (Miriam Coronel Ferrer) Building the Bangsamoro Government (Abhoud Syed M Lingga) The Mamasapano Detour (Edilberto C de Jesus and Melinda Quintos de Jesus) Development Challenges: Human Development in the Autonomous Region in Muslim Mindanao: Trends, Traps, and Immediate Challenges (Toby C Monsod) The Shadow Economy and Strongman Rule in Mindanao (Francisco J Lara Jr) Readership: Scholars in South East Asian Studies, peace studies, History of Philippines, and conflict studies. Keywords: Mindanao; Philippines; Peace; Muslim Liberation Forces; Benigno S Aquino III Review: Reviews of the First Edition: "This compendium of essays could not have come at a more appropriate time. For the first time in Philippine history, the new President hails from Mindanao. The administration of Rodrigo R. Duterte will certainly benefit from the analysis of the experts who have contributed to this volume, as they examine the complex factors that contributed to the 2014 Comprehensive Agreement on the Bangsamoro as well as derailed the passage of the Bangsamoro Basic Law. An excellent and accessible guide for better understanding both the armed conflict in Mindanao and the peace process." Amina Rasul President, Philippine Center for Islam and Democracy "All of us, stakeholders to peace in Mindanao, have invested a lot to win the peace. We have missed a lot of opportunities, but before us is a chance to deliver one final contributors to this book credibly present truths, analyses, and historical insights. It allows for informed judgment by key players, opinion makers, and the public." General Emmanuel T Bautista (Ret.) Former Chief of Staff, Armed Forces of the Philippines "With so many national and regional policymakers and pundits eager to identify links — both real and exaggerated — between Mindanao and broader regional terrorist networks, a clear-eyed assessment of the challenges for peace in the southern Philippines has never been more urgent. This collection of essays offers a welcome

Mindanao: The Long Journey To Peace And Prosperity

This book discusses court-oriented legal reforms across Asia with a focus on the creation of 'new courts' over the last 20 years. Contributors discuss how to judge new courts and examine whether the many new courts introduced over this period in Asia have succeeded or failed. The 'new courts' under scrutiny are mainly specialist courts, including those established to hear cases involving intellectual property disputes, bankruptcy petitions, commercial contracts, public law adjudication, personal law issues and industrial disputes. The justification of the trend to 'judicialize' disputes has seen the invocation of Western-style rule of law as necessary for the development of the market economy, democratization, good governance and the upholding of human rights. This book also includes critics of court building who allege that it serves a Western agenda rather than serving local interests, and that the emphasis on judicialization marginalises alternative local and traditional modes of dispute resolution. Adopting an explicitly comparative perspective, and contrasting the experiences of important Asian states - China, Japan, Korea, Malaysia, Vietnam, Brunei, Thailand and Indonesia - this book considers critical questions including: Why has the 'new-court model' been adopted, and why do international development agencies and nation-states tend to favour it? What difficulties have the new courts encountered? How have the new courts performed? What are the broader implications of the trend towards the adoption of judicial solutions to economic, social and political problems? Written by world authorities on court development in Asia, this book will not only be of interest to legal scholars and practitioners, but also to development specialists, economists and political scientists.

New Courts in Asia

Nurse Migration in Asia explores the ever-increasing need for a larger nursing and healthcare workforce in Asia, where countries are undergoing rapid transformation, given economic globalisation and

commercial expansion. The book examines some of the major forces that play key roles in the changing dynamics of 21st century nurse and care worker migration in the Asian context; changes which inevitably have global implications. The country case studies range from India, China, Singapore to Japan and the Philippines. Common themes emerge: the rapid and unpredictable nature of nurse migration patterns, including the direction, purpose and frequency of migration; and the changes in professional training, regulation, and workforce policy. Forces causing these shifts include the changing population demography, global and regional economic fluctuations, and finally changing professional roles and gender dynamics. The book analyses the response to these transformations, and how countries adjust their immigration regulations, to attract foreign healthcare professionals. It concludes by highlighting the importance for all countries to remain vigilant as regards the exacerbating workforce crisis, and engage in developing coherent policy governance frameworks to manage healthcare workforce at the national or international levels. A valuable addition to the literature, this book will be of interest to academics in the field of nursing, health and social care workforce studies, population demography, labour markets, gender and international migration studies, globalisation in health and Asian studies.

Nurse Migration in Asia

Four years into presidency, with thousands of Filipinos killed and his self-imposed timelines for campaign promises unfinished, President Duterte has polarized once strong coalitions, people's organizations, and networks. While some remain supportive and hopeful of the President with two more years in power, some have also withdrawn their support from the strongman. Civil society organizations and organized sectors grapple with the populist methods of the current administration while attempting to do the impossible task of balancing conflicting interests. This study by INCITEGov on populism aims to look at Philippine society today and civil society's engagement with government. It engaged the sectors to voice out their opinions and widen the discourse on leadership and governance. It asks the difficult questions and explores answers which can shed light on why unity seems like a daunting task for civil society today. It looks back, tracing the history of civil society engagement with the government and the private sector, identifying the divergent perspectives of CSOs and people's organizations on democratic leadership and governance.

POPULISM AND PHILIPPINE CIVIL SOCIETY

El Niño can have drastic effects on livelihoods in affected regions. As the climate changes, there will also be changes in El Nino behavior and therefore in its impacts around the globe on human activities such as agriculture, water resources and weather extremes. The country-specific studies covered in this book are undertaken by experts on climate, water and weather-related fields in the countries being studied. Furthermore, aspects from other disciplines, for example from social sciences have been drawn upon in order to cover crosscutting themes which are identified: depicting similarities and differences in responses to El Nino's impacts such as drought, floods, famines, health-related issues and the like.

El Niño Ready Nations and Disaster Risk Reduction

Countries at the Crossroads: An Analysis of Democratic Governance evaluates government performance in seventy strategically important countries from across the globe, including emerging market countries and at-risk states. The in-depth comparative analyses and quantitative ratings examining Accountability and Public Voice, Civil Liberties, Rule of Law, and Anticorruption and Transparency serve as a valuable tool for public analysts, educators and students, government officials, and the business community.

Countries at the Crossroads 2011

Places for Happiness explores two of the most important performance-based activities in the Philippines: the processions and Passion Plays associated with Easter and the mass-dance phenomenon known as "street dancing." The scale of these handcrafted performances in terms of duration, time commitment, and productive labor marks the Philippines as one of the world's most significant and undervalued performance-centered cultures. Drawing on a decade of fieldwork, William Peterson examines how people come together in the streets or on temporary stages, celebrating a shared sense of community and creating places for happiness. The first half of the book focuses on localized and often highly idiosyncratic versions of the Passion of Christ. Peterson considers not only what people do in these events, but what it feels like to participate. The book's second half provides a window into the many expressions of "street dancing." Street dancing is inflected by localized indigenous and folk dance

traditions that are reinforced at school and practiced in conjunction with religious civic festivals. Peterson identifies key frames that shape and contain the individual in the Philippines, while tracking how the local expands its expressive home by engaging in a dialogue with regional, national, and diasporic Filipino imaginaries. Ultimately *Places for Happiness* explores how community-based performance responds to and fulfills basic human needs. Many Filipinos rely on family members and immediate neighbors for support and sustenance, and community-based performance assumes a unique and leading role in defining, reinforcing, and celebrating shared belief systems. By bringing forth the internal, phenomenological, and embodied aspects of a range of community-based practices contributing to human happiness, the book offers a cultural framework that interweaves the individual experience with that of the collective, plotting out what resides inside the body through the coordinates of culture.

Places for Happiness

The rising strength of mainland China has spurred a revival of "Chineseness" in the Philippines. Perceived during the Cold War era as economically dominant, political disloyal, and culturally different, the "Chinese" presented themselves as an integral part of the Filipino imagined community. Today, as Filipinos seek associations with China, many of them see the local Chinese community as key players in East Asian regional economic development. With the revaluing of Chineseness has come a repositioning of "Chinese" racial and cultural identity. Philippine mestizos (people of mixed ancestry) form an important sub-group of the Filipino elite, but their Chineseness was occluded as they disappeared into the emergent Filipino nation. In the twentieth century, mestizos defined themselves and based claims to privilege on "white" ancestry, but mestizos are now actively reclaiming their "Chinese" heritage. At the same time, so-called "pure Chinese" are parlaying their connections into cultural, social, symbolic, or economic capital, and leaders of mainland Chinese state companies have entered into politico-business alliances with the Filipino national elite. As the meanings of "Chinese" and "Filipino" evolve, intractable contradictions are appearing in the concepts of citizenship and national belonging. Through an examination of cinematic and literary works, *The Chinese Question* shows how race, class, ideology, nationality, territory, sovereignty, and mobility are shaping the discourses of national integration, regional identification, and global cosmopolitanism.

The Chinese Question

This book analyses marginalisation and human rights in Southeast Asia and offers diverse approaches in understanding the nuances of marginalisation and human rights in the region. Throughout the region, a whole range of similarities and differences can be observed relating to the Southeast Asian experience of human rights violation, with each country maintaining particular aspects reflecting the variability of the use and abuse of political power. This book explores the distinct links between marginalisation and human rights for groups exposed to discrimination. It focuses on ethnic minorities, children, indigenous peoples, migrant workers, refugees, academics, and people with disabilities. This book highlights the disparities in attainment and opportunity of marginalised and minority groups in Southeast Asia to their rights. It examines how marginalisation is experienced, with case studies ranging from a regional approach to country context. Paying attention to how broader socio-economic and political structures affect different people's access to, or denial of, their fundamental human rights and freedoms, the book argues that tackling human rights abuses remains a major hurdle for the countries in Southeast Asia. Providing a broader conceptual framework on marginalisation and human rights in Southeast Asia and a new assessment of these issues, this book will be of interest to readers in the fields of Asian Law, Human Rights in Asia, and Southeast Asian Studies, in particular Southeast Asian Politics.

Marginalisation and Human Rights in Southeast Asia

Organizations and businesses are applying sustainable development concepts in their management strategies in order to improve and rethink products, processes, services, and policies which will have significant potential to reduce carbon dioxide emissions, excess consumption, and improve the quality of lives. *Cases on the Diffusion and Adoption of Sustainable Development Practices* is a collection of case studies on the concepts and theories of successful sustainable practices. It also identifies key mechanisms and strategies that have allowed the successful diffusion of these practices into communities, regions and nations around the world. This reference source is essential for professionals, researchers, educators and leaders in pursuit of innovative solutions in sustainable development.

Cases on the Diffusion and Adoption of Sustainable Development Practices

The book focuses on the main security threats, defence industry, arms trade, defence policies and military capabilities related issues in the Asia-Pacific region. There are only a very few regions in the world which have advanced so fast both economically and technologically as the Asia-Pacific in the past few decades. Probably this is one of the reasons why several countries in the region have gained confidence, sharpened their diplomatic tone, increased their defence expenditure, invested into military capabilities, and questioned both the local and global status-quo. The region contains emerging powers, far-reaching ambitions, threatening rhetoric, rising political tensions, and concerns about military conflicts. Factors that show that critical issues are at stake, the reopening of long-forgotten debates, are more relevant than ever and masses of uncertainties are yet to be resolved. This book will be of much interest to all students and scholars of Asia-Pacific Security, Asian politics and International Relations in general. The chapters in this book were originally published as a special issue of Defense & Security Analysis.

Asia-Pacific Defense and Security Outlook

This book provides a fresh and extensive discussion of corruption issues in natural resources sectors. Reflecting on recent debates in corruption research and revisiting resource curse challenges in light of political ecology approaches, this volume provides a series of nuanced and policy-relevant case studies analyzing patterns of corruption around natural resources and options to reach anti-corruption goals. The potential for new variations of the resource curse in the forest and urban land sectors and the effectiveness of anti-corruption policies in resource sectors are considered in depth. Corruption in oil, gas, mining, fisheries, biofuel, wildlife, forestry and urban land are all covered, and potential solutions discussed.

Corruption, Natural Resources and Development

"With an empirical focus on regimes in Singapore, the Philippines, and Malaysia, the author examines the social forces that underpin the emergence of institutional experiments in democratic participation and representation"--

Participation Without Democracy

Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of sports law in Philippines deals with the regulation of sports activity by both public authorities and private sports organizations. The growing internationalization of sports inevitably increases the weight of global regulation, yet each country maintains its own distinct regime of sports law and its own national and local sports organizations. Sports law at a national or organizational level thus gains a growing relevance in comparative law. The book describes and discusses both state-created rules and autonomous self-regulation regarding the variety of economic, social, commercial, cultural, and political aspects of sports activities. Self-regulation manifests itself in the form of by-laws, and encompasses organizational provisions, disciplinary rules, and rules of play. However, the trend towards more professionalism in sports and the growing economic, social and cultural relevance of sports have prompted an increasing reliance on legal rules adopted by public authorities. This form of regulation appears in a variety of legal areas, including criminal law, labour law, commercial law, tax law, competition law, and tort law, and may vary following a particular type or sector of sport. It is in this dual and overlapping context that such much-publicized aspects as doping, sponsoring and media, and responsibility for injuries are legally measured. This monograph fills a gap in the legal literature by giving academics, practitioners, sports organizations, and policy makers access to sports law at this specific level. Lawyers representing parties with interests in Philippines will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative sports law.

Sports Law in the Philippines

This book examines the need for greater East Asian cooperation and the challenges to this grand endeavor. With differing national outlooks, how can East Asia preserve peace, prosperity and stability amidst geopolitical competition? To answer this question, the volume examines the political and economic relations between Beijing and its neighbors against the backdrop of two trends: the power shift from the West to the East in the aftermath of the American Financial Crisis and the ongoing eurozone crisis, as well as the rise of China.

China and East Asia

An in-depth examination of the law and geopolitics of China's maritime disputes and their implications for the rules of the international law of the sea China's Law of the Sea is the first comprehensive study of the law and geopolitics of China's maritime disputes. It provides a rigorous empirical account of whether and how China is changing "the rules" of international order—specifically, the international law of the sea. Conflicts over specific rules lie at the heart of the disputes, which are about much more than sovereignty over islands and rocks in the South and East China Seas. Instead, the main contests concern the strategic maritime space associated with those islands. To consolidate control over this vital maritime space, China's leaders have begun to implement "China's law of the sea": building domestic legal institutions, bureaucratic organizations, and a naval and maritime law enforcement apparatus to establish China's preferred maritime rules on the water and in the diplomatic arena. Isaac B. Kardon examines China's laws and policies to defend, exploit, study, administer, surveil, and patrol disputed waters. He also considers other claimants' reactions to these Chinese practices, because other states must acquiesce for China's preferences to become international rules. China's maritime disputes offer unique insights into the nature and scope of China's challenge to international order.

China's Law of the Sea

Health Disparities, Disasters, and Crises: Approaches for a Culture of Preparedness presents a roadmap to help guide the actions needed to address health disparities introduced as part of the pre-planning, planning, and mitigation phases of natural and technological disasters. With contributions from 30 scholars in disaster management in public health, this text explores how the intersectionality of health disparities of different socioeconomic and racial/ethnic groups and how social determinants help shape exposure, and vulnerability to pandemic disasters and crises. Supported by examples from across the world, chapters are supplemented with case studies of best practices, graphs, and tables. Each of the seven parts address different topics, including how disasters affect the poor, medically underserved, and racial/ethnic groups, the impact of health disparities, and the growing link between global health, disaster planning/mitigation, and global security. Written for the benefit of undergraduate and graduate students, working professionals, and academics in the US and abroad, Health Disparities, Disasters, and Crises: Approaches for a Culture of Preparedness provides the best overall understanding of professional disaster management and safety for all citizens. It is also an ideal text for graduate and undergraduate courses in public health, public policy, medicine and nursing, healthcare administration, emergency management, emergency preparedness, homeland security, epidemiology, sociology, and medical sociology.

Health Disparities, Disasters, and Crises

This Handbook draws together leading and emerging scholars to provide a comprehensive critical analysis of international refugee law. This book provides an account as well as a critique of the status quo, setting the agenda for future research in the field.

Rule of law in the governance of new frontiers of the marine environment

Asian populations are among some of the fastest growing cultural groups in the US. This book is a comprehensive guide to serving library users from 24 specific Asian countries. It begins with a broad overview of how libraries can better serve Asian communities and then devotes a chapter to each country, providing wealth of valuable resources.

The Oxford Handbook of International Refugee Law

"Southeast Asian Affairs, first published in 1974, continues today to be required reading for not only scholars but the general public interested in in-depth analysis of critical cultural, economic and political issues in Southeast Asia. In this annual review of the region, renowned academics provide comprehensive and stimulating commentary that furthers understanding of not only the region's dynamism but also of its tensions and conflicts. It is a must read." – Suchit Bunbongkarn, Emeritus Professor, Chulalongkorn University "Now in its forty-sixth edition, Southeast Asian Affairs offers an indispensable guide to this fascinating region. Lively, analytical, authoritative, and accessible, there is nothing comparable in quality or range to this series. It is a must read for academics, government officials, the business community, the media, and anybody with an interest in contemporary Southeast Asia. Drawing on its unparalleled network of researchers and commentators, ISEAS is to be congratulated for producing this major contribution to our understanding of this diverse and fast-changing region, to a consistently high standard and in a timely manner." – Hal Hill, H.W. Arndt Professor of Southeast Asian Economies, Australian National University

Countries and Territories of the World

Heightened tensions in the South China Sea have raised serious concerns about the dangers of conflict in this region as a result of unresolved, complex territorial disputes. This volume offers detailed insights into a range of country-perspectives, addressing the historical, legal, structural, regional and multilateral dimensions of these disputes

"In July 2012, the Green Infrastructure Finance Framework Report was published to address the constraints in financing green infrastructure and to develop a new PPP-based approach to accelerate investments in low emission technologies. The approach calls for assessing the "Green Investment Climate" of a given country in order to develop country-specific recommendations for policy and incentive programs as well as other measures which can be introduced in order to further promote green growth in an economy. This report includes one of the first Green Investment Country Profiles completed for the East Asia and Pacific Region as part of bringing the approach closer to operational status. The initial countries include China, Philippines, Vietnam, Malaysia, Indonesia, Singapore and South Korea. The assessment involves not only the green policy and incentives environment, but also the country's overall natural resource endowment of fossil and renewable energy, its industrial development strategy in addition to general business indicators and other considerations, such as electricity prices, the capacity of the financial sector to mobilize long-term domestic financing, as well as their overall regulatory and legal capacity to implement PPPs. The country profiles provide a general understanding of the attractiveness, prevailing trends, strengths, and other aspects affecting the ability of the country to leverage its green growth potential."

Southeast Asian Affairs 2019

South China Sea Lawfare: Legal Perspectives and International Responses to the Philippines v. China Arbitration Case is the first of two reports published by the South China Sea Think Tank. Published shortly after the tribunal issued its first award in the Philippines v. China arbitration case, the report is the result of a collaborative effort by an international team of authors and incorporates the diverse perspectives of claimants and non-claimant stakeholders in the South China Sea maritime territorial disputes.

Territorial Disputes in the South China Sea

"The first documented moves to claim and administer some of these far-flung islands took place during the early nineteenth century. The Spanish, as the colonial power in the Philippines, undertook occasional surveys of Scarborough Shoal from 1800 onward. Spain never made a formal declaration of sovereignty over the feature but included it on some maps as part of the Philippine archipelago. Emperor Gia Long, who founded the Nguyen Dynasty in Vietnam, declared sovereignty over the Paracel Islands in 1816. Prior to that, Vietnamese authorities had been officially sanctioning salvage operations in the islands for several decades. Vietnam continued to make occasional use of the islands during the 1830s and 1840s, after which official interest lapsed. In 1843, Captain Richard Spratly aboard the British whaler *Cyrus* claimed to be the first to discover the island that bears his name. Eventually the entire island group would come to be known as the Spratlys. The British East India Company had been conducting surveys of the islands from the late eighteenth century and in 1868, the British

Admiralty compiled the results of those efforts into a new nautical chart of the South China Sea. That map displayed nine distinct islands and reefs in the western portion of the grouping, including Spratly Island itself. In the east, it showed a largely empty expanse of water dotted with reefs whose existence could not be confirmed. The chart labeled this area "Dangerous Ground," a nickname it still bears. The map was revised in 1881 and reproduced by nearly every country with an interest in the South China Sea, including the United States. It would remain the standard chart of the area until the 1950s. No government showed much interest in the islands themselves until 1877 when the British colonial authorities in Labuan, North Borneo registered a claim to Spratly Island and Amboyna Cay on behalf of London. Those two features were listed as possessions by the British Colonial Office from 1891 to 1933, though the British never vigorously pursued the claim. Despite later revisionism, Qing Dynasty documents and actions show that Chinese officials considered Hainan Island to be the southernmost limit of their authority. There is no record of any Chinese objections to Gia Long's annexation of the Paracels or subsequent Vietnamese activity there. When German and Japanese ships carrying insured British copper wrecked on the islands in 1895 and 1896, Chinese authorities foreswore any responsibility for them. Chinese fishers had salvaged the wrecks, prompting the insurance company to demand compensation from those responsible. This was transmitted through the United Kingdom's embassy in Beijing and its consul in Hoihow (modern Haikou). In response, Chinese officials in Liangguang-supervising Guangxi and Guangdong provinces, including Hainan-insisted the islands were unclaimed as far as they were concerned"--

Green Investment Climate Country Profile – Philippines

This book presents various forms of human trafficking, a growing trend in the exploitation of large numbers of people with concurrent public health, socio-cultural, and economic costs to countries burdened with the consequences of the COVID-19 pandemic. Edited by psychiatric-mental health nurses and an applied anthropologist, this volume covers all forms of human trafficking: sex trafficking, forced labor, forced marriage, baby trafficking, organ trafficking, child marriage, and child soldiers with a global public health and policy focus. As such, it fills a gap in human trafficking knowledge and is built on courses springing up around the United States in multiple disciplines. Medical, mental health, and social work interventions are included as well as information about programs with documented outcomes. Each chapter includes state of the art of knowledge with case studies illustrating specific focal ideas, discussion, questions and exercises in order to help readers retain and reinforce chapter material. This textbook will be useful in the disciplines of nursing, medicine, public health, social work, and policy making, as well as in disciplines in which human trafficking is a current interest, such as law, criminal justice, and education.

South China Sea Lawfare

Although the history of organ transplant has its roots in ancient Christian mythology, it is only in the past fifty years that body parts from a dead person have successfully been procured and transplanted into a living person. After fourteen years, the three main issues that Robert Veatch first outlined in his seminal study *Transplantation Ethics* still remain: deciding when human beings are dead; deciding when it is ethical to procure organs; and deciding how to allocate organs, once procured. However, much has changed. Enormous strides have been made in immunosuppression. Alternatives to the donation model are debated much more openly—living donors are used more widely and hand and face transplants have become more common, raising issues of personal identity. In this second edition of *Transplantation Ethics*, coauthored by Lainie Friedman Ross, transplant professionals and advocates will find a comprehensive update of this critical work on transplantation policies.

On Dangerous Ground

Mary Kristerie A. Baleva's groundbreaking *Regaining Paradise Lost: Indigenous Land Rights and Tourism* uses the UN Guiding Principles on Business and Human Rights as its overarching legal framework to present the intersections of indigenous land rights and the tourism industry.

Human Trafficking: A Global Health Emergency

The study of Asia and its plural legal systems is of increasing significance, both within and outside Asia. Lawyers, whether in Australia, America or Europe, or working within an Asian jurisdiction, require a sound knowledge of how the law operates across this fast-growing and diverse region. *Law and Legal Institutions of Asia* is the first book to offer a comprehensive assessment of eleven key jurisdictions in

Asia - China, Hong Kong, Taiwan, Japan, Korea, Vietnam, Malaysia, Indonesia, Brunei Darussalam, Singapore and the Philippines. Written by academics and practitioners with particular expertise in their state or territory, each chapter uses a breakthrough approach, facilitating cross-jurisdictional comparisons and giving essential insights into how law functions in different ways across the region and in each of the individual jurisdictions.

Transplantation Ethics, Second Edition

Rock Solid: How the Philippines Won Its Maritime Case Against China presents a comprehensive account of the epic legal success of the Philippines' territorial claim over that of China. The arbitral ruling is paramount to the protection of Philippine sovereignty and territorial integrity. Readers will appreciate the unpacking of the complex nature of Philippine national interest, stretching from fishery and natural resources to security concerns and territorial integrity of the nation.

Regaining Paradise Lost: Indigenous Land Rights and Tourism

Hawksley and Georgeou bring together scholars and practitioners from across the region to analyse the main effects of the first two years of the COVID pandemic in a range of case studies from Southeast Asia, East Asia, South Asia, and Oceania. The book provides a broad survey of how Indonesia, Bangladesh, Japan, the Philippines, Vietnam, Nepal, Australia, Cambodia, Taiwan, and New Zealand attempted to manage the COVID pandemic; the challenges they faced; and how they fared. Drawing on insights from politics, economics, sociology, law, public health, education, and geography, most authors are nationals of the cases they discuss. Written in non-specialist language, ten case studies are examined, providing a useful analysis of the first two years of COVID in the Asia-Pacific from the emergence of COVID in January 2020 to the lifting of restrictions in December 2021. Chapters focus on different issues according to the scholar's academic expertise, and a wide diversity of national pandemic experiences, challenges, and responses are showcased. An essential read for scholars and students interested in the areas of Asia-Pacific politics, sociology, and public health.

Philippine Journal of Public Administration

The "ASEAN Way" is based on the principle of consensus; any individual member state effectively has a veto over any proposal with which it disagrees. **Dividing ASEAN and Conquering the South China Sea** analyzes how China uses its influence to divide ASEAN countries in order to prevent them from acting collectively to resolve their territorial disputes with China in the South China Sea. Using comparative case studies of China's relations with Cambodia, the Philippines, and Myanmar, O'Neill argues that the regime type in the country with which China is interacting plays an important role in enhancing or constraining China's ability to influence the governments of developing states within ASEAN and globally. Authoritarian institutions facilitate Chinese influence while democratic institutions inhibit that influence. O'Neill argues that as long as ASEAN includes developing, authoritarian regimes, and given that the United States and other global powers are unlikely to risk any serious conflict over each push of China's maritime boundaries, little by little, China will assert its sovereignty over the South China Sea. Nevertheless, noting the long-term, global trend of states democratizing, he contends that if China chooses to engage in more sophisticated bilateral politics, such as providing incentives to a broader range of interest groups in democratic states, then China will have more success in projecting its power globally. "Professor O'Neill's well-crafted and theoretically sound assessment of China successfully dividing ASEAN in pursuit of claims in the South China Sea also shows important variations in China's regional influence dependent notably on the degree of authoritarianism and democracy in Southeast Asian governments."—Robert Sutter, professor of practice of international affairs, George Washington University "There are plenty of books looking at various aspects of the South China Sea issue, but I am not aware of any that duplicates the approach of this book. It is a useful addition to our understanding, both of the specific issue and of the broader theoretical implications which it raises."—Richard Rigby, professor and executive director, China Institute, the Australian National University
