Jeffrey Gundlach's Macro and Market Update in "Cave People" Webcast - Jeffrey Gundlach's Macro and Market Update in "Cave People" Webcast by DoubleLine Capital 11,956 views 1 day ago 45 minutes - In his webcast titled "Cave People" in reference to the philosopher Plato's "Allegory of the Cave," DoubleLine CEO Jeffrey ...

In his webcast titled "Cave People" in reference to the philosopher Plato's "Allegory of the Cave," DoubleLine CEO Jeffrey Gundlach on March 12, 2023, briefly reprises his outlook on the federal debt spiral before reviewing other macroeconomic and market topics, including recessionary "storm clouds." Notably, while the government's establishment survey has resilient nonfarm payrolls, Mr. Gundlach marshals evidence showing "the rubric that there's this booming employment economy is contradicted by other areas." Among subjects addressed in the webcast, Mr. Gundlach covers Federal deficit and national debt spiral

Massive COVID-19-era monetary stimulus as explanation for the absence (to date) of recession

Protracted inversion of the U.S. Treasury yield curve

Weakening consumer confidence

U-3 unemployment rate exceeding 12-month moving average and nearing 36-month MA

Questionable veracity of once-trustworthy economic statistics due to plunging survey response rates

Recessionary divergence between cyclical and noncyclical employment

Deteriorating hiring plans at small businesses

Falling average weekly hours worked in manufacturing. "First they cut the hours, and then they cut the bodies."

Signs of stress among consumers, growing usage of credit cards and a 600-basis point rise to a "punishing" 23% in the average interest rate on credit card debt as forerunners of a future pullback in consumer spending

Inflation as gauged by headline and core CPI

Housing component of CPI versus the Zillow Rent Index and prospects of lower rents due to a construction boom in multifamily housing

Inflation as gauged by headline and core PCE

Inflation as gauged by export and import prices

Commodity prices signaling weak global growth

... narrow **credit**, spreads in high yield **corporate**, bonds ...

Year-to-date performance of the **credit**, sectors of fixed ...

Still-wide spreads on Agency mortgage-backed securities amid discount prices on these securities

AAA spreads compared across non-Agency commercial mortgage-backed securities (CMBS), collateralized loan obligations and corporate bonds

Attractive CMBS versus corporate bonds across AAA, A and BBB cohorts, with warnings against index investing in CMBS

Emerging markets fixed income, which with the Federal Reserve's Nov. 1, 2023, pivot "finally joined the risk asset party," although Mr. Gundlach is awaiting a weaker dollar to support the sector

### Corporate and Commercial Credit

A refreshing insight into the analysis of Corporate and Commercial Credit and the management of the portfolio.

### Bartlett's Guide to Commercial Banking and Corporate Finance

Endorsed by the Chartered Banker Institute as core reading for one of the modules leading to the Institute's professional qualifications and chartered status, *Commercial Lending* supports readers that wish to develop their ability to analyze the creditworthiness of a customer and their business in the context of the current economic climate, future market and sector expectations. *Commercial Lending* uses a series of practical exercises and case studies, and provides the tools needed for the reader to understand and appraise a customer's business strategy. This will then enable the reader to provide appropriate funding solutions to meet the commercial needs of customers while reflecting the bank's risk appetite. These tools include: how to assess the performance and creditworthiness of a business; how to critically evaluate the robustness of cash flow; and how to undertake sensitivity analysis to quantify sustainable debt repayment capacity. This practical text will present a critical analysis of financial and non-financial information to help readers identify key risks inherent in the customer's lending proposition. Readers will go on to propose suitable funding solutions that mitigate risk and meet the needs of customer and bank. Online supporting resources include a glossary and updates to regulation.

### The Modern Credit Company

First Published in 1999. Routledge is an imprint of Taylor & Francis, an informa company.

### Commercial Lending

This book is an accessible introduction to the solicitor's role in two particular forms of business finance: commercial loan facilities and capital markets finance. It is divided into three parts. Part I concentrates on the fundamentals of drafting loan facility documentation. Part II explains the legal principles of secured lending and Part III introduces capital markets financing including the issuing of Eurobonds. A comprehensive glossary helps the reader understand the terminology involved.

### American Commercial Banks in Corporate Finance, 1929-1941

Banking experts review, simplify corporate lending process. James S. Sagner and Herbert Jacobs advise on corporate lending to help bankers, lenders and corporate finance managers avoid future credit problems in *Handbook of Corporate Lending: A Guide for Bankers and Financial Managers*. The

authors argue for a fresh approach to improving bank lending to corporations. Historically, most banks spend their efforts in evaluating loan proposals from businesses before approving or denying credit. The authors argue persuasively and with examples that lending is a two-step process: the analysis of the company in the context of its industry and its competitors; and then a loan agreement that identifies the credit risks. The book demonstrates through the use of case studies how to limit those risks to the lenders and just as importantly, to the company. Sagner and Jacobs, former senior bankers and consultants and educators to the banking industry, systematically review the process of corporate credit decision-making. Too few banks are now providing adequate formal credit-training. This leaves bankers without the proper guidance to review credit requests and create precautions for corporate borrowers and lenders. Sagner and Jacobs show readers how such factors influence credit, funding, pricing decisions and proper structuring of loans. The book covers such topics as trends in commercial loan activity, the credit loan agreement, the banker's responsibilities, risk management measurement and the credit process. Eight cases in the book highlight a variety of credit issues. "The book is written from the perspective of the banker or other lender who makes these important decisions," said Sagner. "But business people, particularly global financial managers who must secure credit and maintain excellent relations with their lenders, need to understand this important information." Sagner and Jacobs help readers navigate the issues confronting financial and banking managers. The book aims to explain the financial processes lenders use to make decisions, and to analyze the strengths and weaknesses of credit measurements so that business and financial managers are better prepared to arrange credit facilities.

#### The Story of Commercial Credit Company, 1912-1945

Here is a chapter from *The Essentials of Risk Management*, a practical, non-ivory tower approach that is necessary to effectively implement a superior risk management program. Written by three of the leading figures with extensive practical and theoretical experience in the global risk management and corporate governance arena, this straightforward guidebook features such topics as governance, compliance and risk management; how to implement integrated risk management; measuring, managing and hedging market, and more.

#### Consumer and Commercial Credit Management

*Advanced Credit Analysis* has been written to assist the reader in both evaluating and correctly identifying the risks inherent in any commercial lending proposal. It gives a practical framework for reviewing both internal and external risk factors to corporate credit.

#### Corporate Finance

In many companies credit management is a passive and reactive discipline. This results in significant receivables assets weighing heavily on balance sheets, dragging down cash flow and inhibiting growth. The power of credit is shackled, muted. Release the power and passion of credit management in your company. Proactively squeeze every morsel of value out of receivables and simultaneously, protect your company from the bad debt danger that lurks in the value chain. Harness the power of credit to effectively manage your company's receivables. Immediately make a positive difference in your company, and use this book as a resource for years to come. Reading *Global Credit Management* will help you wake the sleeping giant on your balance sheet make receivables earn their keep, just like every other asset. wrest control of credit from bureaucratic processes, grab it by the throat and wring out every drop of value. And last but by no means least, boost the value of your company. "...one of the most intelligent and refreshing exposés of the present and future role of international credit management that I have read in a long time. *Global Credit Management* represents a very welcome and innovative addition to the small library of quality publications available on international credit and risk management." —Tim Lane, Director of European Operations, Finance, Credit and International Business (FCIB)

#### Handbook of Corporate Lending: A Guide for Bankers and Financial Managers Revised

Corporate finance comes in many shapes and forms. You can use it to unlock capital to grow your business, buy commercial property, purchase high-value business assets, or simply to access cash to overcome short-term liquidity challenges. Enness Global specialise in small and mid-cap companies that are looking to raise between £5–100m. Depending on the size of your firm and the type of business you run, various options will be available to you. Corporate finance is a broad term that encompasses

everything from stock finance, commercial property finance, bridging finance, VAT finance, invoice finance all the way through to working capital finance, trade finance and entrepreneur finance. Although there are many financing mediums, accessing such finance solutions can be challenging, especially if you have an unusual scenario, a business that is considered “niche” in some way, or if you want to borrow a significant amount. A broker like Enness will be instrumental in helping you go straight to the source of the best corporate finance and present your case in a compelling way to lenders.

### The role of factoring in modern business finance

A practical guide to the practices and procedures of effectively managing banking risks Managing Risks in Commercial and Retail Banking takes an in-depth, logical look at dealing with all aspects of risk management within the banking sector. It presents complex processes in a simplified way by providing real-life situations and examples. The book examines all dimensions of the risks that banks face—both the financial risks—credit, market, and operational—and the non-financial risks—money laundering, information technology, business strategy, legal, and reputational. Focusing on methods and models for identifying, measuring, monitoring, and controlling risks, it provides practical advice backed up by solid theories, without resorting to the use of complicated mathematical and statistical formulas. Author Amalendu Ghosh exposes topics that are usually absent in books on managing banking risk—such as design of control framework, risk management architecture, credit risk rating, risk-based loan pricing, portfolio analysis, business continuity planning, and corporate governance. Author has extensive experience with a variety of major banks and institutions worldwide and brings a fresh perspective in the wake of the global finance crisis Presents a novel approach using models of the credit risk rating of different types of borrowers, the methodology for assigning weights for deriving the rating, and the scoring process Covers the essentials of corporate governance and options for credit risk assessment in line with the recommendations made in the New Basel Capital Accord Explains the methodology of risk-based internal audit, including techniques to enable bank branches to switch over from the old transaction-based audit methods With its logical sequence of the aspects of risk management, the book's layout is ideal for presentations, making it a handy tool for risk management training

### Accounts Receivable Financing as a Method of Business Finance

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

### Advanced Credit Analysis

The essential resource for navigating the growing direct loan market *Private Debt: Opportunities in Corporate Direct Lending* provides investors with a single, comprehensive resource for understanding this asset class amidst an environment of tremendous growth. Traditionally a niche asset class pre-crisis, corporate direct lending has become an increasingly important allocation for institutional investors—assets managed by Business Development Company structures, which represent 25% of the asset class, have experienced over 600% growth since 2008 to become a \$91 billion market. Middle market direct lending has traditionally been relegated to commercial banks, but onerous Dodd-Frank regulation has opened the opportunity for private asset managers to replace banks as corporate lenders; as direct loans have thus far escaped the low rates that decimate yield, this asset class has become an increasingly attractive option for institutional and retail investors. This book dissects direct loans as a class, providing the critical background information needed in order to work effectively with these assets. Understand direct lending as an asset class, and the different types of loans available. Examine the opportunities, potential risks, and historical yield. Delve into various loan investment vehicles, including the Business Development Company structure. Learn how to structure a direct loan portfolio, and where it fits within your total portfolio. The rapid rise of direct lending left a knowledge gap surrounding these nontraditional assets, leaving many investors ill-equipped to take full advantage of ever-increasing growth. This book provides a uniquely comprehensive guide to corporate direct lending, acting as both crash course and desk reference to facilitate smart investment decision making.

### Global Credit Management

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. ### Corporate Finance Guide

An up-to-date, accurate framework for credit analysis and decision making, from the experts at Standard & Poor's "In a world of increasing financial complexity and shorter time frames in which to assess the wealth or dearth of information, this book provides an invaluable and easily accessible guide of critical building blocks of credit analysis to all credit professionals." --Apea Koranteng, Global Head, Structured Capital Markets, ABN AMRO "The authors do a fine job of combining latest credit risk management theory and techniques with real-life examples and practical application. Whether a seasoned credit expert or a new student of credit, this is a must read book . . . a critical part of anyone's risk management library." --Mark T. Williams, Boston University, Finance and Economics Department "At a time when credit risk is managed in a way more and more akin to market risk, *Fundamentals of Corporate Credit Analysis* provides well-needed support, not only for credit analysts but also for practitioners, portfolio managers, CDO originators, and others who need to keep track of

the creditworthiness of their fixed-income investments." --Alain Canac, Chief Risk Officer, CDC IXIS

Fundamentals of Corporate Credit Analysis provides professionals with the knowledge they need to systematically determine the operating and financial strength of a specific borrower, understand credit risks inherent in a wide range of corporate debt instruments, and then rank the default risk of that borrower. Focusing on fundamental credit risk, cash flow modeling, debt structure analysis, and other important issues, and including separate chapters on country risks, industry risks, business risks, financial risks, and management, it guides the reader through every step of traditional fundamental credit analysis. In a dynamic corporate environment, credit analysts cannot rely solely on financial statistical analysis, credit prediction models, or bond and stock price movements. Instead, a corporate credit analysis must supply loan providers and investors with more information and detail than ever before. On top of its traditional objective of assessing a firm's capacity and willingness to pay its financial obligations in a timely manner, a worthy credit analysis is now expected to assess recovery prospects of specific financial obligations should a firm become insolvent. Fundamentals of Corporate Credit Analysis provides practitioners with the knowledge and tools they need to address these changing requirements. Drawing on the unmatched global resources and capabilities of Standard & Poor's, this valuable book organizes its guidelines into three distinct components: Part I: Corporate Credit Risk helps analysts identify all the essential risks related to a particular firm, and measure the firm through both a financial forecast and benchmarking with peers Part II: Credit Risk of Debt Instruments explains the impact of debt instruments and debt structures on a firm's recovery prospects should it become insolvent Part III: Measuring Credit Risk presents a scoring system to assess the capacity and willingness of a firm to repay its debt in a timely fashion and to evaluate recovery prospects in the event of financial distress In addition, a fourth component--Cases in Credit Analysis--examines seven real-life studies to provide examples of the book's theory and procedures in practice. Senior Standard & Poor's analysts explore diverse cases ranging from North and South America to Europe and the Pacific Rim, on topics covering mergers (AT&T-Comcast, MGM-Mirage, Kellogg-Keebler), foreign ownership in a merger (Air New Zealand-Ansett-Singapore Airlines), sovereign issues (Repsol-YPF), peer comparisons (U.S. forestry), and recovery analysis (Yell LBO). Industry "Keys to Success" are identified and analyzed in each case, along with an explanation on how to interpret performance and come to a credit decision. While it is still true that ultimate credit decisions are highly subjective in nature, methodologies and thought processes can be repeatable from case to case. Fundamentals of Corporate Credit Analysis provides analysts with the knowledge and tools they need to systematically analyze a company, identify and analyze the most important factors in determining its creditworthiness, and ensure that more "science" than "art" is used in making the final credit decision.

### International Lending by Commercial Banks

This book is a research monograph addressed to a wide range of academics interested in corporate short-term capital. The study shows the role of trade credit in the functioning of economic entities. It constitutes a comprehensive source of knowledge about the role of trade credit in the development of enterprises, as well as the impact of this form of finance on the development of economies. Apart from an extensive review of the theoretical aspects of the role of trade credit in the economy, the study discusses the importance of factors influencing trade credit behaviour. Trade credit, despite its versatility, has not yet been fully described, particularly with regard to the specificity of domestic markets. This study aggregates and supplements the existing sources. The monograph is of an international character, as it covers a substantial group of European countries. Therefore, it is likely to have international appeal. The findings may be of interest to those involved in finance management. Understanding the differences in receivables management resulting from the country specificity can contribute to a better understanding of business finance and its operational functions. This knowledge may support the effective management of receivables and liabilities, especially in companies operating on the global market.

### Mcmaster's Commercial Cases For The Banker, Treasurer And Credit Man: Current Business Law From The Decisions Of The Highest Courts Of The Several Sta

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. ### The Mechanism Of Commercial Credit

Arnold Ziegel formed Mountain Mentors Associates after his retirement from a corporate banking career of more than 30 years at Citibank. The lessons learned from his experience in dealing with entrepreneurs, multinational corporations, highly leveraged companies, financial institutions, and structured finance, led to the development and delivery of numerous senior level credit risk training programs for major global financial institutions from 2002 through the present. This book was conceived and written as a result of the development of these courses and his experience as a corporate banker. It illustrates the fundamental issues of credit and credit analysis in a manner that tries to take away its mystery. The overriding theme of this book is that when an investor extends credit of any type, the goal is "to get your money back\

### The Mechanism of Commercial Credit, Terms of Sale and Trade Acceptances

Understanding how corporate bond market disruptions are transmitted to the rest of the financial system is essential to gauge systemic financial risk and design policy responses. In this study, we extend the vector autoregression model of Gilchrist and Zakrajšek (2012) to explicitly account for the role of commercial banks in the transmission of corporate bond credit spread shocks. We find that corporate bond market shocks can reduce commercial bank lending activity by tightening loan supply. Policies designed to contain stress in the corporate bond market can thus mitigate systemic risk by limiting contagion to the commercial banking sector.

### Managing Risks in Commercial and Retail Banking

First Published in 2016. Routledge is an imprint of Taylor & Francis, an Informa company.

### The Mechanism of Commercial Credit

This book is a sequel to the author's earlier Thinking About Credit (also published by Macmillan). Once again, he applies his undoubted experience to a number of topics in the area of credit evaluation and management.

### Private Debt

This publication describes how state-owned enterprises (SOEs) can access finance on commercial terms, without sovereign guarantees. Doing so can create fiscal space for governments and new sources of finance for needed investment. Under Strategy 2030, the Asian Development Bank is committed to SOE reform that supports access to commercial finance in its developing member countries. The publication confirms the rise of commercial finance for SOEs and details steps to enhance the bankability of SOEs. This includes practical guidance on how to improve governance and increase financial viability. The publication also explains how the risks of such borrowing, including defaults and moral hazards created by implicit guarantees, can be managed.

### The Impact of Economic Recovery Efforts on Corporate and Commercial Real Estate Lending

This book focuses on the credit environment in today's financial world. Whether the reader is a practicing bank lender or involved in corporate finance, this book demonstrates how various factors influence credit, funding, pricing decisions and proper structuring of loan agreements. An understanding is developed of the most important issues confronting financial and banking managers today, with the discussion of the financial processes used to formulate decisions and analyze the strengths and weaknesses of credit metrics. Eight cases are discussed to illustrate aspects of the corporate credit decision.

### The Mechanism of Commercial Credit

Innovative textbook that examines core principles of commercial law and the social and political context in which they develop.

### Standard & Poor's Fundamentals of Corporate Credit Analysis

With the help of Hillman, you'll conduct effective due diligence on prospective borrowers; use loan closing checklists that ensure every key step is taken to get solid deals done; obtain comprehensive hazard insurance that shields lenders, and draft agreements that protect lenders from environmental risks, resolve conflicts with creditors, and allow lenders to capitalize on lucrative financing opportunities.

### The Economics of Corporate Trade Credit in Europe

Working Capital Management provides a general framework that will help managers understand working capital using a comprehensive approach that links operating decisions to their financial implications and to the overall business strategy. It will also help managers to gain a better understanding of the key drivers to profitability and value creation.

### MECHANISM OF COMMERCIAL CREDIT

The importance of managing credit and credit risks carefully and appropriately cannot be overestimated. The very success or failure of a bank and the banking industry in general may well depend on how credit risk is handled. Banking professionals must be fully versed in the risks associated with credit operations and how to manage those risks. This up-to-date volume is an invaluable reference and study tool that delves deep into issues associated with credit risk management. Credit Risk Management from the Hong Kong Institute of Bankers (HKIB) discusses the various ways through which banks manage risks. Essential for candidates studying for the HKIB Associateship Examination, it can also help those who want to acquire a deeper understanding of how and why banks make decisions and set up processes that lower their risk. Topics covered in this book include: Active credit portfolio management Risk management, pricing, and capital adequacy Capital requirements for banks Approaches to credit risk management Structural models and probability of default Techniques to determine loss given default Derivatives and structured products
