Time, Tense, and Causation

Michael Tooley presents a major new philosophical study of time and its relation to causation. The nature of time has always been one of the most fascinating and perplexing problems of philosophy; it has in recent years become the focus of vigorous debate between advocates of rival theories. The traditional, 'tensed' accounts of time which hold that time has a direction and that the flow of time is part of the nature of the universe have been challenged by 'tenseless' accounts of time, according to which past, present, and future are merely subjective features of experience, rather than objective features of events. Time, Tense and Causation offers a new approach, in many ways intermediate between these two rivals. Tooley shares with tensed approaches the views that the universe is dynamic, and that the past and present are real while the future is not; but he rejects the view that this points to the existence of irreducible tensed facts. Tooley's approach accounts for time in terms of its relation to causation; he argues that the direction of time is based upon the direction of causation, and that the key to understanding the dynamic nature of the universe is to understand the nature of causation. He analyses tensed concepts, and discusses semantic issues about truth and time. Finally, addressing the formidable difficulties posed for tensed accounts of time by the Special Theory of Relativity, he suggests that a modified version of the theory, compatible with the account of time in this book, is to be preferred to the standard version. Time, Tense, and Causation is rich in sophisticated and stimulating discussions of many of the deepest problems of metaphysics. It will be essential reading for anyone specialising in this area of philosophy.

God's Chosen Fast

The People's Covenant and God's Hammer have waged a Cold War that has lasted for over twenty years. A war without armies, where battles are fought in the dark and information is the most dangerous weapon. In this world—which sometimes seems the Middle Ages, sometimes the Renaissance and sometimes the Nineteenth Century—lives Yáxtor Brandan, empirical adept at the service of the Queen of Alboné. A relentless, amoral and unscrupulous character, Yáxtor fights to recover his own past as he tries to prevent a new player in the espionage game to end the world, as he knows it. A fascinating fast-moving and complex plot, full of tension and surprises and excellently paced; a main character for whom it should be impossible to feel the slightest sympathy, and yet somehow we do, even as his cruelty disturbs us more and more -an extremely difficult feat to pull off so successfully; powerful secondary actors, who either leave you with a sense of uneasiness with regard to their motivations and loyalties, or make you want to shout out -as people did in the early days of cinema- "Look out, don't trust him!"; and a pervading atmosphere of tragedy, especially in a final unexpected and shocking, yet on reflection almost inevitable, scene. In short, a totally addictive and highly original novel set in a world that is at once both strangely familiar and disturbingly alien. —Steve Redwood, author of Fisher of Devils.
