Mines and Mineral Resources of Kern County, California

Mining historian Kerby Jackson introduces us to a classic mining work in this important re-issue of the California Bureau of Mines publication "The Mines and Mineral Resources of Kern County". Originally published in 1962, this important publication on California Mining has not been available for nearly fifty years. This publication includes important information on mines and mining in Kern County, California, as well insights into the mineralization and geology of this important mining area in California. Included are extensive details on hardrock and placer gold mines and prospects, including charts showing the locations of these historic mines. Note: This edition is a perfect facsimile of the original edition and is not set in a modern typeface. As such, some type characters and images might suffer from slight imperfections or minor shadows in the page background.

Mines of Kern County California

Mining historian Kerby Jackson introduces us to a classic mining work in this important re-issue of "Register of Mines and Minerals of Kern County, California." Unavailable since the turn of the century, this publication offers rare insights into the famous mining areas of Kern County, California. Included in this small booklet are facts about numerous gold and other types of mines in Kern County. Included are basic facts about lode and placer mines such as their location, geology, ore characteristics, ownership details and more. This small booklet will be found to be of great value in the field for prospectors, treasure hunters, historians and explorers. Note: This edition is a perfect facsimile of the original edition and is not set in a modern typeface. As such, some type characters and images might suffer from slight imperfections or minor shadows in the page background.

Mining historian Kerby Jackson introduces us to a classic mining work in this important re-issue of "Mines and Mineral Resources of Siskiyou County California." Unavailable since 1931, this publication offers rare insights into the famous mining areas of Siskiyou County, California. Included in this small booklet are facts about numerous gold and other types of mines in Siskiyou County. Included are descriptions of each mine, their locations, how they were established and how they operated. Note: This edition is a perfect facsimile of the original edition and is not set in a modern typeface. As such, some type characters and images might suffer from slight imperfections or minor shadows in the page background.

Baltic Mine Project, Kern County

Report for 1917/18 consists of three monographs by E. MacBoyle issued separately as Mines and mineral resources of Nevada County. Mines and mineral resources of Plumas County. Mines and mineral resources of Sierra County.

Register of Mines and Minerals

Some of the richest gold strikes in California history were found in the areas of Randsburg and Johannesburg, located in the Mojave Desert section of Kern County. The desert is a graveyard of abandoned mines, shafts, pits and tailing dumps. Fortunately, some of these historic old mines are still standing, providing us with a rare and valuable glimpse into the world of those who sought to uncover the hidden treasure of gold in the earth. Few got rich and many died paupers in the search for the shiny yellow mineral, yet the burning fever to hit that big strike kept luring men and women to California from all points of the globe. It was a time of "all or nothing." The King Solomon Mine is one of those relics of another era still standing, rising from the mountain and casting its long shadow over the debris and abandoned junk cluttering the ground around it. It sits quiet, a sentinel in the desert, waiting in hope for the day when it will come to life again for modern-day gold hunters.
