A History of Political Economy

One of M. Frederic Bastiat's most influential essays, *That Which Is Seen and That Which is Not Seen* details the way in which economic truths are gained - by looking at the whole picture. Bastiat shows that the things overlooked or "not seen" are often the less desirable sides of the issues, and that it is these things which should be examined the most when making laws or economic decisions. This book holds particular weight in our current state of affairs, and should be especially examined for its uncovering of wasteful government spending practices.

That Which Is Seen and That Which Is Not Seen

Marshalling facts and the latest research findings, the author systematically refutes the adversaries of globalization, markets, and progress. This book will change the debate on globalization in this country and make believers of skeptics.

In Defense of Global Capitalism

The "forgotten" second volume of *Capital*, Marx's world-shaking analysis of economics, politics, and history, contains the vital discussion of commodity, the cornerstone to Marx's theories.

Essays on Political Economy

The bestselling citizen's guide to economics *Basic Economics* is a citizen's guide to economics, written for those who want to understand how the economy works but have no interest in jargon or equations. Bestselling economist Thomas Sowell explains the general principles underlying different economic systems: capitalist, socialist, feudal, and so on. In readable language, he shows how to critique economic policies in terms of the incentives they create, rather than the goals they proclaim. With clear explanations of the entire field, from rent control and the rise and fall of businesses to the international balance of payments, this is the first book for anyone who wishes to understand how the economy functions. This fifth edition includes a new chapter explaining the reasons for large differences of wealth and income between nations. Drawing on lively examples from around the world and from centuries of history, Sowell explains basic economic principles for the general public in plain English.

Basic Economics

Providing perspectives from a range of experts, including international lawyers, political scientists, and practitioners, this book assesses current theory and practice of economic sanctions, discussing current legal and political challenges faced by the international community. It examines both the implementation of sanctions by major powers – the United States, the European Union, and Japan – as well as assessing the impact of those sanctions through case studies of Russia, Iran, Syria, and North Korea. Balancing theoretical analysis of legal considerations with national and regional level empirical analysis, it also includes coverage of sanctions issues by the UN Security Council and the EU, as well as the extraterritorial application of sanctions. A valuable reference for academics and practitioners, *Economic Sanctions in International Law and Practice* will be useful to those working in the fields of international law, diplomacy, and international political economy.

Capital

This book is the first to document the reform of the EU's Common Agricultural Policy (CAP) and to analyse the political and economic factors which determined the outcome of the negotiations. The policy (non-)reform will affect the world's global food security and agricultural ...

Economic Sanctions in International Law and Practice

This open access book builds on the European Union's (EU) Horizon 2020 project 'Financial and Institutional Reforms for an Entrepreneurial Society' (FIRES). The authors outline how Europe can move towards more inclusive, innovative and sustainable growth through reforms that will rekindle its entrepreneurial spirit. Based on decades of research and countless discussions with stakeholders, the book also features the FIRES project's full list of policy interventions and institutional reforms that can help policymakers make that agenda a reality.

The Political Economy of the 2014-2020 Common Agricultural Policy

The history of nations is a history of haves and have-nots, and as we approach the millennium, the gap between rich and poor countries is widening. In this engrossing and important new work, eminent historian David Landes explores the complex, fascinating and often startling causes of the wealth and poverty of nations. The answers are found not only in the large forces at work in economies: geography, religion, the broad swings of politics, but also in the small surprising details. In Europe, the invention of spectacles doubled the working life of skilled craftsmen, and played a prominent role in the creation of articulated machines, and in China, the failure to adopt the clock fundamentally hindered economic development. The relief of poverty is vital to the survival of us all. As David Landes brilliantly shows, the key to future success lies in understanding the lessons the past has to teach us - lessons uniquely imparted in this groundbreaking and vital book which exemplifies narrative history at its best.

The New Institutional Economics

This book develops an approach to international political economy that focuses on culture. It examines Chilean communication scholarship as it developed under shifting political regimes and changing international political economic relations. Also examined is the importance of agency and culture in the political processes of building and challenging transnational hegemony, emphasizing the role of intellectuals.

The Entrepreneurial Society

A unique analysis of strategy in organizations that shows how successful strategies may result without planning or design.

Pure Economics

Despite the liberalized reconfiguration of civil society and political practice in nineteenth-century Europe, the right to make foreign policy, devise alliances, wage war and negotiate peace remained essentially an executive prerogative. Citizen challenges to the exercise of this power grew slowly. Drawn

from the educated middle classes, peace activists maintained that Europe was a single culture despite national animosities; that Europe needed rational inter-state relationships to avoid catastrophe; and that internationalism was the logical outgrowth of the nation-state, not its subversion. In this book, Cooper explores the arguments of these "patriotic pacifists" with emphasis on the remarkable international peace movement that grew between 1889 and 1914. While the first World War revealed the limitations and dilemmas of patriotic pacifism, the shape, if not substance, of many twentieth-century international institutions was prefigured in nineteenth-century continental pacifism.

Wealth And Poverty Of Nations

This collection explores the concept of *patrimoine*, a French word used to denote cultural heritage, traditional customs and practices, and the extent to which it impacts France and Ireland. The contributors unearth manifestations of how *patrimoine* resonates across cultural divides and bestows uniqueness on countries/societies.

International Political Economy and Mass Communication in Chile

Political Economy before Karl Marx. The links between major modern trends and past economic ideas of Boisguillebert, Petty, Turgat, Smith, Ricardo, and many others is traced in a scholarly yet popular style.

Strategy Without Design

A Short History of Man: Progress and Decline represents nothing less than a sweeping revisionist history of mankind, in a concise and readable volume. Dr. Hans-Hermann Hoppe skillfully weaves history, sociology, ethics, and Misesian praxeology to present an alternative — and highly challenging — view of human economic development over the ages. As always, Dr. Hoppe addresses the fundamental questions as only he can. How do family and social bonds develop? Why is the concept of private property so vitally important to human flourishing? What made the leap from a Malthusian subsistence society to an industrial society possible? How did we devolve from aristocracy to monarchy to social democratic welfare states? And how did modern central governments become the all-powerful rulers over nearly every aspect of our lives? Dr. Hoppe examines and answers all of these often thorny questions without resorting to platitudes or bowdlerized history. This is Hoppe at his best: calmly and methodically skewering sacred cows.

Patriotic Pacifism

Citizens across the country are fed up with the politicians in Washington telling us how to live our lives—and then sticking us with the bill. But what can we do? Actually, we can just say “no.” As New York Times bestselling author Thomas E. Woods, Jr., explains, “nullification” allows states to reject unconstitutional federal laws. For many tea partiers nationwide, nullification is rapidly becoming the only way to stop an over-reaching government drunk on power. From privacy to national healthcare, Woods shows how this growing and popular movement is sweeping across America and empowering states to take action against Obama’s socialist policies and big-government agenda.

Books In Print 2004-2005

Asia’s rapid economic growth has led to a significant reduction in extreme poverty, but accompanied by rising inequality. This book deals with three questions: What have been the trends of inequality in Asia and the Pacific? What are the key drivers of rising inequality in the region? How should Asian countries respond to the rising inequality? Technological change, globalization, and market-oriented reform have been the key drivers of Asia’s remarkable growth and poverty reduction, but they have also had significant distribution consequences. These three drivers of growth cannot be hindered because they are the sources of productivity improvement and betterment of quality of life. This book will be useful to those interested in policy options that could be deployed by Asian countries in confronting rising inequality.

The Capitalist & The Entrepreneur

The Oxford Handbook of the Political Economy of International Trade surveys the literature on the politics of international trade and highlights the most exciting recent scholarly developments. The Handbook is focused on work by political scientists that draws extensively on work in economics, but is distinctive in its applications and attention to political features; that is, it takes politics seriously. The Handbook's framework is organized in part along the traditional lines of domestic society-domestic institutions - international interaction, but elaborates this basic framework to showcase the most important new developments in our understanding of the political economy of trade. Within the field of international political economy, international trade has long been and continues to be one of the most vibrant areas of study. Drawing on models of economic interests and integrating them with political models of institutions and society, political scientists have made great strides in understanding the sources of trade policy preferences and outcomes. The 27 chapters in the Handbook include contributions from prominent scholars around the globe, and from multiple theoretical and methodological traditions. The Handbook considers the development of concepts and policies about international trade; the influence of individuals, firms, and societies; the role of domestic and international institutions; and the interaction of trade and other issues, such as monetary policy, environmental challenges, and human rights. Showcasing both established theories and findings and cutting-edge new research, the Handbook is a valuable reference for scholars of political economy.

A Science in Its Youth

Elements of Pure Economics was one of the most influential works in the history of economics, and the single most important contribution to the marginal revolution. Walras' theory of general equilibrium remains one of the cornerstones of economic theory more than 100 years after it was first published.

A Short History of Man

From one of America's best-known economists, the one book anyone who wants to understand the economy needs to read.

Nullification

Inequality in Asia and the Pacific

Including contributions from such figures as Douglas Irwin, James Foreman-Peck, Kevin O'Rourke and Max-Stefan-Schulze, this key book summarizes the recent empirical research carried out on the issue of the classical period of trade protectionism. It provides a basis for revising widely held views on the standard effects of tariffs on economic structures and progress, as well as a historical perspective on recent developments. Long-held views on modern trade policies have been challenged by the introduction of recent theoretical developments in international economics and in measurement techniques brought about in the 1960s and 70s. One question in particular has attracted attention and has contributed to the bringing to light of a number of previously ignored measurement and interpretation problems: the assessment of French and British nineteenth century trade policies. This noteworthy volume examines the theoretical and practical problems associated with the assessment and measurement of the direct impact of tariffs, prohibitions and quotas on domestic prices, output structure and competitiveness. The contributors also examine the direct and long-run consequences of protectionist measures on particular economies, utilizing evidence from in-depth investigations of trade statistics as well as 'best practice' statistical techniques such as effective protection, elasticity of demand and revealed comparative advantage.

Karl Marx: Capital. A Critical Analysis of Capitalist Production, London 1887

'Bill Pollard speaks with a voice of experience. His book deals with the practice of leadership- over time, under pressure, living with reality, getting the desired results. The Soul of the Firm tells how ServiceMaster has successfully grapple with the key issues of leadership. That is why it is so worthwhile.' -Max De Pree 'Bill Pollard demonstrates in great detail ServiceMaster's value system, a system that emphasizes the importance of the dignity of the individual. Readers will benefit greatly from Bill's wisdom. This is an important book that should be widely read.' -W. Earl Sasser, James L. Heskett, and Leonard A. Schlesinger 'Rarely are we given an open and generous look inside the corporate leader who is the embodiment of the mission and values of the enterprise. . . A powerful book.' -Frances Hesselbein 'A fascinating story about servant leadership and an extraordinary culture at ServiceMaster.' -Richard L. Thomas 'A remarkable book. . . . ServiceMaster invented 'lea production' for the service sector by listening to and empowering its employees on the front line. This book is the moving story of the wellspring of that culture and philosophy, told by a reflective, modest corporate leader.' -Elmer Johnson
