Livable Communities, Sustainable Regions How Transportation Investments Shape Our Development - Livable Communities, Sustainable Regions How Transportation Investments Shape Our Development by PlanningWebcast 354 views 11 years ago 1 hour, 31 minutes - 2011-06-03 Presenters: Hannah Twaddell and Chris Sinclair THIS WEBCAST AVAILABLE FOR VIEWING ONLY, NOT ...

Intro

Livable Communities, Sustainable Regions How Transportation Investments Shape Our Development Patterns

A Few Questions

Livability Principles

Sustainability Principles Meet the needs of the present generation without compromising the ability of future generations to meet their needs.

While transportation agencies have historically incorporated livability and sustainability elements into transportation plans, there is no standardized practice for doing so.

Livability in transportation is about using the quality, location, and type of transportation facilities and services available to help achieve broader community goals such as access to good jobs, affordable housing, quality schools, and safe streets.

Sustainable transportation provides exceptional mobility and access to meet development needs without compromising the quality of life of future generations.

How to Become a Sustainable Architect | Eco-Friendly Design - How to Become a Sustainable Architect | Eco-Friendly Design by Going Green 36,759 views 3 years ago 4 minutes, 6 seconds - In this video we visit **sustainable**, architecture from around the world to see what architects are doing to **make**, their buildings more ...

the role that Architects will play in solving the climate crisis.

Now the climate crisis is huge and requires people from all professions to do their part.

Those in the construction industry play a significant role in dealing with the environmental crisis as buildings are responsible for 40% of global CO2 emissions.

To summarise what I found from my travels. I believe there are 3 distinct ways in which Architects can help save the planet.

Firstly the most exciting way an Architect can help the planet

an example of this is the Cloud Forest in Singapore which offers environmental education to the visitors.

The second way in which an Architect can help save the planet is to deal with the existing building stock

We currently have a vast amount of buildings in our cities which have been poorly designed

It is not possible to simply demolish these buildings as this would require an awful lot of energy and resources.

Eco-swaraj - Radical Ecological Democracy: Towards a Sustainable, Equitable World - Eco-swaraj - Radical Ecological Democracy: Towards a Sustainable, Equitable World by Ashish Kothari 398 views 3 years ago 1 hour, 11 minutes - Radical alternative initiatives, some from ancient times, some emerging recently, are showing pathways out of the multiple global ...
