Apple Farmer Annie

Annie the apple farmer saves her most beautiful apples to sell fresh at the farmers' market.

Apple Farmer Annie Board Book

A new format for a yummy fall favorite Filled with bright primary colors and pictures of America's favorite fruit, Wellington's enticing story follows Annie, a busy apple farmer. She picks, counts, sorts, bakes tasty treats, and sells her best apples. Already successful in hardcover and paperback, Apple Farmer Annie in board book format is one that young tots will find absolutely irresistible.

Ana Cultiva Manzanas / Apple Farmer Annie

A delicious treat about America's favorite fruit is now available in a Spanish bilingual format. Ana grows and sells apples, and she makes cider and applesauce and muffins. A glossary helps kids learn the names of Ana's delicious ingredients in both languages. With tie-ins to math and science curricula and units on autumn, this book will be especially welcomed by teachers. Truly the pick of the crop!

Houghton Mifflin Pre-K

Annie is a very busy apple farmer. She bakes yummy treats with the apples she picks and saves her most beautiful apples to sell fresh at the farmers' market. Includes three recipes using apples.

Apple Farmer Annie

Annie is a very busy apple farmer. She bakes yummy treats with the apples she picks and saves her most beautiful apples to sell fresh at the farmers' market. Includes three recipes using apples.

Children's Books in Print, 2007

The side-splittingly funny Newbery Honor Book about a rebellious boy who is sent to a home-schooling program run by one family—the creative, kooky, loud, and loving Applewhites! Jake Semple is notorious. Rumor has it he managed to get kicked out of every school in Rhode Island, and actually burned the last one down to the ground. Only one place will take him now, and that's a home school run by the Applewhites, a chaotic and hilarious family of artists: poet Lucille, theater director Randolph, dancer Cordelia, and dreamy Destiny. The only one who doesn't fit the Applewhite mold is E.D.—a smart, sensible girl who immediately clashes with the defiant Jake. Jake thinks surviving this new school will be a breeze . . . but is he really as tough or as bad as he seems?

Surviving the Applewhites

An American Farm Boy In Search Of Meaning “Life was so short that it meant nothing at all unless it were continually reinforced by something that endured; unless the shadows of individual existence came and went against a background that held together.” - Willa Cather, One of Ours Claude tries to escapes from his family firm grasp who want him pious and working at their family farm in Nebraska. He marries in his attempt to escape only to realize that his wife is not interested at all in him. That's when another opportunity arises: going overseas and fight for the American army in World War One. This Xist Classics edition has been professionally formatted for e-readers with a linked table of contents. This eBook also contains a bonus book club leadership guide and discussion questions. We hope you'll share this book with your friends, neighbors and colleagues and can't wait to hear what you have to say about it. Xist Publishing is a digital-first publisher. Xist Publishing creates books for the touchscreen generation and is dedicated to helping everyone develop a lifetime love of reading, no matter what form it takes

One of Ours

Presents five hundred-one critical reading questions to prepare for the SAT I and other tests and includes skill builders on different subject matter such as U.S. history and politics, arts and humanities, health and medicine, literature and music, sports, science, and social studies.

501 Critical Reading Questions

DigiCat Publishing presents to you this special edition of "History of Atchison County, Kansas" by Sheffield Ingalls. DigiCat Publishing considers every written word to be a legacy of humankind. Every DigiCat book has been carefully reproduced for republishing in a new modern format. The books are available in print, as well as ebooks. DigiCat hopes you will treat this work with the acknowledgment and passion it deserves as a classic of world literature.

Children's Books in Print

"Harsha Walia has played a central role in building some of North America's most innovative, diverse, and effective new movements. That this brilliant organizer and theorist has found time to share her wisdom in this book is a tremendous gift to us all."—Naomi Klein, author of *The Shock Doctrine*

Undoing Border Imperialism combines academic discourse, lived experiences of displacement, and movement-based practices into an exciting new book. By reformulating immigrant rights movements within a transnational analysis of capitalism, labor exploitation, settler colonialism, state building, and racialized empire, it provides the alternative conceptual frameworks of border imperialism and decolonization. Drawing on the author's experiences in *No One Is Illegal*, this work offers relevant insights for all social movement organizers on effective strategies to overcome the barriers and borders within movements in order to cultivate fierce, loving, and sustainable communities of resistance striving toward liberation. The author grounds the book in collective vision, with short contributions from over twenty organizers and writers from across North America. Harsha Walia is a South Asian activist, writer, and popular educator rooted in emancipatory movements and communities for over a decade. Praise for *Undoing Border Imperialism*: "Border imperialism is an apt conceptualization for capturing the politics of massive displacement due to capitalist neoglobalization. Within the wealthy countries, Canada's *No One Is Illegal* is one of the most effective organizations of migrants and allies. Walia is an outstanding organizer who has done a lot of thinking and can write—not a common combination. Besides being brilliantly conceived and presented, this book is the first extended work on immigration that refuses to make First Nations sovereignty invisible."—Roxanne Dunbar Ortiz, author of *Indians of the Americas* and *Blood on the Border*

"Harsha Walia's *Undoing Border Imperialism* demonstrates that geography has certainly not ended, and nor has the urge for people to stretch out our arms across borders to create our communities. One of the most rewarding things about this book is its capaciousness—astute insights that emerge out of careful organizing linked to the voices of a generation of strugglers, trying to find their own analysis to build their own movements to make this world our own. This is both a manual and a memoir, a guide to the world and a guide to the organizer's heart."—Vijay Prashad, author of *The Darker Nations: A People's History of the Third World*

"This book belongs in every wannabe revolutionary's war backpack. I addictively jumped all over its contents: a radical mixtape of ancestral wisdoms to present-day grounded organizers theorizing about their own experiences. A must for me is Walia's decision to infuse this volume's fight against border imperialism, white supremacy, and empire with the vulnerability of her own personal narrative. This book is a breath of fresh air and offers an urgently needed movement-based praxis. *Undoing Border Imperialism* is too hot to be sitting on bookshelves; it will help make the revolution."—Ashanti Alston, Black Panther elder and former political prisoner

History of Atchison County, Kansas

A classic of reportage, *Oranges* was first conceived as a short magazine article about oranges and orange juice, but the author kept encountering so much irresistible information that he eventually found that he had in fact written a book. It contains sketches of orange growers, orange botanists, orange pickers, orange packers, early settlers on Florida's Indian River, the first orange barons, modern concentrate makers, and a fascinating profile of Ben Hill Griffin of Frostproof, Florida who may be the last of the individual orange barons. McPhee's astonishing book has an almost narrative progression, is immensely readable, and is frequently amusing. Louis XIV hung tapestries of oranges in the halls of Versailles, because oranges and orange trees were the symbols of his nature and his reign. This book, in a sense, is a tapestry of oranges, too—with elements in it that range from the great orangeries

of European monarchs to a custom of people in the modern Caribbean who split oranges and clean floors with them, one half in each hand.

Geographic History of Queensland

Anagram Solver is the essential guide to cracking all types of quiz and crossword featuring anagrams. Containing over 200,000 words and phrases, Anagram Solver includes plural noun forms, palindromes, idioms, first names and all parts of speech. Anagrams are grouped by the number of letters they contain with the letters set out in alphabetical order so that once the letters of an anagram are arranged alphabetically, finding the solution is as easy as locating the word in a dictionary.

Undoing Border Imperialism

"Lis Hartel became paralyzed after contracting polio in 1944. Her dreams of riding horses and competing in the sport of dressage were shattered. After months in the hospital, doctors told her she'd never ride again. Lis tried anyway. How do you stay on a horse without using your legs? How do you give the subtle cues needed in dressage with limited mobility? With hard work--and an unlikely horse named Jubilee. After years of training together and creating a new way of communicating, Lis and Jubilee danced into the competition ring, and eventually all the way to the Olympics. Lis Hartel was the first woman with a disability ever to win an Olympic medal, and the first woman to stand equally beside men on the Olympic winners' podium in any sport."--

Oranges

From the celebrated creator of Red and Lulu comes the story of a brave little doe who meets Santa and changes Christmas forever. Dasher is an adventurous young reindeer with a wish in her heart. She spends her days with her family under the hot sun in a traveling circus, but she longs for a different life — one where there is snow beneath her hooves and the North Star above her head. One day, when the opportunity arises, Dasher seizes her destiny and takes off in pursuit of the life she wants to live. It's not long before she meets a nice man in a red suit with a horse-drawn sleigh — a man named Santa. And soon, with the help of a powerful Christmas wish, nothing will be the same.

Anagram Solver

Examining context-specific conditions in which girls live, learn, work, play, and organize deepens the understanding of place-making practices of girls and young women worldwide. Focusing on place across health, literary and historical studies, art history, communications, media studies, sociology, and education allows for investigations of how girlhood is positioned in relation to interdisciplinary and transnational research methodologies, media environments, geographic locations, history, and social spaces. This book offers a comprehensive reading on how girlhood scholars construct and deploy research frameworks that directly engage girls in the research process.

Jubilee

A comprehensive collection of tales and fairy stories edited by the American essayist, editor, critic, and lecturer. American culture is indebted to him for helping to spread, by his lectures as well as his writings, a love of good reading in the United States.

One Thousand Years of Hubbard History, 866 to 1895

Enter into the daily lives of children in the many countries of modern Africa. Countering stereotypes, Africa Is Not a Country celebrates the extraordinary diversity of this vibrant continent. This edition includes updates to the text, statistics, and illustrations to reflect Africa in the 2020s. "A lovely book about Africa that gets the issue of its enormous diversity right." —Barbara Brown, Director, Africa in our Schools and Community Program, African Studies Center, Boston University "A book every school must have as we emerge into the global village. Gives good insights into Africa's many cultures, with a balance of the contemporary and traditional that is the way of life now." —Oscar Mokeme, Director, Museum of African Tribal Art, Portland, Maine

Dasher

A certificate for ONE FREE NIGHT on your next visit to any inn listed in this guide. A value of \$50.00 to \$650.00. An easy-to-use reference to 1,550 carefully selected inns. Detailed listings of inns in all 50 states, Canada and U.S. territories. State maps locating each inn. More than 500 illustrations. Index of inns with special significance, such as inns in lighthouses, former school houses, and Safari type inns.

A History of Sanpete County

Retells the segment from Spenser's "The Faerie Queene, in which George, the Red Cross Knight, slays the dreadful dragon that has been terrorizing the countryside for years and brings peace and joy to the land.

Girlhood and the Politics of Place

"In these tales the reader can observe Anne's writing prowess grow from that of a young girl's into the observations of a perceptive, edgy, witty and compassionate woman"--Jacket flaps.

Childhood's Favorites and Fairy Stories

Though she later climbed to literary fame on the strength of her novels set in the American frontier such as *O Pioneers!* and *My Antonia*, much of Willa Cather's early fiction was set in the upper-crust enclaves of New York and New England. This collection of short stories deftly explores the inner workings of American high society in the early twentieth century, with a few forays into the vast Western plains that served as the backdrop for her later work.

Girlhood

Essays by the twentieth-century novelist record her impressions of works by Katherine Mansfield, Gustave Flaubert, and Sarah Orne Jewett

The National Gazetteer of the United States of America

This new resource from Oxford University Press introduces students to the development of Canada through the varied and rich perspectives of the Aboriginal, British, Francophone, and other groups. It also introduces students, in language they will understand, to active and responsible citizenship at the local, provincial, national and global levels. Components include Student Text, CD-ROM, Teacher's Resource, and Website.

Africa Is Not a Country, 2nd Edition

Conveniently sized yet large in scope, National Geographic Essential Visual History of World Mythology an irresistible treasure to own and to give."--BOOK JACKET.

Bed & Breakfasts and Country Inns

The essential text and classic study of Neo-Paganism Since its original publication, *Drawing Down the Moon* continues to be the only detailed history of the burgeoning but still widely misunderstood Neo-Pagan subculture. Margot Adler attended ritual gatherings and interviewed a diverse, colorful gallery of people across the United States, people who find inspiration in ancient deities, nature, myth, even science fiction. In this edition, featuring an updated resource guide of newsletters, journals, books, groups, and festivals, Margot Adler takes a fascinating and honest look at the religious experiences, beliefs, and lifestyles of modern America's Pagan groups.

Saint George and the Dragon

A glimpse of life, art, and the power of place on remote Orcas Island, as seen through the ?de lens. Volume 1 of the book series known as ?de.

Anne Frank's Tales from the Secret Annexe

Yatandou lives in a Mali village with her family and neighbors. And though she is only eight years old and would much rather play with her pet goat, she must sit with the women and pound millet kernels. To grind enough millet for one day's food, the women must pound the kernels with their pounding sticks for three hours. It is hard work, especially when one is eight years old. But as they work, the

women dream of a machine that can grind the millet and free them from their pounding sticks. But the machine will only come when the women have raised enough money to buy it. Yatandou must help raise the money, even if it means parting with something she holds dear. Through the eyes and voice of a young girl, award-winning author Gloria Whelan brings to life one village's dream of a better future. Atmospheric paintings from artist Peter Sylvada capture the landscape and spirit of this inspiring story of sacrifice and hope. To find recipes, games, interactives maps and much more for this title visit www.discovertheworldbooks.com!

Youth and the Bright Medusa

Most Australians are familiar with the concept of land ownership and understand the meaning of native title, which recognises Indigenous peoples' rights to land to which they are spiritually or culturally connected. The ownership of areas of sea and its resources is often overlooked however, despite Aboriginal and Torres Strait Islander connections with the sea being just as important as those with the land. The papers in this volume demonstrate how the concept of customary marine tenure has developed in various communities and look at some of its implications. Originating in a session of papers at a conference in 1996, the papers in this volume were originally published as Oceania Monograph 48 in 1998.

Not Under Forty

Bob Lazar is the reason Area 51 became infamous in the 1980s and his recent appearance on Joe Rogan's podcast with 7 million listeners is credited with inspiring the Storm Area 51 phenomenon. In his DREAMLAND autobiography, Lazar reveals every detail of his highly controversial story about being an insider within the world's most legendary military research base. Bob Lazar was a brilliant young physicist that found himself employed at a top secret facility in the middle of the desert outside Las Vegas. Under the watchful eye of the government elite, he is tasked with understanding an exotic propulsion system being used by an advanced aerospace vehicle he is told came from outer space. The stressful work and long, odd hours start to wear on Bob and he becomes concerned for his safety. He tells his wife and a couple close friends about what he's doing in the desert, and his employers find out and are furious. When they station goons outside his house, Bob seeks help from wealthy UFOlogist, John Lear, who encourages Bob to take his story to award-winning investigative journalist George Knapp at KLAS-TV, a CBS affiliate. To prove he's telling the truth, Bob takes a group of people out into the desert to watch a test flight of the "flying saucer." On the way home, they are stopped by the police, who notify the base, and Bob loses his job. In a series of interviews with CBS TV, Bob Lazar then blows the lid off "Area 51," blows the whistle on the effort to conceal this craft from the American people, and blows up his career as a top physicist. Bob Lazar's reports have been the subject of intense controversy for decades. He has been interviewed numerous times and his story has been corroborated by other individuals he worked with and who were present when these events happened. But until now, Bob Lazar has never told his own story, in every detail in his own words, about those exciting days in the desert outside of Las Vegas and how the world came to learn about the experiments being conducted at Area 51.

Voices and Visions

The book is current and interdisciplinary, engaging with recent developments around this topic and including perspectives from sciences, arts, and humanities. It will be a welcome contribution to studies of the Anthropocene as well as studies of research methods and practices. —Sam Mickey, University of S. Francisco Educational institutions play an instrumental role in social and political change, and are responsible for the environmental and social ethics of their institutional practices. The essays in this volume critically examine scholarly research practices in the age of the Anthropocene, and ask what accountability educators and researchers have in 'righting' their relationship to the environment. The volume further calls attention to the geographical, financial, legal and political barriers that might limit scholarly dialogue by excluding researchers from participating in traditional modes of scholarly conversation. As such, Right Research is a bold invitation to the academic community to rigorous self-reflection on what their research looks like, how it is conducted, and how it might be developed so as to increase accessibility and sustainability, and decrease carbon footprint. The volume follows a three-part structure that bridges conceptual and practical concerns: the first section challenges our assumptions about how sustainability is defined, measured and practiced; the second section showcases artist-researchers whose work engages with the impact of humans on our environment; while the third

section investigates how academic spaces can model eco-conscious behaviour. This timely volume responds to an increased demand for environmentally sustainable research, and is outstanding not only in its interdisciplinarity, but its embrace of non-traditional formats, spanning academic articles, creative acts, personal reflections and dialogues. Right Research will be a valuable resource for educators and researchers interested in developing and hybridizing their scholarly communication formats in the face of the current climate crisis.

National Geographic Essential Visual History of World Mythology

A CARP FOR KIMIKO is the story of a young girl's struggle against the strong current of tradition. Every year on Children's Day in Japan a kite in the shape of a carp is flown for each boy in the family. Kimiko is a little girl who desperately wants an orange, black, and white calico carp kite of her own to fly on this holiday. Kimiko's parents remind her that there is a holiday just for girls? Doll's Festival Day, but this does not stop Kimiko from dreaming about and wishing for her very own carp. The magical ending achieves the impossible? Kimiko gets what she longs for without breaking tradition. Katherine Roundtree's beautiful illustrations evoke the wonder and excitement of childhood, which will charm readers of all cultures.

North Dakota Place Names

When a family finds a surprising new home for an old couch, a llama becomes the happiest creature of all. The Lago family really loves their couch. It's perfect for reading, snuggling, playing, and jumping. But all good things must come to an end, and, one day, the family realizes the time has come to replace it. As they drive home with their brand-new bright-red couch, though, it gets knocked off the top of their car into a field . . . where a llama tries to make sense of this new thing. At first confused—It doesn't talk! It doesn't taste good! It doesn't budge!—the llama soon realizes how comfy the couch is and settles right in. Can the family get its furniture back—and keep llama happy, too? Leah Gilbert has written and illustrated a warm picture book that touches both the heart and the funny bone.

Encyclopedia of Vernacular Architecture of the World: Cultures and habitats

Divided into three volumes, the Encyclopedia of Vernacular Architecture is a basic resource for this new area of study. As stated in Oliver's introduction "Vernacular architecture is now the term most widely used to denote indigenous, tribal, folk, peasant, and traditional architecture." Volume 1 discusses broad concepts such as 'typologies', 'symbolism and decoration', 'environment' and 'materials and building resources'. Volumes 2 and 3 survey vernacular architecture worldwide, arranged by continent followed by region. Both secular and sacred structures are included in this encyclopedia. The structures and building methods discussed are considered within their particular social and environmental context, disregarding political divisions where appropriate. This encyclopedia also provides line drawings, photographs and some architectural plans. [BQP 2/7/02; MJR 2/12/02].

Perspectives in Vernacular Architecture, III

Based on thirty-five years of fieldwork, Glassie's Vernacular Architecture synthesizes a career of concern with traditional building. He articulates the key principles of architectural analysis, and then, centering his argument in the United States, but drawing comparative examples from many locations in Europe and Asia, he shows how architecture can be a prime resource for the one who would write a democratic and comprehensive history.

Vernacular Architecture

Constancy permits the evolution of types and characteristics to be identified, even in widely spread locations. It helps trace the origins of structures, despite later modifications. And change allows one to trace the effects of difference in environment, fashion, cultural ideas and economic influences. Change and constancy operate together, although one may or other may dominate at a particular time and place. In Vernacular Buildings Allen Noble extends the global survey contained in his earlier highly successful Traditional Buildings, to cover vernacular buildings and dwellings around the world. In a truly comprehensive account, he ranges from the fazenda of the pioneer Brazilian settlers, the Masai dwellings of Tanzania and the gothic houses of Shanghai, to Virginia Hall and Parlor houses, the thatched dwellings of the Eifel region of Germany and the three -decker houses of New York. Acknowledging the value of archival research the author is also firmly convinced of the importance of field observation and the book is extensively illustrated with photographs from his own personal collection. With a comprehensive bibliography, and incorporating new material from cultural geographers, historians, folklorists and anthropologists, Vernacular Buildings is a unique survey that will be welcomed by specialists and enthusiasts alike.

Vernacular Buildings

A comprehensive introduction to architecture and architectural history and exceptional in its approach, this book explores architecture as a current practice in relation to history and in relation to the wider context of cultures, conservation and the environment. This new edition brings in the new emphasis on sustainability, urbanism, urban regeneration and cultural identity, in order to take a holistic approach to the subject of architecture. Highly illustrated, this book enables the reader to make sense of the experience of architecture and the built environment by understanding more about the form, construction, meaning and history of the subject.

VERNACULAR ARCHITECTURE

Vernacular - or traditional - architecture encompasses most of the buildings of the world. This encyclopedia is the first to show the remarkable diversity of the buildings constructed and lived in by the people of over a thousand cultures. The first of the three volumes focuses on the theories, principles and philosophy that underpin traditional architecture. Volumes 2 and 3 consider these principles within specific cultural and societal contexts. As building traditions vary widely within some countries and extend across the political boundaries of others, the encyclopedia considers vernacular architecture within its cultural rather than its national contexts. Richly illustrated with photographs, line drawings and maps, the work is also supported by a glossary, a lexicon, and the largest bibliography on the subject ever published. This work will be an inspiration and resource for architects, anthropologists, folklorists and geographers, and important for all who help shape housing and conservation policies.

Understanding Architecture

Offering a study of vernacular architecture, this book explores the characteristics of domestic buildings in particular regions or localities, and the many social and cultural factors that have contributed to their evolution. It is useful for students and professional architects, as well as those involved with planning housing schemes.

Encyclopedia of Vernacular Architecture of the World

A governing principle of sustainable architecture is that buildings need to reflect upon and respond to the environment they are placed in. Through a series of international case studies, Vernacular Architecture and Regional Design re-examines vernacular architectural theory and looks at what gives buildings a sense of place. The book equips the professional architect with the tools to realise socially responsible principles as part of the design process. The case studies of contemporary architects' work provide real examples of how the study of vernacular architecture can contribute directly to practice in sustainable design. It considers architecture and design as integrated social processes, not just technical or aesthetic exercises, thus showing how local building traditions can become part of a wider architectural and social fabric. Vernacular Architecture and Regional Design will appeal to professionals around the world in the fields of architecture, architectural heritage and urban design. * A series of international case studies demonstrates the place of vernacular architecture in the design process for a wide selection of contemporary architects' work. * Offers a clear analysis of the vernacular building tradition, placing architecture in its social context. * Introduces a new, socially and environmentally inspired approach to sustainable design.

Built to Meet Needs

Based on a lifelong professional and personal interest, "Traditional Buildings" presents a unique survey of vernacular architecture across the globe. The reader is taken on a fascinating tour of traditional building around the world, which includes the loess cave homes of central China, the stilt houses on the shores of Dahomey, the housebarns of Europe and North America, the wind towers of Iran, the Bohio houses of the Arawak Indians of the Caribbean, and much more. Professor's Noble's extensive travels have allowed him to examine many of the building at close quarters and the richly illustrated text includes photographs from his personal collection. With its comprehensive and detailed bibliography, the work will be welcomed by experts and non-specialists alike.

Vernacular Architecture and Regional Design

From Native American sites in New Mexico and Arizona to the ancient earthworks of the Mississippi Valley to the most fashionable contemporary buildings of Chicago and New York, American architecture is incredibly varied. In this revolutionary interpretation, Upton examines American architecture in

relation to five themes: community, nature, technology, money, and art. 109 illustrations. 40 linecuts. Map.

Perspectives in Vernacular Architecture

Ideal for students of architectural technology, this volume of the Technologies of Architecture series covers the technologies available and the processes necessary for the conservation of existing buildings and environments. This book provides, in a single text, the tools for students to be able to evaluate such buildings, as well as an extensive understanding of the mechanisms which cause their deterioration and knowledge of the technologies available to correct their status. The ever higher standards set for buildings, especially in energy conservation contexts, demand that practitioners appreciate how the performance of existing structures can be enhanced, which is also covered. Considering the work of conservation within a holistic perspective and historical context, this book is additionally invaluable for architecture and construction students.

Traditional Buildings

This ground breaking new work draws together a cross-section of South African scholars to provide a lively and comprehensive review of the under-researched area of heritage practice following the introduction of the National Heritage Resources Act. Looking at the daily heritage debates, from naming streets to projects such as the Gateway to Robben Island, Desire Lines addresses the innovative strategies that have emerged in the practice of defining, identifying and developing heritage sites. In a unique multi-disciplinary approach, contributions are featured from a broad spectrum of fields, including the built environment and public culture and education. Showcasing work from tour operators and museum curators alongside that of university-based scholars, this book is a comprehensive and singularly authoritative volume that charts the development of new and emergent public cultures in post-apartheid South Africa through the making and unmaking of its urban spaces. This pioneering collection of essays and case studies is an indispensable guide for those working within or studying heritage practice.

Architecture in the United States

Over 160 photographs, drawings, and maps provide examples of the four traditional Ozark house types and reveal the unity of a distinctive Arkansas culture that bears identity with all hill peoples. Of importance to architects, folklorists, cultural historians, and anyone interested in the Ozarks, this fascinating examination of the Ozark house is a way toward understanding the mind of the inhabitants and their entire way of life.

Vernacular Architecture

Based on a lifelong professional and personal interest, Traditional Buildings presents a unique survey of vernacular architecture across the globe. The reader is taken on a fascinating tour of traditional building around the world, which includes the loess cave homes of central China, the stilt houses on the shores of Dahomey, the housebarns of Europe and North America, the wind towers of Iran, the Bohio houses of the Arawak indians of the Caribbean, and much more. Professor's Noble's extensive travels have allowed him to examine many of the building at close quarters and the richly illustrated text includes photographs from the his personal collection. With its comprehensive and detailed bibliography the work will be welcomed by experts and non-specialists alike.

History, Performance and Conservation

Vernacular Architecture in the Pre-Columbian Americas reveals the dynamism of the ancient past, where social relations and long-term history were created posthole by posthole, brick by brick. This collection shifts attention away from the elite and monumental architectural traditions of the region to instead investigate the creativity, subtlety and variability of common architecture and the people who built and dwelled in them. At the heart of this study of vernacular architecture is an emphasis on ordinary people and their built environments, and how these everyday spaces were pivotal in the making and meaning of social and cultural dynamics. Providing a deeper and more nuanced temporal perspective of common buildings in the Americas, the editors have deftly framed a study that highlights sociocultural diversity while at the same time facilitating broader comparative conversations around the theme of vernacular architecture. With diverse case studies covering a broad range of periods

and regions, Vernacular Architecture in the Pre-Columbian Americas is an important addition to the growing body of scholarship on the indigenous architecture of the Americas and is a key contribution to our archaeological understandings of past built environments.

Desire Lines

Although vernacular architecture scholarship has expanded beyond its core fascination with common buildings and places, its attention remains fixed on the social function of building. Consistent with this expansion of interests, *Constructing Image, Identity, and Place* includes essays on a wide variety of American building types and landscapes drawn from a broad geographic and chronological spectrum. Subjects range from examinations of the houses, hotels and churches of America's colonial and Republican elite to analyses of the humble cottages of Southern sharecroppers and mill workers, Mississippi juke joints, and the ephemeral rustic arbors and bowers erected by Civil War soldiers. Other contributors examine or reexamine the form of early synagogues in Georgia, colonial construction technologies in the Chesapeake, the appropriation and use of storefront windows by San Francisco suffragists, and the evolution of the modern factory tour. Other decidedly twentieth-century topics include the impact of the automobile on American building forms and landscapes, including parkways, drive-in movie theaters, and shopping malls. Drawn from the Vernacular Architecture Forum conferences of 1998 and 1999, these seventeen essays represent the broad range of topics and methodologies current in the field today. The volume will introduce newcomers to the breadth and depth of vernacular architecture while also bringing established scholars up to date on the field's continued growth and maturation. The Editors: Alison K. Hoagland is associate professor of history and historic preservation at Michigan Technological University. Kenneth A. Breisch is director of Programs in Historic Preservation at the University of Southern California. He is author of *Henry Hobson Richardson and the Small Public Library in America*. The Contributors: Shannon Bell, Robert W. Blythe, Timothy Davis, Stephanie Dyer, Willie Graham, Kathleen LaFrank, William Littmann, Carl Lounsbury, Al Luckenbach, Sherri M. Marsh, Maurie McInnis, Steven H. Moffson, Jason D. Moser, Jennifer Nardone, Martin C. Perdue, Mark Reinberger, Andrew K. Sandoval-Strausz, Jessica Sewell, Donna Ware, and Camille Wells.

Ozark Vernacular Houses

In thirteen well-illustrated essays, this book tells the story of the building of the American West and of the edifices that are as much a part of the history of the region as the people who built them. Organised in sequence according to central themes in the history of the West, the collection begins with two essays that describe the cultural connections between East and West during the late nineteenth century. The next two essays place American building forms in their western context, emphasising the distinctive regional qualities of the buildings and the lifeways they represent. The third pair of essays highlights the fact that in settling the West, Americans had to brush aside existing populations, often with serious ramifications for the displaced. Other essays focus on various ethnic groups and women and the exploitation of resources as a significant facet of western architectural development -- and the effect of such exploitation on the western landscape.

Vernacular Architecture in the 21st Century

It was long felt that an English edition on the architecture of Akrotiri, dealing not only with the building technology, but also with issues of typology, form, and function, would be welcomed. The present book is, thus, an attempt to provide the reader with an overall picture of the architecture of Akrotiri, including an outline of its town plan, a description of the individual houses, and a discussion of its relationship with Crete and its neighbors in the Eastern Mediterranean. The book is based on the author's personal observations and experience obtained over a fifteen year period (1977-1992) of work at the site as the architect of the Akrotiri excavation. This book is confined to the last phase of habitation and the uniquely preserved houses that are seen today.

Traditional Buildings

From workers' cottages in Milwaukee's Polish community to Alaskan homesteads during the Great Depression, from early American retail stores to nineteenth-century prisons, different types of buildings reflect the diverse responses of people to their architectural needs. Through inquiry into such topics, the contributors to this volume examine a variety of building forms as they assess the current state of vernacular architecture studies. Because scholars in vernacular architecture have come to consider thematic questions rather than simply to look at types of structures, the essays chosen for this

collection address issues of how people, power, and places intersect. They demonstrate not only the inextricable links between people and place but also show how power relationships are defined by spatial organization--and how this use of space has helped define the distinction between private and public. The essays examine a wide range of forms, from camp meetings to trolley cottages, to consider what buildings might reveal about their makers, users, and even interpreters. One article, for example, will give readers a new appreciation of balloon framing in Midwest farmhouses, refuting popular notions that it was a single individual's invention. Another considers servants' quarters in Apartheid-era South Africa to explore the relationship between black domestic workers and their white employers. Drawn from the Vernacular Architecture Forum conferences of 1996 and 1997, these thirteen essays make significant contributions to the study of design and building processes and the adaptation of architectural forms and spaces over time. They help redefine the scope of "vernacular" and provide new models for better understanding the built environment. The Editors: Sally McMurry is professor of history at Pennsylvania State University and author of *Families and Farmhouses in Nineteenth-Century America*. Annmarie Adams is associate professor of architecture at McGill University and author of *Architecture in the Family Way: Doctors, Houses, and Women, 1870-1900*.

Vernacular architecture

Islamic architecture has enriched design with a wide variety of structural shapes, including among others, unique arches, a wide variety of vaults and domes which allow for new forms to be developed. The influence that these structural forms have in non-Islamic countries was one of the themes of the 3rd International Conference on Islamic Heritage Architecture and Art, at which the included papers were presented. There is much to learn from past experiences to arrive at solutions which are environmentally sound and sustainable in the long term. As conventional energy resources become scarce, the Islamic design heritage can offer invaluable lessons on how to deal in an efficient manner with cases of hard and extreme environments. Traditional architecture and urban environments in most Islamic countries are now being eroded by overemphasis on a global type of architecture and city planning. As a consequence, many regions are losing their identity. It will become increasingly important for new developments to take light of what the classical Islamic urban designs and architectures have to offer modern society. An equally important aspect covered is the analysis of the materials employed and the types of structural elements, particularly those unique to Islamic architecture. Preserving this heritage requires the development of appropriate conservation techniques in response to the different materials used and the ways structural forms work, including under extreme conditions, such as earthquakes. These papers deal with the design of many types of buildings in Islamic countries, including not only the better known public buildings like mosques, mausolea, citadels and forts, but also houses and gardens, engineering works such as bridges and dams, irrigation systems and many others which have also had a profound impact on society.

Perspectives in Vernacular Architecture

Based on a lifelong professional and personal interest, "Traditional Buildings" presents a unique survey of vernacular architecture across the globe. The reader is taken on a fascinating tour of traditional building around the world, which includes the loess cave homes of central China, the stilt houses on the shores of Dahomey, the housebarns of Europe and North America, the wind towers of Iran, the Bohio houses of the Arawak Indians of the Caribbean, and much more. Professor's Noble's extensive travels have allowed him to examine many of the building at close quarters and the richly illustrated text includes photographs from his personal collection. With its comprehensive and detailed bibliography, the work will be welcomed by experts and non-specialists alike.

Vernacular Architecture in the Pre-Columbian Americas

This book explores how the concept of 'region' has evolved over time and shaped architectural culture and practice. It questions what the words 'region' and 'regional' mean for architecture, cities and landscapes past and present, and speculates on the forms they might take in the future. Region is explored in many thematic guises: as a real geographical site of evolving socio-economic activity; as a mythical locus of enduring value; as a gatekeeper of indigenous crafts and vernacular techniques; as a site of architectural and artistic imagination; as a repository of contested, conflicted and mobile identities. The contributing chapters take these themes from the theoretical and literary page through to architectural and urban practice, and from the scale of the domestic hearth through to the ocean archipelago and international law, enriching the long-standing trope of viewing architectural regionalism

purely as a matter of style. Curated into four key thematic areas – Theorised Regions, Contested Regions, Heritage Regions and Future Regions – the book incorporates the values, concerns and approaches of a truly diverse international community of scholars, curators and practitioners, as well as the design work of international students tasked to explore what region means to them.

Constructing Image, Identity, and Place

The Grove Encyclopedia of Islamic Art and Architecture is the most comprehensive reference work in this complex and diverse area of art history. Built on the acclaimed scholarship of the Grove Dictionary of Art, this work offers over 1,600 up-to-date entries on Islamic art and architecture ranging from the Middle East to Central and South Asia, Africa, and Europe and spans over a thousand years of history. Recent changes in Islamic art in areas such as Afghanistan, Iran, and Iraq are elucidated here by distinguished scholars. Entries provide in-depth art historical and cultural information about dynasties, art forms, artists, architecture, rulers, monuments, archaeological sites and stylistic developments. In addition, over 500 illustrations of sculpture, mosaic, painting, ceramics, architecture, metalwork and calligraphy illuminate the rich artistic tradition of the Islamic world. With the fundamental understanding that Islamic art is not limited to a particular region, or to a defined period of time, The Grove Encyclopedia of Islamic Art and Architecture offers pathways into Islamic culture through its art.

Images of an American Land

Jefferson County, New York, has one of the richest concentrations of stone houses in America. As many as 500 stone houses, churches, and commercial buildings were built there before 1860. Some of the buildings are beautiful mansions built by early entrepreneurs; others are small vernacular farmhouses. Some are clustered together; others dot the countryside near stone outcroppings. Embedded in the fabric of each building are the stories of its location, its maker, and its inhabitants over time. Lavishly illustrated with almost 300 photographs, this volume highlights eighty-five stone houses in the region. The editors explore both the beauty and permanence of the stonework and the courage and ambition of the early dwellers. They detail the ways in which skilled masons utilized local limestone and sandstone, crafting double-faced stone walls to protect against fire and harsh winters. The book includes discussions of the geology of the region, the stone buildings that have been lost, and the preservation and care of existing structures. Stone Houses of Jefferson County provides a fascinating look at the intrinsic beauty of these buildings and the historical links they provide to our early settlement.

Illustrated Handbook of Vernacular Architecture

"Though the book is primarily about medieval towns in Britain, many parallels are drawn with contemporary towns and cities all over Europe, from Ireland to Russia and from Scandinavia to Italy. It is written in the belief that medieval urban archaeology should be a Europe-wide study, as are the fields of architecture and urban history."--BOOK JACKET.

Akrotiri Thera

Perspectives in Vernacular Architecture

Acquarossa: The painted architectural terracottas. pt. 1. Catalogue and architectural context

A comprehensive presentation of the ancient and diverse artifacts from the American Academy in Rome's collection.

Lexicon of the Greek and Roman Cities and Place Names in Antiquity, Ca. 1500 B.C. - Ca. A.D. 500

Italien - Eisenzeit - Wirtschaftsgeschichte - Bergbau.

Acquarossa

The late sixth century was a period of considerable change in Etruria; this change is traditionally seen as the adoption of superior models from Greece. In a re-alignment of agency, this book examines a wide range of Etruscan material culture - mirrors, tombs, sanctuaries, houses and cities - in order to demonstrate the importance of local concerns in the formation of Etruscan material culture. Drawing on theoretical developments, the book emphasises the deliberate nature of the smallest of changes

in material culture form, and develops the concept of surface as a unifying key to understanding the changes in the ways Etruscans represented themselves in life and death. This concept allows a uniquely holistic approach to the archaeology of Etruscan society and has the potential for other archaeological investigations. The book will interest all scholars and students of classical archaeology.

The Collection of Antiquities of the American Academy in Rome

For this paperback edition, an updated bibliographical essay discusses the latest research and discoveries in the field.

From Household Production to Workshops

This book has various aims: presenting and discussing the roof-tiles discovered at Poggio Civitate, trying to reconstruct the many roofs they once covered, and outlining the general development of roof-tiles and tiled roofs in Central Italy during the period from c. 650 to 200 BC. Moreover, it also brings the author's earlier studies of skylight-tiles and Archaic simas up to date. Five chapters present typological features of separate tile categories (Ch. I), distribution of terracottas (including the decorative ones) on various roofs (Ch. II), technical issues concerning the production of tiles, their placement on roofs and the collapse of these roofs (Ch. III), plastic and painted decoration (Ch. IV), and the conclusions that can be drawn concerning the chronology of the Poggio Civitate roofs together with a sketch of the introduction and early diffusion of tiled roofs in Central Italy (Ch. V). In one of the appendices letters and signs found on more than three hundred Poggio Civitate tiles are presented and discussed in detail.

Myth and Symbol I

Temples are the most prestigious buildings in the urban landscape of ancient Italy, emerging within a network of centres of the then-known Mediterranean world. Notwithstanding the fragmentary condition of the buildings' remains, these monuments – and especially their richly decorated roofs – are crucial sources of information on the constitution of political, social and craft identities, acting as agents in displaying the meaning of images. The subject of this volume is thematic and includes material from the Eastern Mediterranean (including Greece and Turkey). Contributors discuss the network between patron elites and specialized craft communities that were responsible for the sophisticated terracotta decoration of temples in Italy between 600 and 100 BC, focusing on the mobility of craft people and craft traditions and techniques, asking how images, iconographies, practices and materials can be used to explain the organization of ancient production, distribution and consumption. Special attention has been given to relations with the Eastern Mediterranean (Greece and Anatolia). Investigating craft communities, workshop organizations and networks has never been thoroughly undertaken for this period and region, nor for this exceptionally rich category of materials, or for the craftspeople producing the architectural terracottas. Papers in this volume aim to improve our understanding of roof production and construction in this period, to reveal relationships between main production centres, and to study the possible influences of immigrant craftspeople.

The Archaeology of Etruscan Society

This is a book about identity, about how the ancient Greeks saw themselves and others, and what this tells us in turn about Greek mentality and culture. It looks at voyagers and explorers, at travels in reality and in the mind, and shows what these reveal at key points in Greek history from the creation of Homer's monumental epic around 700 BC to the high Roman imperial period some eight hundred years later. The author takes us first to the journeyings of Odysseus, considering the returning warrior's concerns of witness and memory and finding in the epic the themes that will preoccupy the Greeks over the centuries. He then travels to Egypt with Herodotus, to the problematically 'barbarian' world of Persia and the Near East with Alexander the Great, to old Greece with the fictional Scythian Anacharsis, to the new Greek world under Roman domination with Polybius, Dionysius of Halicarnassos and Strabo, and finally to the Asia Minor of the first-century AD sage Apollonius of Tyana in the company of Philostratos. He examines both what their representations of these lands meant in their own day and how they were received in later times. He looks in particular at the importance of the invention of the barbarian and the "other", first in the theoretical process of describing and accounting for the outside world, and secondly at the justification it gives for the practical reshaping of alien space through conquest and assimilation - themes which have had, as he points out, a more recent resonance. Francois Hartog

draws widely on ancient and modern authors to create a cultural history of ancient Greece that sheds a new and revealing light on the Greeks and the history of humankind more generally.

Early Rome

Brickstamps of Constantinople is the first major catalogue and analysis of stamped bricks manufactured in Constantinople and its vicinity in the Late Roman and Early Byzantine periods. The text discusses the organization of the brickmaking industry, the purpose of brickstamping, and establishes for the first time a chronology for the brickstamps. On the basis of the conclusions, dates are proposed for previously undated buildings in the city, and revised dates are given for other monuments.

Etruscan Dress

The present book is the first complete edition of the 24 Greek and Latin inscriptions in the Collection of Classical Antiquities and the Victoria Museum of Uppsala University. It contains an introduction that discusses the various types of inscriptions represented in the collections, their probable provenance and their history as part of the Uppsala collections. After the introduction follows an actual edition, which consists of a new reading of text of each inscription, followed (where possible) by an English translation, a summary of its physical and palaeographical features, and a line-by-line commentary.

Roof-tiles and Tile-roofs at Poggio Civitate (Murlo)

Axel Boethius's account begins about 1400 B.C. with the primitive villages of the Italic tribes. The scene was transformed by the arrival of the Greeks and by the Etruscans who by about 600 had Rome and Central Italy under their cultural spell.

Deliciae Fictiles V. Networks and Workshops

The concept of a socially constructed space of human activity in areas of everyday actions, as initially proposed in the field of anthropology by Tim Ingold, has actually been much more applied in archaeology. In this wide-ranging collection of 13 papers, including a re-assessment by Ingold himself, contributors show why it has been so influential, with papers ranging from the study of Mesolithic to historic and contemporary archaeology, revisiting different research themes, such as Ingold's own Lapland study, and the development of landscape archaeology. A series of case studies demonstrates the value and strength of the taskscape concept applied to a variety of contexts and scales across wide geographical and temporal situations. While exploring new frontiers, the papers contrast British, Nordic and Mediterranean archaeologies to showcase the study of material culture and landscape and conclude with an assessment of the concept of taskscape and its further developments.

The Etruscans

Hellenistic Bookhands dokumentiert die Entwicklung der für antike griechische Buchrollen verwendeten Schrift. An 94 griechischen Papyrustexten aus Ägypten und aus Herculaneum werden die stilistischen Eigenheiten der verschiedenen Schrifttypen herausgearbeitet, gleichzeitig wird ihre chronologische Abfolge erstmals auf eine verlässliche Grundlage gestellt. Das Handbuch ist gedacht als ein Werkzeug zur Datierung und Klassifizierung der auf Papyrus erhaltenen Reste antiker griechischer Bücher.

Roman Brick and Tile

Surely the ancient Greeks would have been baffled to see what we consider their "mythology." Here, Claude Calame mounts a powerful critique of modern-day misconceptions on this front and the lax methodology that has allowed them to prevail. He argues that the Greeks viewed their abundance of narratives not as a single mythology but as an "archaeology." They speculated symbolically on key historical events so that a community of believing citizens could access them efficiently, through ritual means. Central to the book is Calame's rigorous and fruitful analysis of various accounts of the foundation of that most "mythical" of the Greek colonies--Cyrene, in eastern Libya. Calame opens with a magisterial historical survey demonstrating today's misapplication of the terms "myth" and "mythology." Next, he examines the Greeks' symbolic discourse to show that these modern concepts arose much later than commonly believed. Having established this interpretive framework, Calame undertakes a comparative analysis of six accounts of Cyrene's foundation: three by Pindar and one each by Herodotus (in two different versions), Callimachus, and Apollonius of Rhodes. We see how

the underlying narrative was shaped in each into a poetically sophisticated, distinctive form by the respective medium, a particular poetical genre, and the specific socio-historical circumstances. Calame concludes by arguing in favor of the Greeks' symbolic approach to the past and by examining the relation of mythos to poetry and music.

The Norwegian Institute at Athens

An explanation of Greek theater as seen through its many depictions in classical art

Troy and Its Remains

Interpretations of Greek Mythology, first published in 1987, builds on the innovative work of Walter Burkert and the 'Paris school' of Jean-Pierre Vernant, and represents a renewal of interpretation of Greek mythology. The contributors to this volume present a variety of approaches to the Greek myths, all of which eschew a monolithic or exclusively structuralist hermeneutic method. Specifically, the notion that mythology can simply be read as a primitive mode of narrative history is rejected, with emphasis instead being placed on the relationships between mythology and history, ritual and political genealogy. The essays concentrate on some of the best known characters and themes – Oedipus, Orpheus, Narcissus – reflecting the complexity and fascination of the Greek imagination. The volume will long remain an indispensable tool for the study of Greek mythology, and it is of great interest to anyone interested in the development of Greek culture and civilisation and the nature of myth.

Memories of Odysseus

"Business Managers in Ancient Rome deals with the law of indirect agency in the classical period and explores the technical aspects and historical development of a set of praetorian remedies (actiones adiecticiae qualitatis), their role in the economy and their incidence on the society." "By bringing together various kinds of evidence (legal, literary, epigraphical, archaeological, numismatic, comparative, and accessorially, papyrological), this study attempts to sketch the social and economic history of an important chapter of the Roman law of obligations."--BOOK JACKET. Arte militare e architettura nuragica

A catalogue of the largest known collection of brick stamps outside Italy

Brickstamps of Constantinople

A collection of 27 papers presented at EMAC's 8th European Meeting on Ancient Ceramics, held at Lyon in 2005. The contributors discuss a range of subjects, including methodological developments, dating, ceramics as containers and as building materials, conservation and restoration, technical aspects, and production, diffusion and commercialization.

Greek and Latin Inscriptions in the Collections of Uppsala University

Forty-three short papers, presented at the 5th European Meeting on Ancient Ceramics held in Athens in 1999, reflect on recent archaeological and scientific developments in the analysis of ceramics, with emphasis on pottery from the Aegean, Italy, Iberia and Central Europe.

Fortification Towers and Masonry Techniques in the Hegemony of Syracuse, 405-211 B.C.

This volume is a contribution to the study of culturally bound emotions and emotional response in ancient Rome. Approaches to the study of ancient emotions and how they were culturally specific, appreciated and understood have recently come to the centre of attention, but not so much in the visual as in the literary culture.
