AF Manual

When Adam Peter Lanza, just 20 years old, burst into the Sandy Hook Elementary School in Newtown Connecticut, armed to the teeth and wearing black battle fatigues, and shot 20 small children and 6 of their teachers, he created a hole so big in the heart of their grieving parents and relatives that it can never be forgotten or healed. What caused this young man to commit this unspeakably horrible crime? Pamela Lillian Valemont, the world's first forensic numerological criminal profiler, compiles a chart for Adam Lanza and compares it with some of the world's most heinous mass murderers, like Adolf Hitler, and the youthful Boston marathon bombers, brothers Dzhokhar and Tamerlan Tsarnaev. She also looks at the Preppers, the band of people who included mother of Adam Lanza, Nancy. This ultra-right-wing group of fanatics believe that they must prepare for the end times, when economic ruin comes and governments cannot be either trusted or relied upon to protect them from attackers and invasion of their country.

Ready and prepared to place his body between his employer and a bullet, the bodyguard must be able to blend into the milieu around his charge, yet be ready to spring into action instantly to counter an attack. Based on techniques of the U.S. Secret Service, U.S. State Department Security, the Special Air Service, the Royal Corps of Military Police, the Metropolitan Police, the KGB and its successor the FSB, France's GSPR, and other protective units around the world, The Bodyguard Manual details the steps a protective team takes to prevent attack as well as the tactics which are employed when it is necessary to counter an attack in progress. From security aboard Concorde, the Orient Express, or the Queen Elizabeth 2, to protecting a military general officer in combat, The Bodyguard Manual allows the reader to "stand post" with the professional bodyguard.
