My Body Belongs to Me from My Head to My Toes

Now every parent, grandparent, or teacher can explain to a child the difference between appropriate and inappropriate touching in a way that young boys and girls can understand. As a child, there are constantly people trying to pick you up, hug you, or tickle you. Sometimes, though, children fall victims to people who try to touch them inappropriately. But how do you tell someone, most likely an adult, that you don't want to be touched? Or, if it has already happened, how do you tell an adult you trust about what happened? You're only a child, and they're the adults. Why would they believe you? My Body Belongs to Me from My Head to My Toes is an educational tool to help instill confidence in children when it comes to their bodies. The narrative of the story is led by a girl named Clara, who encourages kids to say "no" if they are uncomfortable with physical contact. The narrator gives readers tips about what they can say or do to avoid unwanted physical contact, or how to tell the right people in the event it has already occurred. My Body Belongs to Me from My Head to My Toes is an invaluable resource that gives children a voice in uncomfortable situations.

It's MY Body

Designed to help adults talk with toddlers and preschoolers about sexual abuse in a way that reduces embarrassment and fear and emphasizes self-reliance and open communication, It's MY Body does not contain specific references and stories about sexual abuse, a nod to the tender age of its target audience. It does, however, emphasize how children's feelings can help them make decisions about sharing their bodies, and how to communicate those decisions to others. The book introduces two "touching codes," which children can use to protect themselves when they are uncomfortable.

Long Live the Free Pericardium !

This book explains in a clear and simple way what life is and how it flows within our cells, between people and through people. It is a practical manual that will help us to "feel" life, to vibrate and breathe the life inside of our bodies and of all living beings. A key focus of this work is how emotional impact affects our pericardium, which is the membrane that envelops, maintains and protects the heart.

But First, We Nap

Sloth wants to nap. Rabbit doesn't. Who will win in the end? For every parent who's struggled to get their child to nap, *But First, We Nap* is a hilarious book to replace the naptime wrestle. Funny illustrations depict Rabbit upping his antics while the ever-patient sloth repeats, "But first, we nap." Finally worn out, Rabbit gives in, and the pair--and hopefully your child--snuggle and nod off. The perfect book for nap time!

The Trouble with Secrets

Aimed at helping children understand which secrets should be shared with an adult and which can be kept, this book teaches that while it can be fun to keep exciting surprises, any secrets that cause children anxiety or worry should be shared right away--even if they've been told to keep silent. This is a useful tool for sexual abuse prevention.

I Feel Better with a Frog in My Throat

It wasn't too long ago that people tried all sorts of things to help sick people feel better. They tried wild things like drinking a glass full of millipedes or putting some mustard on one's head. Some of the cures worked, and some of them...well, let's just say that millipedes, living or dead, are not meant to be ingested. Carlyn Beccia takes readers on a colorful and funny medical mystery tour to discover that while times may have changed, many of today's most reliable cure-alls have their roots in some very peculiar practices, and so relevant connections can be drawn from what they did then to what we do now.

For thirty years, Peter Singer's Practical Ethics has been the classic introduction to applied ethics. For this third edition, the author has revised and updated all the chapters and added a new chapter addressing climate change, one of the most important ethical challenges of our generation. Some of the questions discussed in this book concern our daily lives. Is it ethical to buy luxuries when others do not have enough to eat? Should we buy meat from intensively reared animals? Am I doing something wrong if my carbon footprint is above the global average? Other questions confront us as concerned citizens: equality and discrimination on the grounds of race or sex; abortion, the use of embryos for research and euthanasia; political violence and terrorism; and the preservation of our planet's environment. This book's lucid style and provocative arguments make it an ideal text for university courses and for anyone willing to think about how she or he ought to live.

This book examines trends in divorce throughout the world, comparing previously inaccessible information on Asian and Arab countries and Eastern Europe, as well as data from Latin America, Western

Europe, and the Anglo countries over the last four decades. It discusses are how divorce rates in different countries are affected by industrialisation, dictatorship, civic standards for nations, and easier divorce laws; the relations between divorce and such factors as age and class; the meaning of the worldwide rise in cohabitation; and why people are becoming less likely to remarry.

World Changes in Divorce Patterns

This book has become necessary as a consequence of the rapid expansion of the surgical procedures and implants available for spinal surgery within the "AO Group". We have not attempted to write an in-depth book on spinal surgery, but one which will help the surgeon in the use of AO concepts and implants. We consider the practical courses held all over the world essential for the teaching of sound techniques so that technical complications and poor results can be avoided for both the surgeon and, in particular the patient. This book is a practical manual and an outline of what is taught in the courses. It is intended to help the young spinal surgeon to understand the correct use of AO implants. The indications given will aid the correct use of each procedure. . It must be strongly emphasized that surgery of the spine is technically demanding. The techniques described in this book should only be undertaken by surgeons who are trained and experienced in spinal surgery. Certain techniques, in particular pedicle screw fixation and cages, have not yet been fully approved by the FDA in the United States. However, throughout the rest of the world, the use of pedicle screws has become a standard technique for the spine surgeon, since it has been shown to improve fixation techniques and allow segmental correction of the spine. The use of cages has become more and more popular, specifically as a tool of minimally invasive spinal surgery.

AO ASIF Principles in Spine Surgery

Asking, Why, or in what circumstances, ought we to obey the law?, this work focuses on the common view that disobedience to the law, while justifiable in a dictatorship, is much more difficult to justify in a democracy. It then develops a theory of political obligation in an ideal democracy.

The Wide Window

New developments in reproductive technology have made headlines since the birth of the world's first in vitro fertilization baby in 1978. But is embryo experimentation ethically acceptable? What is the moral status of the early human embryo? And how should a democratic society deal with so controversial an issue, where conflicting views are based on differing religious and philosophical positions? These controversial questions are the subject of this book, which, as a current compendium of ideas and arguments on the subject, makes an original contribution of major importance to this debate. Peter Singer is the author of many books, including Practical Ethics (CUP, 1979), Marx (Hill & Wang, 1980), and Should the Baby Live? (co-authored with Helga Kuhse, Oxford U.P., 1986).

WARNING: LISTENING TO THIS TAPE WILL ONLY MAKE YOU WEEP... Dear Listener, If you are looking for a story about cheerful youngsters spending a jolly time at boarding school, look elsewhere. Violet, Klaus and Sunny Baudelaire are intelligent and resourceful children, and you might expect that they would do very well at school. Don't. For the Baudelaires, school turns out to be another miserable episode in their unlucky lives. Truth be told, within the chapters that make up this dreadful story, the children will face snapping crabs, strict punishments, dripping fungus, comprehensive exams, violin recitals. S.O.R.E., and the metric system. It is my solemn duty to stay up all night reading my history of these three hapless youngsters into a microphone, but you may be more comfortable getting a good night's sleep. In that case, you should probably listen to something else. With all due respect, LEMONY SNICKET

The Penultimate Peril

NOW A NETFLIX ORIGINAL SERIES In their most daring misadventure, the Baudelaire orphans are adopted by very, very rich people, whose penthouse apartment is located mysteriously close to the place where all their misfortune began. Even though their new home in the city is fancy, and the children are clever and charming, I'm sorry to say that still, the unlucky orphans will encounter more disaster and woe. In fact, in this sixth book in A Series of Unfortunate Events, the children will experience a darkened staircase, a red herring, an auction, parsley soda, some friends in a dire situation, a secret passageway, and pinstripe suits. Both literary and irreverent, hilarious and deftly crafted, A Series of Unfortunate Events offers an exquisitely dark comedy in the tradition of Edward Gorey and Roald Dahl. Lemon Snicket's uproariously unhappy books continue to win readers, despite all his warnings.

The Hostile Hospital

Although widows constitute a quarter of the adult female population in many African societies, they have not been the focus of detailed, cross-cultural research. This is the first comparative anthropological study of widowhood in Africa, comprising ten case studies that cover a broad spectrum of societies in different parts of the continent. This volume shows clearly that widows are not passive objects of male transactions; they have interests and options, and make choices affecting their own lives. Ties to children, access to productive sources, and rights to housing are shown to have particular importance for widows' residential and marital decisions. This book provides a needed corrective both to the male perspective on kinship and to women's studies that deal almost exclusively with the adult married woman. In contrast to the traditional anthropological emphasis on widow remarriage and the functions such marriages have for the maintenance of marriage alliances, these papers deal with the women themselves and the quality of their lives. The introduction surveys the literature, examines the factors affecting the widows' strategies, and shows how accepted anthropological concepts of marriage, affinity, and community look different when considered from the perspective of widows. There is a foreword by Mariam K. Slater.
