Unlike some other reproductions of classic texts (1) We have not used OCR (Optical Character Recognition), as this leads to bad quality books with introduced typos. (2) In books where there are images such as portraits, maps, sketches etc We have endeavoured to keep the quality of these images, so they represent accurately the original artefact. Although occasionally there may be certain

imperfections with these old texts, we feel they deserve to be made available for future generations to enjoy.

The Kentucky Warbler; V.73-76 (1997-2000)

Excerpt from The Kentucky Warbler, 1965, Vol. 41 At least 70% Of the woodlands in the region covered had been badly burned by forest fires in November; this burned out portion simply had no bird life, except for the crows we found. The Starlings seem to be entirely absent from Martin County this season; not one has been sighted this winter. The juncos, too, are almost totally non-existent, with only six on our count as compared to 79 last year. The scarcity of Tufted Titmice could well be due to the widespread forest fires and the destruction Of the natural food supply. Chickadees, titmice, and towhees were observed feeding on dogwood berries at the edge of a clearing. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. The Kentucky Warbler; V.58-60 (1982-1984)

Ten years in the making, The Kentucky Breeding Bird Atlas presents the results of a seven-year survey of all birds that nest in the Bluegrass State, providing photographs of each species. This work summarizes the distribution and abundance of these bird species, and describes such recent phenomena as the invasions of the Blue Grosbeak and House Finch and the notable decline of other familiar species. Introductory material outlines the methodology used to complete the survey and summarizes its results. Of particular interest, this work helps to document the effect human alteration of the landscape has had on our bird populations. Some of the most common and widespread species in Kentucky today, for example, may have been among the most rare only two hundred years ago. Information for each species includes its current and historical status in the state, habitat preferences, specific details of the construction and placement of nests, and other pertinent aspects of nesting biology. Results of the survey are organized by physiographic region and degree of forestation. For rare or locally distributed species, more specific details concerning individual breeding records are given. Accompanying maps plot each species' distribution and abundance within the state. An additional section briefly summarizes the former status of twelve extinct or extirpated species. The Kentucky Breeding Bird Atlas is sponsored by the Kentucky State Nature Preserves Commission and the Nongame Wildlife Program of the Kentucky Department of Fish and Wildlife Resources in cooperation with the Kentucky Ornithological Society.

The Kentucky Warbler - Scholar's Choice Edition

The Birds of Kentucky is the first book of its kind to be published for the Bluegrass State. It is designed to provide an accurate, scientifically approved, up-to-date account of the status of all the species of birds found in Kentucky, with seasonal occurrence, abundance, migration dates, and additional reference material. The species accounts provide the natural history of the birds of Kentucky based on a lifetime of field observation and research. But, this is more than a verbal portrait of Kentucky avifauna. The Birds of Kentucky includes 51 paintings by the renowned wildlife artist William Zimmerman. More than one commentator has compared Zimmerman's work favorably to Audubon's. But, instead of Audubon's romanticism and often tortuous style, Zimmerman offers us comfortable birds that look as if they were about to take wing and leave the page. Monroe tells the story of the ornithologists who have worked in Kentucky, and also outlines the physiography of the state as it relates to birding. Each species account informs us whether a bird is a permanent resident, winter resident, summer resident, visitant, or transient.
