From a New England Woman's Diary in Dixie in 1865

From a New England Woman'S Diary in Dixie in 1865 by Mary Ames, first published in 1906, is a rare manuscript, the original residing in one of the great libraries of the world. This book is a reproduction of that original, which has been scanned and cleaned by state-of-the-art publishing tools for better readability and enhanced appreciation. Restoration Editors' mission is to bring long out of print manuscripts back to life. Some smudges, annotations or unclear text may still exist, due to permanent damage to the original work. We believe the literary significance of the text justifies offering this reproduction, allowing a new generation to appreciate it.

From a New England Woman's Diary in Dixie in 1865

This is the account of a teacher who served with the Freedman's Bureau on Edisto Island off South Carolina.

From a New England Woman's Diary in Dixie in 1865 (Expanded, Annotated)

Far from the typical view of Reconstruction in the American South, many well-meaning Yankees went to Dixie after the war to offer help. Mary Ames was one of them. The guns had barely silenced when in May of 1865, wealthy young Northerners, Mary Ames and Emily Bliss, volunteered with the Freedman's Bureau to teach newly emancipated blacks. This diary is the story of that journey. They had quite an adventure, living in abandoned plantation mansions and meeting the leaders of the Freedmen's Bureau, including General O.O. Howard.

From a New England Woman's Diary in Dixie in 1865 (Classic Reprint)

Excerpt from From a New England Woman's Diary in Dixie in 1865 Some of Miss Ames's friends, who have enjoyed listening to the stories of her southern school life, have frequently begged her to print them. This opportunity of helping to educate a pupil in that wonderful school, which is so great a contrast to the scene of her early efforts, has decided her to allow the diary to be prepared for publication. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.

FROM A NEW ENGLAND WOMANS DIAR

This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

FROM A NEW ENGLAND WOMANS DIAR

This is a reproduction of a book published before 1923. This book may have occasional imperfections such as missing or blurred pages, poor pictures, errant marks, etc. that were either part of the original artifact, or were introduced by the scanning process. We believe this work is culturally important, and despite the imperfections, have elected to bring it back into print as part of our continuing commitment to the preservation of printed works worldwide. We appreciate your understanding of the imperfections in the preservation process, and hope you enjoy this valuable book.

From a New England Woman's Diary in Dixie in 1865 - Scholar's Choice Edition

Children--white and black, northern and southern--endured a vast and varied range of experiences during the Civil War. Children celebrated victories and mourned defeats, tightened their belts and widened their responsibilities, took part in patriotic displays and suffered shortages and hardships, fled their homes to escape enemy invaders and snatched opportunities to run toward the promise of freedom. Offering a fascinating look at how children were affected by our nation's greatest crisis, James Marten examines their toys and games, their literature and schoolbooks, the letters they exchanged with absent fathers and brothers, and the hardships they endured. He also explores children's politicization, their contributions to their homelands' war efforts, and the lessons they took away from the war. Drawing on the childhoods of such diverse Americans as Jane Addams, Booker T. Washington, and Theodore Roosevelt, and on sources that range from diaries and memoirs to children's "amateur newspapers," Marten examines the myriad ways in which the Civil War shaped the lives of a generation of American children. "An original-minded, skillfully and suggestively presented history, haunting in its detailed unfolding of a war that put so many already vulnerable youngsters in danger, but elicited from some of them, as well, impressively sensitive, responsive thoughts, gestures, and deeds in what became, as this extraordinary book's title insists, their civil war.--Journal of American History "James Marten's thoroughly researched and engagingly written study . . . stands as one of the most exciting studies to emerge in the last dozen years. . . . Marten has taken a topic ignored by both Civil War historians and historians of childhood and crafted an engaging, masterful, nuanced, and readable study that will not quickly leave the reader's mind or heart.--American Studies "The first comprehensive account of Civil War children. . . . Thoroughly researched and nicely illustrated, *The Children's Civil War* will be a touchstone for historians and generalists who seek to gain a fuller understanding of life on the home front between 1861 and 1865.--Civil War History *The Children's Civil War* is a poignant and fascinating look at childhood during our nation's greatest crisis. Using sources that include diaries, memoirs, and letters, James Marten examines the wartime experiences of young people--boys and girls, black and white, northern and southern--and traces the ways in which the Civil War shaped the lives of a generation of American children. -->

From a New England Woman's Diary in Dixie in 1865 - Primary Source Edition

In antebellum America, both North and South emerged as modernizing, capitalist societies. Work bells, clock towers, and personal timepieces increasingly instilled discipline on one's day, which already was ordered by religious custom and nature's rhythms. The Civil War changed that, argues Cheryl A. Wells. Overriding antebellum schedules, war played havoc with people's perception and use of time. For those closest to the fighting, the war's effect on time included disrupted patterns of sleep, extended hours of work, conflated hours of leisure, indefinite prison sentences, challenges to the gender order, and desecration of the Sabbath. Wells calls this phenomenon "battle time." To create a modern war machine military officers tried to graft the antebellum authority of the clock onto the actual

and mental terrain of the Civil War. However, as Wells's coverage of the Manassas and Gettysburg battles shows, military engagements followed their own logic, often without regard for the discipline imposed by clocks. Wells also looks at how battle time's effects spilled over into periods of inaction, and she covers not only the experiences of soldiers but also those of nurses, prisoners of war, slaves, and civilians. After the war, women returned, essentially, to an antebellum temporal world, says Wells. Elsewhere, however, postwar temporalities were complicated as freedmen and planters, and workers and industrialists renegotiated terms of labor within parameters set by the clock and nature. A crucial juncture on America's path to an ordered relationship to time, the Civil War had an acute effect on the nation's progress toward a modernity marked by multiple, interpenetrating times largely based on the clock.

The Children's Civil War

Explains the history and development of African American religion and theology from the time of slavery until the 21st century.

Civil War Time

Few readers of Margaret Mitchell's *Gone with the Wind* remained unmoved by how the strong-willed Scarlett O'Hara tried to rebuild Tara after the Civil War ended. This book examines the problems that Southern women faced during the Reconstruction Era, in Part I as mothers, wives, daughters or sisters of men burdened with financial difficulties and the radical Republican regime, and in Part II with specific illustrations of their tribulations through the letters and diaries of five different women. A lonely widow with young children, Sally Randle Perry is struggling to get her life back together, following the death of her husband in the war. Virginia Caroline Smith Aiken, a wife and mother, born into affluence and security, struggles to emerge from the financial and psychological problems of the postwar world. Susan Darden, also a wife and mother, details the uncertainties and frustrations of her life in Fayette, Mississippi. Jo Gillis tells the sad tale of a young mother straining to cope with the depressed circumstances enveloping most ministers in the aftermath of the war. As the wife of a Methodist Episcopal minister in the Alabama Conference she sacrifices herself into an early grave in an attempt to further her husband's career. Inability to collect a debt three times that of the \$10,000 debt her father owed brought Anna Clayton Logan, her eleven brothers and sisters, and her parents face-to-face with starvation.

Down by the Riverside

Between 1492 and 1820, about two-thirds of the people who crossed the Atlantic to the Americas were Africans. With the exception of the Spanish, all the European empires settled more Africans in the New World than they did Europeans. The vast majority of these enslaved men and women worked on plantations, and their labor was the foundation for the expansion of the Atlantic economy during the seventeenth and eighteenth centuries. Until relatively recently, comparatively little attention was paid to the perspectives, daily experiences, hopes, and especially the political ideas of the enslaved who played such a central role in the making of the Atlantic world. Over the past decades, however, huge strides have been made in the study of the history of slavery and emancipation in the Atlantic world. This collection brings together some of the key contributions to this growing body of scholarship, showing a range of methodological approaches, that can be used to understand and reconstruct the lives of these enslaved people.

All Things Altered

Divided Houses is the first book to show how the Civil War transformed gender roles and attitudes toward sexuality among Americans. This unique volume brings together a wide spectrum of critical viewpoints by newly emerging scholars as well as distinguished authors in the field to show how gender became a prism through which the political tensions of antebellum America were filtered and focused. Through the course of the book, many fascinating subjects are explored, from new "manly" responsibilities both black and white men had thrust upon them as soldiers, to women's roles in the guerrilla fighting, to the wartime dialogue on interracial sex. In addition, an incisive introduction by Pulitzer Prize-winning historian James McPherson helps place these various subjects within an overall historical context. *Divided House* sheds new light on the entire Civil War experience, demonstrating how themes of gender, class, race, and sexuality interacted to forge the beginnings of a new society.

Origins of the Black Atlantic

Informing current discussions about the growing gap between rich and poor in the United States, *The Lost Tradition of Economic Equality in America* is surprising and enlightening.

Divided Houses

Well-researched compilation of music information, analyzes nearly 1,000 of the world's most familiar melodies -- composers, lyricists, copyright date, first lines of music, lyrics, and other data. Includes 30 black-and-white illustrations.

Hampton Institute: Hampton, VA A Classified Catalog of the Negro Collection in the Collis P. Huntington Library

Gathers diary selections, describes the historical background of each writer, and discusses the changing function and content of diaries.

The Lost Tradition of Economic Equality in America, 1600–1870

In *The Claims of Kinfolk*, Dylan Penningroth uncovers an extensive informal economy of property ownership among slaves and sheds new light on African American family and community life from the heyday of plantation slavery to the "freedom generation" of the 1870s. By focusing on relationships among blacks, as well as on the more familiar struggles between the races, Penningroth exposes a dynamic process of community and family definition. He also includes a comparative analysis of slavery and slave property ownership along the Gold Coast in West Africa, revealing significant differences between the African and American contexts. Property ownership was widespread among slaves across the antebellum South, as slaves seized the small opportunities for ownership permitted by their masters. While there was no legal framework to protect or even recognize slaves' property rights, an informal system of acknowledgment recognized by both blacks and whites enabled slaves to mark the boundaries of possession. In turn, property ownership--and the negotiations it entailed--influenced and shaped kinship and community ties. Enriching common notions of slave life, Penningroth reveals how property ownership engendered conflict as well as solidarity within black families and communities. Moreover, he demonstrates that property had less to do with individual legal rights than with constantly negotiated, extralegal social ties.

The Era of the Civil War--1820-1876

This book examines social, political, and cultural conflicts opened by the abolition of slavery and the fashioning of wage relations in the era of the American Civil War. It offers a new, close look at the origins, goals, and tactics of popular political clubs created by emancipated workers in the countryside of one of the Deep South's oldest plantation states. *The Work of Reconstruction* draws on a rich documentary record that allowed ex-slaves to express in their own words and behavior the aspirations and goals that underlay their efforts. Not satisfied to render freed men and women as objects of theoretical inquiry, this book vividly recovers the concrete practices and language in which ex-slaves achieved freedom and the expectations that they had of liberty.

The Book of World-famous Music

Until the early nineteenth century, "risk" was a specialized term: it was the commodity exchanged in a marine insurance contract. *Freaks of Fortune* tells the story of how the modern concept of risk emerged in the United States. Born on the high seas, risk migrated inland and became essential to the financial management of an inherently uncertain capitalist future. Focusing on the hopes and anxieties of ordinary people, Jonathan Levy shows how risk developed through the extraordinary growth of new financial institutions--insurance corporations, savings banks, mortgage-backed securities markets, commodities futures markets, and securities markets--while posing inescapable moral questions. For at the heart of risk's rise was a new vision of freedom. To be a free individual, whether an emancipated slave, a plains farmer, or a Wall Street financier, was to take, assume, and manage one's own personal risk. Yet this often meant offloading that same risk onto a series of new financial institutions, which together have only recently acquired the name "financial services industry." Levy traces the fate of a new vision of personal freedom, as it unfolded in the new economic reality created by the American financial system. Amid the nineteenth-century's waning faith in God's providence, Americans increasingly confronted unanticipated challenges to their independence and security in the boom and

bust chance-world of capitalism. *Freaks of Fortune* is one of the first books to excavate the historical origins of our own financialized times and risk-defined lives.

A Day at a Time

The Port Royal Experiment builds on classic scholarship to present not a historical narrative but a study of what is now called development and nation-building. The Port Royal Experiment was a joint governmental and private effort begun during the Civil War to transition former slaves to freedom and self-sufficiency. Port Royal Harbor and the Sea Islands off the coast of South Carolina were liberated by Union Troops in 1861. As the Federal advance began, the white plantation owners and residents fled, abandoning approximately 10,000 black slaves. Several private Northern charity organizations stepped in to help the former slaves become self-sufficient. Nonetheless, the Point Royal Experiment was only a mixed success and was contested by efforts to restore the status quo of white dominance. Return to home rule then undid much of what the experiment accomplished. While the concept of development is subject to a range of interpretations, in this context it means positive, continuously improving, and sustained change across a variety of human social conditions. Clearly such an effort was at the heart of the Port Royal Experiment. While the term "nation-building" may seem misplaced given that no "nation" was the beneficiary of these efforts, the requirement to build institutions critical to nation-building operations was certainly a large part of the Port Royal Experiment and offers many lessons for modern efforts at nation building. The Port Royal Experiment divides into ten chapters, each of which is designed to treat a particular aspect of the experience. Topics include planning considerations, philanthropic society activity, civil society, economic development, political development, and resistance. Each chapter presents the case study in the context of more recent developmental and nation-building efforts in such places as Bosnia, Somalia, Kosovo, Iraq, and Afghanistan and incorporates recent scholarship in the field. Modern readers will see that the challenges that faced the Port Royal Experiment remain relevant, even as their solutions remain elusive.

The Claims of Kinfolk

This book is a volume in the Penn Press Anniversary Collection. To mark its 125th anniversary in 2015, the University of Pennsylvania Press rereleased more than 1,100 titles from Penn Press's distinguished backlist from 1899-1999 that had fallen out of print. Spanning an entire century, the Anniversary Collection offers peer-reviewed scholarship in a wide range of subject areas.

The Work of Reconstruction

Schools for All provides the first in-depth study of black education in Southern public schools and universities during the twelve-year Reconstruction period which followed the Civil War. In the antebellum South, the teaching of African Americans was sporadic and usually in contravention to state laws. During the war, Northern religious and philanthropic organizations initiated efforts to educate slaves. The army, and later the Freedmen's Bureau, became actively involved in freed-men's education. By 1870, however, a shortage of funds for the work forced the bureau to cease its work, at which time the states took over control of the African American schools. In an extensive study of records from the period, William Preston Vaughn traces the development—the successes as well as the failures—of the early attempts of the states to promote education for African Americans and in some instances to establish integration. While public schools in the South were not an innovation of Reconstruction, their revitalization and provision to both races were among the most important achievements of the period, despite the pressure from whites in most areas which forced the establishment of segregated education. Despite the ultimate failure to establish an integrated public school system anywhere in the South, many positive achievements were attained. Although the idealism of the political Reconstructionists fell short of its immediate goals in the realm of public education, precedents were established for integrated schools, and the constitutional revisions achieved through the Fourteenth and Fifteenth amendments laid the groundwork for subsequent successful assaults on segregated education.

Freaks of Fortune

Americans in the early 19th century were, as one foreign traveller bluntly put it, "filthy, bordering on the beastly"—perfectly at home in dirty, bug-infested, malodorous surroundings. Many a home swarmed with flies, barnyard animals, dust, and dirt; clothes were seldom washed; men hardly ever shaved or bathed. Yet gradually all this changed, and today, Americans are known worldwide for their obsession with cleanliness—for their sophisticated plumbing, daily bathing, shiny hair and teeth, and spotless

clothes. In *Chasing Dirt*, Suellen Hoy provides a colorful history of this remarkable transformation from "dreadfully dirty" to "cleaner than clean," ranging from the pre-Civil War era to the 1950s, when American's obsession with cleanliness reached its peak. Hoy offers here a fascinating narrative, filled with vivid portraits of the men and especially the women who helped America come clean. She examines the work of early promoters of cleanliness, such as Catharine Beecher and Sylvester Graham; and describes how the Civil War marked a turning point in our attitudes toward cleanliness, discussing the work of the U.S. Sanitary Commission, headed by Frederick Law Olmsted, and revealing how the efforts of Florence Nightingale in the Crimean War inspired American women--such as Dorothea Dix, Clara Barton, and Louisa May Alcott--to volunteer as nurses during the war. We also read of the postwar efforts of George E. Waring, Jr., a sanitary engineer who constructed sewer systems around the nation and who, as head of New York City's street-cleaning department, transformed the city from the nation's dirtiest to the nation's cleanest in three years. Hoy details the efforts to convince African-Americans and immigrants of the importance of cleanliness, examining the efforts of Booker T. Washington (who preached the "gospel of the toothbrush"), Jane Addams at Hull House, and Lillian Wald at the Henry Street Settlement House. Indeed, we see how cleanliness gradually shifted from a way to prevent disease to a way to assimilate, to become American. And as the book enters the modern era, we learn how advertising for soaps, mouth washes, toothpastes, and deodorants in mass-circulation magazines showed working men and women how to cleanse themselves and become part of the increasingly sweatless, odorless, and successful middle class. Shower for success! By illuminating the historical roots of America's shift from "dreadfully dirty" to "squeaky clean," *Chasing Dirt* adds a new dimension to our understanding of our national culture. And along the way, it provides colorful and often amusing social history as well as insight into what makes Americans the way we are today.

The Port Royal Experiment

From *Gone with the Wind* to *Designing Women*, images of southern females that emerge from fiction and film tend to obscure the diversity of American women from below the Mason-Dixon line. In a work that deftly lays bare a myriad of myths and stereotypes while presenting true stories of ambition, grit, and endurance, Margaret Ripley Wolfe offers the first professional historical synthesis of southern women's experiences across the centuries. In telling their story, she considers many ordinary lives—those of Native-American, African-American, and white women from the Tidewater region and Appalachia to the Mississippi Delta to the Gulf Coastal Plain, women whose varied economic and social circumstances resist simple explanations. Wolfe examines critical eras, outstanding personalities and groups—wives, mothers, pioneers, soldiers, suffragists, politicians, and civil rights activists—and the impact of the passage of time and the pressure of historical forces on the region's females. The historical southern woman, argues Wolfe, has operated under a number of handicaps, bearing the full weight of southern history, mythology, and legend. Added to these have been the limitations of being female in a patriarchal society and the constraining images of the "southern belle" and her mentor, the "southern lady." In addition, the specter of race has haunted all southern women. Gender is a common denominator, but according to Wolfe, it does not transcend race, class, point of view, or a host of other factors. Intrigued by the imagery as well as the irony of biblical stories and southern history, Wolfe titles her work *Daughters of Canaan*. Canaan symbolizes promise, and for activist women in particular the South has been about promise as much as fulfillment. General readers and students of southern and women's history will be drawn to Wolfe's engrossing chronicle.

A History of the Freedmen's Bureau

Discusses the relationship between workers and the government by focusing not on the legal regulation of unions and strikes, but on popular struggles for citizenship rights.

Schools for All

Presents the history of slavery in America from colonial times through the U.S. Civil War.

Chasing Dirt

Just seven months into the Civil War, a Union fleet sailed into South Carolina's Port Royal Sound, landed a ground force, and then made its way upriver to Beaufort. Planters and farmers fled before their attackers, allowing virtually all their major possessions, including ten thousand slaves, to fall into Union hands. *Rehearsal for Reconstruction*, winner of the Allan Nevins Prize, the Francis Parkman Prize, and the Charles S. Sydnor Prize, is historian Willie Lee Rose's chronicle of change in this Sea

Island region from its capture in 1861 through Reconstruction. With epic sweep, Rose demonstrates how Port Royal constituted a stage upon which a dress rehearsal for the South's postwar era was acted out.

The Tradition of Women's Autobiography

In this study the author examines how, in the Civil War-era South, newly freed African Americans used their experiences with death from war, disease, and racial violence to advance their own understanding of the meaning of freedom and to stake claims to citizenship, civil rights, and racial justice from the federal government.

Daughters Of Canaan

A valuable collection of folk music and lore from the Gullah culture, *Slave Songs of the Georgia Sea Islands* preserves the rich traditions of slave descendants on the barrier islands of Georgia by interweaving their music with descriptions of their language, religious and social customs, and material culture. Collected over a period of nearly twenty-five years by Lydia Parrish, the sixty folk songs and attendant lore included in this book are evidence of antebellum traditions kept alive in the relatively isolated coastal regions of Georgia. Over the years, Parrish won the confidence of many of the African-American singers, not only collecting their songs but also discovering other elements of traditional culture that formed the context of those songs. When it was first published in 1942, *Slave Songs of the Georgia Sea Islands* contained much material that had not previously appeared in print. The songs are grouped in categories, including African survival songs; shout songs; ring-play, dance, and fiddle songs; and religious and work songs. In additions to the lyrics and melodies, *Slave Songs* includes Lydia Parrish's explanatory notes, character sketches of her informants, anecdotes, and a striking portfolio of photographs. Reproduced in its original oversized format, *Slave Songs of the Georgia Sea Islands* will inform and delight students and scholars of African-American culture and folklore as well as folk music enthusiasts.

Citizen Worker

This bibliography of writing by and about African-American women provides a much needed research tool to scholars and researchers in the field. The bibliography lists writing by African-American women whose earliest publication appeared before 1910; a supplemental bibliography lists writing published as of 1911.

Slavery in America

This book is ideal for any introductory American history instructor who wants to make the subject more appealing. It's designed to supplement a main text, and focuses on "personalized history" presented through engaging biographies of famous and less-well-known figures from the colonial period to 1877. Historical patterns and trends appear as they are seen through individual lives, and the selection of the profiled individuals reflects a cultural awareness and a multicultural perspective.

Rehearsal for Reconstruction

Commentators from Bill Cosby to Barack Obama have observed the phenomenon of black schoolchildren accusing studious classmates of "acting white." How did this contentious phrase, with roots in Jim Crow-era racial discord, become a part of the schoolyard lexicon, and what does it say about the state of racial identity in the American system of education? The answer, writes Stuart Buck in this frank and thoroughly researched book, lies in the complex history of desegregation. Although it arose from noble impulses and was to the overall benefit of the nation, racial desegregation was often implemented in a way that was devastating to black communities. It frequently destroyed black schools, reduced the numbers of black principals who could serve as role models, and made school a strange and uncomfortable environment for black children, a place many viewed as quintessentially "white." Drawing on research in education, history, and sociology as well as articles, interviews, and personal testimony, Buck reveals the unexpected result of desegregation and suggests practical solutions for making racial identification a positive force in the classroom.

African Americans, Death, and the New Birth of Freedom

This book examines teaching as a gendered occupation from the perspectives of contemporary women teachers (ascertained through interviews and participant observation in two schools), and historical teachers (whose views are constructed through diaries and letters archived in libraries). Equally important, the book examines meanings about teachers that circulate in the culture through fiction, biography, and talk. "Synthetic and well written, with a fine sense of historical and empirical detail and an equally fine sense of what is at stake politically and educationally in education today. The book is an important contribution to our understanding of gender relations in education." —Michael W. Apple, The University of Wisconsin–Madison "This book is a valuable contribution to our understanding of the way conceptions of gender have shaped school practices." —Kathleen Weiler, Tufts University "Biklen's qualitative sources provide rich insights and her blend of sociology and history offers a fresh conceptual approach." —History of Education Quarterly

Slave Songs of the Georgia Sea Islands

This book offers a detailed and comprehensive guide to contemporary sources for research into the history of individual nineteenth-century U.S. communities, large and small. The book is arranged topically (covering demography, ethnicity and race, land use and settlement, religion, education, politics and local government, industry, trade and transportation, and poverty, health, and crime) and thus will be of great use to those investigating particular historical themes at national, state, or regional level. As well as examining a wide variety of types of primary sources, published and unpublished, quantitative and qualitative, available for the study of many places, the book also provides information on certain specific sources and some individual collections, in particular those of the National Archives.

The Pen is Ours

Conventional wisdom holds that freedmen's education was largely the work of privileged, single white northern women motivated by evangelical beliefs and abolitionism. Backed by pathbreaking research, Ronald E. Butchart's *Schooling the Freed People* shatters this notion. The most comprehensive quantitative study of the origins of black education in freedom ever undertaken, this definitive book on freedmen's teachers in the South is an outstanding contribution to social history and our understanding of African American education.

American Stories from 1865

Acting White
