The Multicultural Path

In this groundbreaking work, Gurpreet Mahajan tackles the predisposition of political theory to be limited by the Western canon. Bringing into focus how concepts central to the modern democratic political imaginary are interpreted in India, this book elaborates the ways that ideas of freedom, equality and difference are layered with new meanings and how questions of religion and state, critical reason and embedded self are understood in the Indian context. Part of Zed's World Political Theories series, this remarkable work offers a glimpse of the social and political life of contemporary India, and how it differs from the dominant liberal paradigm.

India

Both India and Europe have been undergoing a difficult process of negotiating cultural, religious and ethnic diversity within their democratic frameworks. In fact, recent incidents of xenophobic backlash against multiculturalism and minority communities in Europe, as well as myriad movements for constitutional recognition of castes, tribes and languages and the emergence of Islamophobic terror in India, question the conventional idea of democracy as the idyllic preserver of diversity. This volume contests the simplistic connection between democracy and diversity by proposing that democracy, in fact, produces, sediments and reinforces cultural heterogeneity. It argues that in democratic polities, disparate cultural practices are often converted into identity categories, with disturbing implications for national identity, constitutionalism, political governance and citizenship. While mobilizations on the plank of cultural differences are typically viewed as being born in undemocratic spaces with little toleration for diversity, they also find fertile soil in democracy insofar as democracy celebrates diversity and allows cultural dissent to thrive. Such dissent, while essential for democracy, has difficult consequences. Examining the fundamental conflict between constructions of particular cultural identities and mandates of a unifying democratic ethos, the book brings forth the complexities underlying the politics of identity recognition and national integration. In making a radical intervention in the discourse, this volume offers a critique of existing paradigms of multiculturalism. It will interest scholars and students of political science, sociology, and postcolonial and comparative studies.

The Democratic Predicament

Challenges to a Liberal Polity, amazingly relevant and thought provoking for our times-by Hamid Ansari, former Vice President of India-brings to light some of the most critical issues, which influence our thoughts every day. From Nehru's vision for India as a major world power to the issues of citizenship, religion, democracy, the idea of plurality and Muslim identity in Indian society, inclusion/exclusion of Indian Muslims, the 'mainstream' decision making process in India, the role of women in order to build a compassionate society, implication for dissent, Muslims' role and contribution to Indian culture, civilization and nation-building in the post-Independent India, among others, the book thrashes some of the burning issues of Indian polity and society. Comprehensive, argumentative and evocative, this title will not only interest a wide spectrum of readers but also politicians, policymakers and students and scholars of Indian politics, history and sociology.

The Public and the Private

This book engages a multidisciplinary approach to understand Gandhi in addressing specific contemporary societal issues. The issues highlighted in the book through thirteen distinct, yet interrelated, themes offer solutions to the societal challenges through the prism of Gandhian thought process. This edited book explores how ideas Gandhi expressed over a century ago can be applied today to issues from the UN's Sustainable Development Goals to peaceful resolution of conflicts. In particular, it looks at the contemporary societies' critical issues and offers solutions through the prism of Gandhian ideas. Written in an accessible style, this book reintroduces Gandhi to today's audiences in relevant terms.

Gandhi in the Twenty First Century

Most discussions of multiculturalism and group rights focus on the relationship between the minority and the majority. This volume advances our understanding of minority rights by focusing on conflicts that arise within minority groups and by examining the different sorts of responses that the liberal state might have to these conflicts. Groups around the world are increasingly successful in maintaining or winning autonomy. In light of this trend, a crucial question emerges: what happens to individuals within groups who find that their group discriminates against them? This volume brings together distinguished scholars who examine this question by weaving together normative political theory with case studies drawn from South Africa, the United States, India, Canada, and Britain. Classical liberalism, deliberative democracy, feminism, and associative democracy are among the theoretical frameworks used to offer solutions to the complex set of issues raised by minorities within minorities.

Minorities Within Minorities

This book presents a comprehensive overview of modern conceptualizations of justice in India. It analyses how these concepts relate to traditional theories of justice – in Marx, Ambedkar, Gandhi and Rawls as well as social realities in India. The book critically analyses theories of justice in India from a theoretical and comparative framework. It brings together contributions by well-known scholars to explore a range of questions and dilemmas around justice which have been brought about by a widening disparity between the powerful and the marginalized. The volume engages with the inadequacies of tautological theories of justice and fairness which fall short of adequately articulating the institutionalized forms of injustices and inequality facing citizens in modern society. It also explores exceptions and deviations from transcendental and universalist assumptions of contemporary theories of justice and studies movements and expressions of dissent and alternative structures and paradigms of conceptualizing justice. This book will be useful for scholars and researchers of political theory, political sociology, political studies, sociology, social theory, post-colonial theory and exclusion studies.

Spheres of Injustice

In March 2015, a group of experts from four continents and a wide range of disciplines met with the leading African American writer Ishmael Reed in Mulhouse, France, and Basel, Switzerland. Guided by Swiss cultural and literary theorist Sāmi Ludwig, and deliberately migrating back and forth across a political border in the heart of Europe, they not only listened to Reed and discussed his work, but also looked more widely at the different meanings assigned to “multiculturalism” in the United States, Europe, and other parts of the world. This volume brings together their reflections.

Political Sociology – The State of the Art

India's growing economic and socio-political importance on the global stage has triggered an increased interest in the country. This Handbook is a reference guide, which surveys the current state of Indian politics and provides a basic understanding of the ways in which the world's largest democracy functions. The Handbook is structured around four main topics: political change, political economy, the diversity of regional development, and the changing role of India in the world. Chapters examine how and why democracy in India put down firm roots, but also why the quality of governance offered by India's democracy continues to be low. The acceleration of economic growth since the mid-1980s is discussed, and the Handbook goes on to look at the political and economic changes in selected states, and how progress across Indian states continues to be uneven. It concludes by touching on the issue of India's international relations, both in South Asia and the wider world. The Handbook offers an invigorating initiation into the seemingly daunting and complex terrain of Indian politics. It is an invaluable resource for academics, researchers, policy analysts, graduate and undergraduate students studying Indian politics.

Routledge Handbook of Indian Politics

Human liberation has become an epochal challenge in today's world, requiring not only emancipation from oppressive structures but also from the oppressive self. It is a multidimensional struggle and aspiration in which knowledge – self, social and spiritual – can play a transformative role. 'Knowledge and Human Liberation: Towards Planetary Realizations' undertakes such a journey of transformation, and seeks to rethink knowledge vis-à-vis the familiar themes of human interest, critical theory, enlightenment, ethnography, democracy, pluralism, rationality, secularism and cosmopolitanism. The volume also features a Foreword by John Clammer (United Nations University, Tokyo) and an Afterword by Fred Dallmayr (University of Notre Dame).

Knowledge and Human Liberation

It sheds light on Indian narratives of secularity - Gandhian sarva dharma samabhava, Nehruvian secularism and Gandhi-Nehru tradition.

The Secular Imaginary

This book highlights the relationship between the state and religion in India and Europe. It problematizes the idea of secularism and questions received ideas about secularism. It also looks at how Europe and India can learn from each other about negotiating religious space and identity in this globalised post-9/11 world.

Secularism, Religion, and Politics

This volume focuses on policies that will help transform the world into a better place in which to live. It draws from various methodologies across different disciplines pertaining to humanities, social, economic, political and life sciences. The book showcases certain case studies of Jesuit education which helps in providing for a sustainable future through compassion and cooperation. Each individual chapter, being non-technical in nature, provides a thorough synthesis and understanding of the research strand pioneered by its respective author.

Transforming Our World Together towards Sustainable Development

Designed as a standard text for undergraduate and postgraduate students of Political Science and also for the aspirants of Civil Services Examinations, the third edition of the book provides a thoroughly updated account of Indian politics, taking into consideration the Indian constitutional foundations and functioning of the various democratic institutions. It gives a holistic view of the political system of India that includes the State, Government (both central and state governments), the market, and the civil society, including infrastructures like the party systems in the nation and the states that are partly in the civil society and partly in the state. NEW TO THIS EDITION • All new developments in the working of the institutions of the various organs of the governments at the Union, State, and local levels in their internal as well as interactional settings. • Perspective of governance that demands attention to

relationships among the governments, the civil society, and the market which have acquired a new salience since the parameter-altering economic reforms in 1991 but have suffered some reverses since 2008, a phenomenon known as slowbalization or deglobalization. • New phase in Indian politics with Narendra Modi government at the centre since 2014. TARGET AUDIENCE • B.A. (Political Science) • M.A. (Political Science) • Aspirants of Civil Services Examinations

INDIAN POLITICS

Long recognized as one of the main branches of political science, political theory has in recent years burgeoned in many different directions. Close textual analysis of historical texts sits alongside more analytical work on the nature and normative grounds of political values. Continental and post-modern influences jostle with ones from economics, history, sociology, and the law. Feminist concerns with embodiment make us look at old problems in new ways, and challenges of new technologies open whole new vistas for political theory. This Handbook provides comprehensive and critical coverage of the lively and contested field of political theory, and will help set the agenda for the field for years to come. Forty-five chapters by distinguished political theorists look at the state of the field, where it has been in the recent past, and where it is likely to go in future. They examine political theory's edges as well as its core, the globalizing context of the field, and the challenges presented by social, economic, and technological changes.

Globalization and the Millennium Development Goals

The realm of higher education, much like everything else in a global and mobile world, has rapidly altered in the last few decades. More and more universities and seats of higher education are using strategies towards 'internationalization'; by increasing heterogeneity in rank, student composition, resource endowments, faculty profiles, and their social spaces. The essays in this volume take a critical look at universities across South Asia, more specifically, at the dynamics of student mobility and mobilizations existing in such localized social spaces, and compares these with their counterparts in universities across the world. While elite universities in South Asia, as elsewhere, have been caught in a stiff international competition and are aspiring for the highest ranks, students from the most excluded communities and remote parts of the country seek entry to badly endowed universities, facing obstacles during their courses, and upon seeking entry into employment. The volume evaluates such universities as spaces for mobility opportunity and mobilizations in a globally networked world. It combines local and international perspectives with thorough observations of the dynamics in localized university spaces while embedding them in transnational processes.

Universities As Transformative Social Spaces

It is a political study of the controversy surrounding the issue of the uniform civil code vis-à-vis personal laws from a South Asian perspective. At the centre of the debate is whether there should be a centralized view of the legal system in a given society or a decentralized view, both horizontally and vertically. This issue is entangled within the threads of identity politics, minority rights, women's rights, national integration, global Islamic politics and universal human rights. Champions of each category view it through their own prisms, making the debate extremely complex, especially in politically and socially plural South Asia. So, this book attempts to harmonize the threads of the debate to provide a holistic political analysis.

Resurgence of Nationalism

Inquiries into marital patterns can serve as an effective lens to analyze social structures and material cultures not only on the question of sexuality, but also on the nature of a private citizen's engagement with state and law. Through ethnographic research in courtrooms, community, and kinship spaces, the author outlines the transformations in material culture and political economy that have led to renewed negotiations on the institution of marriage in North India, especially in legal spaces. Tracing organically evolving notions of sexual consent and legal subjectivity, *Courting Desire* underlines how non-normative decisions regarding marriage become possible in a region otherwise known for high instances of honor killings and rigid kinship structures. Aspirations for consensual relationships have led

to a tentative attempt to forge relationships that are non-normative but grudgingly approved after state intervention. The book traces this nascent and under-explored trend in the North Indian landscape.

The Politics of Personal Law in South Asia

This book is a collection of 13 articles which grew out of a workshop on federalism and democratisation in Asia. But, unlike a great many of the publications which have their origins in conferences, this volume has a clear theme running through its contributions, almost all of which are excellent. . . The individual country studies. . . are highly informative, most making imaginative use of the country's history and current politics to illustrate the theme of the tension between nationalising centralisation and pressures for regional decentralisation. Many of these chapters have innovative conclusions about ways in which this tension can be understood. . . this is a serious book, very well produced and indexed. Its chapters are well written with useful notes and lists of references. The volume will be of great interest to specialists on the countries concerned, and has much to offer for anyone with an interest in federalism and the relationship between regionalism and democratisation. Campbell Sharman, *The Australian Journal of Public Administration* Federalism in Asia provides a valuable resource, both for scholars of Asia in general and for political theorists of federalism. In an academic climate where edited volumes are often assumed to be a lightweight option, *Federalism in Asia* demonstrates how rewarding this form of publication can be. Graham K. Brown, *Political Studies Review* Until now there have been few attempts to examine the different models of federalism appropriate in Asia, let alone to trace the extent to which these different perspectives are compatible, converging, or mutually influencing each other. This book redresses the balance by demonstrating the varieties of Asian federalism. *Federalism in Asia* explores the range of theoretical perspectives that shape debates over federalism in general, and over territorial, multinational, hybrid, and asymmetric federalism in particular relation to Asia. The contributors share their understanding of how federal or quasi-federal institutions manage ethnic conflicts and accommodate differences, how democratization facilitates the development of federalism and how federalism facilitates or inhibits democratization in Asia. Their conclusion is that hybrid federalism or quasi-federalism is more prevalent in some Asian countries than others; and the need and potential for greater federalism in more Asian countries makes this sortie into this area worthwhile. While federalism is relevant to Asia, the working pattern of Asian federalism does not necessarily follow a Western style. Hybrid federal institutional design can be seen as an Asian strategy of managing ethnic conflicts through federal arrangements. This unique book will be of great interest to a wide range of scholars and researchers who work on issues of federalism, political economy, public policy, ethnic relations, cultural diversity and democratization in the Asian region. Policymakers and activists dealing with issues of minority rights and ethnic conflict in the region, government officials and NGOs within Asia, and officials in international agencies and organizations will also find much to engage them.

Courting Desire

This book analyses the problematique of governance and administration of cultural diversity within the modern state of Afghanistan and traces patterns of national integration. It explores state construction in twentieth-century Afghanistan and Afghan nationalism, and explains the shifts in the state's policies and societal responses to different forms of governance of cultural diversity. The book problematizes liberalism, communitarianism, and multiculturalism as approaches to governance of diversity within the nation-state. It suggests that while the western models of multiculturalism have recognized the need to accommodate different cultures, they failed to engage with them through intercultural dialogue. It also elaborates the challenge of intra-group diversity and the problem of accommodating individual choice and freedom while recognising group rights and adoption of multiculturalism. The book develops an alternative approach through synthesising critical multiculturalism and interculturalism as a framework on a democratic and inclusive approach to governance of diversity. A major intervention in understanding a war-torn country through an insider account, this book will be of great interest to scholars and researchers of politics and international relations, especially those concerned with multiculturalism, state-building, nationalism, and liberalism, as well as those in cultural studies, history, Afghanistan studies, South Asian studies, Middle East studies, minority studies, and to policymakers.

Federalism in Asia

This book critically reviews state-religion models and the ways in which different countries manage religious diversity, illuminating different responses to the challenges encountered in accommodating

both majorities and minorities. The country cases encompass eight world regions and 23 countries, offering a wealth of research material suitable to support comparative research. Each case is analysed in depth looking at historical trends, current practices, policies, legal norms and institutions. By looking into state-religion relations and governance of religious diversity in regions beyond Europe, we gain insights into predominantly Muslim countries (Egypt, Morocco, Tunisia, Turkey, Indonesia, Malaysia), countries with pronounced historical religious diversity (India and Lebanon) and into a predominantly migrant pluralist nation (Australia). These insights can provide a basis for re-thinking European models and learning from experiences of governing religious diversity in other socio-economic and geopolitical contexts. Key analytical and comparative reflections inform the introduction and concluding chapters. This volume offers a research and study companion to better understand the connection between state-religion relations and the governance of religious diversity in order to inform both policy and research efforts in accommodating religious diversity. Given its accessible language and further readings provided in each chapter, the volume is ideally suited for undergraduate and graduate students. It will also be a valuable resource for researchers working in the wider field of ethnic, migration, religion and citizenship studies.

Central European Political Science Review

Adopting a historical conceptual approach, this book examines the gendering of citizenship. It argues that through successive historical periods, 'becoming a citizen has involved a gradual extension of the status, to more and more persons and groups, in particular, women, which resulted in a more inclusive and egalitarian structure. But, the promise of equal membership in the political community masks the exclusionary framework that defines citizenship as found in caste hierarchies, gender differences, and divides between religious communities based on majority and minority status. Engaging with contemporary debates on citizenship that place themselves within the framework of multiculturalism and world citizenship this work asserts the need to redefine the notion of community by focussing on citizenship as a measure of activity and practice, and by exposing the subtleties of role definition of women implicit in community norms.

Gendered Citizenship

Central to discussions of multiculturalism and minority rights in modern liberal societies is the idea that the particular demands of minority groups contradict the requirements of equality, anonymity, and universality for citizenship and belonging. The contributors to this volume question the significance of this dichotomy between the universal and the particular, arguing that it reflects how the modern state has instituted the basic rights and obligations of its members and that these institutions are undergoing fundamental transformations under the pressure of globalization. They show that the social bonds uniting groups constitute the means of our freedom, rather than obstacles to achieving the universal.

Journal of Social and Economic Development

How, and to what extent, can religion be included within commitments to multiculturalism? Multiculturalism and Religious Identity addresses this question by examining the political recognition and management of religious identity in Canada and India. In multicultural policy, practice, and literature, religion has until recently not been included within broader discussions of multiculturalism, perhaps due to worries of potential for conflict with secularism. This collection undertakes a contemporary analysis of how the Canadian and Indian states each approach religious diversity through social and political policies, as well as how religion and secularism meet both philosophically and politically in contested public space. Although Canada and India have differing political and religious histories - leading to different articulations of multiculturalism, religious diversity, and secularism - both countries share a commitment to ensuring fair treatment for the different religious communities they include. Combining broader theoretical and normative reflections with close case studies, Multiculturalism and Religious Identity leads the way to addressing these timely issues in the Canadian and Indian contexts.

Multiculturalism

This book aims at analysing the fiction produced by the expatriate Parsee writers of the Indian subcontinent: Bapsi Sidhwa, Rohinton Mistry and Boman Desai. These Parsee writers of the South Asian origin have emigrated to Canada and USA in the latter part of the twentieth century. Their works offer several possibilities seen from the multicultural point of view. The fiction of these Parsee diasporic writers examines the problem of migration, relocation and changing identities from a vantage point of distance gained by an insider's view of their community and an outsider's view from the host country. Dislocations, even when voluntary, always have a traumatic side to it due to the process of acculturation, assimilation into or differences with the host country and the issue of rights and privileges in the new location. For the diasporic communities of different backgrounds, their memory, history and cultural beliefs are the important factors that determine their identities. These Parsee novels demonstrate how individual and group/collective identities of the Parsees get constructed and reconstructed/redefined against the changing multinational contexts.

Multiculturalism and Religious Identity

The impasse currently affecting human rights as a language used to express struggles for dignity is, to a large extent, a reflection of the epistemological and political exhaustion which blights the global North. Since the global hegemony of human rights as a language for human dignity is nowadays incontrovertible, the question of whether it can be used in a counter-hegemonic sense remains open. Inspired by struggles from all corners of the world that reveal the potential but, above all, the limitations of human rights, this book offers a highly conditional response. The prevailing notion of human rights today, as the hegemonic language of human dignity, can only be resignified on the basis of answers to simple questions: why does so much unjust human suffering exist that is not considered a violation of human rights? Do other languages of human dignity exist in the world? Are these other languages compatible with the language of human rights? Obviously, we can only find satisfactory answers to these questions if we are able to envisage a radical transformation of what is nowadays known as human rights. Herein lies the challenge posed by the Epistemologies of the South: reconciling human rights with the different languages and forms of knowledge born out of struggles for human dignity.

Multiculturalism and Identity Politics

This volume explores the different ways that ethnic and religious diversity is conceptualized and debated in South and East Asia. In the first few decades following decolonization, talk of multiculturalism and pluralism was discouraged, as states attempted to consolidate themselves as unitary and homogenizing nation-states. Today, however, it is widely recognized that states in the region must come to terms with the enduring reality of ethnic and religious cleavages, and find new ways of accommodating and respecting diversity. As a result, many countries are now debating policies to accommodate minorities, including recognition of indigenous rights, minority language rights, consociational power-sharing, regional autonomy, and multination federalism. This is often described as a key ingredient in any process of democratization in the region. One manifestation of this new ethos is the growing rhetoric of 'multiculturalism', often imported from the West. And indeed Western models of minority rights have had an influence in many Asian countries, often promoted by international organizations. However, Asian societies also have their own traditions of peaceful coexistence amongst linguistic and religious groups. All of the major ethical and religious traditions in the region - from Confucian and Buddhist to Islamic and Hindu - have their own conceptions of tolerance, and their own recipes for sustaining unity amidst diversity. These traditions continue to shape people's beliefs and practices in the region. Even the distinctive conception of Marxism developed in the region provides an influential perspective on these issues not found in the West. The rhetoric of 'multiculturalism' may be ubiquitous around the world, but it is being used to express quite different ideas and norms. Using both case studies and thematic essays, this volume examines the pre-colonial traditions, colonial legacies, and post-colonial ideologies that influence contemporary debates on multiculturalism in the region. It explores the areas

of convergence and divergence between these different perspectives, and the extent to which they provide viable frameworks for managing ethnic and religious diversity in the region.

Nepal, Democracy at Cross Roads

This book examines the politics of social, cultural and political recognition of caste groups in North India. It explores the factors that make some castes politically influential, while others continue to remain socially and economically marginalized. The author situates these groups within democracy and utilizes a multicultural framework to understand why and when various castes have sought to achieve recognition and redistributive justice; to what extent different castes have been able to achieve these goals; and how civil society has engaged with these issues. Unlike dominant discourses on caste and democracy, which give primacy to electoral/procedural democracy over the substantive one, this book views the relationship between castes and the state in both dimensions of democracy. An important addition to the study of caste politics in India, the volume will be of great interest to scholars and researchers of social exclusion, development studies, minority studies, sociology and social policy, politics, and South Asian studies. It will also be of importance to politicians, policy makers, and civil society activists.
