Think Like a Cat

America's favorite cat behavior expert, author of *Catwise* and *Cat vs. Cat*, offers the most complete resource for cat owners of all stripes, now fully updated. "The queen of cat behavior" - Steve Dale, author of *My Pet World* Think it's impossible to train a cat? Think again! By learning how to think like a cat, you'll be amazed at just how easy it is. Whether you are a veteran cat lover, a brand-new owner of a sweet kitten, or the frustrated companion of a feline whose driving you crazy, Pam Johnson-Bennett will help you understand what makes your cat tick (as well as scratch and purr). Topics range from where to get a cat to securing a vet; from basic health care to treating more serious problems; choosing an irresistible scratching post and avoiding litterbox problems. A comprehensive guide to cat care and training, she helps you understand the instincts that guide feline behavior. Using behavior modification and play therapy techniques, she shares successful methods that will help you and your cat build a great relationship.

The Trainable Cat

'Amazing' Guardian From the on-screen experts for BBC2's *Cat Watch*, and based on their ground-breaking research - this is the ultimate guide to making your cat a happier, more sociable animal. The idea of a trained cat is a contradiction in terms, isn't it? Naturally solitary, wary, easily threatened by newcomers, they are attached to place rather than people, and much of their 'antisocial' behaviour arises in situations where that attachment is threatened. But, as cat experts Sarah Ellis and John Bradshaw argue, such stress-induced behaviour can be prevented, reduced, even eliminated, by training. A comprehensive and engaging step-by-step guide, *The Trainable Cat* will help you to help your cat negotiate the complexities of everyday life: to enjoy living with humans - including new babies and lively toddlers - and other pets; to answer to their name; settle into a new home; and to overcome the anxiety of a visit to the vet. You can train your cat to do what is in its own best interests - even when its instincts tell it otherwise. 'I doubt you'll find a more well-informed or scientific book on cats that better shows you how feline thinking works' *The Times*

Help Your Cat Live Longer

This comprehensive cat care guide from Jessica Madison, shows us how to help your cat live longer and eliminate feline behavioral problems by understanding cats' instinctive behavior. If you're a cat owner, especially a new cat owner, it's natural to ask questions about ageing and your feline. Just how long do cats live? Cats are living longer than ever before, thanks to the advances in medicine and nutrition. It's very usual today to see a cat live well into its 20s. We who love cats want them to live as long as possible since we love them just like they are our kids. Although genetics may have an effect on how cats age, there are many things we can do to prolong our cats' life potential, starting when they first come under our house. Unfortunately, there's no magic pill, potion or feline fountain of youth, but following tips on the book will give your kitty the best chance at a long, healthy life. In addition, cats can provide vital love and affection when no one else will, so it's our responsibility to return this affection in full measure. Even if lots of love won't increase your cat's lifespan it will surely make the time you share more enjoyable. Jessica Madison.

Do Parents Matter?

In *Do Parents Matter?* anthropologists (and grandparents) Robert & Sarah LeVine investigate the diversity of parenting practices across the world - from the USA to Africa, Japan to Mexico - and come away with a reassuring conclusion: children tend to turn out to be the same well-adjusted adults all around the world no matter the parenting style. Japanese children sleep with their parents well into primary school, women of the Hausa tribe (largely based in Nigeria) avoid verbal and eye contact with their toddlers; Western parenting frowns on both practices but Japanese children show higher than average levels of empathy while Hausa children seem quite content. The Levines' fascinating global investigation discovers the practices and experiences of parents from around the world, and comes away with profound lessons from other cultures on how to build a family. This in-depth survey of parenting practices across the world is based on almost 50 years of research, concluding: there is no one-size-fits-all approach to parenting, free yourself from expert advice and learn to relax.

A Cat's Tale

"Fun, fanciful, and even informative." —People The first comprehensive history of felines—from the laps of pagan gods to present-day status as meme stars—as revealed by a very learned tabby with a knack for hunting down facts Since the dawn of civilization, felines have prowled alongside mankind as they expanded their territory and spread the myth of human greatness. And today, cats are peddled on social media as silly creatures here to amuse humans with their antics. But this is an absurd, self-centered fantasy. The true history of felines is one of heroism, love, tragedy, sacrifice, and gravitas. Not entirely convinced? Well, get ready, because Baba the Cat is here to set the record straight. Spanning almost every continent and thousands—yes, thousands—of years, Baba's complex story of feline survival presents readers with a diverse cast of cats long forgotten: from her prehistoric feline ancestors and the ancient Egyptian cat goddess Bastet to the daring mariners at the height of oceanic discovery, key intellectuals in the Enlightenment period, revered heroes from World Wars I and II, and the infamous American tabbies. Baba, a talented model in addition to a scholar, goes beyond surface-level scratches, pairing her freshly unearthed research with a series of stunning costume portraits to bring history to life. A paws-on journey through the feline hall of fame, with in-depth research and four-legged testaments that will make you rethink who defines history, *A Cat's Tale* is a one-of-a-kind chronicle that introduces readers to the illustrious ancestors of their closest companions and shows, once and for all, that cats know exactly what they're doing.

The Other End of the Leash

Learn to communicate with your dog—using their language “Good reading for dog lovers and an immensely useful manual for dog owners.”—The Washington Post An Applied Animal Behaviorist and dog trainer with more than twenty years’ experience, Dr. Patricia McConnell reveals a revolutionary new perspective on our relationship with dogs—sharing insights on how “man’s best friend” might interpret our behavior, as well as essential advice on how to interact with our four-legged friends in ways that bring out the best in them. After all, humans and dogs are two entirely different species, each shaped by its individual evolutionary heritage. Quite simply, humans are primates and dogs are canids (as are wolves, coyotes, and foxes). Since we each speak a different native tongue, a lot gets lost in the translation. This marvelous guide demonstrates how even the slightest changes in our voices and in the ways we stand can help dogs understand what we want. Inside you will discover: • How you can get your dog to come when called by acting less like a primate and more like a dog • Why the advice to “get dominance” over your dog can cause problems • Why “rough and tumble primate play” can lead to trouble—and how to play with your dog in ways that are fun and keep him out of mischief • How dogs and humans share personality types—and why most dogs want to live with benevolent leaders rather than “alpha wanna-bes!” Fascinating, insightful, and compelling, *The Other End of the Leash* is a book that strives to help you connect with your dog in a completely new way—so as to enrich that most rewarding of relationships.

Frankenstein's Cat

Winner of 2014 AAAS/Subaru SB&F Prize for Best Young Adult Science Book Longlisted for the PEN/E.O. Wilson Literary Science Writing Award One of Nature's Summer Book Picks One of Publishers Weekly's Top Ten Spring 2013 Science Books For centuries, we've toyed with our creature companions, breeding dogs that herd and hunt, housecats that look like tigers, and teacup pigs that fit snugly in our handbags. But what happens when we take animal alteration a step further, engineering a cat that glows green under ultraviolet light or cloning the beloved family Labrador? Science has given us a whole new toolbox for tinkering with life. How are we using it? In *Frankenstein's Cat*, the journalist Emily Anthes takes us from petri dish to pet store as she explores how biotechnology is shaping the future of our furry and feathered friends. As she ventures from bucolic barnyards to a "frozen zoo" where scientists are storing DNA from the planet's most exotic creatures, she discovers how we can use cloning to protect endangered species, craft prosthetics to save injured animals, and employ genetic engineering to supply farms with disease-resistant livestock. Along the way, we meet some of the animals that are ushering in this astonishing age of enhancement, including sensor-wearing seals, cyborg beetles, a bionic bulldog, and the world's first cloned cat. Through her encounters with scientists, conservationists, ethicists, and entrepreneurs, Anthes reveals that while some of our interventions may be trivial (behold: the GloFish), others could improve the lives of many species—including our own. So what does biotechnology really mean for the world's wild things? And what do our brave new beasts tell us about ourselves? With keen insight and her trademark spunk, Anthes highlights both the peril and the promise of our scientific superpowers, taking us on an adventure into a world where our grandest science fiction fantasies are fast becoming reality.

Raising a Happy, Healthy and Well-Adjusted Cat

Are you excited about the kitten that you just brought home? You surely are! Kittens are cute and they can be delightful pets. But just like other animals, you will need to take good care of them. You want your cat to be healthy, happy and well-adjusted to your home and your family. This takes some patience and some caution. Cats tend to learn how to interact with the world within the first 12 weeks of their

lives. This means that you will need to train and get your kitten ready for your home before it is 12 weeks old. Of course, you can still train an older kitten, but the first 12 weeks are definitely crucial. If you teach your cat during this time what you expect from her, your work will definitely become much easier later. But what do you do? Do you need to bathe your cat? Do you brush her teeth? How do you keep her safe indoors and outdoors? Do you clip her claws? How do you keep her entertained? So many questions can definitely leave you confused! But worry not; this handy guide will help you get started on raising a happy, health and well-adjusted cat.

When he grows up, Claude says, he wants to be a girl. Rosie and Penn want Claude to be whoever Claude wants to be. They’re just not sure they’re ready to share that with the world. Soon the entire family is keeping Claude’s secret. Until one day it explodes. Laurie Frankel’s This Is How It Always Is is a novel about revelations, transformations, fairy tales, and family. And it’s about the ways this is how it always is: Change is always hard and miraculous and hard again, parenting is always a leap into the unknown with crossed fingers and full hearts, children grow but not always according to plan. And families with secrets don’t get to keep them forever.
