This Is How Much Water It Retains or the Plant's Iq or Something like that You'Re Measuring some Trait and You'Re Asking Does It Differ as a Function of Which Version of this Gene You Have So You Do Your Study and this Is What You See and You Say Whoa Okay I Went and Looked at this Plant in a Rainforest and We Identify the Genetic Versions of It and Look Very Different the Gene That You Have There Knowing that Gives You a Lot of Predictive Power over What Level of Whatever It Is that You'Re Measuring this Plant Is that's Great so You'Re Going To Get Your Doctorate out of that and You Get some Publications and It's Great and You Finally Stopped Being a Student and It's Terrific And What You Wind Up Seeing Here Is if You Can either Know this or the Environment You Want To Know What the Environment Is the Variability Oh Plant Iq Could Come In at 98 a Hundred a Hundred and Two Eight Ten and Twelve the Far More of the Variability in those Six Numbers Is Explained by What Environment It's Going On in Rather than the Genetic Difference That's What Heritability Is Telling You and in the Study like this It Would Tell You that the Heritability Number Is Actually Quite Low because the Amount of Variation due to this Is Far Less Explained by the Gene Type than whether It's the Amazon or the Gobi Desert

And What Ultimately One Has To Argue Is that It Is Impossible To Ever Say What a Gene Does You Can Only Say What a Gene Does in the Environments Which to Date It Has Been Studied in Okay Let's See that Expanding Even More because You'Ve Got this Ok Let's Jump Ahead Ok so this Is Showing You Now Just How Totally Nutty and Counterintuitive Heritability Terms Actually Are You Ask a Question What's the Heritability of Number of Fingers on Your Hand no Genes Have To Do with the Fact that We Got Five Fingers Instead of Flippers or some Such Thing Genes Have Huge Amounts To Do with It You'Re Not Asking about the Average Number Figure Fingers You'Re Asking about the Variability

This Is What It Would Look like with Zero Percent Heritability There's no Difference at all of the Variation Explained by Gene Variation It's all Environmental So Now We Have a Version That Forces Us To Put in the Same Phrase We Heard about before this Is What Your Data Look like Now and You Now Ask the Question Well What Does Being an Environment What Does Your Environment Have To Do with Your Plant Iq and the Answer Is It Depends on Which Version of the Gene You Have and Now You Ask What Does Having a Certain Version of the Gene Have To Do with Your Plant Iq
