Folklore Studies in India: Critical Regional Responses is an interesting compilation of twenty-eight critical articles on the beginning of folklore studies in the different parts of India. In the absence of a book that could map the history of Indian folklore studies single-handedly, this book can be deemed as the first-of-its-kind to feature the historical development of folklore studies in the different states of India. This book succinctly introduces the readers to the folk culture, folk arts, and folk genres of a particular region and to the different aspects of folkloristic researches carried out in that region.

North-East India, comprising the seven contiguous states around Assam, the principal state of the region, is a relatively unknown, yet very fascinating region. The forest clad peripheral mountains, home to indigenous peoples like the Nagas, Mizos and the Khasis, the densely populated Brahmaputra valley with its lush green tea gardens and the golden rice fields, the moderately populated hill regions and plateaus, and the sparsely inhabited Himalayas, form a unique mosaic of natural and cultural landscapes and human interactions, with unparalleled diversity. The book provides a glimpse into the region's past and gives a comprehensive picture of its physical environment, people, resources and its economy. The physical environment takes into account not only the structural base of the region, its physical characteristics and natural vegetation but also offers an impression of the region's biodiversity and the measures undertaken to preserve it. The people of the region, especially the indigenous population, inhabiting contrasting environments and speaking a variety of regional and local dialects, have received special attention, bringing into focus the role of migration that has influenced the traditional societies, for centuries. The book acquaints the readers with spatial distribution, life style and culture of the indigenous people, outlining the unique features of each tribe. The economy of the region, depending originally on primitive farming and cottage industries, like silkworm rearing, but now greatly transformed with the emergence of modern industries, power resources and expanding trade, is reviewed based on authentic data and actual field observations. The epilogue, the last chapter in the book, summarizes the authors' perception of the region and its future.

This is the first book to systematically describe the formation and historical changes of the Monpa people's area (Monyul) through its nature, society, culture, religion, agriculture and historically deep ties with Bhutan, Tibet and the Tibetan Buddhist faith. The state of Arunachal Pradesh is located in the northeastern part of India, surrounded by the borders of Assam, Bhutan, and Tibet (China). There has been a long history of conflict over the sovereignty of this area between India and China. Foreigners were prohibited from entering the state until the 1990s and the area has been veiled in secrecy until recently. Thus, there are not many academically researched works on the region. This book serves as an essential guide for anyone who would like to learn about a unique geographical area of Monpa.

Multiparty Government

The seminal text for understanding European coalition politics

Coalition Government, Subnational Style

Addresses a theme of central importance to the theory and practice of parliamentary democracy in western Europe: multiparty coalition government in the under-researched institutional setting of subnational (i.e., regional, provincial, local) representative assemblies. Comparison focuses on France, Belgium, and Germany. Part I discusses the literature, outlines criticisms of formal theory, and surveys attempts to use subnational coalitions as data sources. Part II presents theory and methods, and Part III offers empirical analysis. Part IV applies theoretical points made in previous chapters and presents conclusions. Appendices offer a survey questionnaire used for this study and related statistics. Paper edition (unseen), \$19.95. Annotation copyrighted by Book News, Inc., Portland, OR

Coalition Governance in Western Europe

This book studies such governments, covering the full life-cycle of coalitions from the formation of party alliances before elections to coalition formation after elections.

Coalition Governments in Western Europe

This volume presents a detailed empirical analysis based on a large cross-national data collection, covering the entire post-war period from 1945 to 1999.

Governing Abroad

From Austria to New Zealand, coalition governments often pave the road to foreign policy. In Western Europe, nearly 90 percent of postwar governments include two or more political parties. Israel, the Middle East's only consolidated democracy according to many, has never experienced single-party rule in its history. Even the United Kingdom, known for its long streak of single-party rule, now navigates multiparty cabinets. Coalitions are everywhere, but we still have little understanding of how they act in foreign affairs. History shows that coalitions can sometime engage in powerful international commitments such as participating in military operations, but at other times, they postpone their decisions, water down their policy positions, or promise to do less than they otherwise would. What explains these differences in behavior? *Governing Abroad* unpacks the little-known world of coalition governments to find out. Oktay argues that the specific constellation of parties in government explains why some coalitions can make more assertive foreign policy decisions than others. Building on the rich literature in political science on coalitions, legislatures, and voting behavior, the book weaves together sophisticated statistical analyses of foreign policy events across thirty European countries alongside in-depth case studies from Denmark, the Netherlands, and Finland. It brings political parties back into the study of foreign policy, demonstrating that the size of the coalition, the ideological proximity of the governing parties, and their relationship with the parliamentary opposition together influence the government's ability to act in the international arena. This book challenges our existing perceptions about the constraints and weaknesses of coalition governments. It sheds new light on the conditions that allow them to act decisively abroad.

Coalition Governance in Central Eastern Europe

Coalition government among different political parties is the way most European democracies are governed. Traditionally, the study of coalition politics has been focused on Western Europe. Coalition governance in Central Eastern Europe brings the study of the full coalition life-cycle to a region that has undergone tremendous political transformation, but which has not been studied from this perspective. The volume covers Bulgaria, Estonia, the Czech Republic, Latvia, Lithuania, Hungary, Poland, Romania, Slovakia, and Slovenia. It provides information and analyses of the coalition life-cycle, from pre-electoral alliances to coalition formation and portfolio distribution, governing in coalitions, the stages that eventually lead to government termination, and the electoral performance of coalition parties. In Central Eastern Europe, few single-party cabinets form and there have been only a few early elections. The evidence provided shows that coalition partners in the region write formal agreements (coalition agreements) to an extent that is similar to the patterns that we find in Western Europe, but also that they adhere less closely to these contracts. While the research on Western Europe tends to stress that coalition partners emphasize coalition compromise and mutual supervision, there is more evidence of 'ministerial government' by individual ministers and their parties. There are also some systems where coalition governance is heavily dominated by the prime minister. No previous study has covered the full coalition life-cycle in all of the ten countries with as much detail. Systematic information is presented in 10 figures and in more than one hundred tables. *Comparative Politics* is a series for researchers, teachers, and students of political science that deals with contemporary government and politics. Global in scope, books in the series are characterised by a stress on comparative analysis and strong methodological rigour. The series is published in association with the European Consortium for Political Research. For more information visit: www.ecprnet.eu. The series is edited by Emilie van Haute, Professor of Political Science, Universite libre de Bruxelles; Ferdinand Muller-Rommel, Director of the Center for the Study of Democracy, Leuphana University; and Susan Scarrow, John and Rebecca Moores Professor of Political Science, University of Houston.

Intra-Party Politics and Coalition Governments

This book explores how intra-party politics affects government formation and termination in parliamentary systems, where the norm is the formation of coalition governments. The authors look beyond party cohesion and discipline in parliamentary democracies to take a broader view, assuming a diversity of preferences among party members and then exploring the incentives that give rise to coordinated party behaviour at the electoral, legislative and executive levels. The chapters in this book share a common analytical framework, confronting theoretical models of government formation with empirical data, some drawn from cross-national analyses and others from theoretically structured case studies. A distinctive feature of the book is that it explores the impact of intra-party politics at different levels of government: national, local and EU. This offers the opportunity to investigate existing theories of coalition formation in new political settings. Finally, the book offers a range of innovative methods for investigating intra-party politics which, for example, creates a need to estimate the policy positions of

individual politicians inside political parties. This book will be of interest to political scientists, especially scholars involved in research on political parties, parliamentary systems, coalition formation and legislative behaviour, multilevel governance, European and EU politics.

Institutional Design and Party Government in Post-communist Europe

This volume examines the institutional foundations of coalition government in the ten post-communist democracies of Eastern and Central Europe, arguing that differences in the arrangement of political institutions systematically explain variations in patterns of multi-party government.

Parliaments and Coalitions

Coalition governments are the norm in most of the world's parliamentary democracies. Because these governments are comprised of multiple political parties, they are subject to tensions that are largely absent under single-party government. The pressures of electoral competition and the necessity of delegating substantial authority to ministers affiliated with specific parties threaten the compromise agreements that are at the heart of coalition governance. The central argument of this book is that strong legislative institutions play a critical role in allowing parties to deal with these tensions and to enforce coalition bargains. Based on an analysis of roughly 1,300 government bills across five democracies (Denmark, France, Germany, Ireland, and the Netherlands), the book paints a detailed picture of the treatment of government legislation in contemporary parliaments. Two central contributions emerge. First, the book forces a reconsideration of the common perception that legislatures are largely irrelevant institutions in European democracies. The data presented here make a compelling case that parliaments that feature strong committee systems play an influential role in shaping policy. Second, the book contributes to the field of coalition governance. While scholars have developed detailed accounts of the birth and death of coalitions, much less is known about the manner in which coalitions govern between these bookend events. *Parliaments and Coalitions* contributes to a richer understanding of how multiparty governments make policy. *Comparative Politics* is a series for students, teachers, and researchers of political science that deals with contemporary government and politics. Global in scope, books in the series are characterised by a stress on comparative analysis and strong methodological rigour. The series is published in association with the European Consortium for Political Research. For more information visit: www.essex.ac.uk/ecpr

Political Parties and Coalitions in European Local Government

The authoritative guide to the political parties, local government and coalitions of Europe. Written by leading writers in the field, it gives the reader an excellent understanding of the key areas across the continent.

Coalition Politics in Central Eastern Europe

This insightful book brings the study of coalitions and coalition governance in Central and Eastern European democracies up to date, with an analytical focus framed by difficult economic and social periods, such as the end of the economic crisis and the Coronavirus pandemic. The volume posits insights from a plethora of experts on party politics and coalition studies from their respective countries, with chapters on Bulgaria, Czechia, Estonia, Hungary, Latvia, Lithuania, Poland, Romania, Slovakia, and Slovenia. Embellished with illustrative tables and extensive datasets throughout, each chapter maps the developments of party system change, covering the coalition life cycle from the early 1990s until the end of 2021, and explores whether there has been transformation of the coalition, governance and dissolutions patterns due to heightened pressures. This book will be of key interest to scholars and students of coalition politics, representative democracy, governance, political parties, European Union politics, East and Central European politics, and comparative politics.

Party Government in the New Europe

This truly comparative volume examines the "life cycle" of party governments in Europe from 1990 onwards, and analyses its role and function in contemporary European parliamentary democracies. The life and the performance of party governments in Europe became more and more volatile and publicly contested. In some cases, it has even challenge the democratic quality of the state. This book presents comparative analyses of party governments from formation and duration, to performance. It brings together some of the foremost scholars researching on party government to evaluate existing

theories and compare both the developments in the Western and the 'new' Eastern Europe in an empirically-grounded comparative analysis. The book discusses the interaction between various institutions, political parties and policies, and evaluates how institutional change and party behaviour can drive the "life cycle" of party government. Party Government in the New Europe will be of interest to students and scholars of Comparative Politics, Democracy, Government and European Politics.

Coalition Agreements As Control Devices

Many coalition cabinets negotiate lengthy coalition contracts outlining the agenda for the time in office. Not only does negotiating these agreements take up time and resources, but compromises have to be made, which may result in cabinet conflicts and electoral costs. This book explores why political parties negotiate such agreements, and argues that coalition agreements are important control devices that allow coalition parties to keep their partners in line. The authors show that their use varies with the preference configuration in cabinet and the allocation of ministerial portfolios. First, they posit that parties will only negotiate policy issues in a coalition agreement when they disagree on these issues and when they are important to all partners. Second, since controlling a ministry provides parties with important information and policy-making advantages, parties use agreements to constrain their partners particularly when they control the ministry in charge of a policy area. Finally, they argue that coalition agreements only work as effective control devices if coalition parties settle controversial issues in these contracts. The COALITIONAGREE Dataset is used to evaluate the expectations set out in the book; the dataset maps the content of 229 coalition agreements that were negotiated by 189 parties between 1945 and 2015 in 24 Western and Eastern European countries. The results show that coalition parties systematically use agreements to control their partners when policy issues are divisive and salient and when they are confronted with a hostile minister. These agreements only effectively contain conflicts, however, when parties negotiate a compromise on precisely the issues that divide them. Comparative Politics is a series for researchers, teachers, and students of political science that deals with contemporary government and politics. Global in scope, books in the series are characterized by a stress on comparative analysis and strong methodological rigour. The series is published in association with the European Consortium for Political Research. For more information visit: www.ecprnet.eu. The series is edited by Nicole Bolleyer, Chair of Comparative Political Science, Geschwister Scholl Institut, LMU Munich and Jonathan Slapin, Professor of Political Institutions and European Politics, Department of Political Science, University of Zurich.

New Parties in Government

This volume is a unique exploration of European political parties making the move towards government for the first time.

Liberal Parties in Western Europe

This book is a comparative study of liberal parties in Western Europe, examining the role and development of liberal parties within individual countries; their internal party structure and organization; electoral audience; coalitions and government participation; party programmes and strategies; and international and cross-national links.

Policy, Office, Or Votes?

This book examines the behaviour of political parties in situations where they experience conflict between two or more important objectives.

Political Extremism in Democracies

When political 'extremists' - organized into parties that compete openly and successfully in democratic elections - enter the conventional institutional arena, how do mainstream actors react? This book deals with understanding how democracies respond to party-based extremism and with what consequences.

Left Parties in National Governments

Coalitions are the commonest kind of democratic government, occurring frequently in most countries of western Europe. It is usually assumed that political parties came together in a government coalition because they agree already, or can reach an agreement, on the policy it should pursue. This book examines this idea using evidence from party election programmes and government programmes. It demonstrates that party policies do influence government programmes, but not to the extent they would if policy-agreement were the sole basis of coalition.

Party Policy and Government Coalitions

Which kind of decisions are passed by Cabinet in coalition governments? What motivates ministerial action? How much leeway do coalition parties give their governmental representatives? This book focuses on a comparative study of ministerial behaviour in Germany, Belgium, Italy and the Netherlands. It discredits the assumption that ministers are 'policy dictators' in their spheres of competence, and demonstrates that ministers are consistently and extensively constrained when deciding on policies. The first book in a new series at the forefront of research on social and political elites, this is an invaluable insight into the capacity and power of coalition government across Europe. Looking at policy formation through coalition agreements and the effectiveness of such agreements, *Coalition Government and Party Mandate* will be of interest to students and scholars of comparative politics, governance and European politics.

Coalition Government and Party Mandate

This book provides a comprehensive analysis of the party systems of the whole continent of Europe. This work also includes case studies of the Baltic States and Balkan democracies and goes as far east as Russia, Ukraine, Georgia, and Turkey.

Comparative European Party Systems

Governing in coalitions is a central research field in comparative political science. This book explores how pre-electoral alliances and rejections of potential coalitions influence party competition and coalition politics in Austria, Belgium, Germany, Ireland, and the Netherlands. The study shows that in contrast to the classical perspective, coalition politics is determined not only by ideological diversity, but also by institutional and behavioral factors. Beside a descriptive analysis of the policy-area specific positions of each party and an evaluation of the determinants of coalition formation, the payoff structure in coalition governments is under consideration. The analysis reveals that "key parties" receive a surpassing share of both office and policy payoffs.

Pre-electoral Alliances, Coalition Rejections, and Multiparty Governments

This analysis of coalition politics in Western Europe is based on the most comprehensive data set ever employed in coalition studies exploring both coalitional and single-party countries and governments.

Cabinets and Coalition Bargaining

Uniting theory and application, the third edition of *Representative Government in Modern Europe* continues the tradition of previous editions by first examining the themes, debates, developments and structures driving European politics, and then investigating the way in which the theories behind them are manifested, comparing the historical development, distinct interpretations and present condition of several major European governments. A thematically arranged text which introduces readers to current debates among those who analyze European politics, the 3rd edition of *Representation Government in Modern Europe* delves into the evolution of European politics as we embark on the 21st century. Since the last edition, astonishing changes have occurred on the political scene in Europe. Democratic transformations have taken place throughout the East, along with the emergence of a strong European

Union. These two topics, as well as the state of economics in the region, have dominated the previous decade in Europe and are discussed throughout the 3rd edition.

Representative Government in Modern Europe

This book provides the first systematic book length study of political parties across Central Europe since 1989, and provides new tools and conceptual frameworks that can be used to explain party politics in other regions across the globe.

The New Party Challenge

An unusual combination of a thoroughly focused book - in the style of Lijphart - and a comprehensive study with qualities of a textbook' - "Professor Dr. Klaus von Beyme, Universitat Heidelberg "This comprehensive textbook is the first to go beyond a West European perspective and provide a clear overview of the whole of European politics. Jan-Erik Lane and Svante Ersson address the similarities of key political features among states in Western, Central, Eastern, Northern and Southern Europe and look forward to political developments at the turn of the century. European Politics provides a thoroughgoing analysis of several converging themes, including political culture, the nature of the state, party systems, and the formation of government and public policies. With this approach to economic, social and political aspects of politics in Europe this major text presents a Europe that, within the context of reform, transition and integration, has more in common in the early 1990s than ever before. "

Parties and Democracy

Regionalist parties matter. Over the past 40 years, they have played an ever-larger role in West European democracies. Because of their relevance and temporal persistence, their achievements have increasingly become visible not only in electoral arena, but also as regards holding office and policy-making. Enhancing our understanding of these different dimensions of success, this book analyses various types of regionalist party success. Beyond conventional perspectives, the focus of this book is also on how the dimensions of success are related to each other, and in particular to what extent electoral and office success – jointly or alternatively – contribute to policy success. Adopting a common theoretical framework and combining the in-depth knowledge of country experts, each chapter explores the evolution and impact of regionalist parties in regional or federal states, that is the UK, Germany, Italy, Spain, Belgium, and Switzerland. This allows for a comprehensive and comparative analysis of one of the main political challenges within West-European democracies.

European Politics

In Germany, Grand Coalitions of the two major parties - the Christian Democrats (CDU/CSU) and the Social Democrats (SPD) - generally have a bad reputation. Hence, the CDU/CSU-SPD government under Angela Merkel (2005-2009) was neither the parties' nor the citizens' preferred choice, its performance was seen quite critical from the outset, and it was finished without further ado after the 2009 federal election. Has the Grand Coalition 2005-2009 been a single episode or rather a turning point for German politics? This book provides a retrospective of the first Merkel government, an analysis of the 2009 election and an account of its prospective consequences.

Regionalist Parties in Western Europe

Cutting-edge comparative analysis of the challenges posed by the populist radical right to Western Europe's Conservative, Liberal and Christian Democratic parties.

Germany after the Grand Coalition

The analysis of party systems in Western Europe has long constituted a major focus of concern in comparative political science. Now for the first time, many of the classic writings in this field have been collected into a single volume. The collection contains seminal writings by Weber, Neumann, Duverger, Kirchheimer, Daalder, Rokkan, and Sartori, as well as a selection from the more recent debates on changes in European party systems, including the contributions of Pedersen, Wolinetz, and Inglehart. The writings cover the development, stabilization, and transformation of party systems and include some of the key analyses which have sought to distinguish between different types of party systems.

Coalition Government in Western Europe

In this new edition, Patricia Hogwood and Geoffrey Roberts offer a comprehensive introduction to the political systems and processes of Western Europe. The book begins with an overview of the features and events that have shaped the political landscape of Europe up to the end of the 20th century. The authors go on to discuss liberal democracy, historical sources of conflict between countries, electoral systems, political parties and interest groups, governments and parliaments. The final section looks at federalism and EU decision-making and concludes with a consideration of how liberal democracies in western Europe have attempted to provide stable government while remaining responsive to changes in society. This book has been fully updated to take account of the French, British and Italian general elections that have occurred in recent years, as well as the momentous changes that have taken place in global politics as a result 9/11, and the preparations for EU enlargement. The chapters on the European Union and democracy in Western Europe have also been substantially revised to take account of globalization and recent political corruption issues.

Riding the Populist Wave

Beech and Lee provide a definitive guide to the coalition's first year in office. Offering compelling insights into their policy agenda, its chances of success, and a thought-provoking analysis of how the coalition government will affect the Conservatives, Liberal Democrats and Labour long-term.

European Politics Reconsidered

This volume brings together comparative studies and in-depth case studies that research the diversity of party system change in Europe. In so doing it presents a model for change which challenges orthodox views of political evolution.

The West European Party System

A study of territorial dynamics within party organizations in multi-layered systems. This book contributes to a new approach in party research which acknowledges the importance of multi-layered institutional framing. It includes an analysis of vertical linkages and sub-state autonomy in Austrian, Belgian, British, German and Spanish parties.

European Politics Today

Political Parties in Post-Communist Eastern Europe is the first textbook to survey the course of party developments in eastern Europe as a whole in the post-Communist period. This book relates the specifics of the post-communist situation to the broader picture of the early stages of party development in western Europe and also to contemporary models of party organisation in established democracies. The book includes: · a brief historical introduction to the context of post-communist change · the process of competitive party formation and democratic elections · the development of independent parties; their ideologies, and electoral volatility · the structure and level of organisation developed by new parties · an analysis of stable party systems which have emerged in eastern Europe and the contribution they make to emerging democracies in the region Party Politics in Post-Communist Eastern Europe will be a comprehensive and invaluable resource, accessible to undergraduates of politics and European studies, as well as the non-specialist reader.
